Glossary of terms

DAFF:	Department of Agriculture, Fisheries and Forestry
ICR:	Importing Country Requirement
ISO:	International Organization for Standardisation
MICoR:	Manual of Importing Requirements
NPPO:	National Plant Protection Organization
RSS:	Rich Site Summary

Introduction

The Manual of Importing Country Requirements (MICoR) Plants is DAFF Plant Exports' current database that publishes known importing country requirements and is used by stakeholders (industry, exporters, importing National Plant Protection Organisations and staff) to check / verify requirements relating to plant commodities to be exported from Australia and is the source for approved and consistent wording of additional declarations/endorsements.

The database is provided for general information only, and you should independently verify the information in the database before relying on it. While the Commonwealth has processes in place for updating the database and correcting errors that are found, the database may be subject to change at any time without notice and will not necessarily contain the most accurate or up-to-date information.

The data published in MICoR Plants is sourced from the latest known conditions of the National Plant Protection Organisation (NPPO), obtained through a number of avenues including import permits or other official documents, which are supplied to micorplants@daff.gov.au.

Where there are no Importing Country Requirements (ICRs), it is the responsibility of the exporter (or their agent) to obtain official notification in writing from the Importing Plant Protection Organisation (import permit or instrument in writing) and email MICoR Plants: micorplants@daff.gov.au for assessment/updating of the database.

Any notification received which differs to that in MICoR Plants is to be emailed to MICoR Plants micorplants@daff.gov.au for assessment/updating of the database.

Purpose

The purpose of this user guide is to assist users in using the MICoR Plants system

Tips

Less is more! Start with basic information like a Country and Group/End use, then refine your search and add more details if there are too many results.

When searching within MICoR Plants, the term 'consumption' within the 'end use' list is only applicable to grains/seeds.

For the following End Use descriptions, a Group description is not associated:

- Logs
- Processed timber
- Stockfeed
- Timber
- Wood Packaging
- Woodchips
- Growing media

For the following Group descriptions, an End Use description is not associated:

- Nuts
- Processed plant products
- Cut flowers – fresh
- Cut foliage – fresh

The following are classed as fruits (as they develop from a flower) and any specifically listed conditions or generic Phytosanitary case conditions apply:

- . Avocado
- . Capsicum
- . Chillies
- . Cucumber
- . Eggplant
- . Melons
- . Olives
- . Pumpkin
- . Squash
- . Tomato
- . Zucchini

A 'PDF' version of your search results is available by selecting the 'PDF' icon toward the top of the screen, as per the example below.

Searching in MICO R Plants

There are two search options in MICO R Plants – a ‘simple’ search and an ‘advanced’ search.

Simple search

The Simple Search fields are located on the MICO R Plants home page

The screenshot displays the MICO R Plants website interface. At the top, there is a green header with the word 'HOME' on the left and 'PLANTS' in large white letters. To the right of 'PLANTS' is a search bar labeled 'Search ICRs' with a magnifying glass icon and the text 'Enter keyword'. A black 'Search' button is positioned to the right of the search bar. Below the search bar, there are links for 'FAQ | Support | Tips for search | Advanced search'. The main content area has a breadcrumb trail 'Home > Plants' and utility icons for 'Subscribe to RSS feed', 'Text Resize', 'Print', and 'PDF'. The 'Plants' section contains introductory text about the database, export requirements, and a 'support' link. A tip box suggests starting with basic information like 'Country and Group / End use'. Below this is a 'Search Importing Country Requirements (ICRs)' form with four fields: 'Country' (dropdown menu showing '-- All Countries --'), 'Scientific/Common Name' (text input), 'Group' (dropdown menu showing '-- All --'), and 'End use' (dropdown menu showing '-- All --'). A green 'Submit' button is located at the bottom right of the form. The 'Documents' section follows, containing text about relevant documents and a link to 'View the documents'. At the bottom, a dark grey footer contains the text 'Content disclaimer'.

Select the ‘Country’, ‘Group’ and ‘End use’ from the respective drop-down lists and click on ‘submit’.

