Introduction

1.1 Introduction

Pen Computer Systems (PCS) have developed the PrimaryCare Sidebar[™] as an adjunct to the GP Clinical Desktop System to deliver useful tools and decision support information for general practice at the point of care.

The PrimaryCare Sidebar[™] sits on the right of the screen (by default) and contains a series of panels, each with links to a range of primary care software tools. The panels allow the tools to be grouped into logical areas of health care. The Clinical Audit Tool (CAT) Prompts are provided as one of these panels.

This document assumes that the PrimaryCare Sidebar[™] has been installed and the user has been registered.

1.2 Clinical Audit Tool (CAT)

The Clinical Audit Tool (CAT) analyses clinical information from GP Clinical Desktop Systems. It translates data into real statistical and graphical information that is easy to understand and action. This allows practitioners to assess and improve the quality and completeness of patient information. The benefit to the practice is to assist with its ongoing accreditation and provide opportunities to grow practice income. The emphasis of the tool is to help practice staff to take specific action to improve patient coverage in chronic disease management and prevention.

Other benefits of CAT are many and include:

- targeting patients with particular needs
- targeting patients with specific health risk profiles
- improved compliance with statistical data collections
- extracting data to meet the needs of others
- meeting reporting requirements

Statistics that are required for the Australian Primary Care Collaboratives (APCC) program and the Department of Health & Ageing (DoHA) Future Directions Key Performance Indicators for Divisions are a by-product of the use of the system.

1.3 CAT Prompts

CAT Prompts provides the practice with the ability to flag targeted patients for follow-up. When a flagged patient presents for consult the GP is prompted by a pop up bubble containing the follow up details.

- CAT provides the functionality to flag targeted patients for follow up.
- The PrimaryCare Sidebar[™] provides the pop up prompt functionality when a patient presents for consult.

CAT Prompts is currently only available for Medical Director Users.

1.4 CAT Prompts User Guide

The purpose of this document is to provide instructions on how to install and use the functionality provided by CAT Prompts. It should be used as a supplementary guide to the main user guide: **`Clinical Audit Tool – User Guide'**. Some user instructions in this guide assume a general understanding of how to use CAT. References will be made to the main user guide where necessary.

1.5 Relevant Documents

'Clinical Audit Tool – User Guide'

This User Guide provides instructions on how to install and use the functionality provided by the CAT. It should be available as a prerequisite to this guide and will be referred to throughout this guide where necessary

This guide is available from <u>http://help.pencs.com.au/cat.htm</u>.

'Pen Setup Installation and PrimaryCare Sidebar™ User Guide'

This guide provides instructions on how to install the PrimaryCare Sidebar[™] and the selected primary care software tools that are accessible from it. These tools integrate with the GP clinical desktop system at the point of patient care. One or all of the tools can be selected for installation. The CAT Prompts are one of these PrimaryCare Sidebar[™] tools.

This guide is referred to in the System Requirements & Installation sections of this guide.

This guide is available from <u>http://help.pencs.com.au/primarycaresidebar.htm</u>.

1.6 Intended Audience

The audience for this document is all users of the PrimaryCare Sidebar™.

1.7 Terminology

Term	Definition
APCC	Australian Primary Care Collaboratives
CAT	Clinical Audit Tool
Clinical Desktop System	A general term used for the computer program used by a clinician to record patient clinical information
DoHA	Department of Health & Ageing
PCS	Pen Computer Systems
PrimaryCare Sidebar™	The PCS sidebar application that links to a range of primary care software tools

2 System Requirements

CAT Prompts requires the installation of the Clinical Audit Tool and the PrimaryCare Sidebar[™]. The System Requirements for these are provided in the following user guides:

- 'Clinical Audit Tool User Guide'
- 'Pen Setup Installation and PrimaryCare Sidebar™ User Guide'

2.1 Clinical Desktop System Compatibility

CAT Prompts is only compatible with Medical Director Versions 2 and 3.

2.2 Clinical Audit Tool

CAT Prompts requires a minimum of the Clinical Audit Tool version 2.5.

3 Installation

Please refer to 'Pen Setup Installation and PrimaryCare Sidebar[™] User Guide' and follow the installation instructions.

CAT Prompts also requires the following applications to be installed:

- Clinical Audit Tool
- Launch Pad

The CAT Prompts panel will be displayed once logged into the PrimaryCare Sidebar[™]. The Clinical Audit Tool will be available as a shortcut on the `Launch Pad'.

		CA	T Prompts Pane

4 Clinical Audit Tool

The Clinical Audit Tool will be available as a shortcut on the 'Launch Pad'.

Figure 4A: Launch Pad

- Double-click the CAT shortcut icon to open CAT
- The CAT login screen will open and you will be required to login with your username and password.
 - If you have used your CAT login to register for the PrimaryCare Sidebar™ then you will also use this login to activate CAT.
 - If you have registered for the PrimaryCare Sidebar[™] using an alternative username and password then you will need to use this new login to activate CAT.

