

COBRA

OWNERS MANUAL

by Shawn Bell

For Brandon;

the world is a much better place because of you.

Acknowledgements

The list of people who have helped, educated and guided me is long, and more than likely I'd forget someone if I were to attempt to name all of them. But if I don't name certain individuals who stand out head and shoulders above the rest I would be doing everyone a disservice.

To Carroll Shelby, thank you for creating the fastest, scariest, meanest, loudest kick-ass car in the world...And your chili isn't half bad, either.

To Curt Scott, thank you for improving the replica industry. Without your unflagging dedication we wouldn't be enjoying this hobby nearly as much as we do.

To Dave Radtke, thank you for putting up with me and my unending stream of questions. Your knowledge of the Cobra replica industry is unparalleled, your tolerance is incredible, and you've got some really comfy seats over there at House of Cobras.

This book is dedicated to Cobra enthusiasts everywhere.

Your pal,
Meat.

This marks Release Two of the Cobra Owners Manual by Shawn Bell. As such, there are some significant changes to this version.

First off, it's on the internet and (obviously) you can download it for free. While it may be free, it's still Copyright by Shawn Bell, this version Copyright (c) 2001 by Shawn Bell.

Also notable is that it is significantly larger than the original book (which fit neatly into a handy door pocket or glove compartment), and that the pages appear to be printing off-center to the right about 1/2 an inch. The reasoning behind this is that once you have this book printed out you can take the pages down to your local 3-hole-punch outlet and have this book set up for a standard 3-hole notebook. You can also velobind or spiral bind it, and you won't be cutting text off the edges of the page. See? I'm always thinking about you!

Something else that has recently been discovered is that the cover page has been known to print funny on laser printers and other easily-confused machines (the Hewlett Packard DeskJet color printer series doesn't have this problem...guess which printer I use?). If you want a nice, clean cover page in glorious full color I would recommend that you take the file down to your local Kinkos or other full-service copy center and have them print the front page in color.

As of right now, that is the only known glitch. If you come across any other ones, please feel free to let me know and I'll correct them.

Your pal,
Meat.