The results of the search criteria will be displayed:

[Refine search \(show\)](#)

1 - 7 of 7 search results for

	Country
1. Other <i>India (IN)</i> - India (IN). This commodity is a prohibited import. Fruit - Fresh. Other. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document Type. Required. Import	india (in) (7)
2. Kiwifruit <i>India (IN)</i> - India (IN). Fruit - Fresh. Actinidia spp. Kiwifruit. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document Type. Required. Import Permit. Yes.	
3. Apple <i>India (IN)</i> - India (IN). Fruit - Fresh. Malus spp. Apple. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document Type. Required. Import Permit. Yes. Phytosanitary	
4. Pyrus <i>India (IN)</i> - India (IN). Fruit - Fresh. Pyrus spp. Pyrus. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document Type. Required. Import Permit. Yes. Phytosanitary	
5. Grapes <i>India (IN)</i> - India (IN). Fruit - Fresh. Vitis spp. Grapes. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document Type. Required. Import Permit. Yes. Phytosanitary	
6. Apricot, Cherry, Nectarine, Peach, Plum <i>India (IN)</i> - India (IN). Fruit - Fresh. Prunus spp. Apricot, Cherry, Nectarine, Peach, Plum. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document Type. Required.	
7. Oranges, Mandarins, Lemons, Grapefruit, Limes, Tangelo <i>India (IN)</i> - India (IN). Fruit - Fresh. Citrus spp. Oranges, Mandarins, Lemons, Grapefruit, Limes, Tangelo. NPPO details: Ministry of Agriculture (Department of Agriculture Cooperation). Relevant web addresses: www.agricoop.nic.in. Documentation. Document	

1

If too many results, the search criteria can be refined – details are provided at Search by scientific / common name – page 9.

Where import conditions are the same for all products within the group/end use, the ICR 'name' will be 'ALL'.

Where import conditions are the same for most products within the group/end use, the ICR 'name' will be 'OTHER'.

Click on the hyperlink of the applicable ICR to view full details.

The Importing Country Requirement will contain all, or some of the following:

FAQ | Support | Tips for search | Advanced search

Home > Plants > India (IN)

Subscribe to RSS feed A* a Text Resize Print PDF

1 → **India (IN)** ← 2

3 → **Citrus spp Oranges, Mandarins, Lemons, Grapefruit, Limes, Tangelo**

4 → **Fruit - Fresh**

5 → **India (IN)**

6 → **Documentation**

Document Type	Required?
Import Permit	Yes
Phytosanitary Certificate	Yes
Additional Declaration/Endorsement	Yes

7. **General**

Copy of the Import permit must be presented to the DAFF Biosecurity inspector at the time of inspection.

Consignments are to be free from pests, soil, weed seeds and extraneous material.

Exporter to provide evidence attesting to the endorsement and to present to the DAFF Biosecurity inspector at time of inspection

Northern Territory fruit fly (*Bactrocera aquilonis*) - known to occur in WA & NT
 Jarvis fruit fly (*Bactrocera jarvisis*) - known to occur in WA, NT, QLD & NSW
 Lesser Queensland fruit fly (*Bactrocera neohumeralis*) - known to occur in QLD & NSW

8. **Treatment**

Fruit sourced from fruit fly free areas under fruit fly monitoring does not require any treatment (ie Tasmania; Riverland; Sunraysia; Riverina).

Fruit from a fruit fly area or that area which is in outbreak must undergo an appropriate treatment against Queensland fruit fly & Mediterranean fruit fly, options are:

Methyl bromide fumigation at 32g/m³ for 2 hours at 21 degrees celsius or above

or

In-transit cold treatment at 3 degrees celsius or below for 20 days against Mediterranean fruit fly; or
 In-transit cold treatment at 3 degrees celsius or below for 16 days against Queensland fruit fly

Where treatment is undertaken on-shore, the exporter to provide evidence attesting to the treatment and to present to the DAFF Biosecurity inspector at time of inspection; and
 Details of treatment to be endorsed on the Phytosanitary certificate in the treatment section.

9. **Additional Declaration/Endorsements**

Option 1 (EXDOC Endorsement No 1537)

1) A representative sample was inspected and found free of Queensland fruit fly (*Bactrocera tryoni*), Mediterranean fruit fly (*Ceratitis capitata*), Light brown apple moth (*Epiphyas postvittana*), Aucuba scale (*Aspidiotus nerii*), Northern Territory fruit fly (*Bactrocera aquilonis*), Jarvis fruit fly (*Bactrocera jarvisis*), Lesser Queensland fruit fly (*Bactrocera neohumeralis*), Citrus black spot (*Guignardia citricarpa*), Scarlet mealybug (*Pseudococcus calceolariae*) and Citrus snow scale (*Unaspis citri*).

