

Ready for
iPod

Discover a new force of nature

Feel the beat of the jungle, sounding out powerful, pure and crisp. That's exactly what you get when you opt for Pioneer's cleverly constructed A/V amplifier and receivers. At the centre of your quest for exceptional entertainment, they create a new and exciting audio environment in your home. Play any sound format and your room is automatically and perfectly filled. With digital connectivity, as well as a connection for your iPod®, the audio adventure is even more absolute.

STANDOUT TECHNOLOGIES

THE CONCEPT BEHIND MULTI-CHANNEL SURROUND SOUND EXCELLENCE

In order to recreate the natural sound and energy of the original performance, Pioneer's Advanced Multi-Channel Stereophonic Philosophy aims to match the audio reproduction to the music and film soundtrack master recording. This unique audio concept is made up of three professional audio principles, as outlined below. In this way you can elevate the performance of your home system to professional sound studio levels.

ADVANCED MULTI-CHANNEL STEREOPHONIC PHILOSOPHY

	Professional Sound Studio Principles Applied to Home Environments
STEP 1	HIGHEST QUALITY EQUIPMENT Best possible parts and construction available for home sound equipment produce pure and powerful sound
STEP 2	PRECISE SOUND REPRODUCTION Pioneer's unique Advanced Multi-Channel Acoustic Calibration system automatically calibrates the sound for individual living rooms
STEP 3	PROFESSIONAL EXPERTISE Sound tuning by AIR Studios, THX Ultra2/THX Select2 certification and support of the latest surround formats reproduce the art in sound

HDMI™
HIGH DEFINITION MULTIMEDIA INTERFACE

Ready for
iPod

PIONEER PREPARES YOU FOR A TRULY DIGITAL INTERFACED ENVIRONMENT

The range of digital connections in the new multi-channel A/V receivers ensures that you're ready for the digital era. Now that a true digital interface is possible, digital-to-analogue conversions are made redundant and therefore the pure digital quality shines through. Remarkably streamlined HDMI connections allow you to switch easily between two HDMI-capable sources while preserving perfect picture quality via high-resolution video signals. Another single-cable convenience can be found with i.LINK. This pure digital connection between an A/V amp/receiver and a DVD player lets you enjoy high-resolution audio formats like DVD-Audio and SACD. An iPod® port is tech-heaven for fans of portable digital music. With the USB terminal, you can easily hook up your computer as well.

MAIN FEATURES

- ★ Enjoy 7.1-channel playback from any multi-channel programme over the widest possible seating area with this THX Ultra2 certified product
- ★ Measure and adjust acoustic parameters automatically with the Advanced MCACC calibration microphone and 9-band equaliser
- ★ The Ultra Digital Core Engine ensures the clearest sound possible, with high-tech digital circuitry
- ★ The WMA9 Pro decoder provides premier top-notch digital surround sound
- ★ Use the Multi-channel USB terminal to amplify 2-channel as well as multi-channel audio from your PC
- ★ Enjoy audiophile-pleasing crystal-clear sound and deep bass thanks to the Stable Cast Iron Base, which controls all unnecessary vibration
- ★ Experience enhanced SACD sound quality and alternative SACD gain setting with the 176.4 kHz/32-bit high-precision DSD to PCM conversion
- ★ AIR Studios, one of the most renowned recording studios in the world, contributed its best sound engineers and expertise to this stereophonic multi-channel amplifier
- Thanks to the i.LINK interface you can achieve the very best device-to-device digital audio data communication, with no quality loss, and jitter-free transmission of DVD-Audio/CD/SACD with the help of PQLS (Precision Quartz Lock System)
- Thanks to the advanced Direct Construction you can enjoy high-performance audio with a minimum of distortion and suppressed signal interference
- Properly reproduce 7.1-channel high-end quality audio from the latest multi-channel formats thanks to the 7-channel Advanced Direct Energy MOSFET
- The Audio Scaler improves the sound quality of both stereo and multi-channel sources to a level approaching that of DVD-Audio
- Appreciate extensive application of surround sound decoders for enjoyment of all the latest surround sound formats (DTS 96/24, DTS ES Matrix 6.1, DTS ES Discrete 6.1, Dolby Digital EX, THX Surround EX, DTS Neo:6 and Dolby Pro Logic IIx)

