WWW.IMAGILIGHTS.COM

Thank you for having selected an IMAGILIGHTS® lamp.
This multicolour ambiance LED lamp is rechargeable, waterproof and highly resistant to shock.
It may be used inside, outdoors, suspended or not, and in a swimming pool.
This lamp is resistant to UV radiation, chlorinated water, and saltwater.

Pack contents
1. Lamp
2. Induction charger
3. Electrical adapter
4. Infrared remote control (not included with models 20, 20H, 21, 21H, 22, 22H, 30, 30H, 31, 31H, 32 & 32H)
5. User guide
6. Textile lanyard to hang the lamp (depending on the model)

Usage precautions

Carefully read this guide before using the device and keep it handy for future use.
Use the lamp in conformity with the utilization precautions ; failure to do so will void any warranty.
IMAGILIGHTS® disclaims any responsibility for the incorrect use of the product or the transformer with another product which would be defective, dangerous or inappropriate.

Charger
- Do not use it near a heat source or expose it to fire.
- Keep it outside the reach of young children.
- Do not touch the charger or the charger base while charging.
- Do not try to open the charger ; in case of faultiness, please return it to your vendor.
- Disconnect the charger after charging the lamp.
- Do not use outdoors and keep it in a dry area.
Lamp
- Do not expose the lamp to fire or a heat source.
- Do not try to dismount or open the lamp to avoid any risk of electrical shock or altering its waterproofing ; failure to comply will automatically cancel your warranty.
- Do not connect the lamp's base to another device.
- Do not try to charge the lamp with a charger other than the one supplied in your pack.
- Although solid, bad handling could scratch the diffuser.
- Avoid extended periods in water, the pool or bright sunshine.

First usage

Connect the charger.
Fully charge the lamp's battery by placing the lamp on the charger for at least 6 hours.
A RED charge indicator appears on the charger when loading.
The battery supplied with this pack does not have a charge accumulator and will require 5 or 6 complete charges/discharges before it is fully powered.

Lamp charging

- Charging : a RED luminous indicator on the induction charger plate indicates to you that the lamp is charging.
- End of charging : a GREEN luminous indicator on the induction charger plate indicates to you that the lamp is fully charged.
Important: the light automatically turns off when placed on the induction charger plate. This is to protect the long life of the battery and to assure that charging and discharging is not done simultaneously.

READ "IMPORTANT NOTICE" ON LAST PAGE OF THE ENGLISH VERSION!!!

Autonomy

To guarantee the maximum autonomy of your product, please conform to the «first usage» precautions.

LED MODULE	MODEL N° (see models on next pages)	WATT CONSUMPTION	BATTERY/MAH	CHARGING TIME/HOURS	HOURS OF LIGHT

Information:
* The colour "NATURAL WHITE" is the colour demanding the most power from the battery.
* The colour "WARM WHITE" is the colour demanding the most power from the battery. (ONLY FOR THE SHAPE MODELS N° 20, 20H, 21, 21H, 22, 22H, 30, 30H, 31, 31H, 32, 32H)
The life time depends on the indoor/outdoor temperature.

Usage instructions of the buttons on the back of the lamp

1 + 2 : COLOURS (UP and DOWN)
These are the 24 pre-programmed colors.

3 : MIX /PAUSE
When this button is pressed, the unit will start a very progressive 160.000 color "scroll" that will take around 14 minutes, and will continue without interruption.
When this button is pressed again, then that chosen color will be fixed.
When again pressed, then the cycle of 160.000 colors will continue.

4 : BRIGHTNESS: This is the intensity of the light that can be set in 4 steps.

5 : RETRACTABLE METAL HANGER RING: This is to hang the unit.

6 : The UP button will function as an ON/OFF command when held for 2 seconds.

Usage instructions of the buttons on the remote controller

A : ON/OFF

B : MIX/PAUSE
When this button is pressed, the unit will start a very progressive 160.000 color "scroll" that will take around 14 minutes, and will continue its cycle without interruption.
When this button is again pressed, then that chosen color will be fixed.
When again pressed, then the cycle of 160.000 colors will continue.

C + D : SELECT COLOURS with the words "UP and DOWN"
These are the 24 pre-programmed colors, up and down.

E : BRIGHTNESS (4 steps)
This is the intensity of the light that can be set in 4 steps.

F : CANDLE MODE (2 steps)
The candle effect in 2 different modes = yellow and orange.

The remote operates on one Lithium battery CR2025 3V

The colors and the intensity of the light (=brightness)
- 24 pre-programmed colors including 2 different types of candle effect
- Self changing slow motion mix color mode (160.000 colors) + with the possibility to fix a color
- The intensity (brightness) of the light in 4 steps

The pre-programmed colours :

1	NATURAL WHITE	9	YELLOW	17	DARK BLUE
2	GALACTIC WHITE	10	WHITE/GREEN	18	PINK LIGHT
3	CANDLE MODE LIGHT	11	LIGHT GREEN	19	PINK MEDIUM
4	CANDLE MODE DARK	12	DARK GREEN	20	PINK DARK
5	DARK RED	13	TURQUOISE LIGHT	21	SALMON
6	LIGHT RED	14	BLUE/TURQUOISE	22	PURPLE LIGHT
7	ORANGE LIGHT	15	BLUE/GREEN	23	PURPLE DARK
8	ORANGE DARK	16	PURPLE/BLUE	24	PINK/PURPLE

Important : the 1st colour used FOR MODELS N° 20, 21, 22, 30, 31, 32, 20H, 21H, 22H, 30H, 31H, 32H is WARM WHITE

- 12 or 27 or 56 or 56 flat led (depending the shape) high intensity white and color LED's offering 160 000 colors.
- Waterproof module : Class IP 68.
- Charger : Input 100-240V AC~50/60Hz – Output DC 7.5V 1.5A.
- Battery : Li-Polymer 1200 or 2000 or 4000 or 2800 mAh. (depending the shape of the lamp)
- Polyethylene plastic diffuser, resistant to UV and shocks.
- Lamp's ideal operating temperature range : 10°C to 45°C.
- Manufacturer's warranty : 1 year ; certifications : see last page of the user guide.
!!! Important: Charger INDU 8 (only operates with the following adapter): Input 100-240V AC~50/60Hz – output DC 7.5V 5A.

Recycling
You should not throw this device away in your household garbage.
Contact the appropriate service in your community to learn what is the best way to dispose of this device.
In fact, electrical and electronic products contain substances harmful to human health and the environment and must be adequately recycled.

Information

IMAGILIGHTS®   info@imagilights.com
The components of this lamp are not replaceable.   www.imagilights.com
If any part is damaged, this "product" or "light" must be discarded.

IMPORTANT NOTICE

- It is recommended to empty (discharge) the full capacity of the battery, before recharging fully.
- Once fully loaded and a GREEN luminous indicator on the induction charger plate is shown, please remove the unit from the plate.
- Do not leave the unit too long in the water, to avoid dirty water markings on the level of the waterline.
- The light automatically turns off when placed on the induction charger plate, this to protect the long life of the battery and to assure that charging and discharging is not done simultaneously.
