

AM-20 Lighted Attach-A-Mag

Flexible clamp-on LED lighted magnifier

The Carson Lighted Attach-A-Mag is a fully adjustable, flexible arm, hands free LED lighted magnifier with a clamp-on base that attaches to most tabletops. Its large 2x power lens provides sharp, crystal-clear images. Super-Bright LED lights ensures a bright clear image. Operates on three 386 (SG12) button cell batteries (included). The Lighted Attach-A-Mag is great for reading fine print, ideal for hobbies, model building, small electronics, and perfect for fly-tying.

Directions:

Simply attach magnifier to surface using clamp-on base, and adjust flexible arm to position lens. Loosen or tighten screws along flexible arm as needed to adjust tension. To operate light simply flip the switch located on top of the housing unit at the base of the lens.

To Replace Batteries:

Carefully pull back light housing unit and "snap" off from magnifier neck. Remove battery door and replace with three 386 (SG12) button cell batteries following polarity indicators marked on the battery door. Replace battery door and snap light housing unit back in place.