THX ULTRA2 PROCESSING AND CERTIFICATION (VSA-AX10Ai)

THX Ultra2 means enjoying exciting 7.1-channel playback performances from multi-channel programmes. Whereas original THX Ultra was intended for Dolby Pro Logic sources, THX Ultra2 is entirely adapted to recent high-quality digital formats such as DTS and Dolby Digital. Pioneer's VSA-AX10Ai was the first in the world to adopt this technology — a true breakthrough in home entertainment. THX Ultra2 ensures optimal multi-channel music and film enjoyment. In addition to THX Cinema and THX Surround EX, THX Ultra2 technology includes two new modes featuring THX exclusive technology, ASA (Advanced Speaker Array). THX Ultra2 Cinema allows non-Surround EX-encoded, Dolby Digital 5.1 and DTS 5.1 material to be played on a seven-speaker configuration. For music playback, THX Music Mode can handle all types of music formats, including high-resolution DVD-Audio and SACD multi-channel music recordings.

TOP-PERFORMANCE COMPONENTS

Only the most select parts and cutting-edge technology are found in Pioneer's high-end A/V amplifier and receivers. Each has been precisely engineered with an ultra rigid construction, the best-in-class amplifier design and advanced digital processing — the first step in Pioneer's Advanced Multi-Channel Stereophonic Philosophy. It is crystal clear that these high-class components were designed with a quest for pure sound perfection.

STABLE CAST IRON BASE FOR ULTIMATE CHASSIS RIGIDITY (VSA-AX10Ai)

Combined with the 3-D space frame, the stable cast iron base realises heretofore unknown chassis rigidity. The heavy 4 kg cast iron base, made by TAOC — known as the quality audiophile accessory brand — overwhelmingly enhances the strength and stability of the chassis. And it serves to support and intercept external vibration thanks to its specially designed material — 10 times more anti-resonant than steel. The base contacts the frame at 15 points with the newly developed, patent-pending pivot-shape for crystal-clear and even deeper bass sound.

Cast iron base and 3-D space frame construction

CHIMNEY-SHAPED HEAT SINK FOR EFFICIENT HEAT DISSIPATION AND LOW RESONANCE (VSA-AX10Ai)

Since this amplifier incorporates 7-channel, high power units, it generates a huge amount of energy. The chimney-shaped heat sink acts as a natural cooling system, releasing excess heat from the power elements which could otherwise adversely affect operation. There is less resonance compared to general cooling systems, and the sound remains transparent to the source input signal.

Chimney-shaped large heat sink

ULTRA DIGITAL CORE ENGINE FOR MORE POWERFUL SIGNAL PROCESSING (VSA-AX10Ai)

The VSA-AX10Ai uses twin 32-bit floating-point processors SHARC Melody Ultra and 48-bit processing Motorola DSP engines, such as those widely used in pro audio equipment. Pioneer engineers created the most advanced digital processing module, the Ultra Digital Core Engine, optimised for the DSPs. It features a short signal path thanks to the latest 6-layered circuitry board design and an exclusive processing algorithm. The Ultra Digital Core Engine processes the data with extreme precision, and delivers more powerful multi-channel sound decoding and processing than ever before. This engine can handle all the latest surround formats, and makes high-definition-quality 96 kHz/24-bit processing possible for Dolby Pro Logic IIx, THX and DTS Neo:6.

Ultra Digital Core Engine

PROFESSIONAL SOUND REPRODUCTION WITH ADVANCED MCACC (VSA-AX10Ai, VSX-AX4AVi, VSX-AX2AV)

With Pioneer's Advanced Multi-Channel Acoustic Calibration system (MCACC) — an automatic sound field adjustment system created by Pioneer experts in cooperation with AIR Studios professional sound engineers — you are able to precision-tune your home system to your living room just like a sound professional, with minimum effort. Using the included calibration microphone, the MCACC system monitors the sound environment and automatically adjusts various sound parameters. (See page 55 for more info.) Advanced MCACC also neutralises the effects of reverberation, caused by obstacles or imperfect room characteristics. With Pioneer's patent-pending 3-D Calibration method, frequency and level readings are taken for each band at a series of time intervals. This enables even more accurate tonal measurement and calibration of the frequency balance. The sound is adjusted based on how we actually hear it.

