

When Genesis makes a petite loudspeaker for small rooms, you can rest assured that it will produce nothing less than *absolute fidelity*™. To achieve the delicacy, speed, transparency, and dynamic bass response of the larger Genesis 3-way systems in a little 2-way loudspeaker, we developed the world's first **solid-titanium cone mid-woofer**.

This made the Genesis 7.1p possible – a tiny loudspeaker with a big voice. Despite its svelte proportions, the G7p displays much of the familial sound of its larger brethren – effortlessly dynamic with intense foot-tapping musicality.

Used as a stereo pair on appropriate loudspeaker stands, the diminutive G7p demonstrates spectacular imaging and soundstage. With a rear tweeter driven out of phase from the front tweeter, the G7p is a dipole in the high frequencies, enhancing “air”, imaging and soundstage depth.

The G7p produces prodigious bass from a small sealed cabinet. Yet, it is also designed with a view of the entry-level amplifiers that are likely to be used to drive it. Unique among small monitor loudspeakers, the G7p features a passive bass contour control that allows it to deliver more bass when driven by more capable amplifiers.

A speaker level throughput allows convenient connection to any Genesis ServoSub™ for full frequency response. With better amplification, the G7p is able to scale the sonic heights like its more expensive brethren.

Being the baby of the family, the G7p is built to the same exacting quality as the larger Genesis speakers. The drivers are mounted on a front baffle that is a full 1 ½ inches thick in a cabinet that has the highest level of build quality. The crossover is built with the same high quality components used throughout the Genesis range.

Aesthetically, the Genesis 7-Series reflects the artistry and sculptural elegance of the highly regarded Genesis 6-Series that was featured in The Architectural Digest. Gorgeous natural wood veneers, and high-gloss automotive finishes are used to ensure that the Genesis 7p never goes out of style.

Genesis Advanced Technologies 7.1p Petite Loudspeaker

Frequency Response	52Hz to 36kHz, ± 3dB
Sensitivity	86 dB 1 watt 1 meter
Max/Min Tube Power	150/45 watts
Max/Min Solid State Power	250/60 watts
Input Impedance	6 ohms (nominal)
HF Transducers	Two Genesis 1" circular ribbon (front & rear)
Mid-Woofer Transducer	Genesis 5.5" titanium cone
Controls	Front Tweeter Level (± 1.0 dB) Bass Contour Control Rear Tweeter Defeat
Inputs	Speaker level 5-way binding posts
Outputs	Speaker level throughput with 5-way binding posts
Dimensions	H 16 ½ " x W 8 " x D 11 " H 420mm x W 205mm x D 280mm
Weight	24 lbs (11 kg)
Finish Options	Maple body with Rosewood Shield Maple body with Olive Burl Shield Cherry body with Brazilian Rosewood Shield Arctic Silver body with Metallic Slate Grey Shield
