

**POWER
WHEELS**
by Fisher-Price®

Owner's Manual with Assembly Instructions

Please read this manual and save it with your original sales receipt.
For Model 74180

Tools needed for assembly: Phillips Screwdriver, Safety Scissors and Hammer.
Use only with a Power Wheels® Type H 6 Volt Battery, Power Wheels® Thermal Fuse and Power
Wheels® Type H 6 Volt Charger (all included).

A

Important Information

- Your new vehicle requires adult assembly. Please set aside at least 30 minutes for assembly.
- You must charge your battery for 18 - 30 hours BEFORE YOU USE YOUR VEHICLE FOR THE FIRST TIME. We recommend that you start charging your battery before beginning assembly. Please see "Battery Charging" beginning on page 7 for detailed instructions.
- Read this manual carefully for important safety information and operating instructions before using your vehicle.
- This vehicle is designed for use on asphalt or other hard surfaces by children 3 years of age and older.
- This vehicle has an adjustable play seat belt. Please note that the adjustable seat belt is designed to be a play feature only and does not function as a protective safety restraint.
- To prevent damaging the motors and gears, do not tow anything behind the vehicle or overload it. Do not exceed the maximum weight capacity of 65 lbs (30 kg).
- If you have any questions about your Power Wheels® vehicle, please call our toll-free service lines at **1-800-348-0751** from 8 AM to 6 PM (EST) Monday through Friday. Trained customer service representatives are available to take your call in English or French.

Habla Español? Si usted tiene alguna pregunta ó necesita asistencia llame gratis **1-800-348-0755** para los Estados Unidos. Tenemos representantes que hablan español para atender su llamada.

- For your convenience, Power Wheels maintains an Authorized Service Center Network with more than 400 authorized service centers nationwide. Our authorized service centers will repair or replace parts under warranty at no extra charge, and can perform non-warranty repairs for a minimal charge. Please see the Authorized Service Center list beginning on page 24 to find the authorized service center nearest to you, or call **1-800-348-0751**.
- Please complete and return the enclosed Registration Card today, or call **1-800-348-0751** to register your vehicle by phone.

CAUTION

Use the charger indoors only.

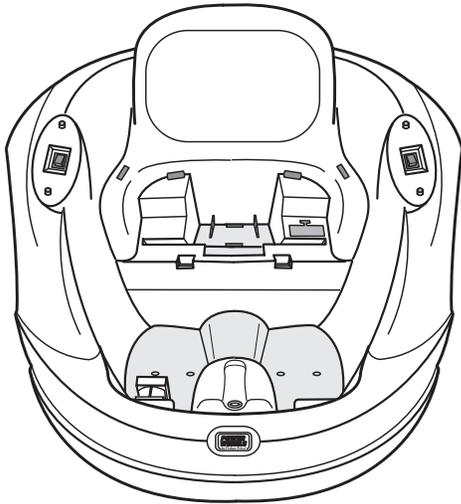

**WARNING**

- Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. Care should be taken in unpacking and assembly of the vehicle. Children should not handle parts, including the battery, or help with assembly of the vehicle.
- Keep small parts and plastic bags out of children's reach. Dispose of plastic bags properly.
- Adult supervision is required. Children do not have the judgement necessary to avoid many accidents. Be sure that children operating this vehicle can do so safely and that they are supervised at all times.
- Never use near steps, driveways, steep inclines, roadways, alleys, swimming pool areas or other bodies of water.
- Always wear shoes or sneakers when operating this vehicle.
- Never allow more than one rider.
- The rider should sit on the seat when the vehicle is in operation.
- **Hot** motor covers. Handle carefully.
- The thermal fuse can get **hot**. Handle carefully.
- Never alter this vehicle or its electrical system in any way. Alterations could cause a fire resulting in injury and could also ruin the electrical system.
- Use of the wrong type battery, fuse or charger could cause a fire or explosion, resulting in serious injury.
- Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in injury. Lift and carry the battery by the case only.
- Read the cautions on the back panel of the battery.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the vehicle until you have replaced the worn or damaged part as it could possibly cause a fire resulting in injury.

C

Parts

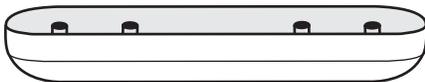

- If you experience a problem with this product, or are missing a part, please call us at **1-800-348-0751**, rather than return this product to the store.
- Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
- Metal parts have been coated with a lubricant to protect them during shipment. Wipe all metal parts with a paper towel to remove any excess lubricant.

 **WARNING**

- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- The thermal fuse can get **hot**. Handle carefully.
- Use of the wrong type battery, fuse or charger could cause a fire or explosion, resulting in serious injury.
- Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- Read the cautions on the back panel of the battery.
- Never lift or carry the battery by the wires or connectors. This can damage the battery and possibly cause a fire. Lift and carry the battery by the case only.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the vehicle until you have replaced the worn or damaged part as it could possibly cause a fire resulting in injury.
- Never alter this vehicle or its electrical system in any way. Alterations could cause a fire resulting in injury and could also ruin the electrical system.

 **CAUTION**

Use the charger indoors only.

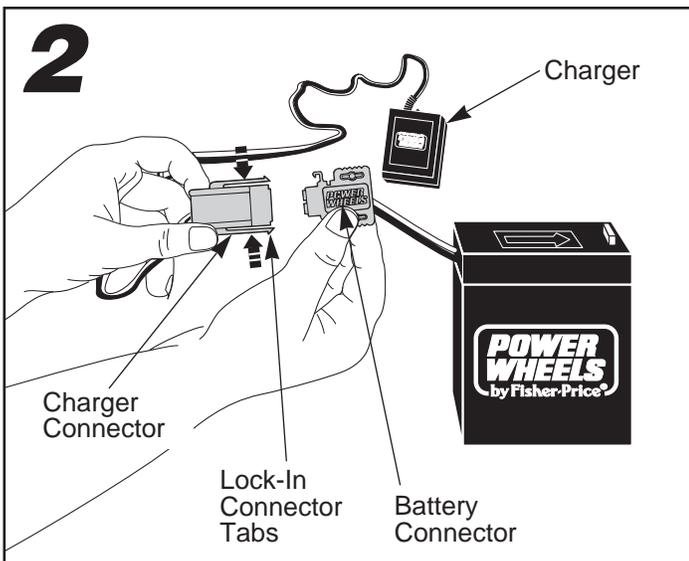

Important Notes:

- **Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.**
- We recommend that you start charging your battery before beginning assembly of your new vehicle.
- Use only a Power Wheels® Type H 6 volt charger (120 VAC 60 Hz 12W with an output of 6.0 VDC (800mA) to charge your Power Wheels® 6 volt battery.
- The charger is not a toy.
- Before charging the battery, examine the battery case for cracks or other damage which may allow sulfuric acid (electrolyte) to leak during the charging process. Never attempt to charge a damaged battery. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts. Take precautions to protect any surface on which you charge the battery.
- The battery must be upright while charging.
- Do not short circuit the battery.
- You do not need to remove the battery from your vehicle to recharge it.
- If your battery is old and will not accept a charge, do not leave it in the vehicle. Always remove a dead battery from the vehicle.

Battery Charging

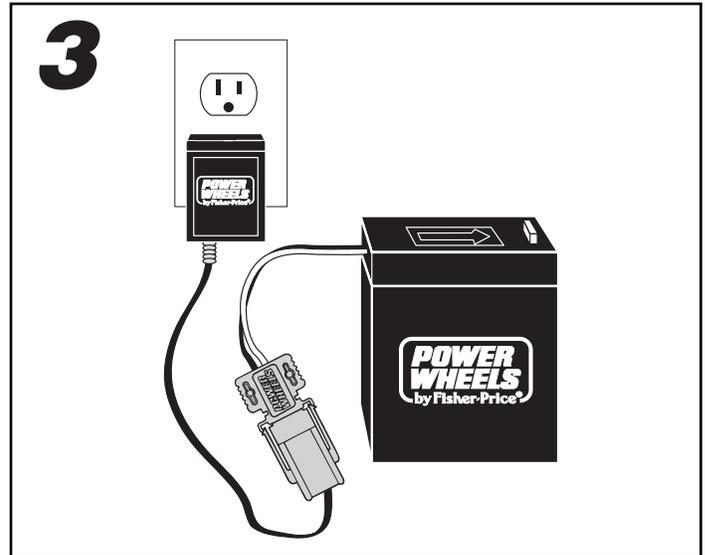

- If you are charging the battery for the first time, insert a thermal fuse into the battery. The battery will not charge unless a thermal fuse is installed.
- If you are recharging your battery, make sure the thermal fuse already installed in the battery is in good condition. Remove the fuse from the battery and shake it gently. If it rattles, it is damaged. Replace a damaged fuse with a new Power Wheels® thermal fuse.

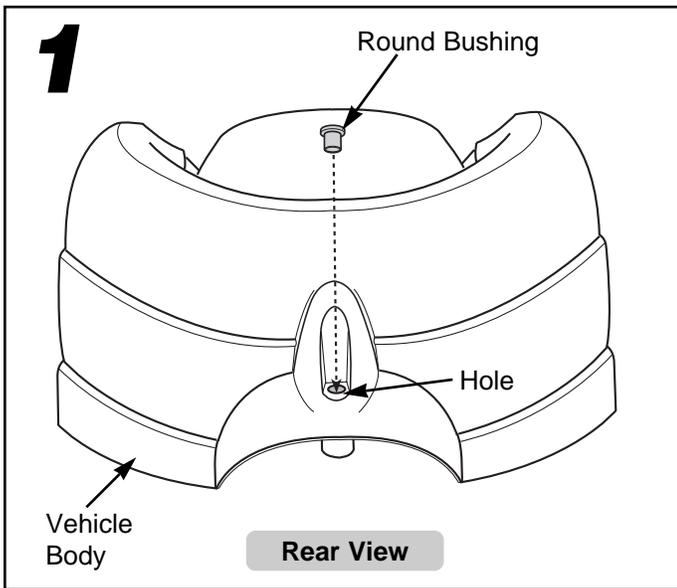

- Squeeze the Lock-In connector tabs on the charger connector and plug it into the battery connector.

