1.0 Introduction

This chapter describes the main features of the application. Besides, it provides the user with the needed information aimed at its correct use.

1.1 About BCS

The Blt Clearing Station (BCS) for IDEM is a GUI application allowing an authorized user, namely a Clearing House member, to execute clearing operations on IDEM Derivatives markets traded financial products.

The application allows to:

- Receive trades executed by members in real time and their own non-clearing members in the current trade date and in the last trading days
- Perform transfer, split, open/close and client code change operations
- View the history of a specified trade
- Receive positions in real time and perform rectify, transfers, subaccount change and exercise operations
- Manage exercise and assignments operations
- Manage subaccounts
- Download clearing reference data
- Receive intraday margin calls and messages from the clearing house
- View deposited guarantees
- Receive and save settlement reports provided by the clearing house

1.2 Work environment

The Blt Clearing Station is based on a client-server architecture: the server layer is located at one of the IDEM server farms and connected to the Clearing House and markets through their

User Guide

September 2014

network access points. On the other hand, the client layer is installed on Clearing House members' PCs.

BCS client is the sole comprehensive solution for all IDEM clearing functionalities. The electronic platform supporting the client application is structured to make its access independent from the technical frame features of central systems.

1.3 How to get started

In order to access to the clearing services through BCS, the user needs a login name, a password and a Member Code. These data have to be requested to Borsa Italiana.

BCS client can be downloaded from the Borsa Italiana website (www.borsaitaliana.it) and installed on one or more members' PCs. The BCS workstation needs Java Virtual Machine V.1.5 or higher. A compatible version of the JVM will be installed during the setup process of the BCS Client.

The client can be used to reach production or test environment (CDS). By default the Client will point to the production environment. The user can select the desired environment at the startup in the login window.

Before starting the application, is warmly suggested to the user to uninstall any previous version of the BCS Client and to test the connectivity from the local desk to the BCS application servers. This involves the following steps:

- close the BCS client if running;
- verify with the customer network department if a natted IP address is used to reach the BCS application servers instead of the real addresses

If the real IP address is used:

- go into the BCS Client installation directory (usually C:\Program Files\Borsa Italiana\BCS Client XXX\) and locate the GKApi_J_Version.cfg" file in the "etc\Server" directory.
- verify that the file contains the real IP addresses of the BCS application servers; the ip address should be specified in the "TCP_IP" tag of each application server

User Guide

September 2014

```

TRACE_LEVEL=INF

TRANSACTION_BUFFER_SIZE=2000

SUBSCRIPTION_BUFFER_SIZE=2000

INQUIRE_BUFFER_SIZE=2000

TCP_BUFFER_SIZE=10240
```

- telnet the BCS application server IP addresses and ports from the user local PC;
- if the telnet does not work, please verify with the customer network department if the telnet attempt is filtered by any internal firewall;

If a natted IP address is used:

- go into the BCS Client installation directory (usually C:\Program Files\Borsa Italiana\BCS Client XXX\) and locate the GKApi_J_Version.cfg” file in the “etc\Server” directory;
- change the file replacing the real IP addresses with the natted ones; the ip address should be specified in the “TCP_IP” tag of each application server

```

```
INQUIRE_BUFFER_SIZE=2000
```

```
TCP_BUFFER_SIZE=10240
```

- save the file
- telnet the natted IP addresses and ports from the user local PC;
- if the telnet does not work, please verify with the customer network department if the telnet attempt is filtered by any internal firewall;

Please notice: the user is not allowed to put chars ';' and '=' in free fields; otherwise an error message will be shown on the GUI.

1.4 Disaster Recovery Invocation

In case of Disaster Recovery invocation, in order to correctly reach the SDC application server, the user should apply a change on the configuration of the BCS Client. This involves the following steps:

- close the BCS client if running;
- go into the BCS Client installation directory (usually C:\Program Files\Borsa Italiana\BCS Client XXX\) and locate the GKApi_J_Version.cfg file in the "etc\Server" directory.
- apply the following change (in bold) to the default configuration:

TCP_BUFFER_SIZE=10240
```

- save and close.

1.5 Clearing calendar

A configuration file, namely:

<installation directory>\Clearing Client\etc\client\Common.config (the default <installation directory> is C:\Program\BitSystems)

allows the user to define the current year calendar with holidays.

An example of the holiday configuration file is shown hereafter:

User Guide

September 2014

```
HOLIDAYS=*SUNDAY;*SATURDAY;01/01;$EASTER;$EASTER+1;$EASTER-1;$EASTER-2;01/05;15/08;$CHRISTMAS;$CHRISTMAS+1;$CHRISTMAS-1;31/12
```

Where:

- “;” = Field separator character
- *SUNDAY = every Sunday of the year
- *SATURDAY = every Saturday of the year
- \$EASTER = Easter date
- \$CHRISTMAS = Christmas date
- \$EASTER +/- n° = Easter + or – specific number of days
- \$CHRISTMAS +/- n° = Christmas + or – specific number of days
- dd/mm = specific date of the year

September 2014

2.0 Application layout

This chapter provides basic instructions to start the application and a description of the menus and main window commands. BCS can be started via the Microsoft Windows® Start menu. After having clicked on the BCS option, the following System Login window will pop up:

2.1 Application start

The screenshot shows a Windows-style dialog box titled "BCS - System Login". At the top left is the Borsa Italiana logo with the text "Borsa Italiana" and "London Stock Exchange Group" below it. Below the logo are four input fields: "Username", "Password", "Member code", and "Environment". The "Environment" field is a dropdown menu currently showing "Pre-Prod". At the bottom of the dialog are two buttons: "Login" and "Cancel".

Username, Password, Member Code and Environment should be specified in order to have access to the system. Password is case-sensitive.

PDC: Production environment
CDS: Test environment

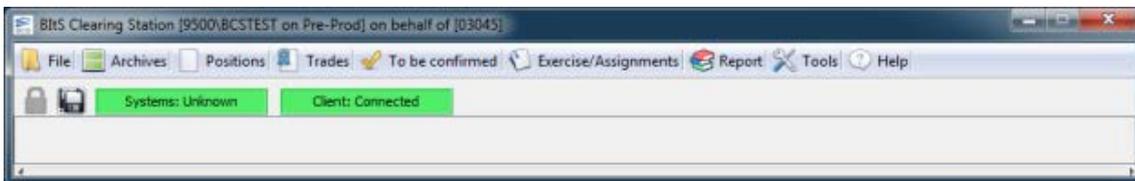

At the first login the password change is required.

User Guide

September 2014

2.2 The main window

After the user has been authenticated, the BCS tool bar will appear on the screen. The toolbar shows the username and the environment the user is connected to. It is made up of three functional sections: Menu Bar, Tool Bar - through which it's possible to access directly the menu commands - and Active Windows Bar.

