

ADDONICS TECHNOLOGIES

Model: MSXUDEU

I. Connecting cables

Note: When both eSATA and mini USB connections are used, mini USB takes precedence over eSATA.

a. Mini USB connection

Connect the USB cable provided to the mini USB port on the pocket micro SATA UDD and the other end to the USB port on the system.

b. eSATA connection

1. Connect the eSATA cable provided to the eSATA port on the pocket micro SATA UDD and the other end to the eSATA port on the system.
2. Connect the 5V power adapter center negative provided to the power connector on the pocket micro SATA UDD.

II. LED information

When power is provided to the Internal Micro SATA UDD, the power LED will light up. The drive activity LED will blink when files are accessed and transferred on the drive.
