ICS Series  
ICS 1030

### A HI PERFORMANCE LCR THAT CAN STAND WITH THE BEST TWO CHANNEL MONITORS

The left and right speaker in an audiophile two-channel system can uncannily recreate all the complexity, detail and space of a live performance, while the center channel speaker is regarded as the most important speaker in any multi-channel, surround system. LCR's, are a multipurpose design for both of these critical applications. The ICS 1030 is a D'Appolito Array, designed by Snell chief engineer, Joe D'Appolito. As an Left & Right it can haunt you with precision and soundstage, while as a Center it captures every whisper, every nuance. Together they set the tonal balance, called timbre, for the rest of the system. The ICS 1030 takes its drivers and crossover design of the acclaimed Snell LCR7 and integrates them into a utility, in-cabinet LCR. As such, it is designed to fit into furniture or millwork, and is tuned to compensate for the sonic problems that these cabinet boundaries cause. The result is a speaker that perfectly matches the LCR7, and its two cousins the AMC 830 In-Wall and AMC 6030 In-Ceiling Monitor. Any combination of these four models can be mixed and matched to make a fully integrated system that will work with any room décor.

# ICS 1030

Design	Acoustic Suspension D'Appolito Array		
Frequency Response	75Hz-22kHz±3dB		
Sensitivity	90dB		
Nominal Impedance	4 Ohms		
Crossover Frequency	2.0kHz		
Recommended Amplifier Power	50-300 Watts		
Maximum Output (per pair)	110dB		
Placement	Wall, or Shelf		
Dispersion Angle (±1dB of on-axis response)	Horizontal: ±45 degrees		
	Vertical: ±15 degrees		
Drive Units	Tweeter: 1-inch SEAS Silk Dome		
	Woofer: Two 5.25-inch SEAS Treated Paper, 5mm Excursion		
Video Shielding	Standard		
Dimensions	Height: 19-inches		
	Width: 7-inches		
	Depth: 8.75-inches		
Finishes Cabinet:	Textured Black Paint		
Grille:	Black Cloth over MDF Frame		
Manufactured by	Snell Acoustics, PO 3717, Peabody MA 01960