2.3 Menu Bar

The Menu Bar contains the following menus and commands:

File

Menu	Description
Login	Shows the login prompt
Save Environment	Saves the windows configuration
Change Password	Changes the current password
Exit	Performs the logout

Archives

Menu	Description
Markets	List of the available markets
Classes	List of the classes

User Guide

September 2014

Menu	Description
Tradable Series	List of the tradable series
Participants	Clearing members list
Non-Clearing members	List of own non-clearing members (for GCM only)
Sub Accounts	Configuration/management of secondary accounts for every clearing member
Automatic Give-up	Configuration/management of client codes for automatic give-up functionality

Positions

Menu	Description
Positions	Increase or decrease the volume of positions on client account; Transfer requests of positions on client account (also house accounts for IDEX); early exercises execution; whole or partial transfer of a position into a different sub-account

Trades

Menu	Description
Trades	International give up, contract transfer, trade split, open/close change, client code change

To be confirmed

Menu	Description
Transferred positions to be confirmed	Received positions acceptance/rejection
Transferred trades to be confirmed	Received trades acceptance/rejection

User Guide

September 2014

Exercise/Assignments

Menu	Description
Exercise request	Ex by ex or early exercise request
Exercise Request History	List of ex by ex and early exercises performed on a specific day
Expiry exercises requests	List of exercise requests at expiry provided by the clearing house
Assignments	List of assignments provided by the clearing house

Guarantees

Menu	Description
Collateral guarantees	List of Collateral guarantees
Deposited guarantees	List of Deposited guarantees

Report

Menu	Description
Report	Available report list

Tools

Menu	Description
Clearing messages	Messages sent by CC&G
Intraday margin calls	Intraday margins requested by CC&G

User Guide

September 2014

2.4 Tool Bar

The main window tool bar is located under the menu bar. It gives quick access to the most frequently used commands, which are mapped into specific buttons. Each command can be activated by clicking on the corresponding button.

Two lights appear on the tool bar:

1. A first light stands for the centralized layer server/client connection status (green/red)
2. A second light indicates the operational status of the clearing system (green/red).

2.5 Command selection

A command is an instruction through which BCS executes a specific operation. Commands can be selected from:

- Menu bar
- Tool bar
- Quick selection menu: after a BCS object has been selected, its specific commands quick selection menu can be shown right-clicking on the mouse. If no command has been selected, the quick selection menu can be closed just clicking anywhere outside it.

2.6 Change Password

In the File menu click "Change Password"; the following window will appear, showing the username and the member code and allowing the user to change the current password to a new one.

Change password

New password

Retype new password

Ok Reset

User Guide

September 2014

Click the "OK" button to send the new password to the system, or click "Reset" to cancel the values in the blanks.

2.7 System behavior during evening settlement batch

After the end of clearing activity, CC&G starts the evening settlement batch to calculate closing prices, assignments and perform other activities.

During this phase the BCS system is still available, but only for customer who remains connected with the BCS Client. Connection attempts during this phase (with the BCS Client) are rejected.

Starting from this phase, only reports download is possible; any other activity is not allowed, until the end of the service.

User Guide

September 2014

3.0 Common functions

This chapter describes some basic functions which can be executed on every BCS window, in order to manage, sort, filter and export data.

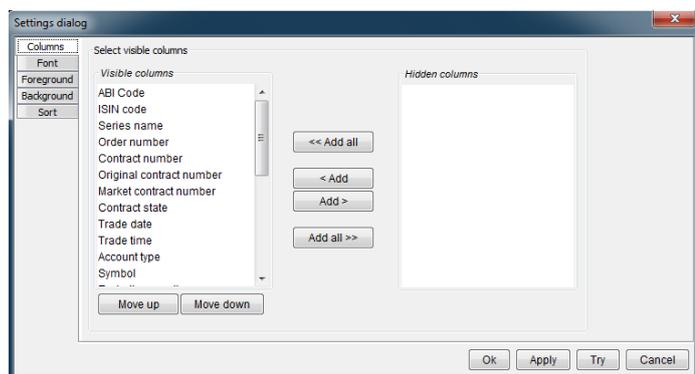

3.1 Window features configuration

Every window is provided with a Configuration menu that allows the setup of some window features.

The Setting window appears by selecting the Option button in the Configuration menu of each window. This window allows to:

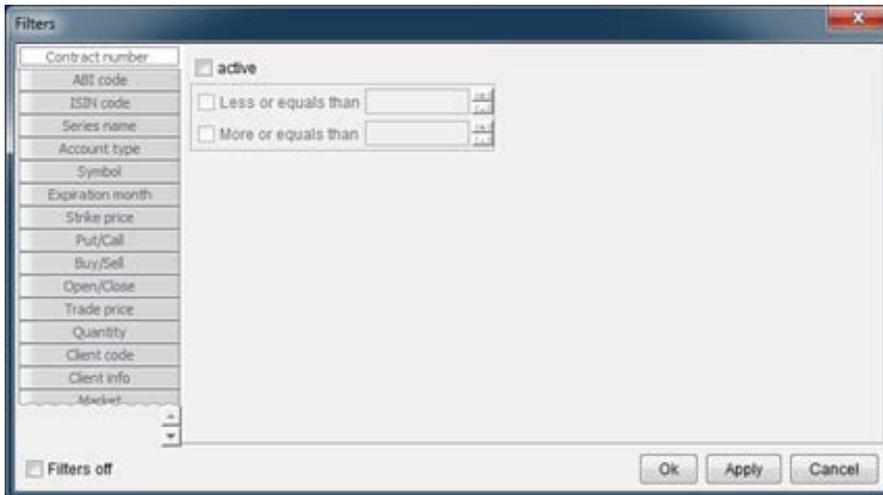

- [Columns] Show/hide columns
- [Font] Character type and dimension configuration
- [Foreground] Text rows color configuration
- [Background] Table rows background colors configuration
- [Sort] Sort rows according to specific criteria.

The Filter button in the Configuration menu allows to enable a set of filters on the displayed data.

User Guide

September 2014

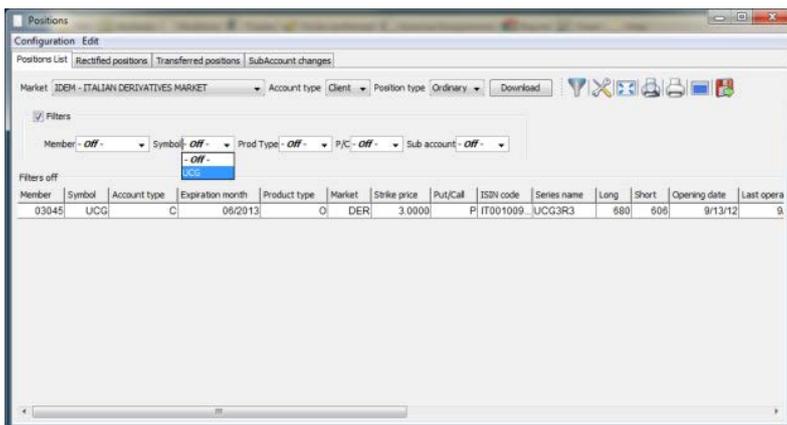

Where allowed, regular expressions can be used (See Appendix A: Regular Expressions).

The Toggle View button in the Configuration menu allows to show/hide the window tool bar. The same function can be enabled using the function-key [Ctrl-W].

3.2 Quick filters

In many windows it's possible to set quick filters.

The "Filters" flag allows to enable/disable all the filters set.

A single filter can be disabled when the mouse focus is on the filter box by pressing ESC key.

In filters where editing is allowed, regular expressions can be used to filter data set of interest (See Appendix A: Regular Expressions)

User Guide

September 2014

Ctrl + W sequence key allows to show/hide the window tool bar as well as quick filters.

Quick filters are not saved during client logout procedure.

3.3 Saving and closing windows

The Save Environment function, in the File menu of the main tool bar window, allows saving the windows current configuration (i.e. static filters, characters, colors, sort criteria, etc...).

The configuration is saved before closing and exiting the BCS client.

3.4 Data print

Many windows allow to print displayed data to a specified printer.

The Print Preview command allows viewing data before printing.

The Print command allows sending data to a specified printer

Only data shown on the screen are printed : hidden columns, if any, or filtered data will not be printed.

3.5 Data export to Excel spreadsheet or ASCII file

Save command allows saving windows data to an Excel spreadsheet or ASCII/PDF file.