Once logged in you will see a new menu item on the header toolbar for CAT Prompts.

5 CAT Prompts

CAT provides the ability to find patients that meet a set of risk criteria. CAT Prompts provides the ability for this list to generate a patient prompt when a patient on the list presents for a GP consultation.

The steps in the clinician workflow are:

From CAT

- 1. Identify patient cohort using CAT
- 2. Flag the patients for follow up at consult

From GP clinical desktop system

1. A Patient record is opened triggering the consult prompt for review

From the PrimaryCare Sidebar™

1. The CAT Prompt is actioned by the clinician

5.1 Selecting Patients for Follow-Up

It is assumed the user knows how to use CAT to:

- 1) create and load a data extract from the clinical desktop system, and
- 2) set up a filter to find patients of interest.

Please refer to the 'Clinical Audit Tool – User Guide' for further information.

The example here will create a follow-up CAT Prompt for Diabetic patients. When they present for consult the clinician will be notified.

- 1. Login to CAT
- 2. Load an extract and filter on Diabetes = Yes
- 3. Click the 'View Pop.' Button
- 4. The patient 'Reidentify Report' is displayed

Figure 5.1A: CAT Prompt at Consult option

A new option is available at the bottom of the report: 'Prompt at Consult'. Click the Go button

The 'Prompt at Consult' dialogue box appears. This allows the user to set the following prompt details:

- \circ Status Period select a timeframe before the CAT Prompt becomes active e.g. Prompt at next consult
- Summary Overtype the prompt text to insert the text that will appear in the Prompt bubble e.g. DIABETES REVIEW
- Description this is the patient filter selection used and cannot be changed

Figure 5.2A: CAT Prompt History dialogue

The CAT Prompt that has just been saved is listed at the top and highlighted. Information about the CAT Prompt includes:

- Extract Date the date the CAT data extract was created
- $_{\odot}$ $\,$ Created Date the date the prompt was created
- Target Date the date the prompt will become active
- Period the status period that was selected when the prompt was created
- Detail the summary text entered and patient filter selection used when the prompt was created
- No. of Patients the number of patients selected to receive this prompt
- \circ $\,$ Created by the user logged into CAT when the prompt was created
- Status the prompt status: active or cancelled

Note: You can sort the list to your own preference by clicking on the column header.

- Double-click on the prompt that has just been saved
- The 'Prompt Details' dialogue box will display

ditions | Medications | Results | Providers | Saved Filters |

					OK	

Figure 5.2B: CAT Prompt Details dialogue

This will display the list of patients that were selected for the CAT Prompt. For each patient the following details are provided:

- Status the prompt status for this patient: initially this will be *scheduled* but this will change when the prompt is actioned by the clinician
- Actioned the date the prompt was last updated
- Target Date the date the prompt will become active (this will change if the prompt is rescheduled by the clinician)
- Patient ID this is a Medical Director ID that may be useful in troubleshooting
- Family Name patient's family name
- Given Name patient's given name

5.3 Cancelling a CAT Prompt

CAT Prompts can be cancelled for all patients from the CAT 'Prompts History'

- Click the 'Prompts' menu item
- The 'Prompt History' dialogue box will be displayed (Figure 5.2A)
- From the list of CAT Prompts highlight the prompt to be cancelled
- Click the 'Cancel Prompt' button
- You will be asked to confirm that you want to cancel this prompt
- Click 'OK' to cancel the prompt
- You will be advised the CAT Prompt has been cancelled
- The CAT Prompt will display as greyed out in the list
- You are still able to double-click the CAT Prompt to view the patients that were selected for that prompt

5.4 Responding to a CAT Prompt at Patient Consult

In Medical Director:

1. Open a patient who has been flagged for follow up CAT Prompt.

If the patient has any active CAT Prompts with a target date due the prompt pop up bubble will appear. The prompt summary text will be displayed in the bubble.

The prompt bubble appears with the prompt summary text

Figure 5.4A: CAT Prompt Pop Up

In the PrimaryCare Sidebar™:

1. Open the PrimaryCare Sidebar[™] by moving the mouse over the thin line at the right of the screen.

The CAT Prompt details will be displayed in the CAT Prompts panel.

2. Click on the CAT Prompt details to review more information

Figure 5.4C: CAT Prompts panel with active prompt information

Page 16 of 19

3. Right-click on the CAT Prompt details to choose an action option: *Complete, Cancel or Reschedule*

Reschedule allows you to choose a new timeframe before the CAT Prompt becomes active.

Figure 5.4D: CAT Prompts panel with action options

- 4. Choose 'Complete'
- 5. You will be prompted to complete this prompt

Figure 5.4E: CAT Prompts panel confirm complete

6. Click 'Yes'

The CAT Prompt will be completed and you will be alerted to ensure you have added appropriate notes to the Medical Director patient record.

Please note: CAT Prompts do not store any information into the clinical desktop system.

Figure 5.4F: CAT Prompts panel prompt complete

7. Click 'OK'

The CAT Prompt will be completed and removed from the active prompts list
