2 Introduction

This document describes the steps that have to be performed in order to correctly install the NeoLogica DICOM Anonymizer Pro software on a target computer.

The DICOM Anonymizer Pro software can be installed and executed on a variety of different platforms, including Windows, Mac OS X, and Linux. A different *Installer* application is provided for each supported platform; please select and use the *installer* which is appropriate for your target platform. Here is a list of available *Installer* files and their association with each platform:

- Windows: DICOMAnonymizerPro_win_32bit.exe o DICOMAnonymizerPro_win_64bit.exe
- Mac OS X: DICOMAnonymizerPro_macosx.dmg
- Linux: DICOMAnonymizerPro_linux_x86.sh o DICOMAnonymizerPro_linux_amd64.sh
- Other Java-enabled OS: DICOMAnonymizerPro_install_java.zip

3 Setup procedure

In order to install the software on the target PC, please double-click on the installer file which is appropriate for your platform, as explained in the previous selection. The automatic *Installer* application will show up, allowing user to choose the language:

🚼 Selez	ione lingua	
	Selezionare una lingua: Italiano	•
		OK Annulla

After choosing the language, the short installation procedure will start.

reologica