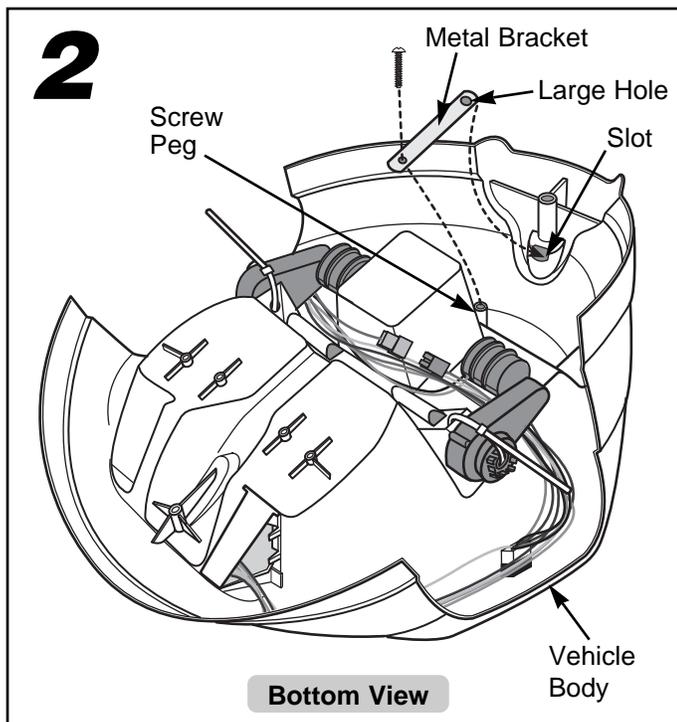

IMPORTANT NOTE! If you are recharging your battery, you will first need to disconnect the battery connector from the motor harness connector under the seat of your vehicle.

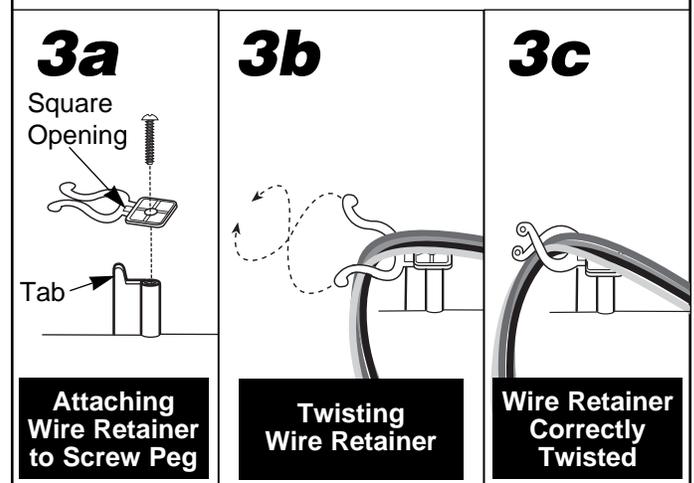

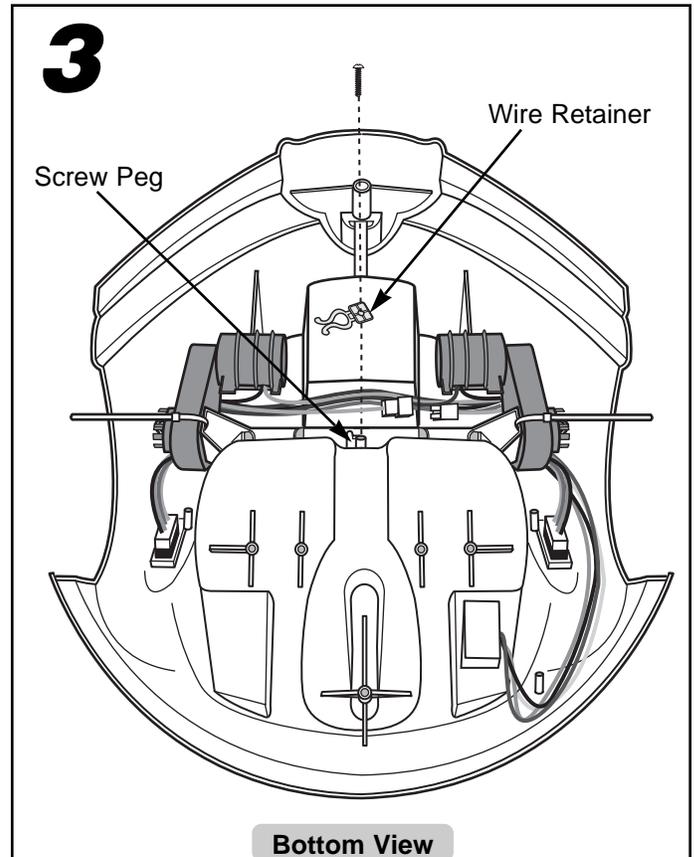

- Plug the charger into a standard 120 volt wall outlet.
Note: If power flow to the wall outlet is controlled by a switch, make sure the switch is **ON**.
- Before first time use, charge the battery for **at least 18 hours**. Never charge the battery longer than 30 hours.
Note: The battery must be upright while charging.
- Recharge the battery after each use of your vehicle for at least 14 hours. Do not charge the battery longer than 30 hours.
- Once the battery is charged, disconnect the charger connector from the battery connector. Unplug the charger from the wall outlet. The battery is now ready to be installed in your vehicle. Please see "Battery Installation" on page 15 for detailed instructions on installing your battery. If your battery is already installed in your vehicle, simply re-connect the battery connector and motor harness connector and re-assemble the seat.

- Position the vehicle body upright.
- Fit and hold a round bushing into the hole in the rear of the vehicle body.

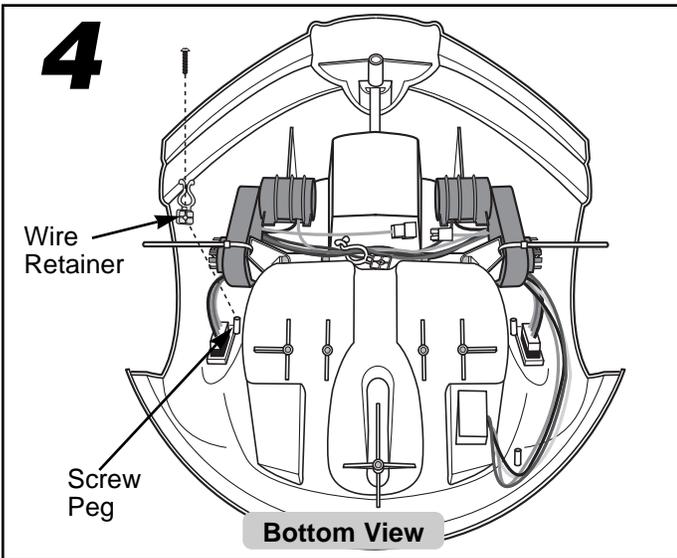

- Position the vehicle body upside down.
- Slide the end of the metal bracket with the large hole through the slot in the rear of the vehicle body to cover and hold the round bushing.
- Align the small hole at the other end of the bracket with the screw peg on the vehicle body.
- Insert a #12 x 1 1/2" screw through the small hole in the bracket and into the screw peg.
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.

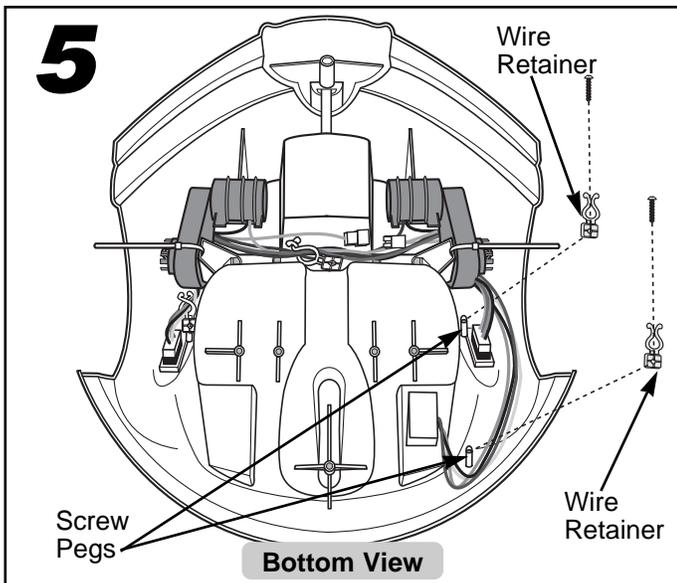

- Fit a #8 x 1" screw through a wire retainer and into the screw peg at the center of the vehicle body. The square opening in the wire retainer should fit onto the tab on the screw peg (3a).
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.
- Place the wires between the wire retainer arms (3b).
- Twist the ends of the wire retainer arms together to secure the wires against the bottom of the vehicle body (3c).

