1.1 Standard wiring layout for open / close zone system

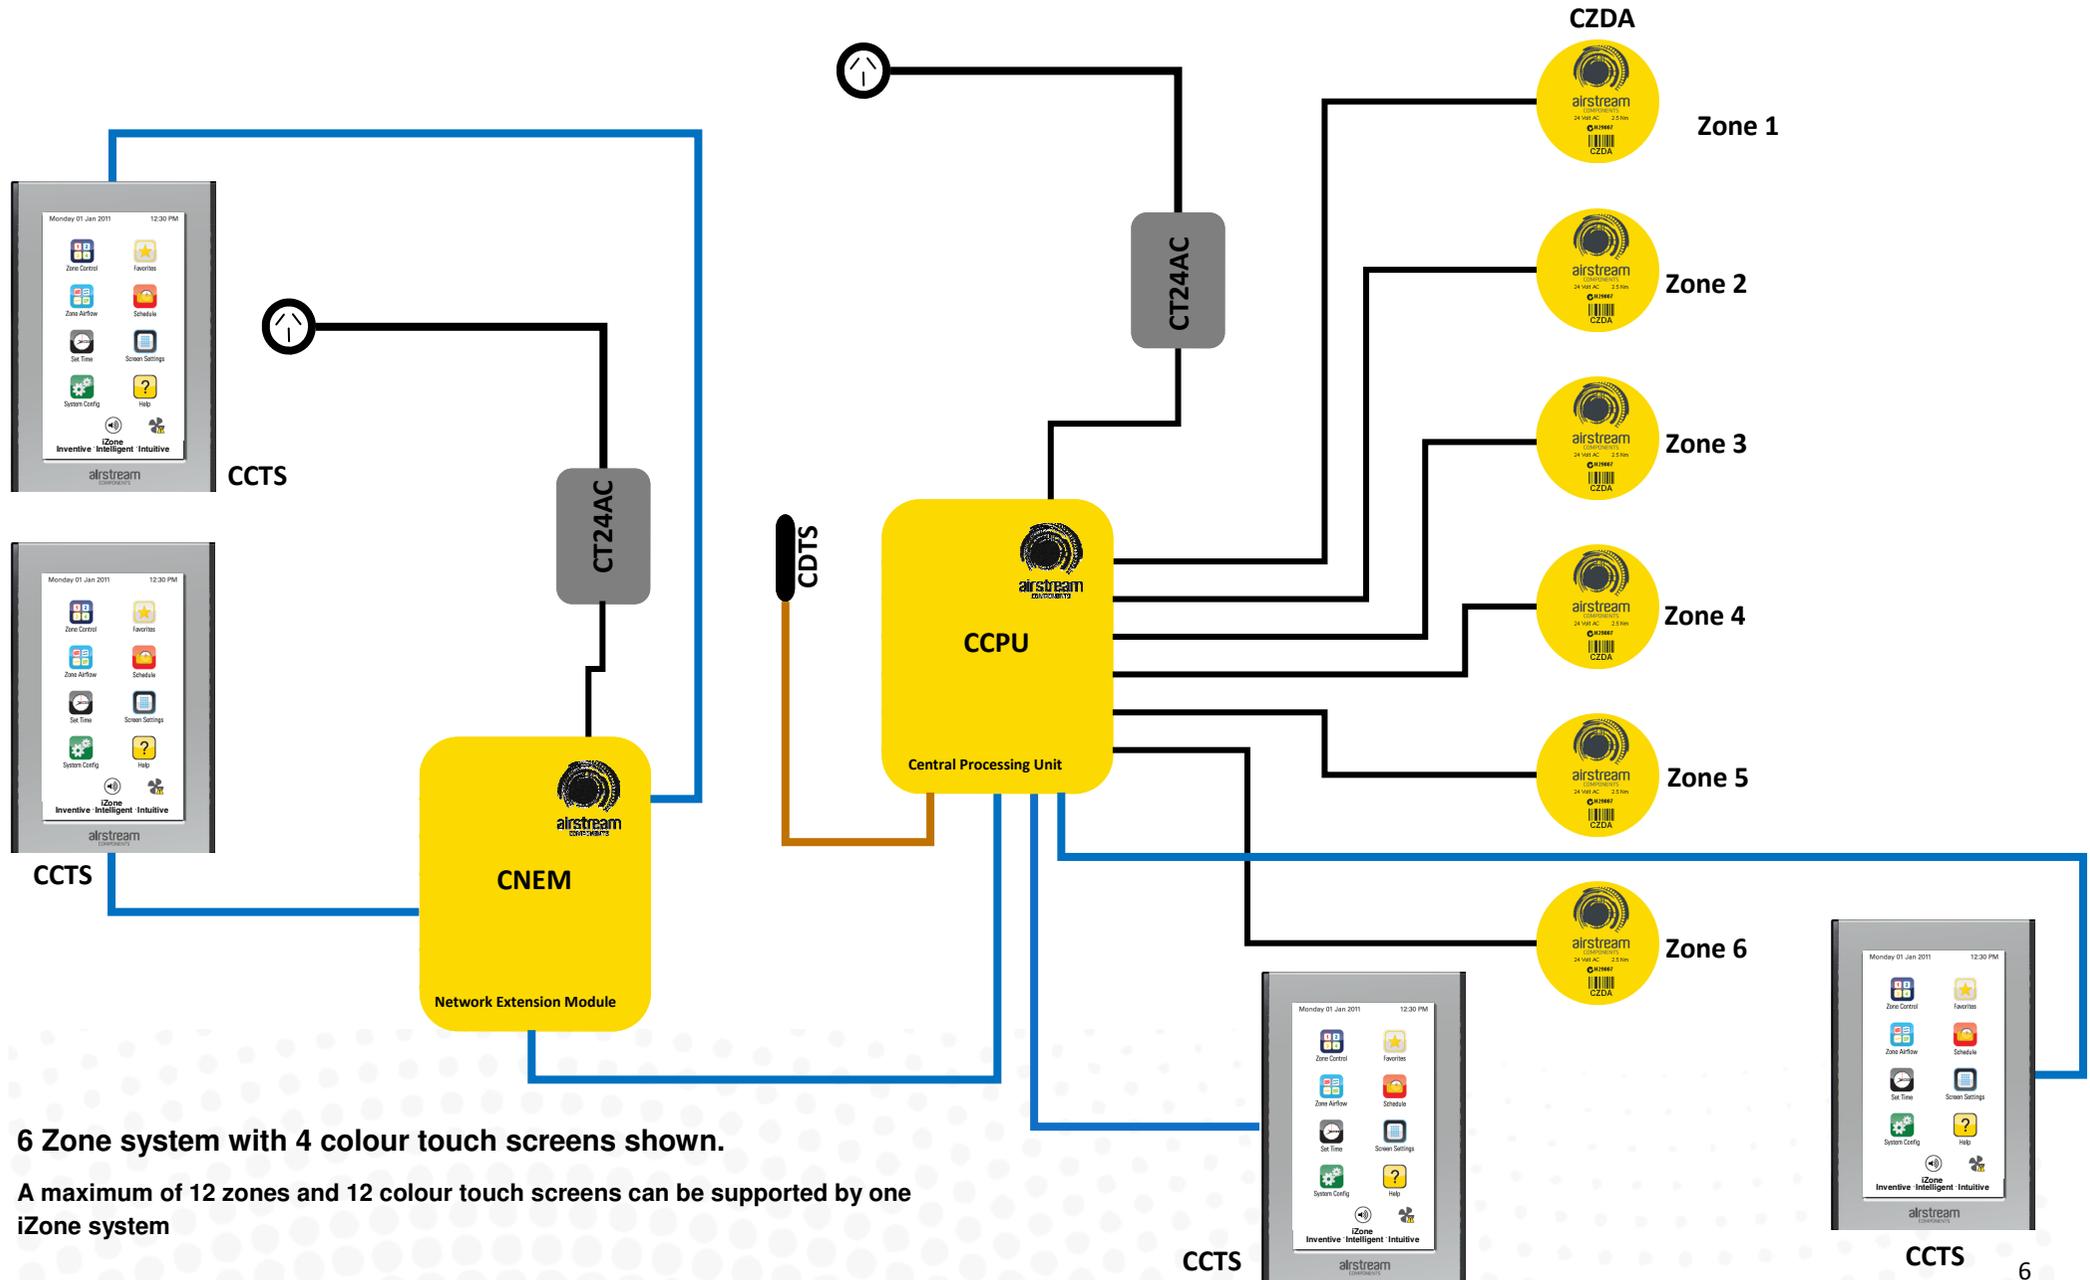

1.2 Wiring layout when temperature controlled zones are installed

7 Zone system with 2 colour touch screens shown above

1.3 Wiring when more than 3 colour touch screens are installed

6 Zone system with 4 colour touch screens shown.

A maximum of 12 zones and 12 colour touch screens can be supported by one iZone system

