Preparation

You will need to purchase Butane gas bottle size 7kg or 15kg and a 28mbar regulator to operate this barbecue which can be

obtained from your nearest gas retailer.

Caution: The gas hose connecting the appliance to the gas bottle and the length recommended which shall not exceed 1.5 m. Only use 5 kg gas bottle size on the bottom shelf of the Barbecue Gas Grill.

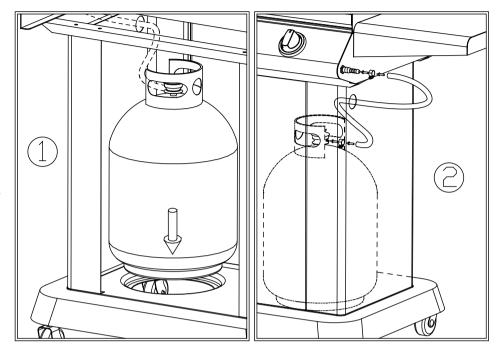

Gas bottle connection

How to connect a gas bottle:

- Check that all control knobs and regulator are in off position
- Connect the hose to the hose nozzle of the regulator tightly.
- 3. Plug the regulator onto the gas bottle valve.
- Switch on the regulator to turn on gas supply.

How to disconnect a gas bottle:

- Check that all control knobs and regulator are in off position
- 2. Pull up the regulator from the gas bottle valve.

Note: Always test gas line for leaks at connector with soapy water finishing all connections.

Ay out from any source of ignition when changing the gas bottle.

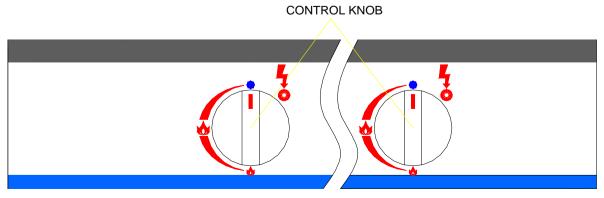

Operation Instructions

Ignition system lighting:

- 1. Raise the grill lid.
- 2. Turn on the gas supply at gas bottle valve.
- 3. Press and turn control knob on barbecue anti-clockwise to high position.
- 4. Repeat step 3 immediately several times if burner does not light.
- 5. Adjust flame size by turning the knob.

Manual lighting:

- 1. Press and turn the left control knob anti-clockwise to the high position.
- 2. Light the left hand burner immediately through the gap between the front of the drip pan and the barbecue body.
- 3. Remaining burners will cross light from the left to the right.

Note:

- 1. Do not use more than 1 burner on high, when cooking with the lid in the closed position. This may cause damage to the barbecue and lid. (Not applicable in Model "JH-HXFS series")
- 2. Never use more than two burners on high position.

Caution: If burner fails to ignite, turn control knob off clockwise and also turn gas bottle valve off. Wait five minutes before attempting to re-light.

Cleaning instructions

- 1. Turn the burner on for 15-20 minutes. Grease drippings will be burned off from your grill as well as your appliance is cold before continuing.
- 2. Grids should be cleaned periodically by soaking and washing in soapy water.
- 3. The interior surfaces of the grill housing cover should be washed with hot, soapy water. Use a wire brush, steel wool or a scouring pad to remove stubborn spots.
- 4. Periodically check the burner to see that it is free from insects and spiders that may clog the gas system, deflecting gas flow. Ensure to clean venturi pipe area.
- 5. Any modifications of this appliance may be dangerous and are not permitted.

Note: Your barbecue is easy to clean with minimum effort, just follow these helpful hints for cleaning convenience.

Burner Maintenance

- 1. Check throat, main opening and ventilation holes of each burner and pilot flame tube regularly for insect nests. Ensure the nests are cleaned thoroughly before used.
- 2. Cleaning the burners periodically and make sure that the ports are free of obstructions.
- 3. Replace burners in the correct position and dry by lighting each one to avoid subsequent corrosion.

Storage

- 1. Your gas bottle must be stored outdoors in a well-ventilated area and must be disconnected from your barbecue when not being used. Ensure that you are outdoors and away from any sources of ignition before attempting to disconnect your gas bottle from your barbecue.
- 2. When you are using your barbecue after a period of storage, please ensure to check for gas leaks and check for any obstructions in the burner etc. before using. Also follow the cleaning instructions to ensure barbecue is safe.
- 3. If barbecue is stored outdoors ensure to check that all areas under the front panel are free from any obstructions (insects etc.). This area must be kept free as this may affect the flow of combustion or ventilation air.
