# GPComplete Installation Manual

1. Insert the GPComplete CD.

2. If you have autorun enabled then it should start the GPComplete setup program automatically. Otherwise open the CD drive and double-click setup.exe.

- Shared Documents
- My Computer
- My Network Places

Details

Double click setup to run the application

3. Click Next.

4. Please read the license agreement and if you accept the terms of the agreement click Next.

5. Type in the user name and company name and then click Next.

6. Click the <u>Server and Client</u> button to install the server and client on this machine.
   (Only install the server on *one* machine in the network.)
   Click the <u>Client</u> button to install only the client on a machine- you will need to
   have already installed the Server on *one* other machine in the network.

7. Select the folder where you want the software to be installed. Click Next if you want to leave the current location unchanged (Recommended)
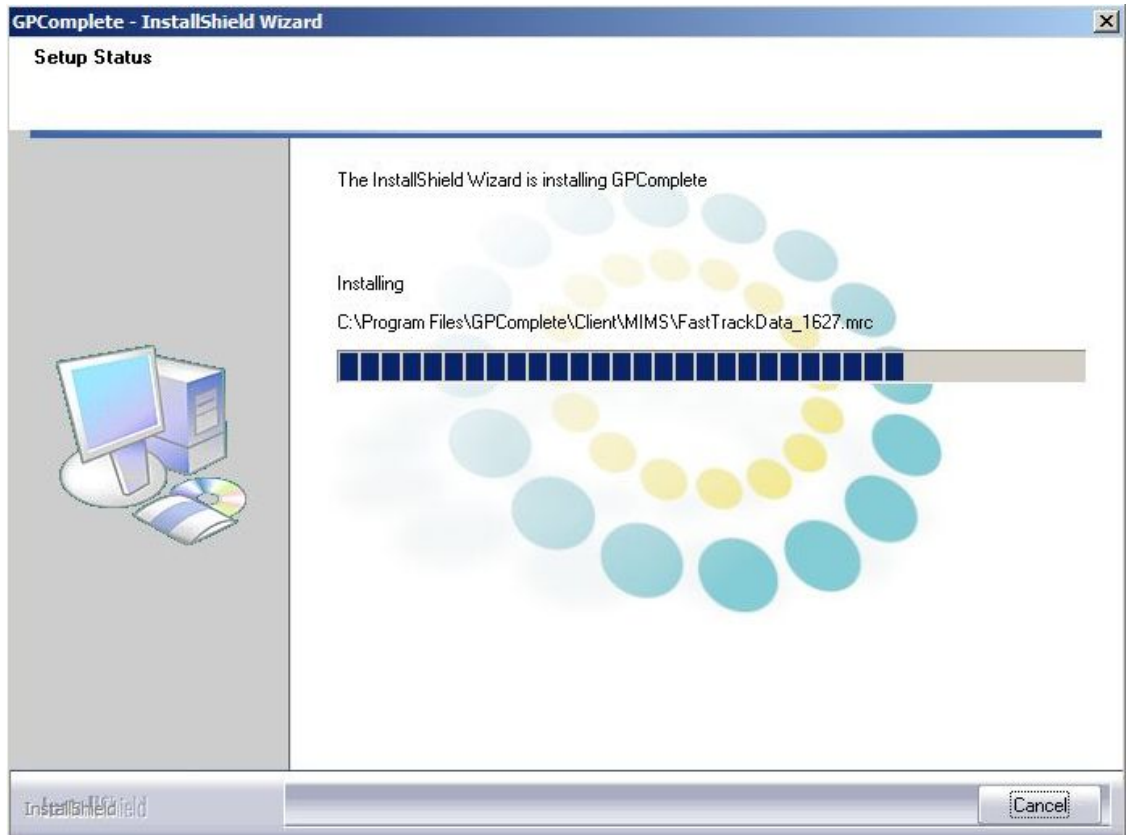

8. Click the Install button to begin the installation process.

9. The installation progress bar will appear.

10. Skip this step if you are installing only the Client software (as selected by you in step 5). Choose the folder where you want to install the database. We recommend that the drive where you are installing the database should have at least 1 GB of free space.

11. The installation of GPComplete is finished so click on Finish.

12. You will need to restart the machine for all the changes to take effect.
