Package list:

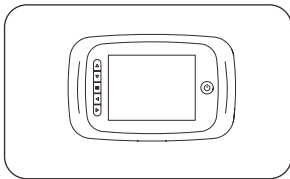

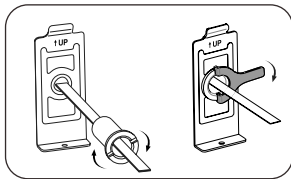

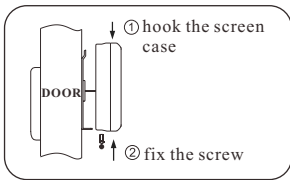

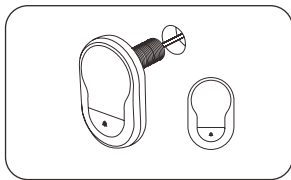

- ① LCD Screen
- ③ 4 AA batteries
- ⑤ Camera
- ⑦ Tightening tool

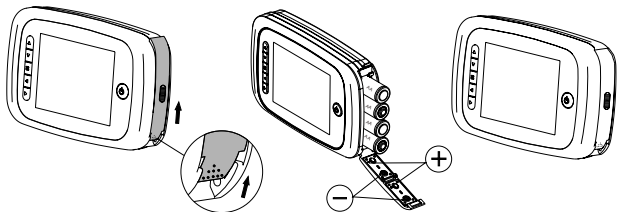

- ② 1 fixing screw
- ④ Holding plate
- ⑥ Locking barrel

Installation:

1. Replace the existing door viewer or drill a 14mm hole in the door at the required height, insert the camera from the outside. Making sure the washer is fitted between the camera and the door. Ensure the bell push is at the bottom and adjust so that the camera is perpendicular to the horizon.
2. Peel off the 3M stickers on the holding plate and fit it over the end of the lens, then screw the locking barrel on to the threaded sleeve of the camera and tighten. This will hold the plate to the door. Make sure that the arrow on the plate points upwards.
3. The data wire should be fully plugged in at the back of the screen; excess wire should be gently placed into the groove at the back of the screen.
4. Hook the screen over the bracket at the top of the plate and secure with one small screw through the hole at the bottom of the screen case.

Installation and replacement of batteries:

Installation:

1. Slide the lid according to the pointing and open it upwards.
2. Put in the batteries according to the “+” “-” sign on the lid.
3. Take the reverse steps to close the lid.

Attentions:

1. DO NOT overexert when open and close the lid to avoid any damage to the lid.
2. DO NOT press the lid to the opposite direction when it's open to avoid damage to the lid.
3. When the low battery indicator is on, please replace the batteries in time to avoid any damage to this product by battery weeping.