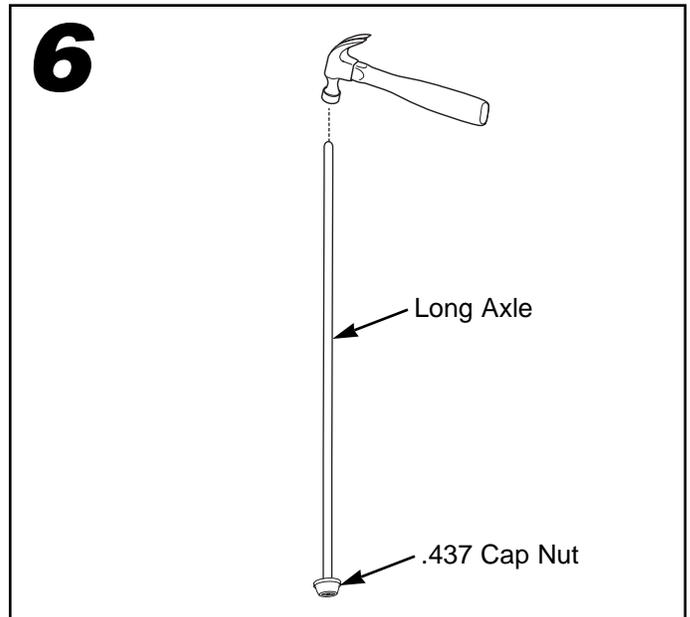

Assembly

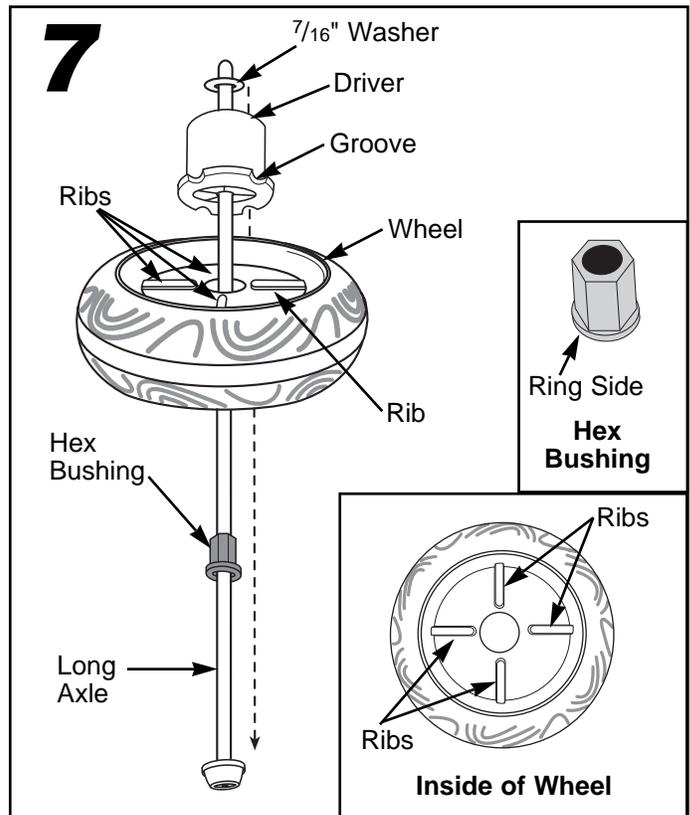

- Fit a #8 x 1" screw through a wire retainer and into the screw peg at the left side of the vehicle body, near the wire connectors. The square opening in the wire retainer should fit onto the tab on the screw peg.
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.
- Place the wires between the wire retainer arms.
- Twist the ends of the wire retainer arms together to secure the wires against the bottom of the vehicle body.

- Fit two #8 x 1" screws through two wire retainers and into the screw pegs at the right side of the vehicle body, as shown. The square opening in the wire retainers should fit onto the tab on the screw pegs.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.
- Place the wires between the wire retainer arms.
- Twist the ends of the wire retainer arms together to secure the wires against the bottom of the vehicle body.

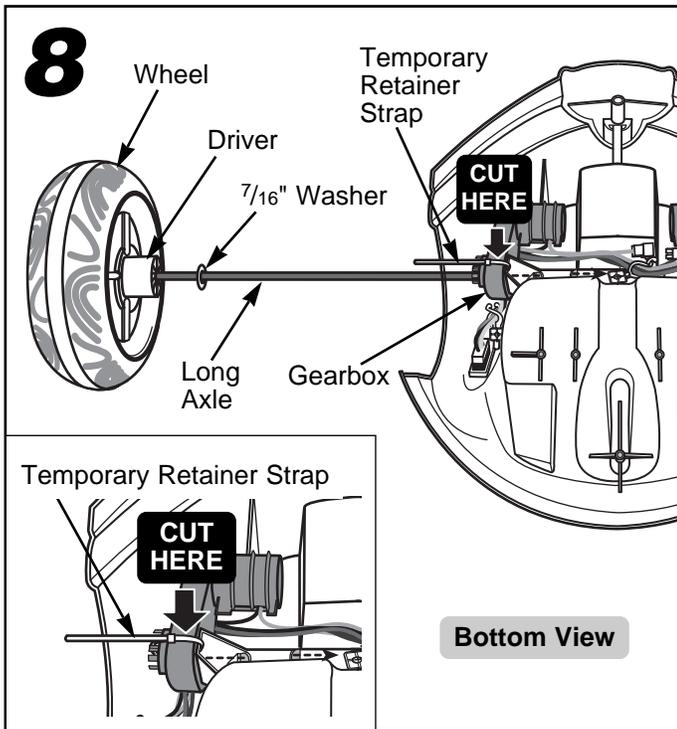

- Fit a .437 (large diameter) cap nut onto one end of the long axle.
- Tap the other end of the long axle with a hammer to secure the cap nut on the axle.

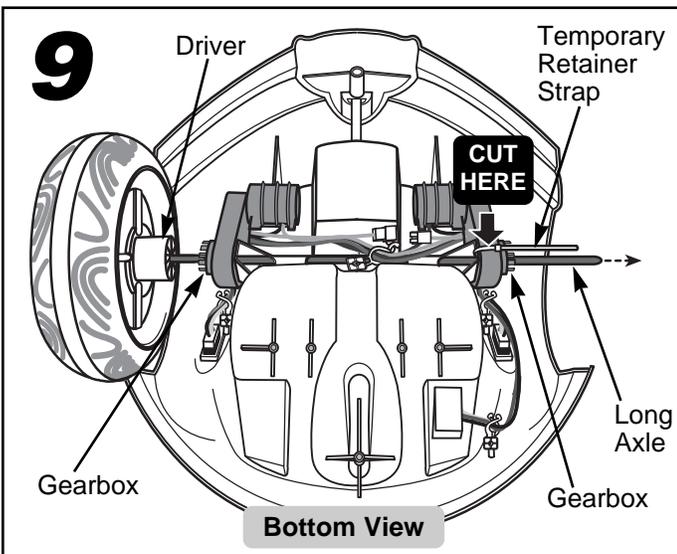

- Fit a hex bushing (ring side first), large wheel (inside surface up), driver (ring side first) and 7/16" (large diameter) washer on the long axle. **Make sure that the grooves in the driver fit around the ribs on the inside surface of the wheel.**

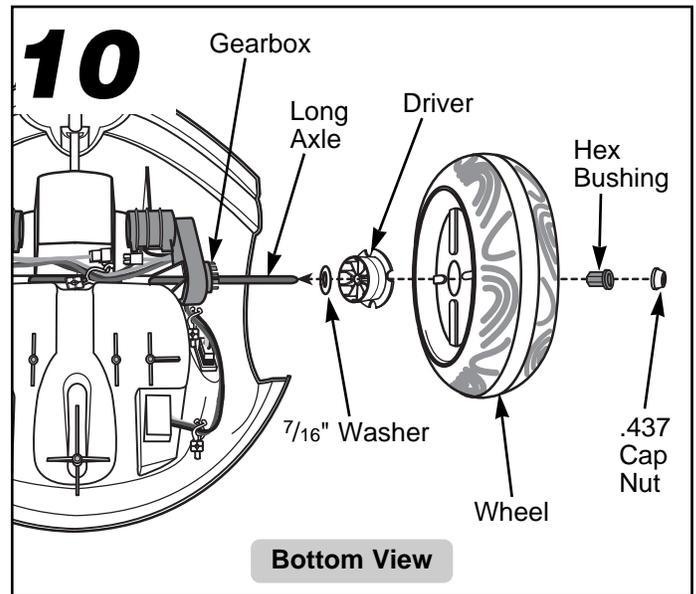

Assembly

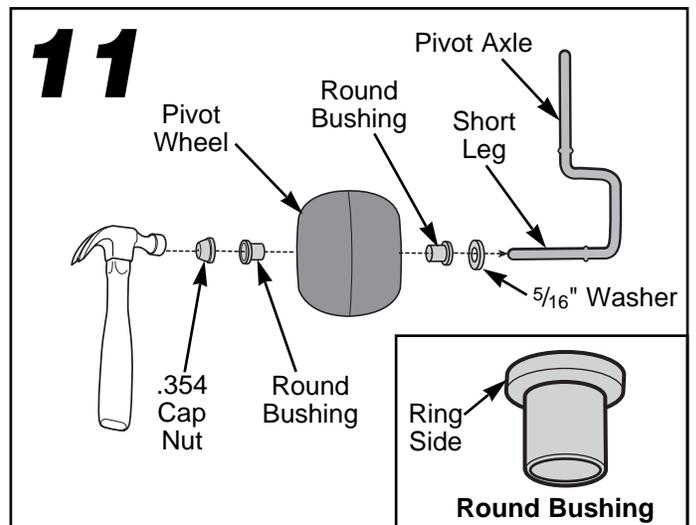

- While carefully holding a gearbox in place, cut and remove the temporary retainer strap from the gearbox using safety scissors (see inset). Properly dispose of the retainer strap.
- While holding the gearbox in place, slide the end of the long axle through the gearbox and into the vehicle body until the end of the axle is at the center of the vehicle body.