2) Northern Territory fruit fly (*Bactrocera aquilonis*), Jarvis fruit fly (*Bactrocera jarvisis*), Lesser Queensland fruit fly (*Bactrocera neohumeralis*), Queensland fruit fly (*Bactrocera tryoni*) and Mediterranean fruit fly (*Ceratitis capitata*) are known not to occur in the area of production.

ICR details page continued:

Option 2 (EXDOC Endorsement No 2594)

1) A representative sample was inspected and found free of Queensland fruit fly (*Bactrocera tryoni*), Mediterranean fruit fly (*Ceratitis capitata*), Light brown apple moth (*Epiphyas postvittana*), Aucuba scale (*Aspidiotus nerii*), Northern Territory fruit fly (*Bactrocera aquilonis*), Javis fruit fly (*Bactrocera jarvisi*), Lesser Queensland fruit fly (*Bactrocera neohumeralis*), Citrus black spot (*Guignardia citricarpa*), Scarlet mealybug (*Pseudococcus calceolariae*) and Citrus snow scale (*Unaspis citri*).

2) Queensland fruit fly (*Bactrocera tryoni*) and Mediterranean fruit fly (*Ceratitis capitata*) are known not to occur in the area of production.

Option 3 (EXDOC Endorsement No 3320)

1) A representative sample was inspected and found free of Queensland fruit fly (*Bactrocera tryoni*), Mediterranean fruit fly (*Ceratitis capitata*), Light brown apple moth (*Epiphyas postvittana*), Aucuba scale (*Aspidiotus nerii*), Northern Territory fruit fly (*Bactrocera aquilonis*), Javis fruit fly (*Bactrocera jarvisi*), Lesser Queensland fruit fly (*Bactrocera neohumeralis*), Citrus black spot (*Guignardia citricarpa*), Scarlet mealybug (*Pseudococcus calceolariae*) and Citrus snow scale (*Unaspis citri*).

2) The fruit has undergone pre-shipment cold disinfestation for Queensland fruit fly (*Bactrocera tryoni*) and Mediterranean fruit fly (*Ceratitis capitata*).

Option 4 (EXDOC Endorsement No 3321)

1) A representative sample was inspected and found free of Queensland fruit fly (*Bactrocera tryoni*), Mediterranean fruit fly (*Ceratitis capitata*), Light brown apple moth (*Epiphyas postvittana*), Aucuba scale (*Aspidiotus nerii*), Northern Territory fruit fly (*Bactrocera aquilonis*), Javis fruit fly (*Bactrocera jarvisi*), Lesser Queensland fruit fly (*Bactrocera neohumeralis*), Citrus black spot (*Guignardia citricarpa*), Scarlet mealybug (*Pseudococcus calceolariae*) and Citrus snow scale (*Unaspis citri*).

2) The fruit has been fumigated prior to export.

Option 5 (EXDOC Endorsement No 1709)

1) A representative sample was inspected and found free of Queensland fruit fly (*Bactrocera tryoni*), Mediterranean fruit fly (*Ceratitis capitata*), Light brown apple moth (*Epiphyas postvittana*), Aucuba scale (*Aspidiotus nerii*), Northern Territory fruit fly (*Bactrocera aquilonis*), Javis fruit fly (*Bactrocera jarvisi*), Lesser Queensland fruit fly (*Bactrocera neohumeralis*), Citrus black spot (*Guignardia citricarpa*), Scarlet mealybug (*Pseudococcus calceolariae*) and Citrus snow scale (*Unaspis citri*).

2) The fruit will be subjected to in-transit cold disinfestation.

Search by scientific/common name

If there are too many results from the 'simple' search, it can be refined by entering either the scientific or common name into the 'scientific/common name' field. For example, select the country – Taiwan, and type broccoli in the 'scientific/common name' and select 'submit' as per the example below:

Search Importing Country Requirements (ICRs)

Country:

Scientific/Common Name:

Group:

End use:

Where the word is found throughout the ICRs text, MICO R Plants will list all of these ICRs.

