# Memory Cards

## SanDisk CompactFlash®

SanDisk CompactFlash allows you to carry more images, voice and text. It's perfect for digital cameras, digital camcorders, handheld PCs and voice recorders. It is 100% compatible with all CompactFlash-compliant devices.

## SanDisk SmartMedia™

SanDisk SmartMedia is ideal for digital cameras. It is 100% compatible with all SmartMedia-compliant devices.

## SanDisk xD-Picture Card™

The SanDisk xD-Picture Card provides the highest capacity in one of the smallest memory formats available today. Featuring rapid data transfer speeds, it is ultra compact for the most portable devices. The SanDisk xD-Picture Card is fully compatible with all xD-compliant devices.

## SanDisk MultiMediaCard

The SanDisk MultiMediaCard lets you carry more images, data and voice. This small but rugged memory card is great for voice recorders, smart phones and digital camcorders. It is 100% compatible with all MultiMediaCard-compliant devices.

## SanDisk SD™

SanDisk SD is ideal for digital cameras, voice recorders, smart phones and digital camcorders. The SD card also has a security feature for protection of copyrighted data. SanDisk SD cards are 100% compatible with all SD-compliant and MultiMediaCard-compliant devices.

## SanDisk Memory Stick®

SanDisk Memory Stick is a high capacity and high performance memory card. It is ideal for digital cameras. SanDisk Memory Stick is compatible with all Memory Stick-compliant devices.

## SanDisk Memory Stick PRO™ and Memory Stick PRO Duo™

SanDisk Memory Stick PRO and Memory Stick PRO Duo are the ideal solutions for anyone who wants to capture and play back DVD-quality video in real time, or store high-resolution digital images and more! Both cards provide high performance, fast data transfer, large capacities and advanced security for your Memory Stick PRO-optimized devices.

## SanDisk Memory Stick Duo™

SanDisk Memory Stick Duo is the perfect companion for your digital camera, smart phone or PDA. It is compatible with all Memory Stick-compliant devices with the use of the Adaptor.

# Connectivity Solutions

## ImageMate® 8 in 1 Reader/Writer

The SanDisk ImageMate 8 in 1 Reader/Writer is a Hi-Speed USB 2.0 4-slot reader/writer that connects to your USB 2.0 port (backwards compatible with USB 1.1). It's the quickest way to transfer pictures, movies or any type of data from CompactFlash Type I/II, SmartMedia, xD, Memory Stick, Memory Stick PRO, MultiMediaCard or SD cards. You can simultaneously transfer data between cards and/or your computer. And the SanDisk

ImageMate 8 in 1 Reader/Writer comes with a bonus docking station for easy desktop connectivity.

## SanDisk Digital Photo Viewer (DPV)

SanDisk's DPV makes viewing and sharing your digital photos as simple as watching TV. It's easy to use—simply plug the DPV into your TV, place your memory card into the DPV, then sit back and enjoy watching your digital photos appear on your TV. The SanDisk DPV takes CompactFlash, SD, MultiMediaCard, SmartMedia, and Memory Stick memory cards and is the fastest, most convenient way to share your favorite memories with family and friends.

## SanDisk PC Card Adapters

SanDisk PC Card Adapters allow you to read and write to flash memory cards via any PCMCIA/PC Card slot. By inserting the card into the adapter, it becomes a PCMCIA accessible "plug-and-play" memory card. Choose from SanDisk's CompactFlash PC Card Adapter or the multi-card adapter which can be used with a variety of card formats.

## SanDisk Cruzer™ Mini

The SanDisk Cruzer Mini is the fastest and easiest way to move your data. Cruzer Mini is Hi-Speed USB 2.0 certified for fast data transfer (backwards compatible with USB 1.1). Store all your data, pictures and more on this pocket-sized device and then easily transfer files between your laptop/desktop and home and work computers.

## SanDisk Connect™ and Connect Plus Wi-Fi cards

The new SanDisk Connect and Connect Plus Wi-Fi cards allow you to access the internet, check e-mail, and send and receive data from any available access point. Connect Plus gives you even more options by combining memory and Wi-Fi in a single card. Both versions are built on the 802.11b standard for up to 11Mbps data transfer rate, and are available in CompactFlash and SD versions. Power usage is optimized for lowest battery drain and highest performance.

COMING SOON!

## SanDisk ImageMate® USB 2.0 Readers

SanDisk ImageMate USB 2.0 single-slot readers are a fast and convenient way to transfer data between memory cards and your computer. They are Hi-Speed USB 2.0 certified for fast data transfer up to 480 Mbps, and are over 40x faster than USB 1.1 readers (backwards compatible with USB 1.1). Versions are available for CompactFlash, SmartMedia/xD, Memory Stick/Memory Stick PRO, and MultiMediaCard/SD memory cards.