- While carefully holding the other gearbox in place, cut and remove the temporary retainer strap from the gearbox using safety scissors. Properly dispose of the retainer strap.
- While holding the gearbox in place, continue to slide the long axle through the vehicle body and out through the gearbox. **The driver may need to be rotated so that it fits onto the teeth on the gearbox.**

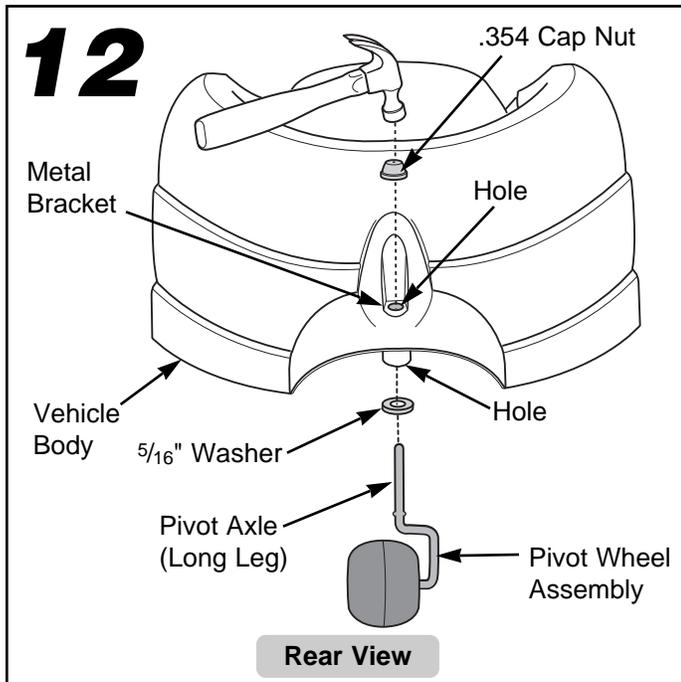

- Fit a $\frac{7}{16}$ " (large diameter) washer onto the end of the long axle.
- Fit a driver (ring side out) onto the end of the axle. **The driver may need to be rotated so that it fits onto the teeth on the gearbox.**
- Fit a large wheel (inside surface first) and hex bushing (barrel side first) onto the end of the axle. **Make sure that the ribs on the wheel fit into the grooves on the driver.**
- Fit a .437 (large diameter) cap nut onto the axle end.
- Support the opposite end of the axle and tap the cap nut with a hammer to secure it on the end of the axle.

- Fit a $\frac{5}{16}$ " (small diameter) washer, round bushing (ring side first), pivot wheel and a second round bushing (barrel side first) onto the short leg of the pivot axle.
- Fit a .354 (small diameter) cap nut on the end of the pivot axle's short leg.
- Tap the cap nut with a hammer to secure it on the end of the pivot axle.

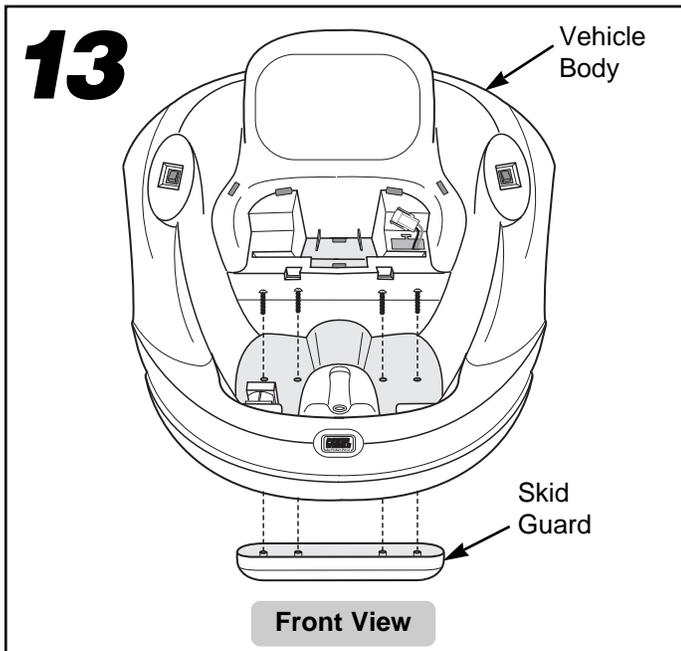

Assembly

12

- Position the vehicle body upright.
 - Fit a $\frac{5}{16}$ " (small diameter) washer onto the long leg of the pivot axle.
 - Face the rear of the vehicle body.
 - Insert the pivot axle leg up through the hole in the underside of the vehicle body and out through the hole in the metal bracket at the rear of the vehicle body.
- Note:** You may need to flex the vehicle body to align the pivot axle with the hole in the metal bracket.
- Fit a .354 (small diameter) cap nut onto the end of the pivot axle and tap the cap nut with a hammer to secure it.

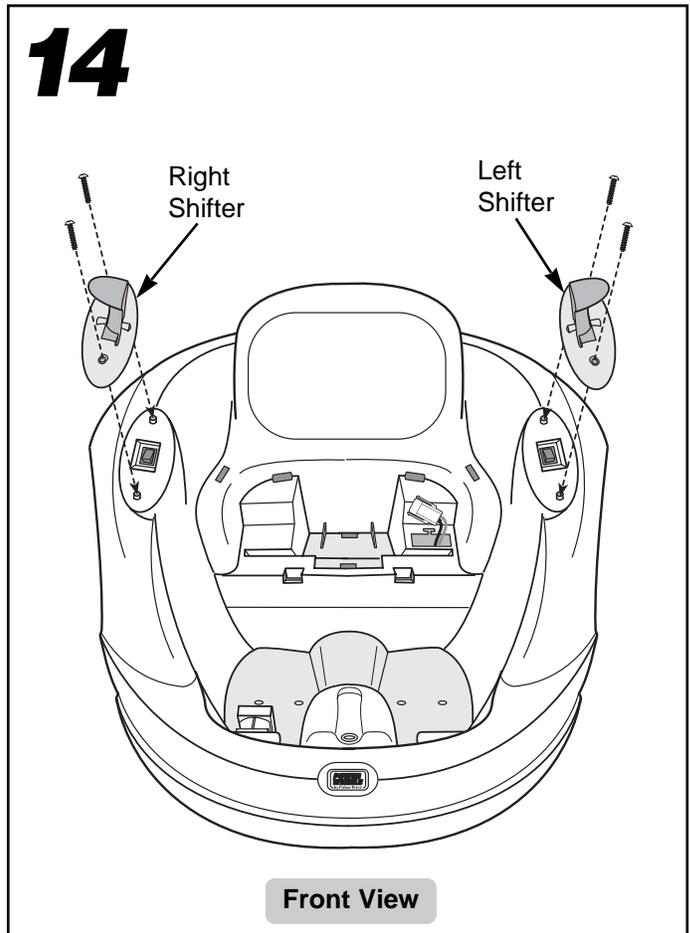

13

- Face the front of the vehicle body.

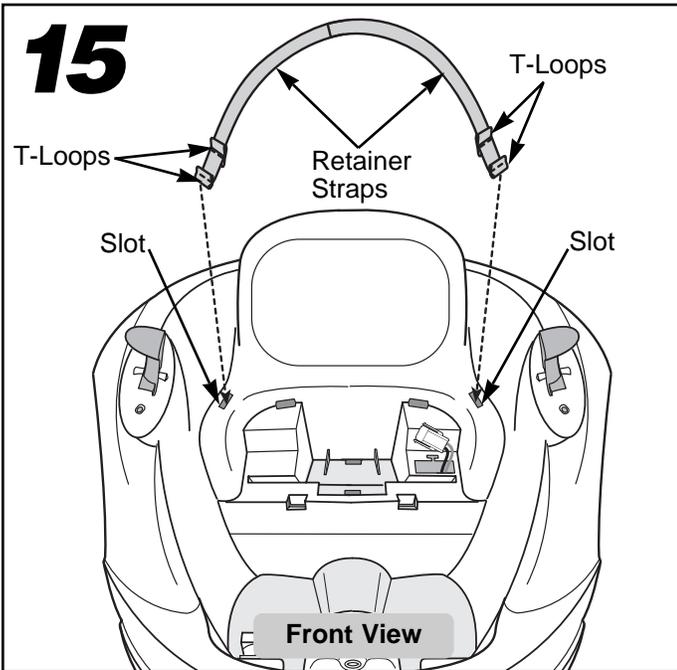

- Fit the skid guard under the vehicle body with the pegs on the skid guard aligned with the holes in the vehicle body floor.
- Insert four #8 x 1" screws through the vehicle body floor and into the skid guard.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

