

# FILM 2 SD PRO

PREMIUM 9MP 35MM FILM AND SLIDE SCANNER

## Enjoy ultra-high resolution scans of your favorite pictures at home or on the go.

Rediscover your long-lost 35mm slides and film negatives with FILM 2 SD PRO. This high-quality scanner transfers your images directly onto an SD card so you can enjoy your old pictures with the latest technology. Thanks to FILM 2 SD PRO's large, full-color LCD screen, you don't even need a computer to make it work! This ultra-high resolution scanner creates up to 9 megapixel scans for stunning realism.

You can view your images on your digital picture frame, your SD card slot equipped television, your micro SD slot equipped mobile phone, computer, and other portable devices. Imagine having all of your memories with you at home or anywhere you go.

FILM 2 SD PRO is fast and easy to use. Just one button starts the scan, which takes an average of two seconds or less! Convenient auto focus, auto exposure, and auto-color balance mean you don't have to be a photo whiz to make great digital images. FILM 2 SD PRO does all the hard work for you.

FILM 2 SD PRO has a built-in SD card slot, so you can scan directly to most SD, SDHC, and micro SD cards without needing a computer. FILM 2 SD PRO comes with an SD card to get you started, and additional cards are available from virtually any electronics retailer. If you have a computer, you can also connect FILM 2 SD using the included USB cable. When connected to your Mac

or PC, FILM 2 SD PRO becomes a handy SD card reader, so you can drag and drop your pictures from the card onto your hard drive.

FILM 2 SD PRO makes high-resolution, scans of all of your color and black & white slides and film negatives. FILM 2 SD PRO is portable, lightweight, and has an ultra-small footprint so you can take it with you and scan your friends' and family's pictures too. Start rediscovering your old pictures today with FILM 2 SD PRO.
