
Attention!

- ✘ Don't use the canopy in strong wind! Dismount the side walls and close the tent in case of storm or snow.
- ✘ Alutent canopies are designed for temporary solution against different weather conditions. Please use the pegs and ropes for anchoring the canopy to the ground.
- ✘ The top cover may fade if heavily exposed to sun.
- ✘ Don't close the tent in a wet condition. Close it half way and wait for it to dry.
- ✘ Don't leave the canopy open outdoors for extended periods as rain may be collected on the top cover.
- ✘ Transport the packed canopy in an upright position.

Warranty

In case of normal usage we provide 1 year of warranty in the following cases:

- ✓ tearing of the top and side cover
- ✓ breaking of the plastic joint parts
- ✓ breaking of screws
- ✓ damage to aluminium poles (legs, spreaders)
- ✓ damages of sewn or sealed areas

We do not take responsibility for any usage of the canopies (breaking, theft, icing, storm, etc) or damages caused over time by normal usage!

We provide full repair service for any Alutent product regardless of the nature of the damage.

Date of purchase:

User Manual

- 1.) Unpack your Alutent canopy and put it on its legs in an upright position.
- 2.) The tent may be set up easiest by two people on opposite sides of the frame. Its ill advised to try opening it alone as the frame may strain and break.
- 3.) Hold on to the spreader poles of the frame on opposite sides, lift the frame and open it all the way.
- 4.) Fasten the spring-lock on each leg by pushing the plastic joint parts upwards.
- 5.) Check the cover on each corner of the frame.
- 6.) Erect the tent to its maximum height by loosening up the spring-lock and pulling out each leg.
- 7.) Secure the tent to the ground by anchoring it with pegs and ropes (included in the package).
- 8.) Mount the side walls. Start on the top by attaching the Velcro parts and continue with tightening the edges to the legs.
- 9.) Place the leg weights on the legs (sold separately).