User Guide

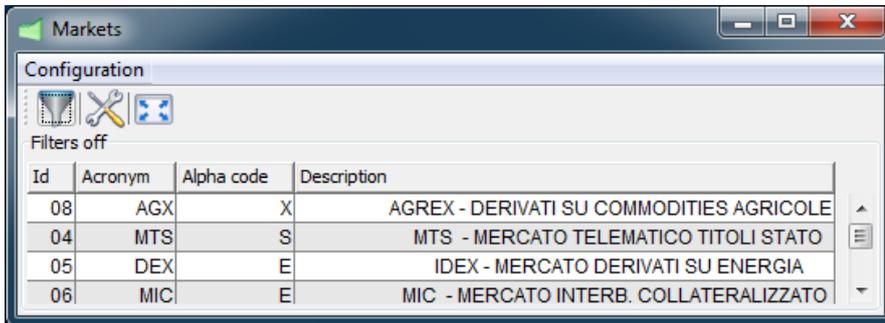

September 2014

4.0 Archives

This menu displays clearing reference data, like available markets, product classes, tradable series and clearing house members. It allows also to manage sub accounts and automatic give-up codes.

4.1 Markets

The Markets window shows the information concerning the markets the customer belongs to.

The screenshot shows a software window titled "Markets". Inside, there is a "Configuration" section with icons for filters, tools, and refresh. Below this, it says "Filters off". A table displays market information with the following data:

Id	Acronym	Alpha code	Description
08	AGX	X	AGREX - DERIVATI SU COMMODITIES AGRICOLE
04	MTS	S	MTS - MERCATO TELEMATICO TITOLI STATO
05	DEX	E	IDEX - MERCATO DERIVATI SU ENERGIA
06	MIC	E	MIC - MERCATO INTERB. COLLATERALIZZATO

Table columns description:

Id	Market identification code
Acronym	Market identification name
Alpha code	Market alphanumeric code
Description	Market description

User Guide

Description	Financial instrument description
Market	Trading market
ISIN Code	ISIN code of underlying financial instrument
Underlying	Alphanumeric code of underlying financial instrument

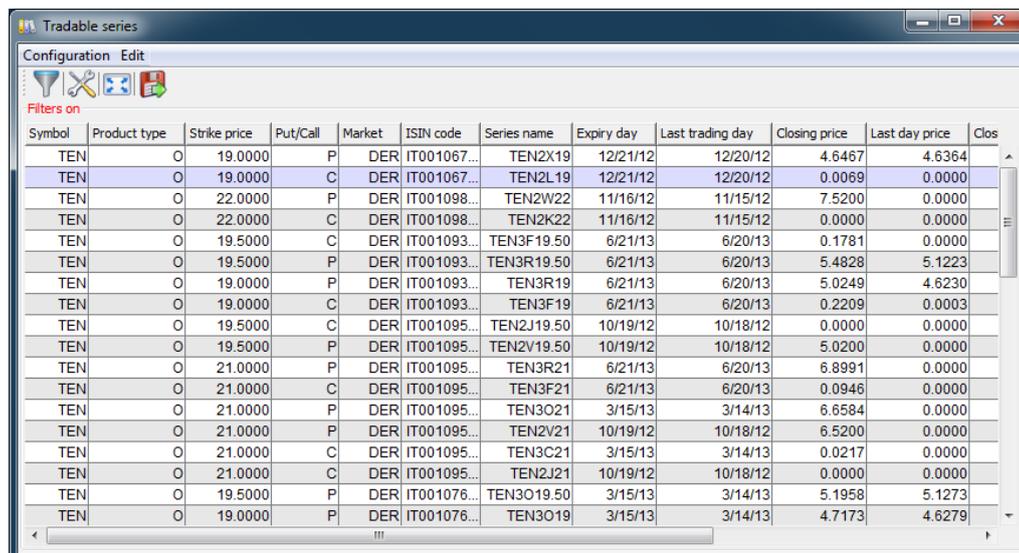

User Guide

September 2014

Margin interval	Maximum upward/downward expected deviation of the underlying price
Settlement Type	Settlement type of a financial contract (ST = settled, CSH = cash settled, FUT = future style)
Contract size	Number of shares underlying a standard contract
Option Underlying type	Financial instrument type (Bond, Equity, Index)
Option Style	Option style (American, European)
Settlement days	Number of days between trade and settlement date

4.3 Tradable series

Tradable series window shows the list of the standard tradable instruments for the current date. Only the tradable series of the markets the customer belongs to are shown.

The screenshot shows a window titled "Tradable series" with a menu bar containing "Configuration" and "Edit". Below the menu bar are several icons and a "Filters on" label. The main area contains a table with the following columns: Symbol, Product type, Strike price, Put/Call, Market, ISIN code, Series name, Expiry day, Last trading day, Closing price, Last day price, and Clos. The table lists various financial instruments, including options and futures, with their respective details.

Symbol	Product type	Strike price	Put/Call	Market	ISIN code	Series name	Expiry day	Last trading day	Closing price	Last day price	Clos

4.6 SubAccounts

The Subaccounts window allows to show and manage the list of subaccounts of the member and its NCMs.

SubAccount list

This windows shows the list of the customers subaccounts and its NCM ones.

The screenshot shows a software window titled "Sub Accounts" with a "Configuration: Edit" header. Below the header are tabs for "Subaccount list", "Customer/Subaccount links", and "Customer/Subaccount changes". The "Subaccount list" tab is active, displaying a table with columns: Market, Member, Account type, Sub account, Activation date, Disabling date, Creation date, Modify date, Market maker flag, Liquidity provider flag, Keep net position flag, and Net mar. The table contains six rows of data for member 00001 in the DER market.

Add New Subaccount. This function allows to create a new subaccount.

The screenshot shows a dialog box titled "Add new Subaccount". It contains the following fields and options:

- Market: IDEM - ITALIAN DERIVATIVES MARKET (dropdown)
- Member code: 00001 (dropdown)
- Account type: H C
- Sub account: (empty text box)
- Activation date: 10/16/12 (dropdown)
- Keep net position: Y N
- Net margin: Y N

Buttons: Insert, Cancel

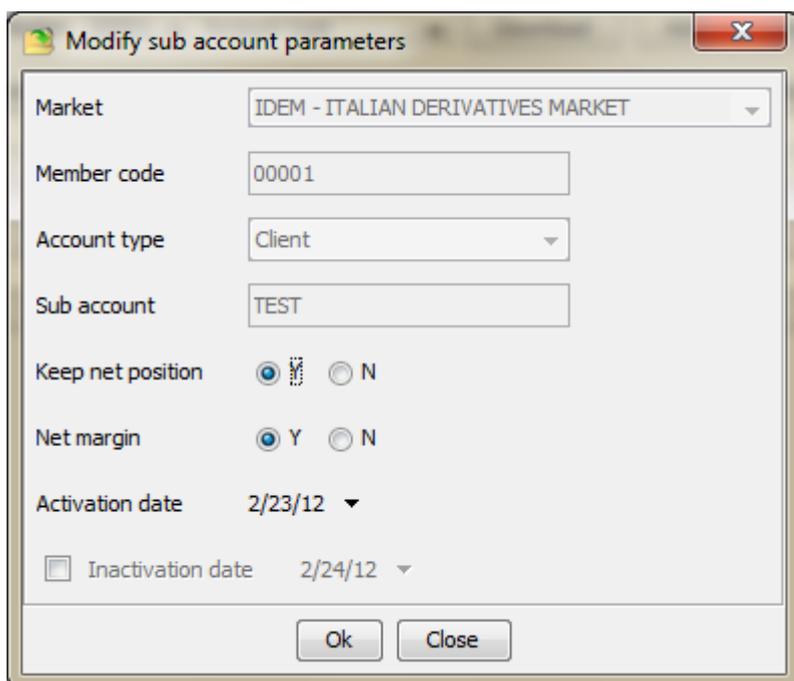

User Guide

September 2014

The user is required to specify the new sub account details in the dialog window.

