## User manual

### Introduction

This software is for entering the time and penalties for each of the tasks in a trial and for creating the final results.

There are two parts to the software:

- Score Entry application
- Main Results application

The Score entry application will be run on multiple PC's, one for each task.

The Main Results application is run on one PC and is where the participant details are entered and where the individual task scores are amalgamated.

### Installation

Unzip the file then run setup.exe - just take all the default values.

Note: the file should be unzipped to a top level directory – not to a subdirectory