14

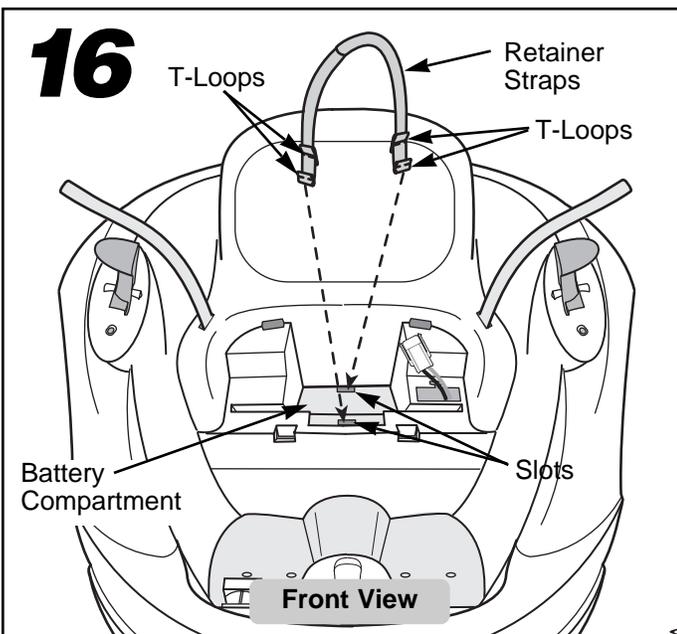

- Using safety scissors, separate the right and left shifters from the plastic connector. Dispose of the plastic connector properly.
- Identify the right and left shifters. The right shifter is marked **R** on the underside of the shifter plate; the left shifter is marked **L**.
- Fit the right shifter (**R**) onto the right side of the vehicle body, marked **R**.
- Insert two #8 x 1" screws through the shifter plate and into the vehicle body.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.
- Repeat this procedure to assemble the left shifter (**L**) to the left side of the vehicle body, marked **L**.

Assembly

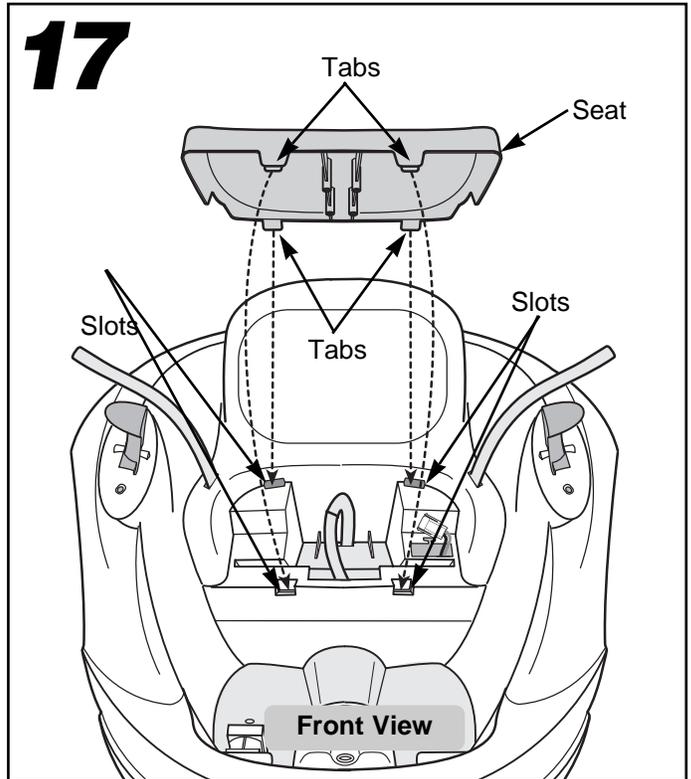

Please note: The seat has been factory assembled. You will need to remove the seat to complete assembly steps 15 - 17. Please see Step 1 on page 15 for instructions.

- Fasten together two retainer straps to form one long strap with T-loops at each end.
- Note the two T-loops at each end of the retainer strap.
- Insert the end T-loops on the strap through a slot in the vehicle body. **Do not insert the second set of T-loops through the slots.**
- Pull up gently on each end of the retainer strap to make sure the end T-loops are secure in the slots.

- Fasten together the remaining two straps.
- Note the two T-loops at each end of the retainer strap.

- Insert the end T-loops on the strap through a slot in the battery compartment. **Do not insert the second set of T-loops through the slots.**
- Pull up gently on the each end of the strap to make sure the end T-loops are secure in the slots.

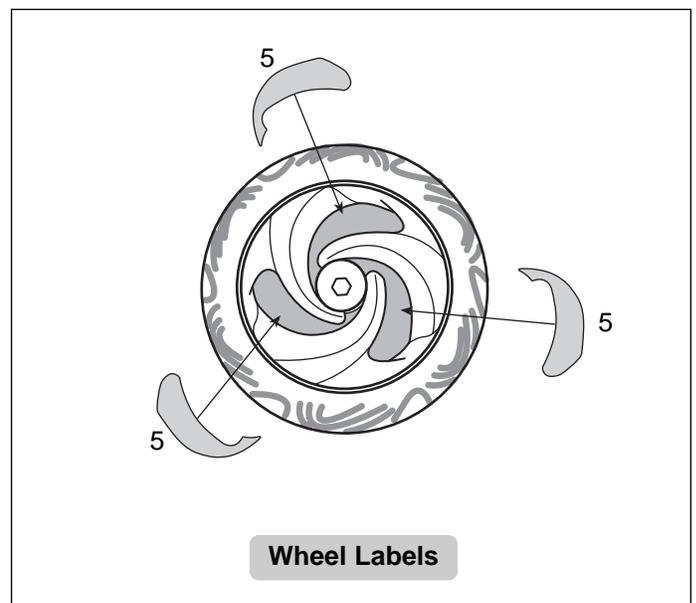

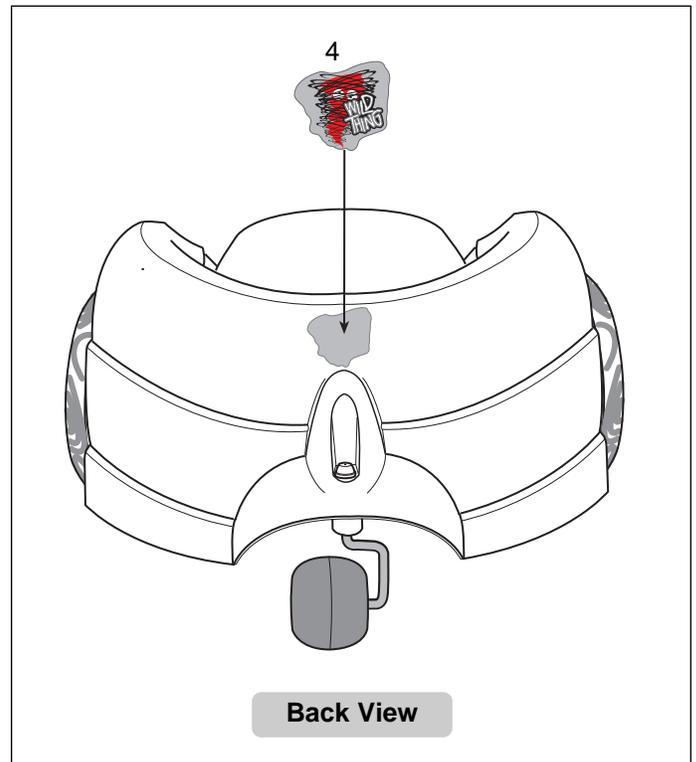

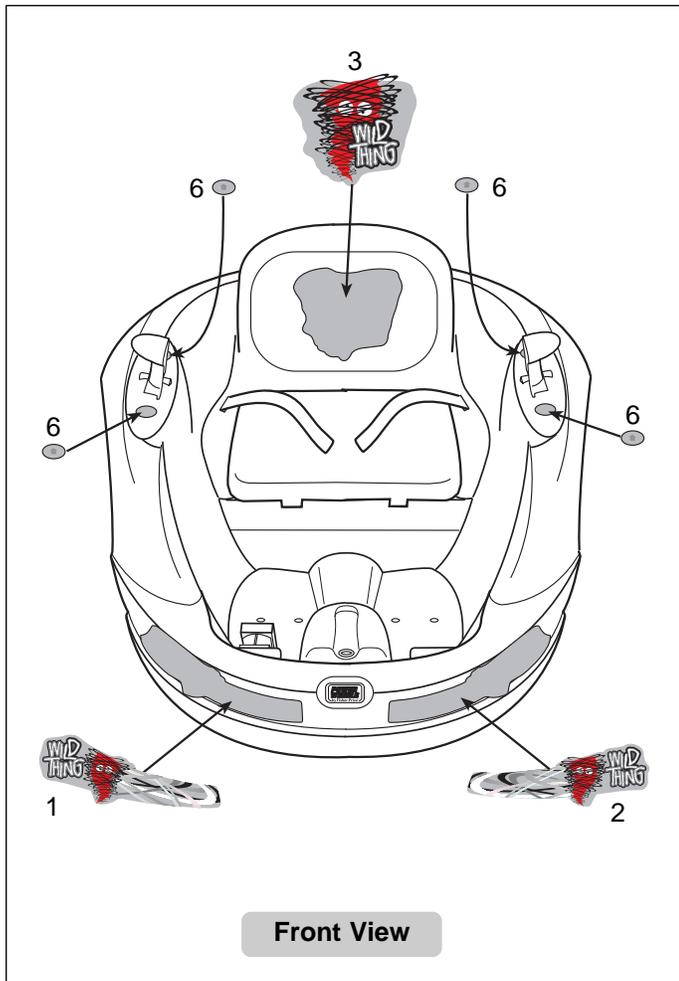

Note: If you have already charged your Power Wheels® 6 volt battery for at least 18 hours, you may want to install it in the battery compartment before assembling the seat to your vehicle. Please refer to "Battery Installation" beginning on page 15 for instructions.

