

# User manual

*For Hero*

*Do what you love, love what you do*

  
**WOOLMAKERS**

*Mount Hero on a table using the table clamps and mount the crank.*

*Hero is ready for the job. When using Hero for the first time it is wise to use left-over wool, since there could be some grease on the carding cloth due to the manufacturing process.*

*Let Hero pull the fibers out of your hand onto the small drum, while turning the crank clockwise.*

*The small drum will accumulate fibers. We recommend that you leave these on the drum and only clean it when you are drastically changing colors or fibers.*

*Filled up enough? Use the doffer pin to pull apart the carded fibers at the location of the wooden bar.*

*Turn the crank counter clockwise while lifting the batt from the drum. Use the doffer pin to keep the batt complete.*

*Clean the drum completely if you plan on using different colours or fibers next time.*

*Let it be your Hero!*