The following fields have to be selected: market, member code which a sub account is assigned to, account type (House/Client), sub account name (only upper-case characters are allowed), activation date, Keep net position and Net margin flags.

Modify Subaccount: In order to modify an existing subaccount, the user has to right click on a specified entry in the SubAccount list window and select Modify. Only some parameters may be changed: Keep net position, Net margin, Activation date and Inactivation date.

Modify sub account parameters

Market: IDEM - ITALIAN DERIVATIVES MARKET

Member code: 00001

Account type: Client

Sub account: TEST

Keep net position: Y N

Net margin: Y N

Activation date: 2/23/12

Inactivation date: 2/24/12

Ok Close

Customer/SubAccount links

The “Customer/Sub account links” window allows to perform the following functions:

1. show “Subaccount-client code” links;
2. create a new “Subaccount-client code” link;
3. modify a “Subaccount-client code” link;

User Guide

September 2014

4. disable a Subaccount-client code link;

A subaccount-client code link is an association between a subaccount and a specific client code. The customer can specify a client code previously associated to a subaccount in a client code change operation on a trade, in order to transfer the trade to the related subaccount.

The list of all existing subaccounts-client code links can be downloaded clicking the “Download” button. Clicking on a specific sub account on the subaccount list shown in the left part of the window, will download only the subaccount-client code links related to that subaccount.

In both cases, it is possible to specify the Account Type and/or the first letters of the client code to filter the results.

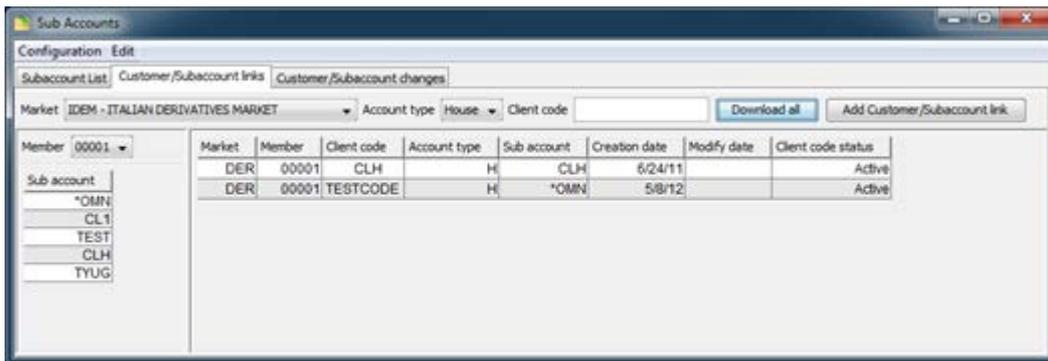

Table columns description:

Market	Trading Market
Member	Member ABI Code
Client code	Client Code identifier
Account type	Account type (House/Client)
Sub account	Sub account identifier
Creation date	When the sub account was created
Modify date	When the sub account was modified

5.0 Positions

This menu allows users to manage positions registered in the clearing house. It is possible to download the positions list and perform rectifications, transfers, subaccount changes and early exercises.

5.1 Positions

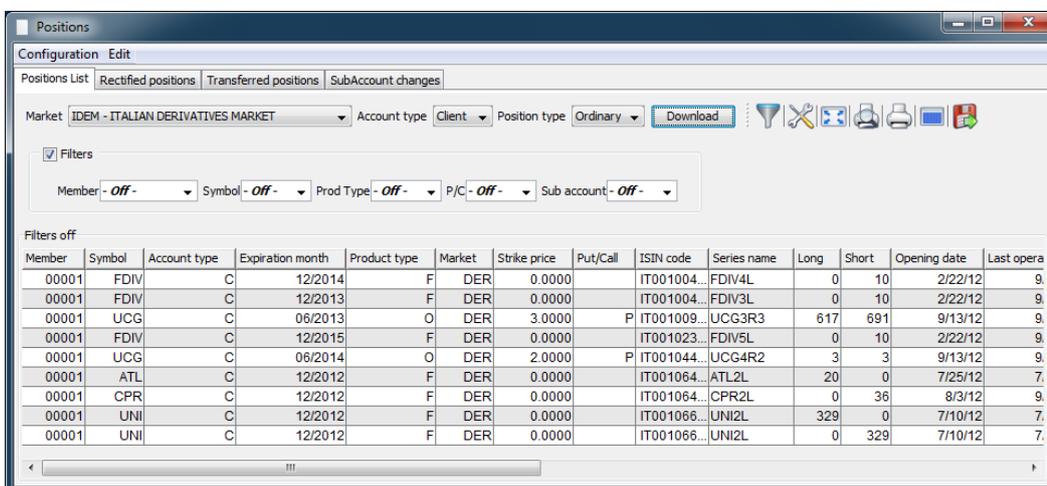

Positions menu shows the open positions registered on Members' accounts in the clearing house and allows to execute rectifications, early exercises, subaccount change and early exercise operations.

The Positions menu is made by the following tabs:

- Positions list: it shows the list of open positions held at the clearing house. For each open position it is possible to access the Rectify, Transfer, SubAccount Change and Early Exercise Request functionalities via the quick selection menu.
- Rectified positions: it shows the rectified positions list.
- Transferred positions: it shows the transferred positions list.
- SubAccounts Changes: it shows the list of positions modified by a SubAccount change operation.

5.2 Position list

In order to download positions list, the user is required to select the market, the account type (House/Client) and the position type and then click on the Download button.

September 2014

5.3 Rectify Position

The user can access the Rectify position function right clicking on the position he wants to modify.

The Rectify Position window allows to increase / decrease positions in share or index options on client account.

Executing this kind of operations on its own account or on other financial instruments is not allowed.

The rectification is allowed only for IDEM market and only for client account types.

Operational steps description:

1. Insert the amount of positions to be adjusted into the Volume field
2. Select the Increase or Decrease option
3. Press OK button to confirm

A confirmation message informs the user that the transaction has been successfully committed.

5.4 Positions transfer

The user can access the position Transfer function right clicking on a specified position in the positions list (also multiple selection is allowed).

The position transfer allows to transfer a position to a specific counterpart who is a CC&G member. The CC&G system will process the transfer only after the counterpart accepts the received position.

User Guide

September 2014

It is possible to transfer only positions on client account (also house accounts for IDEX) and only to counterparts other than the member itself.

Sel/Unsel	ISIN code	Symbol	Expiration month	Strike price	Put/Call	Long	Short	Transfer price	Long/Short	Volume
<input checked="" type="checkbox"/>	IT0010091590	UCG	06/2013	3.0000	P	617	691	0.0000	<input checked="" type="radio"/> Long <input type="radio"/> Short	

Receiver Member: 00001 | BORSA ITALIANA S.P.A.

Ok Close

Operational steps description:

1. Double click with the mouse into the Volume field and insert the amount of positions to be transferred
2. Select Yes or No option to access the gross position rectification function: this option allows to increase automatically positions in case a positions lack occurs in the time frame between the request sending and counterpart's acceptance, due to market executed trades on the transferred series.
3. Insert data into the Additional Info field (optional)
4. Insert data into the Client Code field (optional)
5. Insert data into the Client Info field (optional)
6. Insert data into the Sub Account field (optional)
7. Select the Receiver Member
8. Press OK to confirm

A confirmation message informs the user that the transaction has been successfully committed.

