

# Android wireless setup user guide

June 2011

---

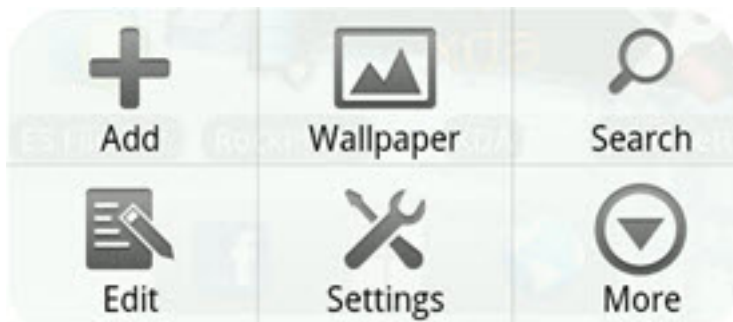

## 1 Android wireless setup user guide

This guide describes how to connect an Android device to the RMIT wireless network (RMIT-University).

**Note:** This user guide is not device specific

Step 1. Click the 'App Drawer' icon , or

Step 1A. Click the 'Menu' button

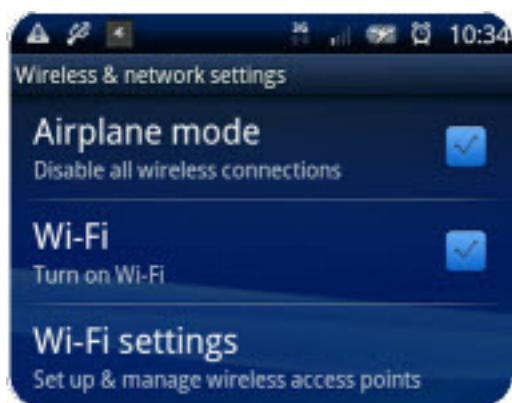

Step 2. Select 'Settings' icon

The **Settings** screen displays

Step 3. Select 'Wireless & networks'

The **Wireless & network settings** screen displays

Step 4. Select '*Wifi*' Settings

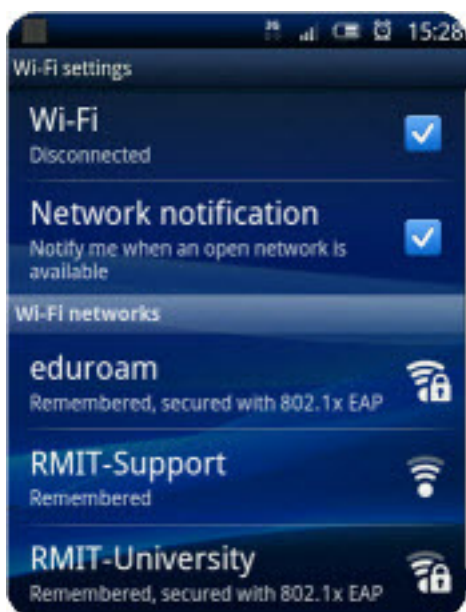

The **Wi-Fi** screen displays

Step 5. Select '*Turn on Wifi*' check box

Step 6. Select '*RMIT-University*' from the available list of networks

**Note:** You may need to scan for the networks again

The **Connect to RMIT-University** screen displays

Complete the following selections:

