MERLIN MAIL™ Voice Messaging System

Quick Reference Card

Voice Mail Service portion of the Voice Messaging System acts like a built-in answering machine. Callers from inside and outside your company can leave messages in your mailbox, which you can listen to, forward, save, or discard. A password you create keeps messages private. You can also send messages, respond to messages, or add your comments to a message and forward both to other people in your company.

HELPFUL HINTS

- Program a button on your phone for one-touch dialing into the MERMAIL system.
- You can dial the next sequence without waiting for a greeting or prompt to finish.
- If your phone has a display, "Call MERMAIL" appears and your green message lamp goes on when a message is sent to your Mailbox. Deleting your message removes the display message. (Even if multiple messages are left, only one "Call MERMAIL" appears.)
- If you have a phone without a display, press **MESSAGE** to turn off the message waiting lamp when messages remain in your Mailbox.
- If you have a basic Touch-Tone phone, lift the handset, then press **[#]** **[5]** **[4]** to turn off the message waiting lamp when messages remain in your Mailbox.
- To call for your messages from outside your company, call in on a line answered by the MERLIN MAIL system or ask your System Operator to transfer you to the Voice Mail extension.
- See "Using the Directory" to look up other users' extensions.
- When your Mailbox reaches its storage limit, the "Mailbox Nearly Full" warning plays.