You can even visualise the room acoustics of your own room on your PC, and therefore make more accurate settings. All that's needed is to connect an RS-232C cable (not included) to your PC, and download software from the Pioneer website. You can also consult this site to get calibration results for the VSX-AX4AVi and the VSX-AX2AV. The VSA-AX10Ai also includes an automatic 'X-curve' adjustment*, to ensure that the sound is perfectly matched to your room size. Our perception of the sound frequency changes depending on our distance from the source (high frequencies decrease more for larger rooms). 'X-curve' compensates for this difference. Audio will be fine-tuned and personalised for your home — heard exactly the way the recording engineers intended.

* X-curve is authorised as an international standard, ISO 2969.

Example of a room with no reverberation — nonexistent in a home environment

Example of a room with a large amount of reverberation — frequency and level measured over time reveal reverberation in the room

MAIN FEATURES

- ★ The i.LINK interface guarantees the very best device-to-device digital audio data communication, with no quality loss, and jitter-free transmission of DVD-Audio/CD/SACD with the help of PQLS (Precision Quartz Lock System)
- ★ The HDMI interface makes a direct digital audio (including DVD-Audio)/video connection between your receiver and an HDMI-equipped Pioneer Plasma, DVD player/recorder with a single cable
- ★ This THX Select2 certified A/V receiver delivers an immersive DVD, movie and gaming experience
- ★ Measure and adjust acoustic parameters automatically with the Advanced MCACC calibration microphone and 9-band equaliser
- ★ Hook up your iPod® through the dedicated, high-quality connection and navigate the iPod® menu on the receiver's FL display as well as on the OSD (On-Screen Display)
- ★ Operate your system easily with Advanced SR+ — view the receiver's status and controls on a Pioneer Plasma TV, and use the macro function to perform multi-step commands at the push of a button
- ★ Properly reproduce 7.1-channel high-end quality audio from the latest multi-channel formats thanks to the 7-channel Advanced Direct Energy Circuitry
- ★ Connect your computer to the receiver's USB terminal and amplify 2-channel music from your PC
 - Up to 6 MCACC room settings can be memorised to best match your preferred listening position
 - Reproduce accurate low frequency sound by using the Standing Wave Control to reduce standing waves
 - Match the phase levels precisely with Pioneer's Phase Control technology

- ★ Properly reproduce 7.1-channel high-end quality audio from the latest multi-channel formats thanks to the 7-channel Advanced Direct Energy Circuitry
 - Up to 6 MCACC room settings can be memorised to best match your preferred listening position
 - Reproduce accurate low frequency sound by using the Standing Wave Control to reduce standing waves
 - Match the phase levels precisely with Pioneer's Phase Control technology

NEW PHASE CONTROL TECHNOLOGY PRECISELY MATCHES PHASE LEVELS

Phase mismatching can occur at any stage in the audio process, during recording or reproduction at home. Various speaker size configurations need the low-pass filter function, and this can cause delay in lower frequencies. Pioneer's new Phase Control technology calibrates the delay and aligns the phase precisely, to match it for all channels and achieve new levels of sonic purity!

REDUCE STANDING WAVES IN YOUR ROOM

An unwanted phenomenon, acoustic standing waves occur in most rooms. They create peaks in the low frequencies, resulting in a boomy sound. Pioneer's new Standing Wave Control neutralises this effect, by creating a flatter frequency response while respecting the phase differences between each channel. Since more filters are utilised in the lower bandwidths, up to 3 standing waves can be more precisely identified and reduced. Reproduction of low frequencies is truer than ever.

MAIN FEATURES

- ★ This first ever THX Select2 certified A/V receiver delivers an immersive DVD, movie and gaming experience
- ★ Properly reproduce 7.1-channel high-end quality audio from the latest multi-channel formats thanks to the 7-channel Advanced Direct Energy MOSFET
- ★ Experience sound purity as a result of the innovative 3-D construction: it reinforces the chassis to eliminate distortion
- Measure and adjust acoustic parameters with the calibration microphone of the MCACC system with 5-band equaliser
- Extensive application of surround sound decoders for enjoyment of all the latest surround sound formats (DTS 96/24, DTS ES Matrix 6.1, DTS ES Discrete 6.1, Dolby Digital EX, THX Surround EX, DTS Neo:6 and Dolby Pro Logic IIx)
- The WMA9 Pro decoder provides premier top-notch digital surround sound
- 9 Original Surround Modes let you choose depth and quality of sound to suit your taste and entertainment
- Component video terminals (3 in/1 out) with maximum quality, including support for high definition and progressive signal sources
- The SR+ terminal lets you view the receiver's status and controls on a Pioneer Plasma TV
- Enjoy added convenience and control with the preset & learning remote control with LCD display

