# Installation Guide

Step 1：Pull out the Head unit

Step 2：Disconnect the cables

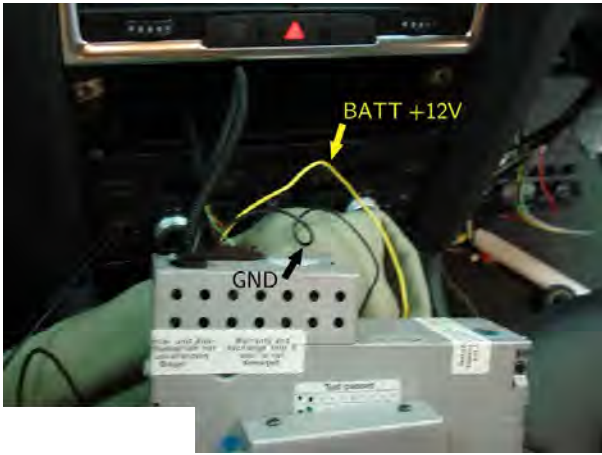

Step 3：Change the MOST connector
(indicated with red circle)

Step 4：Eject the original optical input cable A
(the one has light)

AUX optical cable 1

AUX optical cable 2

Step 5：Connect the original optical input
cable A (ejected in step 4) to the
affiliated AUX optical connector 1.
Insert the affiliated AUX optical cable 2
to original input.

Step 6：Yellow cable is BATT +12V
Black cable is GND

CAUTION:

To prevent sound noises, please try not to bend the optical cables.

Operation

- Go to CD changer
- The original CD1~6 will be moved to CD7~12

- CD1 will become the aux-in source
- If you wish to play the aux-in source (from DVD/DTV…etc), just simply select CD1. The sound will synchronize with picture.