- Unfasten the seat belt (retainer) straps.
- Insert the tabs on the back of the seat into the slots in the vehicle body.
- Press near the front of the seat to snap the front tabs into the vehicle body.

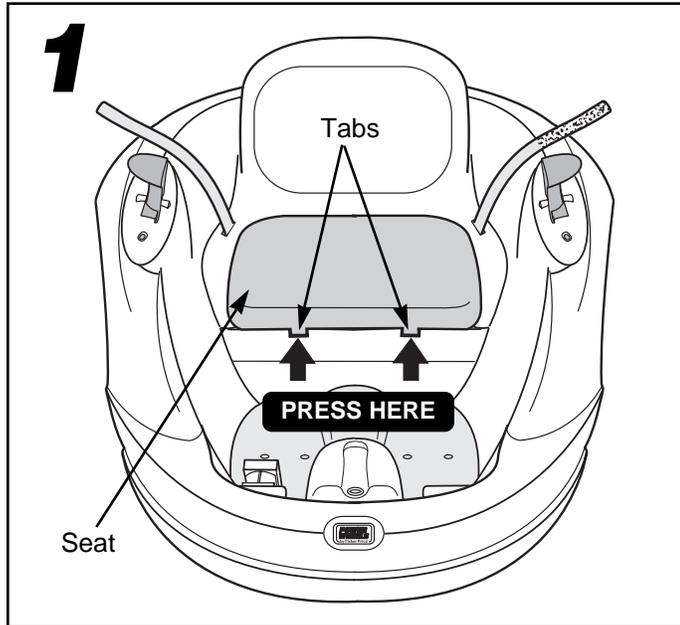

One-time assembly is now complete. For your convenience, two extra .437 (large diameter) cap nuts and two extra .354 (small diameter) cap nuts have been included with your vehicle. You should not have any extra screws, washers or bushings. If you complete assembly and have extra screws, washers or bushings, please re-read the assembly instructions and correct assembly of your vehicle where necessary.

Proper label application will help to keep the labels looking their best!

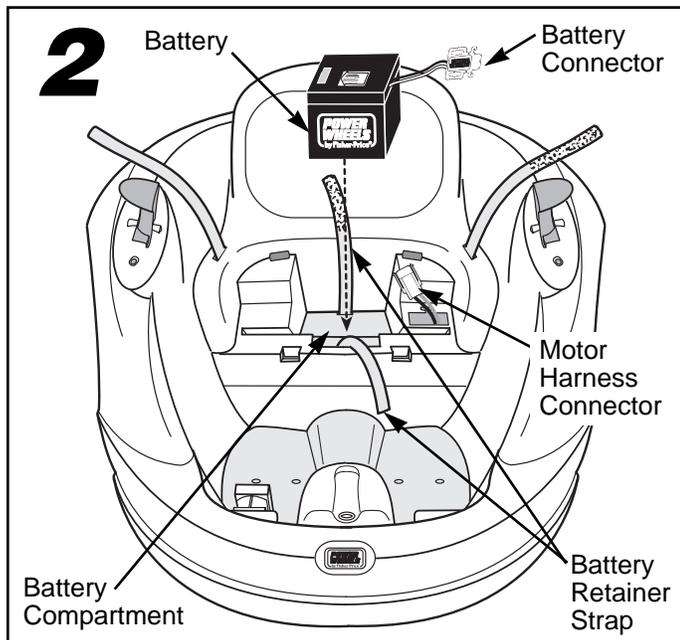

- Wash your hands before applying the labels.
- Make sure the areas where the labels will be applied are clean and dry. Wipe your vehicle with a clean, soft, dry cloth to remove any dust or oils.
- For best results, avoid repositioning a label once it has been applied to the vehicle.
- Apply the labels as shown in the illustrations.
- **After applying each label, rub the label firmly with a clean, dry cloth to make sure the label is adhered to your vehicle.**

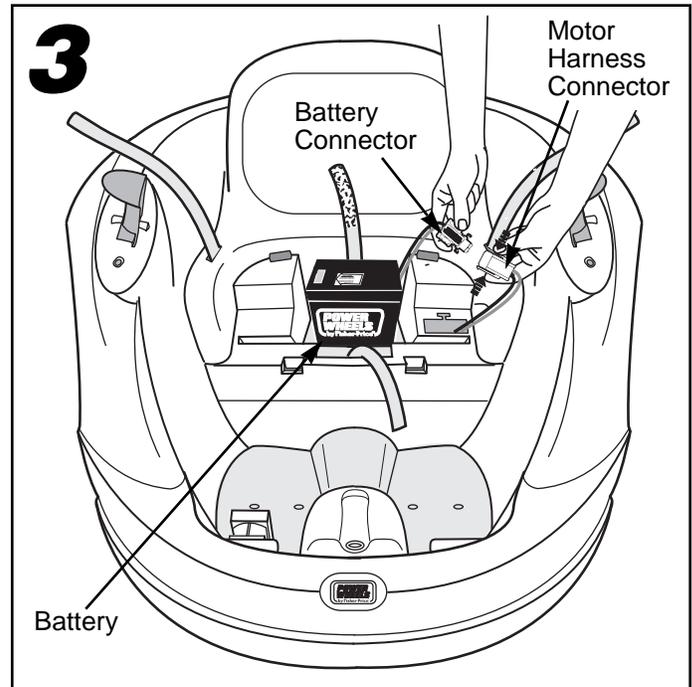

Important Note: Use only a Power Wheels® Type H 6 volt battery with a Power Wheels® thermal fuse installed. Use of any other battery or fuse will damage your vehicle. Make sure that you charge the battery for at least 18 hours using the enclosed Power Wheels® 6 volt charger before operating your vehicle for the first time. Charge the battery for at least 14 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Failure to follow these instructions may damage your battery and will void your warranty.

- If the seat has been assembled to your vehicle, press in on the tabs on the front of the seat and lift to remove it.

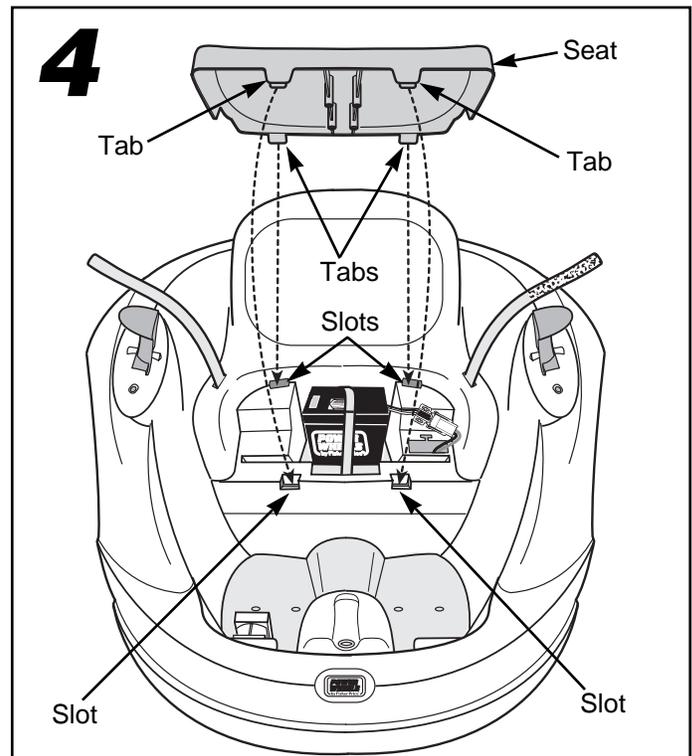

- Unfasten the battery retainer straps.
- Place the battery in the battery compartment with the battery connector extending towards the vehicle's motor harness connector.

- Squeeze the tabs on each side of the motor harness connector and plug the battery connector into the motor harness connector.

Note: If the battery connector will not plug into the motor harness connector, turn it over and try again! Do not force the battery connector into the motor harness connector.

- Fasten the retainer straps snugly around the top of the battery.
- Re-assemble the seat.

I

Battery Care and Disposal

Care

If a battery leak develops, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

If acid comes in contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.

If acid is internally ingested, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

- Charge a new battery for at least 18 hours before first use. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.
- After the first charge, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.
- The battery must be upright while charging.
- Do not allow the battery to run down completely before charging.
- Charge the battery before storing the vehicle.
- Charge the battery at least once per month, even if the vehicle has not been used.
- Leaving the battery in a discharged condition will ruin it.
- Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage your vehicle.
- Do not store the battery in temperatures above 75° F or below -10° F.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
- Attempting to charge the battery without a thermal fuse or with a blown fuse will not damage the battery, but it will not charge. Check the fuse to make sure it is in good condition each time you charge the battery.

Disposal

- Your Power Wheels® battery is a sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of the lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.
- Return the battery to a federal or state approved lead-acid battery recycler, such as a Power Wheels® authorized service center or a local seller of automotive batteries. In Minnesota, call 1-800-348-0751 if further disposal information is required. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries.

J

Rules For Safe Driving

WARNING

- Adult supervision is required. Children do not have the judgement necessary to avoid many accidents. Be sure that children operating this vehicle can do so safely and that they are supervised at all times.
- Never use near steps, driveways, steep inclines, roadways, alleys, swimming pool areas or other bodies of water.
- Always wear shoes or sneakers when operating this vehicle.
- Never allow more than one rider.
- The rider should sit on the seat when the vehicle is in operation.
- The thermal fuse can get **hot**. Handle carefully.