The results of the search criteria will be displayed:

HOME

PLANTS

Search ICRs

FAQ | Support | Tips for search | Advanced search

Home > Plants Subscribe to RSS feed A* a Text Resize Print PDF

Search

[Refine search \(show\)](#)

- [Cauliflower, Cabbage, Broccoli, Brussel sprouts, Turnips, Swede....](#)
Taiwan (TW) -
Taiwan (TW). Vegetables - Fresh. Brassica spp. Cauliflower, Cabbage, Broccoli, Brussel sprouts, Turnips, Swede, Broccoli.

Country
[taiwan \(tw\)](#) (1)

Advanced search options

Using the Search ICRs option:

Type in the key word / words and a search will be undertaken in all ICRs for the specified word / words.

Note – the search is undertaken on all content of the ICR.

Eg: General text, Treatment text, Additional Declaration/Endorsements text

Example shown is for the text methyl bromide and the corresponding results:

A screenshot of the PLANTS website's search results for 'methyl bromide'. The header is dark green with 'PLANTS' in white. The search bar contains 'methyl bromide' and a 'Search' button. Below the header, the search results are displayed. On the left, there is a list of 10 results, each starting with a number and a bolded title (e.g., 'Beans', 'Chana dahl - kibbled', 'Dill', 'Basil', 'Chives', 'Parsley', 'Lettuce', 'Coriander'). Each result includes a link to the country (e.g., 'Fiji (FJ)', 'Mauritius (MU)', 'Vanuatu (VU)') and a brief description of the fumigation process. On the right, there is a 'Country' filter section with a list of countries and their respective result counts: 'solomon islands (sb) (48)', 'india (in) (34)', 'papua new guinea (pg) (29)', 'vanuatu (vu) (20)', 'mauritius (mu) (18)', 'french polynesia (pf) (17)', 'fiji (fi) (14)', 'vietnam (vn) (14)', and a 'more...' link. At the bottom of the results, there is a pagination bar with buttons for '1', '2', '3', '4', '5', '6', '7', '8', '9', '10', and 'Next 10'.

Using the Advanced Search option:

The 'advanced' search function enables searching at a more detailed level.

From the home page, select 'Advanced search'.

Complete the Advanced Search screen with the details required.

Example shown is for *Ditylenchus dipsaci* for solanum for all countries, groups and end use and the corresponding results:

The image shows the 'Advanced Search' form on the PLANTS website. The form includes several input fields: 'Country' (a dropdown menu), 'Scientific / Common Name' (text input with 'solanum'), 'Group' (dropdown menu with '--ALL--'), 'End Use' (dropdown menu with '--ALL--'), 'Search keyword' (text input with 'Ditylenchus dipsaci'), 'The exact phrase' (text input), and 'Without the words' (text input). The 'Group' dropdown and the 'The exact phrase' text input are highlighted with red rectangular boxes. A 'Submit' button is located at the bottom right of the form.

The results of the search criteria are:

The image shows the search results page for 'ditylenchus dipsaci'. It displays 3 results. The first result is 'Solanum tuberosum' with details for India (IN), Taiwan (TW), and Thailand (TH). The second result is 'Potato' with details for Taiwan (TW). The third result is 'Potatoes' with details for Thailand (TH). A 'Country' sidebar on the right shows counts for india (in) (1), taiwan (tw) (1), and thailand (th) (1). The page number '1' is shown in a small box at the bottom left.

Click on each ICR hyperlink to view the details.

All ICRs search options

To view the lists of all ICRs for a country, click on the country in the ICR pathway located on each ICR content page.

Documents

MICoR Plants also publishes documents which are relevant to plant exports that are not country or commodity specific.

It also includes protocols and workplans for those commodities in which there is a bilateral agreement between DAFF and the importing country NPPO.

