

1

Tear away the protective foil.

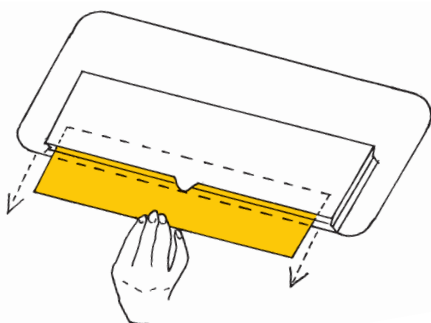

2

Install Reflektostop on the sun visor on the opposite side of the mirror to keep it functional:

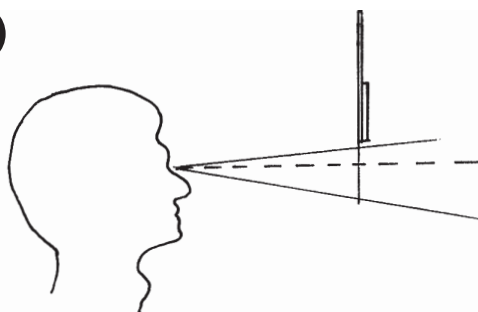

- Degrease the surface of the sun visor.
- By pressing glue the Reflektostop to the sun visor.

3

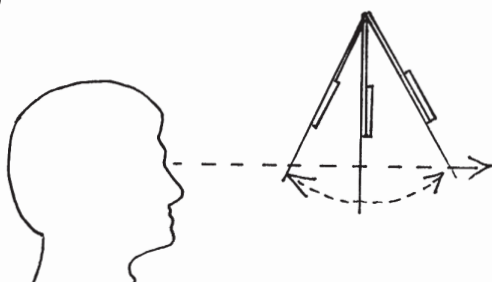

Pull the yellow screen from the cassette.
Don't grease it with Your fingers.

4

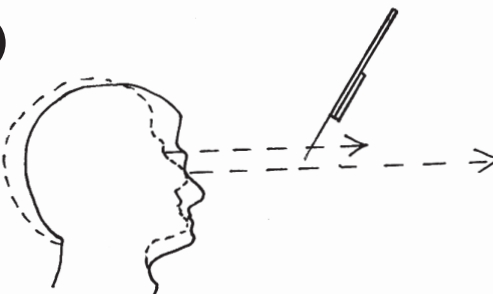

Adjust the screen to make sure it is in right position.

5

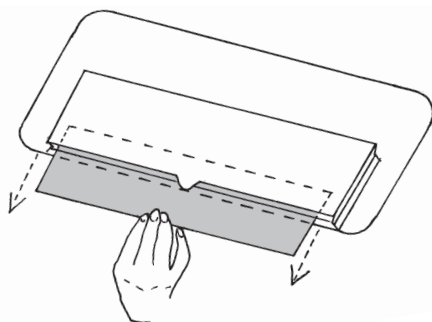

Make further adjustments to avoid light reflexes from behind.

6

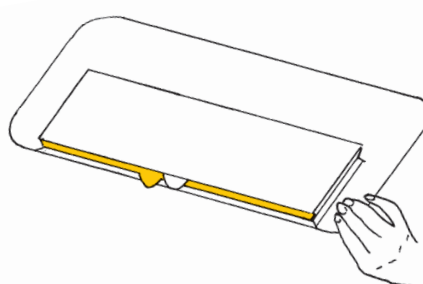

The moment You get blinded look through the yellow screen. By nodding Your head You can avoid getting blinded.

7

In the haze conditions during the day use only **GREY** screen.

8

After the drive close the sun visor.