Rules For Safe Driving

Teach Safety Rules to Children

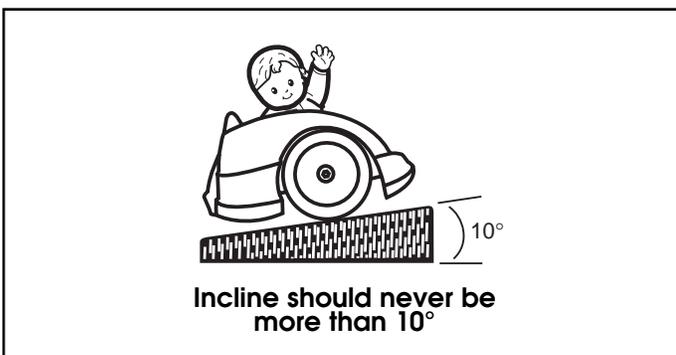

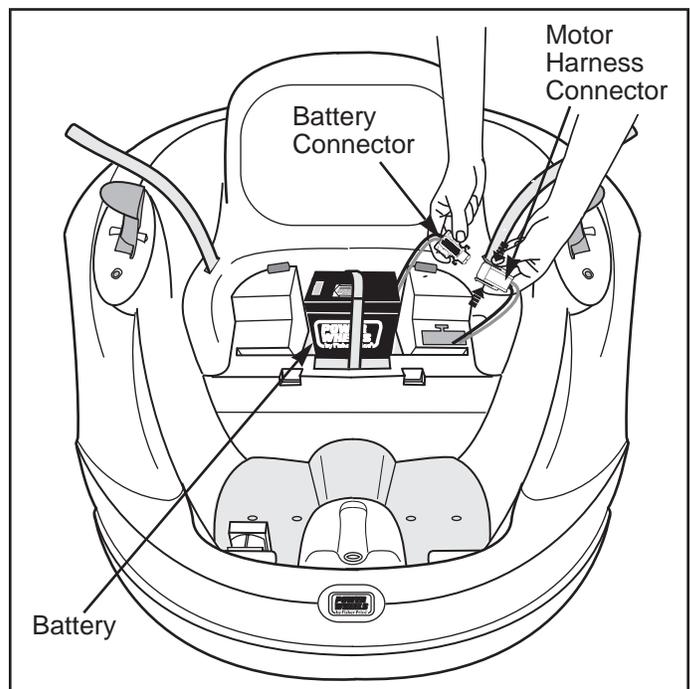

While children can quickly develop the skill necessary to drive this vehicle, it is important to remember that their judgement skills are still very immature. Unsupervised driving by children can lead to serious injury. Before children use the vehicle an adult should carefully evaluate the driving area as well as the children's skill level and ability to drive it safely. Children are not always able to recognize or anticipate hazards, even when they have been taught about them. There is no acceptable substitute for adult supervision.

Teach appropriate safety rules to your child before allowing operation of this vehicle. These rules should also be reviewed with neighborhood children or other playmates who want to drive this vehicle.

1. Do not allow any child to drive the vehicle in the street or near moving (motorized) vehicles.
2. Do not allow any child to drive near bodies of water (such as pools or creeks), obstructions (such as furniture, low tree limbs or play equipment), or drop-offs (such as stairs or decks).
3. Do not allow any child to drive the vehicle in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or in a well-lit area.
4. Teach your child to avoid driving on steep inclines or slopes. Restrict your child's driving to areas that are fairly level with gentle inclines or slopes of no more than 10°.
 - While driving down a steep slope, the vehicle may gain unsafe speed, even if the foot pedal is released to stop.
 - While driving across a steep slope, the vehicle may tilt and tip over. The wheels could lose traction, causing the vehicle to slip.
 - While driving up a steep incline, the motor may stop and the vehicle could roll backwards at an unsafe speed.
5. Do not operate this vehicle with more than one rider, seated in the seating area. A child who is not sitting on the seat or who is standing on the vehicle could fall off, cause a tip-over or block the driver's view. A child could be seriously injured.
6. Always wear shoes or sneakers when operating this vehicle.
7. Never put anything near any moving parts. Rotating parts such as motors, gear boxes and wheels can snag fingers, hair, etc., causing serious injury. Do not allow operation of the vehicle when it is on its side or in an upside-down position.
8. Do not operate the vehicle near flammable vapors (gasoline, paint thinner, acetone, liquid wax, etc.). The vehicle's electrical switches, like most electrical switches, emit an internal spark when first turned on or turned off. The presence of flammable liquids or vapors could cause an explosion or a fire. Keep all flammable products in tightly sealed containers and away from the vehicle.
9. Do not allow a child to operate the vehicle without proper adult supervision. To prevent unsupervised use of the vehicle, disconnect the motor harness from the battery when the vehicle is not in use.

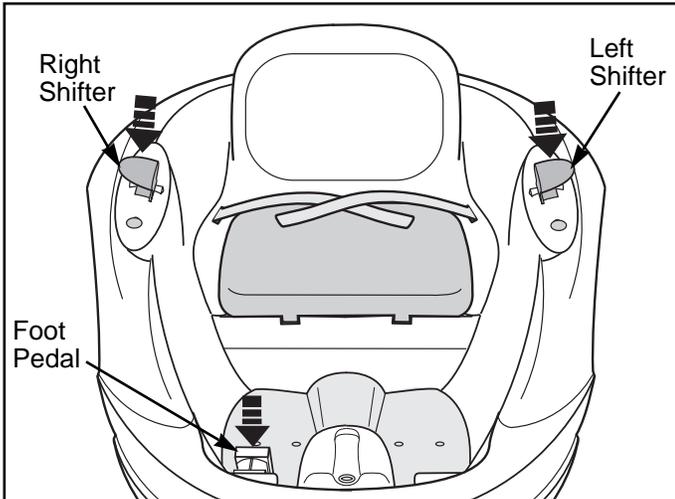

To disconnect the motor harness connector and battery connector:

- Press the tabs on the front of the seat and lift to remove it.
- Squeeze the tabs on the motor harness connector to unplug it from the battery connector.
- Re-assemble the seat.

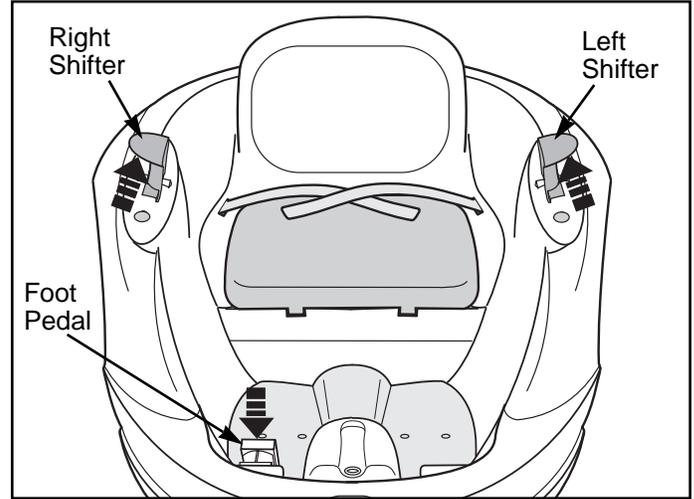

Your vehicle has been designed with a **REVERSE LOCK-OUT** system and has been pre-set to drive forward only. The vehicle will not drive in reverse or spin until you fasten the reverse connectors on the underside of the vehicle body. We recommend that your child master use of the shifter handles and the foot pedal to start and stop the vehicle before fastening the reverse connectors.

Forward

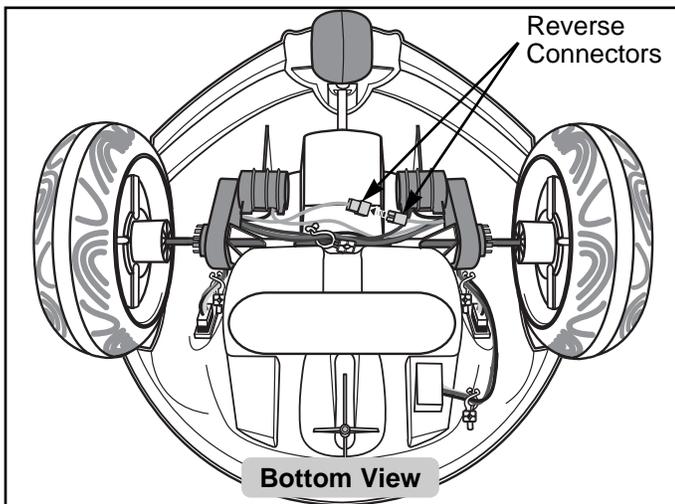

- To drive forward, push the shifter handles forward and press down on the foot pedal. The vehicle will move forward at a maximum of 4 mph.
- Your vehicle has a patented, electronic braking system that automatically stops the vehicle when your child's foot is lifted from the foot pedal.

