

**THE  
LOGOS  
FROM  
MARTIN-  
LOGAN**

**CENTER  
CHANNEL  
SPEAKER**

Until now, a center channel speaker with the accuracy and openness of Martin-Logan electrostatic speaker technology was only a vision. Today, that vision is fulfilled with the introduction of the Logos.

Starting with a clean sheet of paper, the engineers and industrial designers at Martin-Logan began a quest to design a reference standard home theatre system. The results are astonishing.

Their work produced an innovative three-way speaker design featuring a curved electrostatic midrange. The Logos contains a shielded woofer and dome tweeter that does not interfere with the operation of TV tubes. It also boasts a field-cancelling crossover design that electrically eliminates the magnetic fields generated by the crossover itself.

A tour de force, the Logos combines soft curves with the finest materials to create a compact, yet stunning design. The Logos is a triumph of art, engineering and imagination.

# SPECIFICATIONS

<b>Frequency Response</b>	<b>THE LOGOS™</b> 75-20,000 Hz ± 3dB
<b>Sensitivity</b>	89dB/2.83 volts/meter
<b>Impedance Magnitude</b>	Nominal: 5 ohms • Minimum: 2.75 ohms
<b>Crossover Frequency</b>	300, 3,500 Hz • 12dB per octave
<b>Woofer</b>	6.5" (16.5 cm) magnetically shielded in a sealed cabinet
<b>Mid-range</b>	Two 17" x 9.25" (43.2 cm x 23.5 cm) curved electrostatic panels, vapor deposited polyester film with proprietary insulated stators
<b>Tweeter</b>	.55" (1.4 cm) titanium composite dome, ferro fluid cooled voice coil
<b>Recommended Amplifier Power</b>	To be matched with system; minimum 50 watts
<b>Weight</b>	62 lbs (28.1 kg)
<b>Dimensions</b>	40.6" W x 9.6" D x 11.8" H (103.1 cm x 24.4 cm x 30 cm)

*The versatile Logos can be mounted almost anywhere, and comes complete with hardware that includes a bracket for wall or ceiling mounting, rubber bumpers for placement on your TV, and spikes to secure the speaker on carpeting.*