The screenshot shows the MICoR Plants website interface. At the top, there is a green header with 'HOME' and 'PLANTS' in large white letters. A search bar labeled 'Search ICRs' is positioned to the right of the header. Below the header, there are navigation links for 'FAQ | Support | Tips for search | Advanced search' and utility icons for 'Subscribe to RSS feed', 'Text Resize', 'Print', and 'PDF'. The main content area is titled 'Plants' and contains introductory text about MICoR (plants) and export requirements. A search form titled 'Search Importing Country Requirements (ICRs)' is located below the text, with fields for 'Country', 'Scientific/Common Name', 'Group', and 'End use', and a 'Submit' button. A red rounded rectangle highlights the 'Documents' section, which includes a paragraph of text and a blue underlined link labeled 'View the documents'. A red arrow points from the text below the screenshot to this link. At the bottom of the page, there is a dark grey footer with the text 'Content disclaimer'.

Select the 'View the documents' link.

Workplans

[View the Workplans](#)

Forgot your password?

[Click here](#) if you have forgotten your password

Complete your details as per the following example, then click on 'submit':

The screenshot shows a registration form for the PLANTS system. The form is set against a dark green header with the word 'PLANTS' in large white letters. A search bar for ICRs is located in the top right. The form fields are as follows:

Your name	Bugs Bunny
Company	Bunny Exporters Pty Ltd
Address	96 Rabbit St BUNNYVILLE NSW 0123
Product	Citrus, Cherries, Apples
Country	Japan
Email	bugs.bunny@bunnyexporters.com.au
Phone number	02 9999 1234

At the bottom right of the form are two buttons: 'Cancel' and 'Submit'.

You will be emailed a user name and password.

Once access has been given, on the Documents page select to view either the Protocols or view the Workplans (you have access to both sections).

The screenshot shows the 'Documents' page of the MICoR system. The page header includes the Australian Government logo and the text 'Department of Agriculture, Fisheries and Forestry' on the left, and 'MICoR Manual of Importing Country Requirements' on the right. The page has a dark green header with 'HOME' and 'PLANTS' in white. A search bar for ICRs is present. Below the header, the page title is 'Documents'. A descriptive paragraph follows: 'This section contains documents relevant to plant exports, but which are not country or commodity specific.' There are two main sections: 'Protocols' and 'Workplans'. Each section has a brief description and a link to view the documents. The links 'View the Protocols' and 'View the Workplans' are highlighted with red boxes.

The logon screen will appear:

Enter your user name and password as provided; you will then be able to access the protocols/workplans information.

You can change or edit your password as follows:

- Once you are logged in, click on your name which is located at the top left hand of the page under the Australian government logo and the edit details screen will appear with your details pre-populated in the fields.
- You can change your password or your contact details once you are in this screen. When you have completed updating your details, click the commit button to save your changes.

If you experience any problems, please email: micorplants@daff.gov.au

Subscribe to RSS feed

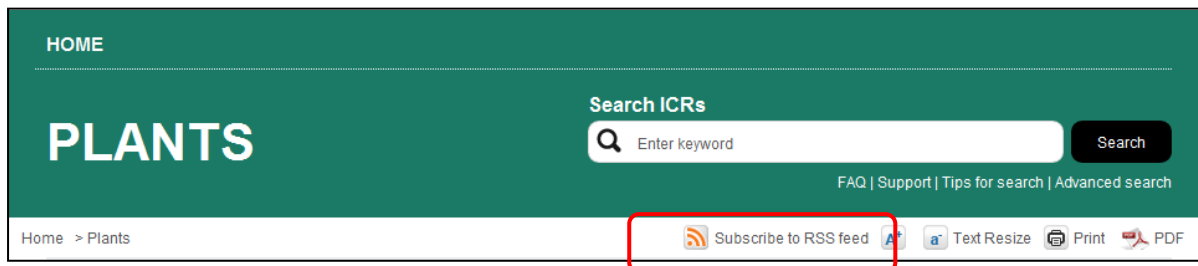

RSS stands for Rich Site Summary and is an Internet technology standard that allows you to receive updates to web-based content of interest.

Subscribing to the RSS feed will enable you to automatically receive updates to importing country requirements as soon as they become available.

Rather than being notified of website updates by ezines or email, RSS feeds give you complete control. There is no requirement to reveal your email address and you can stop receiving content without requesting to be “taken off the list.”

Your privacy is maintained as there is no email address involved and therefore no way a publisher can sell, rent or disclose your contact details. You are also protected from spam, viruses, phishing, or identity theft. You can unsubscribe at any time.

