Product highlights

Real Flat Picture Tube

The Real Flat picture tube offers high contrast for natural colors and improved daytime viewing. With the revolutionary flat screen design, there is virtually no picture distortion, even when viewed from the sides.

The flat screen technology reduces glare from ambient light, preventing eye fatigue.

Scavem

Scan Velocity Modulation - the speed at which the picture lines are "written" on the screen is varied to ensure that all objects have the most crisp definition and sharpest edges.

Contrast Plus

A special electronic circuit has been incorporated into this television to enhance the darker portions of the picture for added realism and improved picture quality.

Virtual Dolby® Surround

Virtual Dolby® Surround is processing circuitry for enhanced surround sound effects, which create the sensation of Dolby Pro Logic without the necessity of additional rear speakers. The benefit is that the viewer is totally immersed in their television experience.

On Board CD/DVD/MP3 Player

Just press play on the integrated TV-DVD remote control and the Philips TV-DVD plays it all; DVD-Video discs, Video CDs, Super Video CDs, Audio CDs, Home recorded CDs and MP3 CDs.

Picture CD Playback

A Picture CD contains digital still pictures in JPEG format. Most Philips DVD players and recorders support playback of Picture CDs & home created discs as well as ones from photo shops.

FM Radio Built in

A radio is included capable of storing 40 FM presets. On Screen naming makes navigation simple, and a handy Clock Screensaver is also included for use while listening.

10 Page Smart Text

Fast access to your own programmed favourite text pages.

Top Controls

Volume and channel change controls on top of the tv to enable easy adjustment without the remote control.

Side Connections

Digital cameras and video games can be connected quickly and easily to video or stereo AV inputs. Connect your headphones (optional) for convenient private listening.