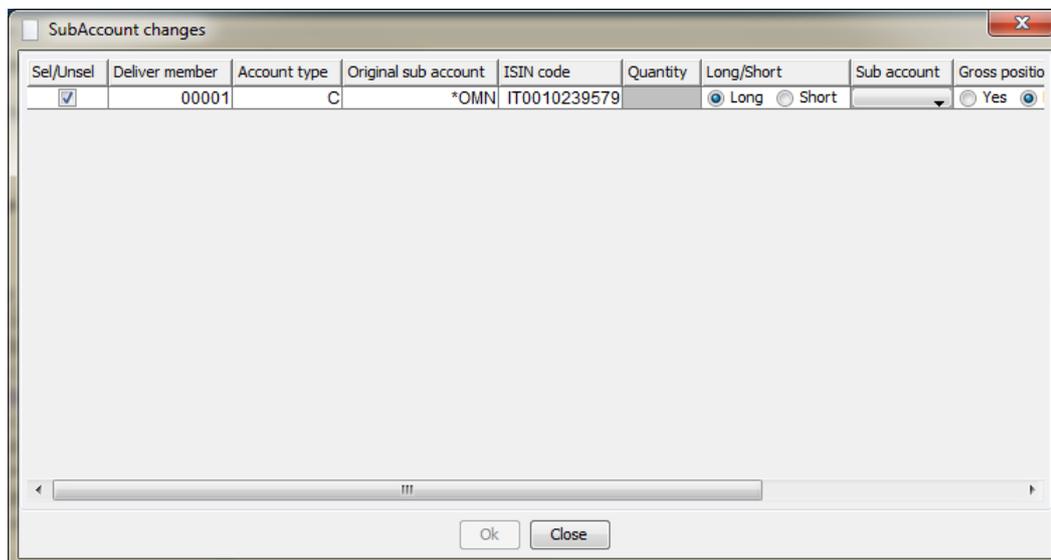

User Guide

September 2014

5.5 SubAccount changes

This function allows to change the subaccount of a specific position.

Once selected a position, it is possible to assign it to a different subaccount; contextually it is possible to make a modification of gross position rectification and assign a part of the original position to the new subaccount.

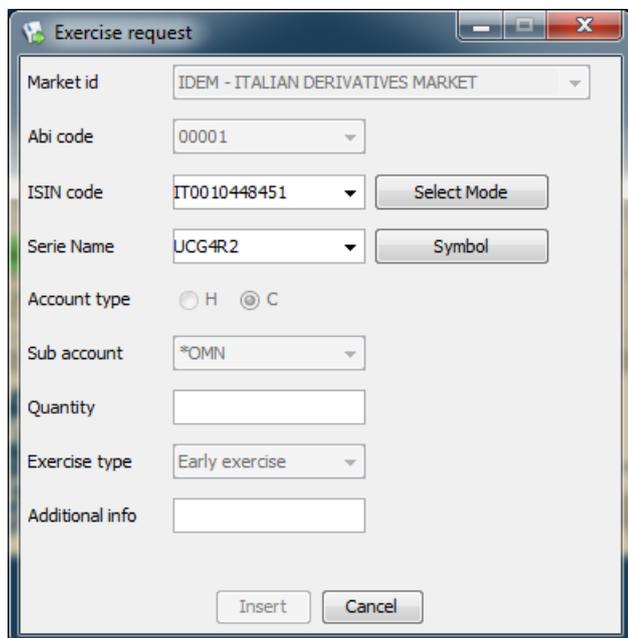

User Guide

September 2014

5.6 Exercise request

This function allows to execute an early exercise request on the specified position.

Right click on a position in the positions list in order to access this function.

The screenshot shows a window titled "Exercise request" with the following fields and controls:

- Market id: IDEM - ITALIAN DERIVATIVES MARKET (dropdown)
- Abi code: 00001 (dropdown)
- ISIN code: IT0010448451 (dropdown) with a "Select Mode" button
- Serie Name: UCG4R2 (dropdown) with a "Symbol" button
- Account type: Radio buttons for H and C (C is selected)
- Sub account: *OMN (dropdown)
- Quantity: Empty text box
- Exercise type: Early exercise (dropdown)
- Additional info: Empty text box
- Buttons: Insert, Cancel

The user has to specify the amount to exercise. The quantity field is limited to four digits. In order to early exercise a quantity with more than four digits, the user should send more than one request, to cover the whole amount of positions to exercise. The user can also specify an additional information in the Additional Info field before click Insert.

It's possible to download the historical list of exercises through the Exercise/Assignments main menu, in the Exercise Request History sub-menu.

Please notice

An early exercise can be executed also in the **Exercise Request** window, that can be reached through the **Exercise/Assignments** main menu.

6.0 Trades

This menu allows to manage executed trades registered in the clearing house system. It is possible to download the list of trades, the history of a single trade and to access the functions of trade transfer, split, open/close change and client code modification.

6.1 Trades

Using Trades menu, the user can access the following functions:

- download of company trades executed in the specified trading day;
- contracts transfer;
- international give-up;
- trades split;
- open/close change
- client code change (allows Subaccount change).
- trade history

The Trades menu is made by the following tabs:

- Trades list: it shows the trade list and allows separation, transfer, International Give Up, open/close and client code change operations and the trade history functionality.
- Transferred Trades: it shows the transferred trades list
- Separated Trades: it shows the separated trades list
- Open/Close Changes: it shows the list of trades whose open/close flag has been changed
- Client code Changes: it shows the list of operations of client code change

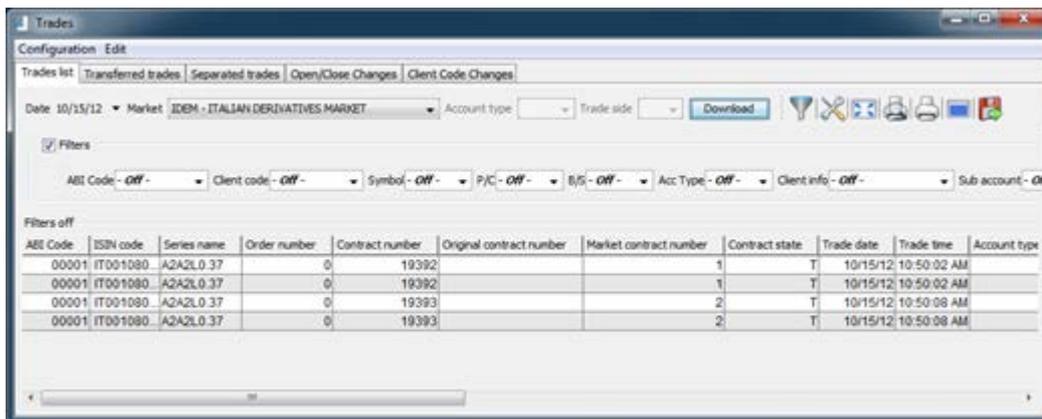

User Guide

September 2014

- Trade History: it shows all the clearing operations on the selected trade in which the customer is involved.

6.2 Trade list

This window shows all the trades owned by the customer. General Clearing Members can see also the trades of their Non-Clearing Members. The user has to select the Market and the Date (also the Account Type and the Trade Side for previous days).

The screenshot shows a software window titled 'Trades' with a menu bar (Configuration, Edit) and a toolbar. Below the toolbar, there are filters for Date (10/15/12), Market (IDEM - ITALIAN DERIVATIVES MARKET), Account type, and Trade side. A 'Download' button and several icons are also present. Below these are more filters for ABI Code, Client code, Symbol, P/C, B/S, Acc Type, Client info, and Sub account, all currently set to 'OFF'. A table titled 'Filters off' displays the following data:

ABI Code	ISIN code	Series name	Order number	Contract number	Original contract number	Market contract number	Contract state	Trade date	Trade time	Account type

6.3 International Give up

To execute an International Give up , the customer has to download the trade list. Then he has to select one or more trades and right click on them to access the International Give up function. The International Give up dialog window allows to send the selected trades at execution price to a counterpart who is a clearing house member. This function is available only on T trades. Besides performing the trade transfer, this function executes the settlement of the variation margins or the premium as well, according to the execution price of the trade. Only the clearer is due to deposit initial margins. The clearing house system processes the transfer only after the counterpart has accepted the received trade.