Reverse

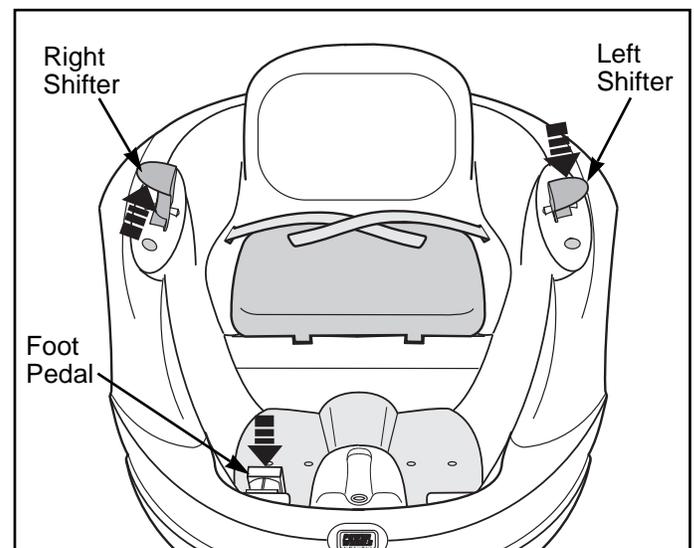

- To drive in reverse, pull the shifter handles toward you and press the foot pedal. The vehicle will travel in reverse at a maximum of 4 mph.
- Stopping in reverse is the same as stopping while driving forward. Simply lift your foot off the foot pedal to stop the vehicle.

Reverse Lock-Out

- Once your child has mastered driving forward and knows how to start and stop easily, it's time to fasten the reverse connectors.
- Carefully position the vehicle upside down.
- Plug the reverse connectors together.
- Position the vehicle upright. The vehicle can now be driven forward, backward and can spin.
- To lock-out reverse and spin at any time, simply unplug the connectors.

Spin

- To spin, push one shifter handle away from you while pulling the other towards you. Hang on tight!
- To change direction, switch the position of the shifter handles.

L

Caring for Your Vehicle

- Check all screws, retainers and protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
- During snowy or rainy weather, the vehicle should be stored inside or under a protective cover. Remember to charge the battery at least once per month while your vehicle is not in regular use.
- Avoid operating the vehicle in wet or snowy conditions and do not spray the vehicle with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode and could cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam and could cause switch or motor failure.
- The vehicle can be wiped down with a soft, dry cloth. For a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap and water or spray the vehicle with a hose.
- To ensure that your vehicle stays in good operating order, we recommend that you periodically have your vehicle checked by a Power Wheels® authorized service center. See page 24 for the list of authorized service centers or call **1-800-348-0751** for the location of the authorized service center nearest you.

M

Statement of Limited Warranty

90-day limited warranty for the Power Wheels® Ride-On Toy Vehicle

A 6-month battery warranty applying only to the 6 volt battery which was included by Power Wheels®, with the Power Wheels® vehicle when originally purchased.

This limited warranty covers the Power Wheels® ride-on vehicle and the 6 volt battery, purchased from Power Wheels® by the original purchaser, against defects in materials and workmanship.

This warranty covers normal use and does not cover the Power Wheels® vehicle or battery if damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty. This warranty does not cover, and is intended to exclude, any liability on the part of Power Wheels®, whether under this warranty or implied by law or any indirect or consequential damages for breach of warranty. Some states do not allow the exclusion or limitation so this limitation may not apply to you.

Should you need service or assistance with your vehicle during the warranty period, **DO NOT RETURN THE VEHICLE TO THE STORE.** Power Wheels® has provided a nationwide network of Authorized Service Centers. Please refer to the list in this manual. Power Wheels® is continually expanding our authorized service center network. If there is not an authorized service center in your area, please call Consumer Affairs for information, **1-800-348-0751**.

This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

PLEASE SAVE YOUR ORIGINAL SALES RECEIPT.

IMPORTANT! If you experience a problem with your vehicle, first check the Problems and Solutions Guide below. If you still experience a problem, please contact Power Wheels® Consumer Affairs, toll-free at **1-800-348-0751** between 8 AM and 6 PM (EST) Monday through Friday. Or, contact your local Power Wheels® authorized service center. For the location nearest you, please refer to the Authorized Service Center list beginning on page 24.

Problem	Possible Cause	Solution
Vehicle does not run	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is ON .
	Charger is not working	There is no sure way to tell if your charger is working unless you have a volt meter. If you suspect there is a problem with your charger, contact your local Power Wheels® authorized service center. They can test your charger for you.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse before charging. For best performance, do not use substitute parts.
	Tripped fuse	If the vehicle is overloaded or the driving conditions too stressful, the thermal fuse may trip and cut power to the motors. The thermal fuse will automatically reset after approximately 25 seconds and the vehicle can resume operation. To prevent additional automatic shut-downs, reduce the load on the vehicle and/or avoid stressful driving conditions.
	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector and that there are no loose wires around the motors.
	Dead battery	If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. If you are unsure whether or not the battery is dead, you can have it tested at your local Power Wheels® authorized service center. Always remove a dead battery from your vehicle.
	Electrical switch damage	The electrical switches can become corroded due to exposure to water or moisture or can jam due to loose dirt, sand or gravel. Contact your local Power Wheels® authorized service center for diagnosis and repair.
Motor damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.	
Damaged fuse	The thermal fuse may be damaged. Remove the thermal fuse from the battery and shake it gently. If it rattles, it is damaged. Replace the thermal fuse with a new Power Wheels® thermal fuse. For best performance, do not substitute parts.	

Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle drives forward only	Reverse lock-out feature not disabled	See page 18 for instructions on fastening the reverse connectors to allow the vehicle to drive in forward, reverse and spin.
Vehicle was running but suddenly stopped	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector and that there are no loose wires around the motors.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse installed before charging. For best performance, do not use substitute parts.
	Tripped fuse	If the vehicle is overloaded or the driving conditions too stressful, the thermal fuse may trip and cut power to the motors. The thermal fuse will automatically reset after approximately 25 seconds and the vehicle can resume operation. To prevent additional automatic shut-downs, reduce the load on the vehicle and/or avoid stressful driving conditions.
	Damaged fuse	The thermal fuse may be damaged. Remove the thermal fuse from the battery and shake it gently. If it rattles, it is damaged. Replace the thermal fuse with a new Power Wheels® thermal fuse. For best performance, do not substitute parts.
Short run time (Less than 1 - 3 hours per charge)	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all wires and connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is ON .
	Overcharged battery	Do not charge the battery longer than 30 hours. If you suspect that your battery is damaged as a result of overcharging, contact your local Power Wheels® authorized service center. They can test your battery for you.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. Replace the battery with a Power Wheels® Type H 6 volt battery. For best performance, do not use substitute parts.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse before charging. For best performance, do not use substitute parts.
	Driving conditions are too stressful and/or vehicle is overloaded	Use only on gentle inclines or slopes of 10° or less. Do not allow more than one rider, exceed the 65 lbs. maximum weight limit or tow objects behind the vehicle. Extreme temperatures can also affect run time. Recharge the battery and avoid extreme driving conditions.

Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle runs sluggishly	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is ON .
	Battery needs charging	After approximately 3 hours of constant use, the battery needs charging. Recharge the battery.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse installed before charging. For best performance, do not use substitute parts.
	Battery is old and will not accept full charge	Even with proper care, rechargeable batteries do not last forever. Average battery life is 1 to 3 years depending on the vehicle use and use conditions. Replace the battery with a Power Wheels® Type H 6 volt battery. For best performance, do not use substitute parts.
Sometimes the vehicle doesn't run, but other times it does	Vehicle is overloaded and/or driving conditions are too stressful	Make sure you do not overload the vehicle by allowing more than one rider at one time, exceeding the 65 lbs. maximum weight capacity, or by towing objects behind the vehicle. Use only on gentle inclines or slopes of 10° or less. Recharge the battery and avoid extreme driving conditions.
	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
When the foot pedal is pressed, the vehicle won't run without a push	Motor or electrical switch damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.
	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
	"Dead Spot" on motor	Contact your local Power Wheels® authorized service center for diagnosis and repair.

Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle constantly trips the fuse	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® thermal fuse before charging. For best performance, do not use substitute parts.
	Vehicle is overloaded and/or driving conditions are too stressful	Make sure you do not overload the vehicle by allowing more than one rider at one time, exceeding the 65 lbs. maximum weight capacity, or by towing objects behind the vehicle. Use only on gentle inclines or slopes of 10° or less. Recharge the battery and avoid extreme driving conditions.
Loud clacking or grinding noise from a motor-gearbox	Broken gears	Contact your local Power Wheels® authorized service center for diagnosis and repair.
Charger gets warm during use	It is normal for some chargers to get warm during use and is not reason for concern. Some chargers do not get warm during use.	No action required. If your charger does not get warm during use, it does not mean that it is not working properly.
Battery makes a sizzling or gurgling noise when charging	It is normal for some batteries to make noise and swell slightly while charging and is not reason for concern. Some batteries do not make noise or swell while charging.	No action required. If your battery does not make noise or swell slightly during charging, it does not mean that it is not accepting the charge.

If, after reviewing the Problems and Solutions Guide, the vehicle still fails to operate, please contact your nearest authorized service center (see page 24) or contact Power Wheels® Consumer Affairs toll-free at **1-800-348-0751**.

Helpful Hint: For faster service when calling Consumer Affairs, completely charge the battery before calling and have the following available by the phone:

1. vehicle
2. vehicle model number (see sticker in the battery compartment)
3. vehicle production run number (see sticker in the battery compartment)
4. Phillips screwdriver, slotted screwdriver and needle-nose pliers with plastic or rubber handles
5. an extra Power Wheels® thermal fuse is helpful

Authorized Service Centers

We are continually expanding our Authorized Service Center Network. Please check this listing for the Authorized Service Center nearest you. If there is not one in your area, please call Power Wheels® Consumer Affairs at 1-800-348-0751.
