

2002 FORK SERVICE KIT INSTRUCTIONS

Compression Damping Assembly – Reference Owners Manual Figure A

Installation of Compression Damping System

1. For Black forks with adjustable damping, remove knob screw and knob.
2. Unscrew the compression damping assembly. Pour old oil out of the top of the fork and discard appropriately.
3. Fill right leg with 5wt Maxima fork oil (Ref Answer Products PN 85-3814) to the level indicated in your Owner's Manual. Owner's manuals can also be found on our website at www.answerproducts.com.
4. Cover the hole with a rag and cycle the fork 5 times. Recheck oil level and add/drain to meet the level requirement.
5. Reinstall, damping assembly, torque to 35 – 50 inlbs.

Compression Damping Assembly with Knob
