Simple Trouble Shooting Guide

Please read the check sheet first before check-up. If there is still some problem after checking, please contact the local distributor for help.

Problems	Cause	Solution
No power	no startup	If power is appropriately fixed up on the accessory, please put switching on "ACC".
	Fuse is burnt out	Change a fuse (Note: in same specification)
Disc can't be loaded or ejected	A CD disc is loaded in the mechanism	Remove the CD disc in the mechanism, and insert a new disc
	The disc inverts	Insert the disc with label paper face upward
	Disc is dirty or defective	Clean the disc or change a new one
	The temperature in the car is too high	Let the temperature in the car down to normal state
	Cooling	Stop using it for an hour and then test again
Voice flashes	The assembled angle is over 30	Adjust the angle to less than 30
	CD disc is dirty or defective	Clean the disc or change a new disc
No radio working	The broadcasting signal is too weak	Choose a station with strong signal

Specifications:

1.FM tuning:

Frequency range: 87.5-108MHz

Medium Frequency: 10.7MHz

Sensitivity: 3uV

2.AM tuning:

Frequency range: 522-1620KHz

Medium Frequency: 450KHz

Sensitivity: 40dB

3.CD MP3 Play

System: audio system

Disc available: CD/CD-R/CD-RW/MP3

Frequency response: 20-100KHz ≤ 5dB

10-20KHz ≤ 5dB

4.Common

Work Voltage: 13.8V DC

Current Consumption: 5A

Output Power: 50W × 2