It is possible to transfer only trades on client account and only to counterparts other than the member itself.

September 2014

Operational steps description:

1. Only the overall amount of trade can be transferred. The Quantity field cannot be modified
2. Select Yes or Not option to access the gross position rectification function: this option allows to increase automatically positions in case a positions lack occurs in the time frame between the request sending and counterpart's acceptance, due to market executed trades on the transferred series.
3. Insert data into the Additional Info field (optional)
4. Select the ABI code and description of Receiver Member.
5. Press OK button to confirm

A confirmation message informs the user that the transaction has been successfully committed.

6.4 Trade transfer

To execute a trade Transfer, the customer has to download the trade list. Then he has to select one or more trades and right click on them to access the Transfer function.

The Trades Transfer dialog window allows to send the selected trades to a counterpart who is a clearing house member.

This function is allowed only on T+1 trades; besides performing the trade transfer, this function executes the settlement of the variation margins or the premium as well, according to the

User Guide

September 2014

execution price of the trade. It is also possible to transfer a partial number of lots of the trade thus allowing the lots to be assigned to several clearing brokers.

The CC&G system processes the transfer only after the counterpart has accepted the received trade.

It is possible to transfer only trades on client account and only to counterparts other than the member itself.

Total Quantity: Mean Weighted Price: Receiver Member:

Operational steps description:

1. Insert the quantity of the trade to be transferred into the Quantity field.
2. Select Yes or Not option to access the gross position rectification function: this option allows to increase automatically positions in case a positions lack occurs in the time frame between the request sending and counterpart's acceptance, due to market executed trades on the transferred series.
3. Insert data into the Additional Info (optional)
4. Select the ABI code and description of Receiver Member
5. Press the OK button to confirm

A confirmation message informs the user the that the transaction has been successfully committed.

User Guide

September 2014

6.5 Trade Separation

To execute a Separation (Split), the customer has to download the trade list. Then he has to select a trade and right click on it to access the Separation function.

The Separation function allows the user to split any trade into 8 trades at maximum, each one of different volume amount. The total amount of the separated trades must be equal to the volume of the original trade

This function is allowed on T and T+1.

Split quantity	Client code	Client info	Contract number
0	1231		
0	1231		
0			
0			
0			
0			
0			
0			

Operational steps description:

1. Insert the amount of trade to be split into the Split quantity field.
2. Insert data into the Client Code field (optional).
3. Insert data into the Client Info field (optional).
Repeat these operational steps until the remaining quantity will be equal to 0.
4. Select Yes or Not option to access the gross position rectification function
5. Press the Submit button to confirm

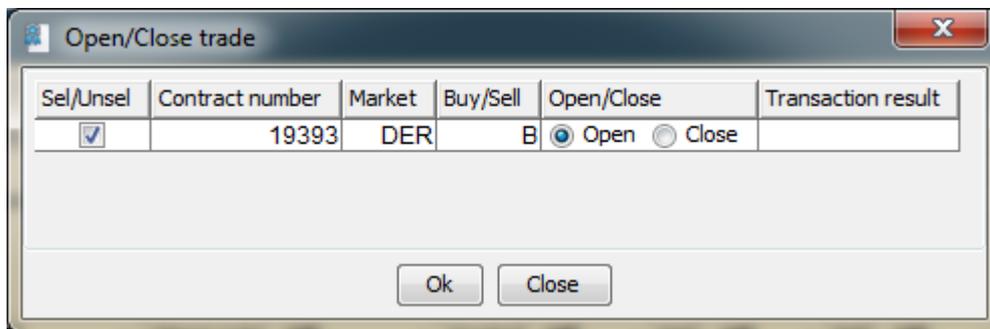

A confirmation message informs the user that the transaction has been successfully committed; the new trade numbers originated by the separation will be shown in the Contract Number column of the window dialog.

User Guide

September 2014

6.6 Open Close Change

To execute an Open Close Change, the customer has to download the trade list. Then he has to select one or more trades and right click on them to access the Open Close Change function.

Operational steps description:

1. Select the Open or Close flag option
2. Press OK button to confirm

A confirmation message informs the user that the transaction has been successfully committed.

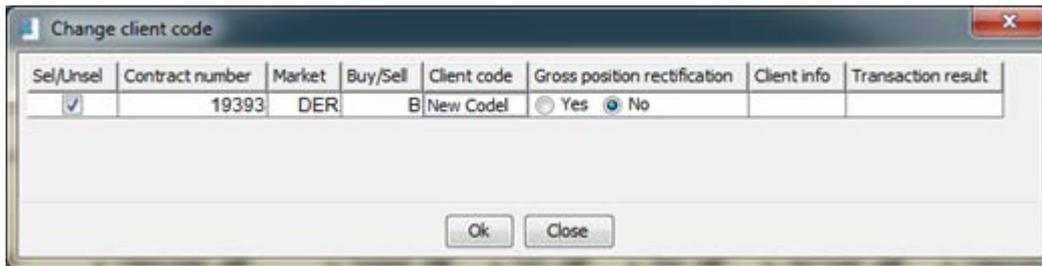

6.7 Client Code Change

To execute a Client Code Change, the customer has to download the trade list. Then he has to select one or more trades and right click on them to access the Client Code Change function.

In the Client Code Change window the user has to specify the new client code and, optionally, the client info.

User Guide

September 2014

It's also possible to insert the same Client code and the same Client info for multiple trades at the same time; in order to do this, the customer has to select more than one trade in the Trades List window and select "Client code change" in the quick selection menu; after this, it's possible to insert the same value in all the trades (in the Client code and in the Client info fields) using the copy and paste functionality(CTRL+C; CTRL+V).

The client code change allows to perform also subaccount changes; these actions are executed by the system when a client code associated to the specific subaccount (subaccount-client code link) is inserted.

6.8 Trade History

This functionality allows to view all the clearing operations done on a selected trade.

To access this functionality, the customer has to download the trade list. Then he has to select a trade and right click on it to access the Trade History function.

A window will appear, showing a line for each clearing operation done on the trade that involve the customer.

7.0 Operations To be confirmed

This menu allows to accept or reject a trade or a position transfer received from another clearing member.

7.1 Transferred Trades to be Confirmed

This window shows the incoming International Give ups and Trade Transfers which have not been accepted/rejected yet by the customer. The user has to select the reference market and click the Download button to see the data.

The user can accept/reject a incoming trades right clicking on the selected trades and selecting the Accept/Reject function.

The clearing house system will perform the transfer only after the user accepted the received trade. Received trades can be allocated on house or client account.

Please notice: Trades transferred via Automatic Give-Up don't need to be accepted by the receiver member. For this reason they are not shown in this window.

In case an International Give-up is not accepted by the end of the day, it will expire.

8.0 Exercise and Assignments

Exercise/Assignments menu allows the user to send early exercises or ex by ex requests. Furthermore, it is possible to display all the exercise requests executed on a specific date on house/client account, the exercise proposals on expiry and the assignment messages received by the clearing house.

8.1 Exercise request

The Exercise Request function allows the user to send:

1. Early exercise requests on an American type options.
2. Ex by ex exercise requests to partially or entirely exercise an “out-of-the-money” option, which would be otherwise, abandoned by the clearing house.
3. Ex by ex exercise requests to entirely abandon an “in-the-money” option, which would be otherwise exercised by the clearing house.