1.4 Installation instructions

1. The CCPU can be installed on top of the indoor fan coil unit.
2. Do **not** run the blue network cables along side 240 Volt wiring.
3. When installing network cables down wall cavities or chasing network cables into walls, tape up and protect the RJ45 connector to avoid damage to the connectors.
4. Always install zones in consecutive ports starting at Zone 1. The back of the CCPU is marked with the zone port numbers.
5. Do not directly hardwire the CT24V into the AC unit's power supply. This may void the warranty as it will require an electrician in the event that a repair of the iZone system is required.
6. Connect Zone Damper Actuators (CZDA) to the zone ports using the RJ11 cables as shown.
7. Connect the Colour Touch Screens (CCTS) to the CCTS ports using the RJ45 cables. If you are connecting more than 3 CCTS to the system you will need to connect a Network Extension Module (CNEM) to the CCPU using a short RJ45 cable.
8. If any CCTS is being used for zone temperature control connect a Duct Temperature Sensor (CDTS) to the CDTS port. Install the sensor into the supply air duct upstream of all dampers. Secure the sensor in place by using reinforced aluminium tape.
9. Connect the power supply to the(CT24AC) port.
10. When installing temperature controlled zones ensure the CCTS for the associated zone is installed in a location that is representative of the temperature in the room / zone . The CCTS should be installed at approximately 1600mm above the floor and should not be subject to draughts, direct sunlight or heat from equipment such as computers, TV screens etc. The supply air outlets to this room must **not** blow conditioned air directly onto the touch screen, as the temperature sensor is located in the CCTS.

2.0 System configuration

WARNING ! Only qualified iZone installers should configure the iZone System. Incorrect configuration could result in damage to your air conditioning unit and system.

2.1 To configure your system click on the System Config icon on the home page.

Enter the system password “**wamfud**” and press the enter button. The enter button must always be touched to save changes.

2.2-2.5 You will now be in the System Configuration area:

This is the zone that is currently being configured. If the zone has been named its name will show here

Touch here to go to the home screen

Touch here to increase the maximum airflow to the zone

Touch here to decrease the maximum airflow to the zone

Touch here to increase the minimum airflow to the zone

Touch here to decrease the minimum airflow to the zone

Touch here to make this zone an electronic variable constant

Touch here to make this zone a temperature controlled zone. This must only be done from the screen installed in the temperature controlled zone

Touch here to make this zone an open / close zone

Touch here to proceed to the next zone

Touch here repeatedly if more than one constant zone is required. This will step through the constant numbers. Select which constant you want this zone to be