To subscribe to RSS feed, click on the Subscribe to RSS feed link located on the MICoR Plants home page.

Using the selections below you can subscribe for recent changes to the site using RSS

Group	-- All --
End use	-- All --
Country	-- All Countries --

[Subscribe](#)

Using the drop down lists, select the criteria for which the RSS subscription is required.

Eg: Grains / Seeds for consumption to all countries:

Using the selections below you can subscribe for recent changes to the site using RSS

Group	Grains / Seeds
End use	Consumption
Country	-- All Countries --

[Subscribe](#)

Or

Fruit (fresh) to Taiwan

Using the selections below you can subscribe for recent changes to the site using RSS

Group	Fruit
End use	Fresh
Country	Taiwan (TW)

[Subscribe](#)

If multiple Groups, End use and / or Countries are required, separate submissions will need to be made.

Send the request by clicking the 'Subscribe' icon.

To view updates at any time, check the RSS icon on the Windows Internet Explorer tool bar

Updates will be obtainable through this link when they are available.

An RSS document (which is called a 'feed', 'web feed', or 'channel') includes full or summarised text and other data such as publishing dates and authorship.

If you experience any problems, please email: micorplants@daff.gov.au

Frequently Asked Questions (FAQ's)

A number of frequently asked questions appear within MICoR Plants and can be accessed through the 'FAQ' link on the home page. Click on the relevant link for an answer to that question.

A screenshot of the MICoR Plants website. The page has a dark green header with the word 'PLANTS' in large white letters. To the right of the header is a search bar with the text 'Search ICRs' and a search button. Below the search bar, the text 'FAQ | Support | Tips for search | Advanced search' is visible, with 'FAQ' highlighted by a red rectangular box. Below the header, there is a navigation bar with 'Home > Plants' on the left and several utility icons on the right: 'Subscribe to RSS feed', 'Text Resize', 'Print', and 'PDF'. The main content area is titled 'FAQ' and contains a list of 18 blue hyperlinks for frequently asked questions, such as 'Can anyone get access to MICoR?' and 'How do I access content in MICoR?'. The page is framed by a thin black border.

FAQ

- [Can anyone get access to MICoR?](#)
- [How do I access content in MICoR?](#)
- [How do I register for a MICoR account and obtain a login?](#)
- [What do I do if I have forgotten my password?](#)
- [What do I do if I have forgotten my username?](#)
- [What do I do if I no longer require access to MICoR?](#)
- [What do I do if I have been locked out of my account?](#)
- [What do I do if I need to change or edit my password or contact details?](#)
- [What do I do if I need to change or edit my password or contact details?](#)
- [Who do I contact if I need help using MICoR?](#)
- [Who do I contact in relation to importing country requirements' and page content?](#)
- [The information I am looking for is not in MICoR, where is it?](#)
- [How can I search for specific country requirements?](#)
- [How can I receive updates on content?](#)
- [Can I print content to PDF?](#)
- [What has happened to the Phyto database?](#)
- [I have printed copies of Phyto cases that I am familiar with. Can I just use that?](#)
 - A review of the Phyto database content has taken place and ICRs deemed to be current and correct are now available in MICoR. Some of the information is identical, but a lot has changed.
 - If a country/commodity has been moved from Phyto to MICoR, users should check the information in MICoR, particularly if they are very familiar with the information in Phyto, because the information may have changed.
 - Exporters are encouraged to familiarise themselves with MICoR at their earliest convenience.
- [How do I access Protocols?](#)
- [How do I view Workplans?](#)

Support

For additional assistance on the use of MICoR Plants and contact details, click on the 'Support' link on the home page.

The screenshot shows the MICoR Plants website interface. At the top, there is a dark green header with the word "HOME" on the left and "PLANTS" in large white letters. To the right of "PLANTS" is a search bar labeled "Search ICRs" with a magnifying glass icon and a "Search" button. Below the search bar, the text "F / Q | Support | Tips for search | Advanced search" is visible, with "Support" highlighted by a red rectangle. Below the header, the breadcrumb "Home > Plants" is shown on the left, and utility icons for "Subscribe to RSS feed", "Text Resize", "Print", and "PDF" are on the right. The main content area is titled "Support" and contains the following text:

[MICoR help](#) - contains helpful information about accessing MICoR.