Each of these actions can be performed via the Exercise Request dialog:

The screenshot shows the 'Exercise request' dialog box with the following fields and values:

- Market id: IDEM - ITALIAN DERIVATIVES MARKET
- Abi code: 00001
- ISIN code: IT0010646344
- Serie Name: CPR2L
- Account type: H (selected), C
- Sub account: (empty)
- Quantity: (empty)
- Exercise type: Early exercise
- Additional info: (empty)

User Guide

September 2014

Operational steps description:

1. Select a market into the Market Id field and insert the ISIN code of the option to exercise into the ISIN Code field; you can also select the option to exercise in the Series name field that will automatically set the ISIN into the ISIN code field..
2. Select the clearing member into the Abi Code field
3. Select 'H' option in the Account type field to exercise the option on house account, or select 'C' for Client
4. Select the subaccount associated to the position to exercise in the SubAccount field.
5. Insert the volume to exercise in the Quantity field.
 - For early exercises, the quantity field is limited to four digits. In order to early exercise a quantity with more than four digits, the user should send more than one request, to cover the whole amount of positions to exercise.
 - For exercises by exception, the quantity field is limited to six digits. Every exercise by exception sent replaces a previous request already sent on the same ISIN Code / Abi Code / Account Type / Sub Account
6. Select the Exercise Type (Early exercise/Exception) in the combo box.
7. Insert any additional information into the Additional Info field
8. Press Insert to confirm

Please notice

An early exercise can be executed also in the Position List window, reachable from the Positions item of the main menu.

An ex by ex exercise can be executed also in the Expiry Exercises Request window which can be accessed from the Exercise/Assignments item in the main menu.

User Guide

September 2014

8.2 Exercise Request History

The Exercise Request History window shows the list of executed ex by ex and early exercise requests.

Early exercises sent

The user has to select the reference market, the participant (ABI Code) and click the Download button to see the data.

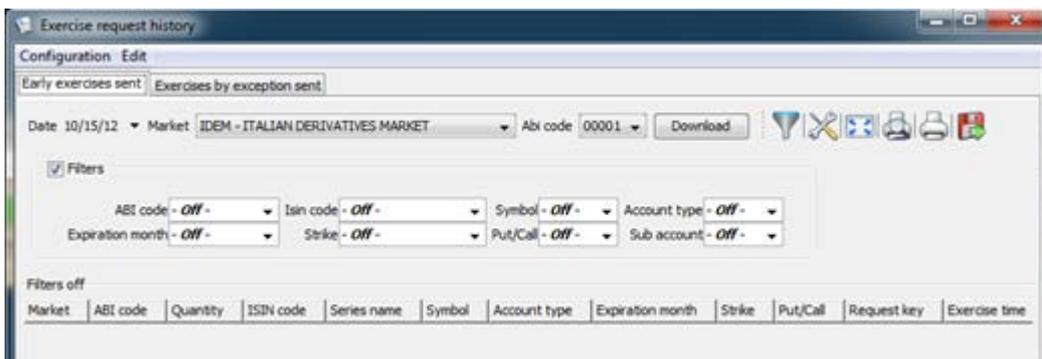

Table columns description :

Market	Trading Market
Abi code	Abi code of the company which has executed the exercise request
Symbol	Series identification code
ISIN Code	Option ISIN Code
Series name	Name of the series
Strike	Strike Price
Put/Call	Put/Call
ITM/OTM	In the money/Out of the money
Expiration month	Expiration Month
Account Type	Account Type (House/Client)
Sub account	Sub account of the position associated with the operation
Exercise time	Time exercise request has been forwarded

User Guide

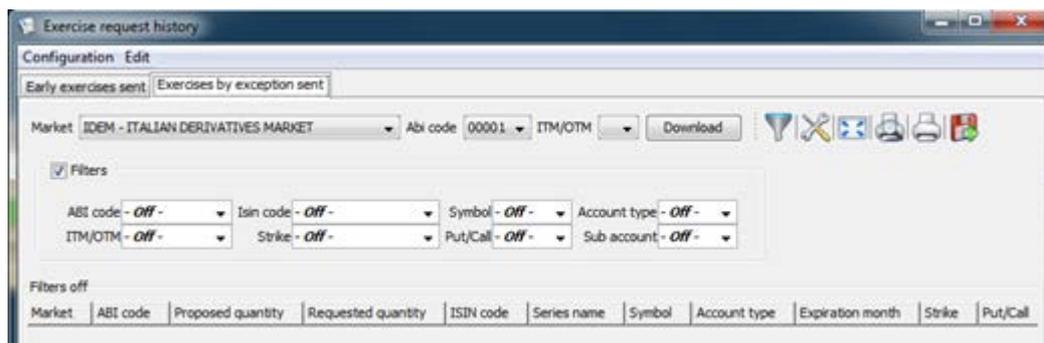

September 2014

Exercise date	Date exercise request has been forwarded
Request key	System assigned exercise request key
Quantity	Executed option quantity
Total exercise quantity	Total exercise quantity
Status	Request current validity status (P=Processed,C=Cancelled)
ITM/OTM amount	'in the money'/'out of the money' amount

Cancel Exercise Request: In order to cancel an early exercise request, the user has to download the list of the early exercises, right click on the specified request and select the Cancel option.

Exercises by exception sent

The user has to select the reference market, the participant (ABI Code) and click the Download button to see the data. The user can also select the ITM/OTM flag in order to download only 'in the money' or 'out of the money' ex by ex requests; if the flag is not specified all the requests will be shown.

9.2 Deposited guarantees

Deposited guarantees item shows collateral guarantees deposited by CC&G members or their house or client account by the CC&G member.

The screenshot shows a window titled "Deposited guarantees" with a "Configuration" section and a "Refresh" button. Below is a table with the following data:

Allocation type	Deposit ID	Repayment date	Participant	Account type	Type	Deposit date	Expiration date
	000051		95000	C	CC	4/9/08	
	000054		95000	H	CC	4/9/08	
O	002606		95000	C	BD	4/10/08	
O	002607		95000	C	BD	4/10/08	
O	002608		95000	C	BD	4/10/08	
O	002609		95000	C	BD	4/10/08	
O	002610		95099	H	BD	4/25/08	

Table columns description:

Allocation type	Allocation Type on cash guarantees (O=Option, F=Futures)
Deposit ID	Deposit ID
Repayment date	Repayment Date
Participant	Member's ABI Code
Account Type	Account Type: House/Client
Type	Deposit Type (GD=Government Bonds Deposit, BD=Equities Deposit, CC=cash)
Deposit Date	Deposit Date
Expiration Date	Expiration date
Quantity	Quantity (0 if cash)
Value	Margins hedge value (0 on not cash guarantees)
ISIN Code	ISIN Code (not valued if cash)
Description	Description
Currency	Currency
Sub account	Subaccount

User Guide

September 2014

Shares Deposits allocation/subaccount change: The user can change the allocation and the subaccount associated to one or more shares deposits. In order to access this function, the user has to right click on the a specified guarantee and select Bulk Deposit Modify.

Sel/Unsel	Participant	Account type	Deposit ID	Allocation type	Sub account	Allocation type change result	Sub account change result
<input checked="" type="checkbox"/>	95000	C	002608	<input checked="" type="radio"/> O <input type="radio"/> F	PUPA		
<input checked="" type="checkbox"/>	95000	C	002609	<input checked="" type="radio"/> O <input type="radio"/> F	*OMN		
<input checked="" type="checkbox"/>	95099	H	002610	<input checked="" type="radio"/> O <input type="radio"/> F	*OMN		

In order to modify a subaccount the user has to select a new value in the SubAccount field; to modify the allocation just select O (option) or F(future); is possible to perform both these changes simultaneously. Click the OK button to send the modifications to the system. The results will be shown into the columns 'Allocation type change result' and 'Sub account change result'.

10.0 Report

This window shows the list of clearing reports provided by the clearing house, together with the Order and Trades files provided by the trading system.