THX SELECT2 CERTIFICATION (VSX-AX4AVi, VSX-AX2AV, VSX-1015)

Developed by Lucasfilm Productions, THX is a seal of approval found on home cinema equipment and software, signifying that the highest quality standards have been used. THX Select2 is a quality hallmark of receivers that sets a performance benchmark for home theatre audio reproduction, assuring the best-in-class performance.

Pioneer's VSX-1015 was the first-ever receiver in the industry to receive THX Select2 certification. Now available for several Pioneer multi-channel receivers, THX Select2 provides additional THX listening modes for enhanced playback of a variety of entertainment content, including movies, music and games. Thanks to full 7.1-channel THX EX processing, it will bring you the best possible sound reproduction using 7 channels, whether you're watching, listening or playing.

SOUND STUDIO SURROUND, WITH AUTO MCACC

(VSA-AX10Ai, VSX-AX4AVi, VSX-AX2AV, VSX-1015, VSX-915, VSX-515)

The MCACC (Multi-Channel Acoustic Calibration System) Set-up, jointly developed with world-renowned AIR Studios, situated in London, is a user-friendly soundfield adjustment system, which enables you to replicate the sound and feel of a movie sound studio at home. Pioneer's revolutionary Automatic MCACC technology does all of this automatically, analysing your speaker settings and room acoustics by means of a calibration microphone. Plug it in, and it does the necessary analysis, making the required adjustments. The end result: high-quality surround sound perfectly calibrated to your room in a matter of minutes.

- 9 Original Surround Modes let you choose depth and quality of sound to suit your taste and entertainment
- Experience high sound quality, thanks to effective temperature control by the Pioneer Hybrid Amplification (PHA) Circuit

DIGITAL INTERFACING

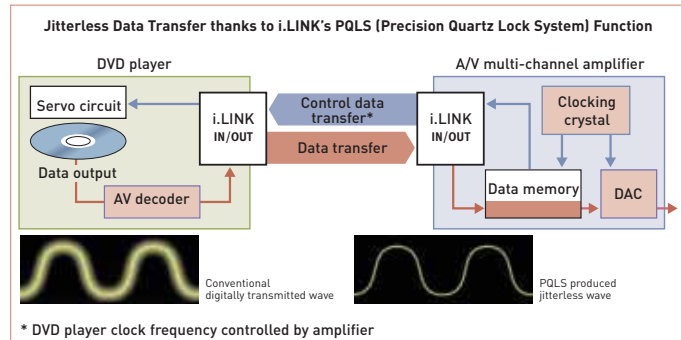

PURE DIGITAL AUDIO TRANSMISSION: THE i.LINK (ADVANCED RESOLUTION DIGITAL AUDIO INTERFACE)

(VSA-AX10Ai, VSX-AX4AVi)

The realism of high-resolution DVD-Audio and SACD audio is astonishing. But some of the fine details are lost in the digital-to-analogue conversion, and vice versa during digital signal processing. Thanks to the i.LINK* Advanced Resolution Digital Audio Interface, all the original details are preserved. i.LINK supports device-to-device digital audio data transfers of all major compressed and uncompressed formats including operational commands. Only one digital cable is needed to connect the amplifier/receiver with any i.LINK-equipped audio source component — for example a DVD-Audio/Video/SACD player — to handle DVD-Audio and SACD discs (both multi-channel and 2-channel), not to mention digital audio from DVD-Video and CD. By utilising i.LINK's 2-way communication between units, Pioneer's PQLS (Precision Quartz Lock System) is able to conform the speed of the DVD player's signal transfer to the amplifier/receiver's crystal clock speed. This reduces jitter arising from the signal transmission to an absolute minimum**, and SACD and DVD-Audio sound reproduction is as true to the original source as possible.

* The i.LINK interface is also known as IEEE1394. 'i.LINK' and the 'i.LINK' logo are trademarks.