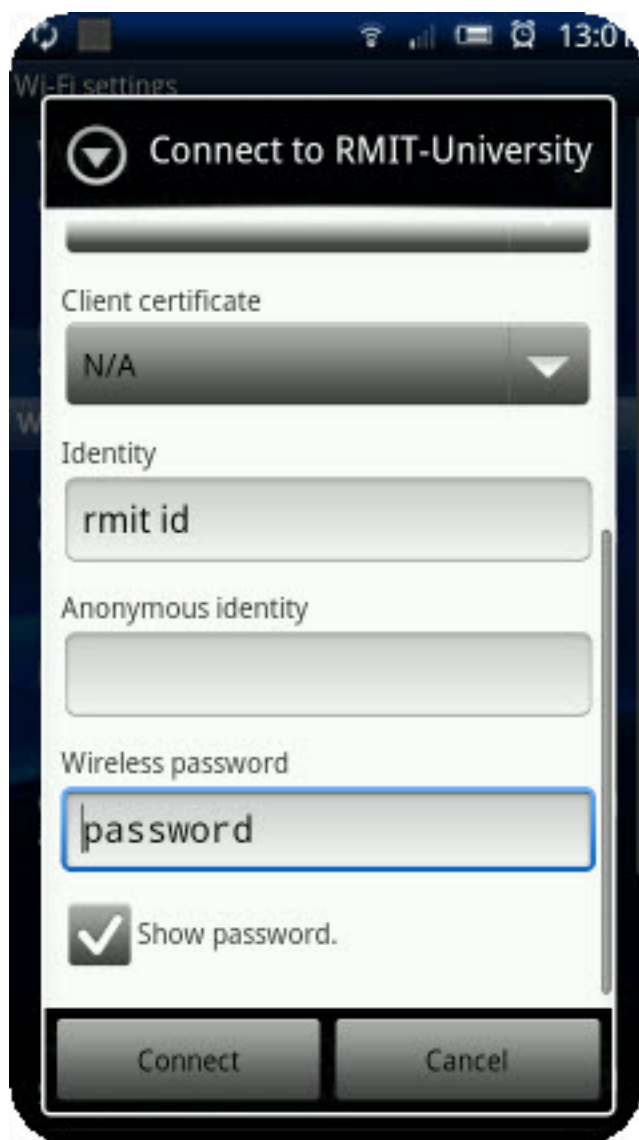

Step 7. Click '*EAP method*'

Step 8. Select '*PEAP*' from the drop-down list

Step 9. Click '*Phase 2 authentication*'

Step 10. Select '*MSCHAPV2*' from the drop-down list

Step 11. Scroll to display '*Identity*' and '*Wireless password*' fields

Complete the following fields:

### **Identity**

Step 12. Type your '*RMITID*'

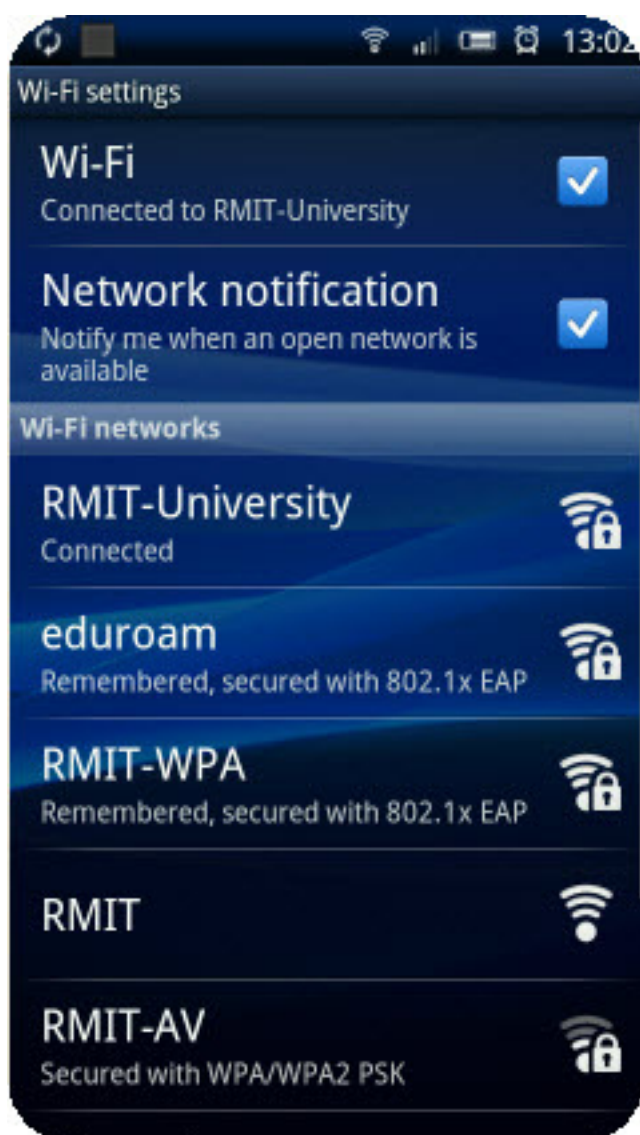

### **Wireless Password**

Step 13. Type your '*Password*'

Step 14. Click '*Connect*' button

The wireless network indicates the status '*Connected*'

The '*Wireless*' icon displays in the Systems tray

Your Android device is now connected to the RMIT wireless network (RMIT-University)