10.1 Report

This window shows the list of the clearing reports available on a specified date. Some reports are available in a multiple format, so the user can select to download them in TXT, PDF or XML. A GCM (General Clearing Member) can manage and download also its NCM reports simply selecting the corresponding tab.

GCM	Type	Description	PDF	XML	TXT	ZIP
	D12A	Trades and Position Transfer		1.07 bytes		
	D13A	CCP Positions				
	D14A	Variation/Premium Margins		22.08 KB	17.01 KB	
	D18A	Stock Option - Proposed Exercises				
	D18B	Stock Option Expiry - Assigned Position				
	MD01	Options Exercised/Assigned to be settled				
	MD51	Expired Futures Positions to be settled				
	MD55	Deliveries for CCP services (incorporates options and futures)				
	MP01	Option Open Positions				
	MP02	Option Open Positions in sub accounts				
	MP10	Failed Position				
	MP11	Expired Options				
	MP30					
	MP51	Futures Open Positions				
	MP52	Futures Open Positions in sub accounts				
	MT02	Options Exercised/Assigned				
	MT05	Net Positions of Option Contracts	15.41 KB			
3102	MT05	Net Positions of Option Contracts	32.23 KB			
	MT06	BCS Transfers				
	MT12	Option Contracts				
	MT14	Options transferred under give-up				
	MT15	Options Received under give-up	1.04 bytes			
6254	MT15	Options Received under give-up	1.04 bytes			
	MT48	Monthly Fee Report				
	MT55	Net Positions of Futures Contracts				
	MT62	Futures Contracts	1.84 bytes			
	MT64	Futures transferred under give-up	1.19 bytes			
	MT65	Futures Received under give-up				
0002	MX01	Expiring Options	1.04 bytes			
0003	MX01	Expiring Options	1 bytes			

User Guide

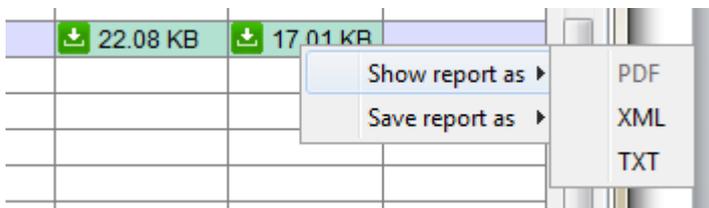

September 2014

Table columns description:

Type	Report type identification code
Description	Report description
PDF	PDF Report availability status and zipped file size
XML	XML Report availability status and zipped file size
TXT	TXT Report availability status and zipped file size
ZIP	ZIP Report availability status and zipped file size (Only for RISK file)
GCM	GCM Participant Code the report refers to

Operational steps description:

1. Select the Date and press Download button to view available reports for that date.
2. If you are a GCM (General Clearing Member), more than one tab will appear, allowing to choose the participant for which you want to download the report.
3. Select the row of the desired report and right click on the row. Depending on the availability of the formats, you will be able to open them ("Show Report as") or save them in the local PC ("Save Report as").

User Guide

September 2014

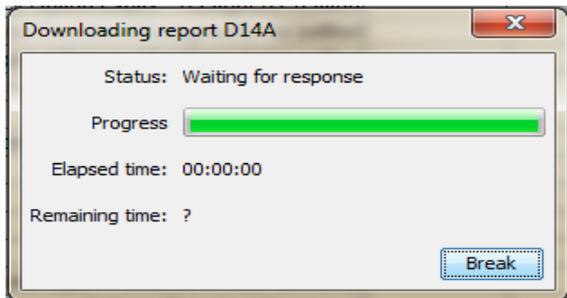

Please notice

For Risk file only the "Save report as" functionality is available.

The report window always shows the most recent version of a report, in case more than one update is sent during the same day.

After the selection, the download of the report will start, showing a progress bar that will alert about the remaining and the elapsed time for this action.

The user can abort the download clicking on the "break" button and then on "Close".

11.0 Tools

This menu allows to view clearing messages and intraday margin calls.

11.1 Clearing messages

This window shows the list of free-text messages sent by CC&G operators (i.e. technical issues, urgent notifications etc...). This window will be automatically shown to the customer in case of new notifications.

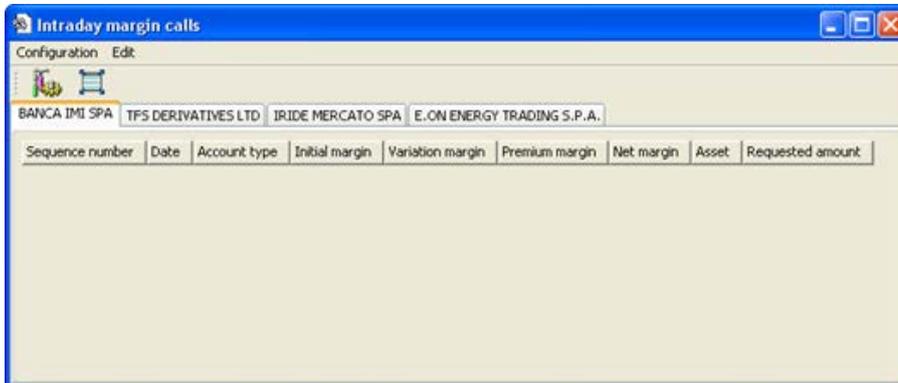

User Guide

September 2014

11.2 Intraday Margin Call

This window shows the request of additional intraday margins issued by CC&G to the participant.

This window will be automatically shown when a new intraday margin call will be required by CC&G to the clearer or to one of its NCMs.

In this case one tab for each NCM will be shown.

Table columns description:

Sequence Number	Identifier of the request
Date	Date of the request
Account Type	Account Type
Initial Margin	Initial Margin
Variation Margin	Variation Margin
Premium Margin	Premium Margin
Net Margin	Net Margin
Asset	Guarantees Amount
Requested amount	Requested Amount

12.0 Appendix A – Regular Expressions

A regular expression is a string (sequence of characters) built with a proper syntax, which express characteristics shared by a set of strings.

Assume you intend to use a notation to indicate all the strings which begin by 'a' and end by 'o': we will write 'a*o' to indicate all these strings which share the characteristic to start by 'a' and end by 'o'. The following strings belong to the set mentioned above 'ao', 'ago', 'also' but not 'aristotelis' or 'psycho'. The character '*' used into the regular expression indicate whatever sequence of characters.

Let's see the syntax to be used for regular expressions and the meaning of each abbreviation:

x	"x" character
[]	Finds a single character into the brackets. For instance,[abc] looks for an 'a', a 'b' or a 'c'. [a-z] is an interval and finds every small character of the alphabet. Mixed cases can occur: [abcq-z] looks for b, c, q, r, s, t, u, v, w, x, y, z, just as [a-cq-z].
[^]	Finds every small character not included into the brackets. For instance, [^abc] finds all the characters different than "a", "b", o "c". [^az] looks for every character different than small letter
^	Indicates the beginning of the string
\$	Indicates the end of the string
()	Define a sub expression
X?	X which recurs 0 or one time
X*	X which recurs 0 or several times
X+	X Which recurs at least once
X{n}	X which recurs twice exactly
X{n,}	X which recurs at least n times
X{n,m}	X which recurs at least n times and no more than m times
XY	X followed by Y
X Y	X or Y

User Guide

September 2014

X and Y are regular expressions

Some examples follows:

$[ab]^*$ = all the strings which start by a or b

$[\text{^}a-c]^*a\$$ = all the strings which start by "a", "b" e "c" but which end by "a"

$*s\{2\}^*$ = all the strings which have two "s" at any point of the sequence

$*cu(t|p)$ =strings which end by "cut" and "cup"