3.0 User manual

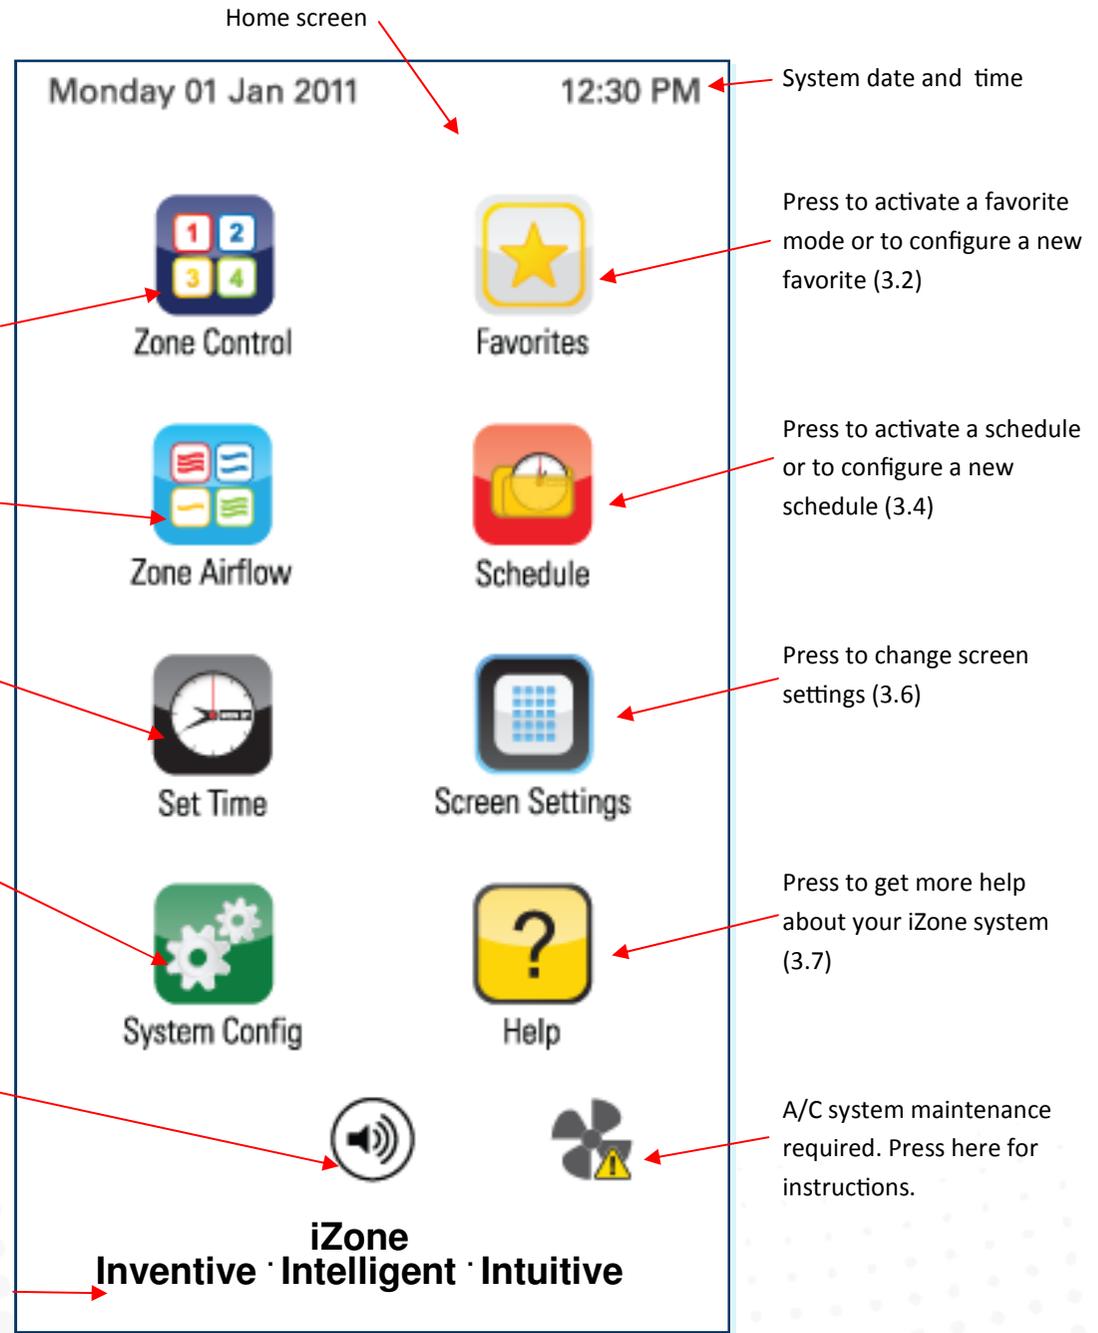

1. To get back to the Home screen at any time press 

3. When entering names or values using the keyboard it is easier to use a thin object such as a toothpick. Do not use sharp, hard objects as they may damage the screen. The enter button must always be pressed to save the changes you have made.

4. Some functions may have been locked by your installer to ensure the commissioned values are not changed. To make changes to these values contact your installation company.

Installing company's tag line this will vary depending on the installation company

3.1 Zone control

The screenshot shows the 'Zone Summary' screen of the iZone application. At the top, it displays the date 'Monday 01 Jan 2011' and the time '12:30 PM'. Below this is a header bar with a home icon and the title 'Zone Summary'. The main content area lists several zones, each with a name, a status icon, and a control button. The zones listed are Zone 1, Living room, Dining room, Kitchen, Master bedroom, John bedroom, Study, and Hall. The status icons include a key, a red 'S', a green 'O', and a blue 'C'. The control buttons show temperature set points (24.5°C, 23.5°C, 22.5°C, 23.0°C) or zone states (Closed, Open, Const). At the bottom, there are three navigation buttons: 'Up', 'Down', and 'Back'. The iZone logo and tagline 'Inventive · Intelligent · Intuitive' are at the very bottom.

Zone Name	Status Icon	Control Button
Zone 1	Key icon	24.5°C
Living room	Red 'S' icon	Closed
Dining room	Key icon	23.5°C
Kitchen	Green 'O' icon	Open
Master bedroom	Key icon	22.5°C
John bedroom	Key icon	23.0°C
Study	Red 'S' icon	Closed
Hall	Blue 'C' icon	Const

Annotations and their corresponding elements:

- Indicates this zone is currently in climate control mode: Points to the key icon next to 'Zone 1'.
- Indicates Zone 1 temperature set point. Press here to change the Set point. (3.3): Points to the '24.5°C' button.
- Zone Name. Press to edit zone name and other zone settings (3.2): Points to the 'Living room' text.
- Indicates this zone is closed. Press here to open the zone: Points to the 'Closed' button.
- Indicates this zone is currently fully open: Points to the green 'O' icon next to 'Kitchen'.
- Indicates this zone is open. Press here to close the zone: Points to the 'Open' button.
- Indicates this zone is currently closed: Points to the red 'S' icon next to 'John bedroom'.
- Indicates this zone is currently be overridden by the system and is being used as a constant because too many zones are closed: Points to the 'Const' button.
- Indicates the hall is an electronic constant and it is currently active: Points to the blue 'C' icon next to 'Hall'.
- Press here to go back to the home page: Points to the 'Back' button.
- Scroll up or down to see more zones: Points to the 'Up' and 'Down' navigation buttons.