** When connected to a source player (DVD player, CD/SACD player) with compatible feature such as PQLS.

HIGH DEFINITION MULTIMEDIA INTERFACE

ONE CONNECTION FOR COMPLETE DIGITAL TRANSFER OF ALL SIGNALS (VSX-AX4AVi, VSX-AX2AV)

A single HDMI cable allows high definition video and uncompressed multi-channel surround audio — as well as standard stereo — to be directly transmitted between two HDMI-equipped units. The purity of the signal is maintained, true to the original, with absolutely no distortion or loss of quality. Two HDMI inputs are available, in addition to the standard inputs, allowing you to connect even more sources. Pioneer's Digital Video Converter even allows component, S-Video and composite signals to be up-converted to HDMI, allowing a single connection to your display. With the range of connection options, it is easy to configure any home installation. Additionally, you can adjust video parameters, such as brightness and contrast, independently for each function.

HIGHEST QUALITY EQUIPMENT

INNOVATIVE FRAME DESIGN CONCEPT GIVES SUPERIOR SUPPORT (VSA-AX10Ai, VSX-AX4AVi, VSX-AX2AV, VSX-1015)

The revolutionary 3-D space frame construction reinforces the physical strength of the amplifiers/receivers. Unlike traditional 2-D chassis designs, each part is fixed to the frame from various angles, so the unit has the strength to support the heavy transformer, without any distortion. The double-layered chassis ensures an extremely strong and rigid base for the 3-D frames. In addition, the chassis is copper-plated* to suppress signal interference between circuits and reduce ground impedance. This 3-D space frame works simultaneously with the concentrated direct construction to further minimise signal interference — which results in an open and fresh sound.

* VSA-AX10Ai only.

VSA-AX10Ai 3-D space frame with direct construction design:
1) Power supply 2) Video block 3) Power Amplifier
4) Audio block 5) i.LINK block 6) Digital block

VSX-AX4AVi
Direct Construction

THE PURE SOUNDS OF DIRECT CONSTRUCTION (All A/V amplifiers and receivers)

Pioneer's A/V amplifiers and receivers are designed with a highly efficient, or 'direct', internal construction, which minimises distortion and suppresses signal interference between circuits. This is achieved by positioning parts more efficiently along the signal route, separating digital and analogue circuits and reducing the PCB units. These measures contribute to producing the highest grade of audio and video reproduction.

SOLID HIGH PERFORMANCE AUDIO FOR EACH CHANNEL

(VSA-AX10Ai, VSX-AX4AVi, VSX-AX2AV, VSX-1015)

One of the secrets to these amplifier/receivers is Pioneer's exclusive Advanced Direct Energy (A.D.E.) power design. It produces an amazingly efficient, high-end sound quality with equally amplified power for each channel, to ensure consistent sound quality for multi-channel applications. This highly advanced circuitry is designed to offer high stability and ultra-linear amplification combined with low energy loss. The VSA-AX10Ai and VSX-1015 feature a new AC/DC isolated amplifier module, designed especially to optimise the A.D.E. MOSFET performance under any condition. Combined with the built-in temperature adjustment, it minimises power imbalances that can cause distortion in the sound stage.

AC/DC isolated amplifier module

Advanced Direct Energy MOSFET

Video Decoder-Encoder

OPTIMUM VIDEO PROCESSING (VSX-AX4AVi, VSX-AX2AV)

Thanks to a newly developed video decoder and encoder, you can be sure of the finest video quality. The video decoder's extended bandwidth makes it fully compatible with progressive DVD and HDTV, as well as standard NTSC, PAL and SECAM formats. These decoders perform 4 times oversampling for standard definition and 2 times oversampling for high definition formats, enabling the input of progressive scan signals. The video encoder can properly support NTSC and PAL colour standards. With these receivers, the video signal is passed on to the TV or display with the highest integrity.

SHARC® processor

THE MOST ADVANCED DIGITAL AUDIO PROCESSOR TO DATE (VSX-AX4AVi, VSX-AX2AV)

Audio quality has been enhanced even further, as a result of the new Advanced Dual Digital Core Engine. It includes the latest digital audio processing technology, such as Analog Devices' third-generation SHARC® processor. The performance of this DSP device has been dramatically improved over the previous generation. The audio signal processing capability has in fact doubled, while the consumption power has been cut in half. Its 32-bit high-performance engine processes digital data with extreme precision, and fully supports the latest surround sound formats to surpass the limits of the digital audio range.

