MASTER[®]
SOLUTION

EvoEye - custom-made solution

The modular architecture of EvoEye offers a solution, perfect harmonized on specific needs.

Below the modules at a glance:

Module Short description

- EvoMaster:** The EvoMaster serves the transmission of screen content, sound and video. In parallel with that it also steers the appearance on the receiver's side.
- EvoPlayer:** With EvoPlayer the transmitted screen content, video, audio and files are received and reproduced. Live broadcasts can be taped and played back later, too. Besides, interactions will be supported, if EvoChoice and EvoAct exist.
- EvoPlanner:** Enables to structure lessons in advance, by preparing and storing chapters, Multiple-Choice questions, banners and files to dispatch them during the lessons. Another function is the remote control of files on the participant devices.
- EvoRemote:** With EvoRemote you've got the possibility to operate every participant PC by remote control from your own computer via Internet and if requested to transmit it to all participants! With EvoRemote you can also grant to every participant access to your computer.
- EvoChoice:** Questions and answers can be dispatched, stored and evaluated statistically. EvoChoice - the question and answer system for interactive success-control.
- EvoTalk:** Allows text-based communication between the lecturer on one side and the participants on the other side. Questions, answers and information can be exchanged.

MASTER[®]
SOLUTION

* Additional module EvoRemote

Start EvoRemote 

Window "Start Session" opens up:

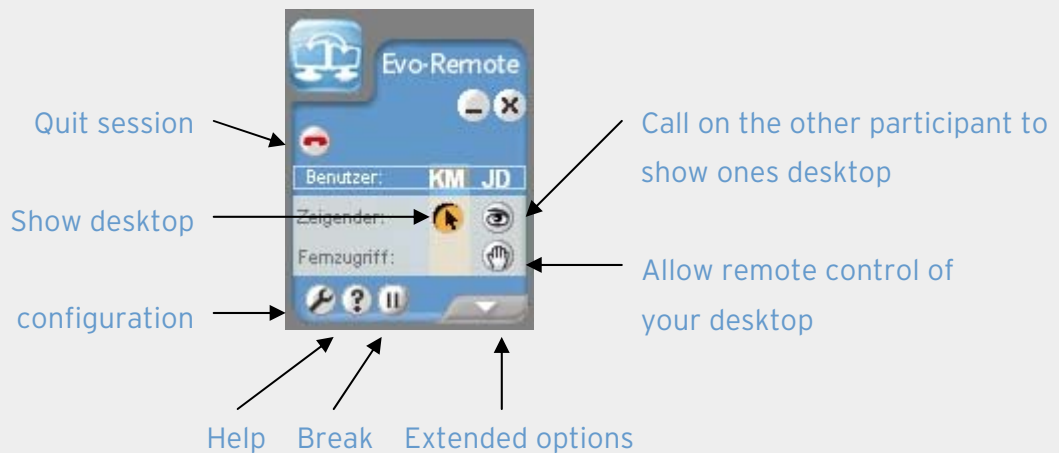

Enter a "nickname" for the session in the upper field

Enter the "session number", communicated by the lecturer, in the field below

Choose "connect" to establish a connection with the lecturer

The configuration console opens up. By this, settings can also be changed while the session:

Extended options:

Upload files and release them for other participants or download files released by other participants

Choice, which applications are visible for the session partner (settings will work immediately)

Release clipboard contents for other participants or download released contents form participants

Activate and deactivate zoom