SHARC is a trademark of Analog Devices, Inc.

ULTRA CONVENIENT FEATURES**MORE CHOICE OF SPEAKER CONFIGURATIONS** (VSA-AX10Ai, VSX-AX4AVi, VSX-AX2AV, VSX-1015)

With these amp/receivers, you've got more options to configure your speakers. If you're a true hi-fi stereo lover, you might want additional support for your front speakers. In Bi-Amp mode, the surround back speaker channels can be reassigned to drive the front speakers. Separate amplifiers for the high and low frequency drivers allow better crossover performance. The speakers must be bi-amplable though — with separate high and low terminals. There's also the possibility to power stereo speakers in another room. Either option still leaves you with 5.1 surround in your main room.

**WINDOWS MEDIA™ AUDIO 9 PROFESSIONAL**

(VSA-AX10Ai, VSX-AX4AVi, VSX-AX2AV, VSX-1015, VSX-915, VSX-515)

It's no understatement that these Pioneer A/V amp/receivers are completely up-to-the-minute with the latest surround formats. They incorporate a WMA9 Pro decoder, the first digital surround sound coding technology for the Web — developed by Microsoft. When connected to a PC with Windows Media Player 10, you are able to enjoy high-resolution stereo (96 kHz/24-bit) or 5.1-channel surround audio at 128 k — 768 Kbps compression rates. At any given bit rate, 5-channel WMA9 Pro will bring you higher fidelity than other sound compression algorithms thanks to the latest audio codec technology.

EASY ROOM AND SEAT POSITION SET-UP

(VSX-915, VSX-515, VSX-415)

Now you can select your room size and seat position for maximum sound impact. By using the Room Set-up button, you can select the size of your room (large, medium, small) and the sound will be adjusted accordingly. You're also able to indicate your listening position (forward, middle, back) so that the sound (delay) can be matched to where you're sitting.

SURROUND MODES FOR MORE PERSONALISED VIEWING (All A/V amplifiers and receivers)

Enhance your entertainment experience even further. Just take advantage of Pioneer's pre-defined Original Surround modes and listening modes to tailor the sound to your specific listening conditions or source. Bring out big-theatre sound from action movies with Advanced Movie mode, while Advanced Music mode will make you believe you're in a large concert hall. 5/6/7-Channel Stereo uses all the speakers in the system to simulate a stereo feeling and create rich surround sound. (6/7-Channel Stereo is used with one or two Surround Back speakers; if none are available, 5-Channel Stereo takes effect.) Virtual Surround Back creates a highly convincing 'phantom' surround back sound behind you. Expanded Theatre mode adds more sound depth to Dolby Surround sources. For TV or headphone listening turn on TV Surround and Phones Surround modes for enhanced surround effects. A sports fan? You'll feel right in the middle of the stadium with Sports mode. Try out Game mode if you're an avid gamer. It deepens the sound of powerful movement and speed for intense video game action. During those late night movies, put on Midnight Listening mode for better cinema-like sound at low volumes. If poken dialogue isn't clear during action sequences, switch on Dialogue Enhancement mode.

See the charts on pages 91 — 92 for availability of modes for each receiver.

Sports mode blasts you straight to the scene of the match, as though you were personally at the stadium

ENTIRE HOME SYSTEM AT YOUR FINGERTIPS (VSX-AX4AVi, VSX-AX2AV, VSX-1015, VSX-915)

With the SR+ interface, you can integrate your A/V receiver with a Pioneer Plasma TV with minimum fuss. Receiver status, controls and set-up features are displayed on the plasma for easy operation; the plasma TV automatically follows the input and accepts remote control commands from the A/V receiver. Advanced SR+ also includes a macro function, an easy solution for frequently used multi-step system commands (available for VSX-AX4AVi and VSX-AX2AV only).

For example, press the macro and DVD buttons on the remote control, and the plasma TV, A/V receiver and DVD player will all switch on at the same time. Moreover, the input function for both the plasma TV and the A/V receiver will be changed automatically.

LCD PRESET & LEARNING REMOTE CONTROL

(VSX-AX4AVi, VSX-AX2AV, VSX-1015, VSX-915)

Operating your receiver just got even simpler. These receivers are outfitted with Pioneer's exclusive new remote control, with an intuitive and easy-to-understand key layout. It features an LCD display, which gives information about the source currently being controlled. It enhances ease-of-use between the receiver and a Pioneer DVD player, DVD recorder and plasma TV. And, it includes a host of preset codes and learning capability, which make setting up a cinch.

Enter a paradise of pure audio

Embark on a bold adventure of sonic excellence with Pioneer's home cinema speaker sets. Sound has never been so colourful or so clear — just like nature intended. Echo the professional audio of the studio with revolutionary world-class speakers. There's never been more freedom of choice when it comes to design or finish. As diverse as the jungle itself. But when it comes to quality, only the best will do.

STANDOUT TECHNOLOGIES

SPEAKERS DESIGNED FOR EVERY TASTE IN INTERIOR

You demand an entertainment system with utmost digital purity. Only a first-class set of home cinema speakers can maintain the integrity of the digital source and reproduce truly pure audio. Ordinary speakers just won't suffice. Pioneer has spent the greater part of 60 years continuing its dedication to acoustic research and speaker design. In 2000, the SDC (Speaker Design Centre) was established in Paris in order to stay up-to-date with European trends and new technologies. This has resulted in an enormous selection of expertly crafted speakers. There is a range of designs and finishes to fit practically any taste and interior.

S-VIEX-QL

This year, Pioneer is delighted to introduce the EX series: an absolute-reference home cinema speaker set, based on professional audio industry technology found in the world's most renowned TAD studio monitoring speakers.

A wide selection of superb-sounding wood finish home cinema sets will please those with an eye — and ear — for quality. They are constructed with unique acoustic designs and the latest in speaker technology. To satisfy your style, they are available in trendy beech wood or more traditional dark oak wood.

S-V810A

Fans of the cooler tones will opt for home cinema sets in a contemporary aluminium finish.

S-V710-III

Minimalists most certainly will vote for the design-oriented, lifestyle home cinema sets with trendy slim satellite speakers that look fabulous wall-mounted.

NEW

S-V1EX/S-V2EX

EX Series Speaker Set

Front 200 W Max.
Rear & Centre 200 W Max.

S-V1EX-W

S-V1EX-QL

MAIN FEATURES

- ★ Designed to please even the most demanding audiophiles, Pioneer's EX series high-end speaker system is a true reflection of Pioneer's dedication to sound perfection, combining cutting-edge speaker technology and high-quality design.
- The S-V1EX set consists of two floor-standing front speakers (S-1EX), a centre speaker (S-7EX) and two rear bookshelf type speakers (S-2EX), all of which are magnetically shielded for video use.
- All speaker units are designed by TAD (Technical Audio Devices) — the world-famous manufacturer of professional recording studio loudspeakers.
- Each 3-way floor-standing and centre speaker features two 18 cm TAD woofers with Carbon Aramid cones, a concentric TAD midrange/tweeter speaker unit with a 14 cm Magnesium midrange cone and a 3.5 cm Beryllium tweeter.
- The exceptional TAD Beryllium tweeter can reproduce very high frequencies (up to 100 kHz) of DVD-Audio and SACD. For the best sound performance, it's recommended to combine these speakers with DVD-Audio and SACD compatible receiver and players.
- The EX series speaker's heavy and rigid cabinet was designed to eliminate the influence of internal standing waves, while its front baffle 'Precision Curve' is responsible for a perfect time alignment of the sound.
- For a pure music and home cinema experience, Pioneer acoustics engineers recommend the following amplifiers: VSA-AX10Ai, VSX-AX4AVi.

Featuring a more space-conscious design, but offering the same high-end performance level, the S-V2EX home cinema speaker set consists of four bookshelf speakers (S-2EX) and a centre speaker (S-7EX).

For more details on features and technology, please visit www.pioneer-eur.com

S-V2EX-QL

S-V2EX-W

The EX series is a true testament to Pioneer's commitment to creating an absolute reference speaker system. Designed in France — with engineering contributions from Japan and the USA — it owes many technical specifications to the TAD M1, considered by audio professionals as one of the best speakers in the world.

Tweeter components

TAD SPEAKER UNITS BY TAD

The EX series speaker units are designed by TAD (Technical Audio Devices), Pioneer's world leading brand of professional studio monitor speakers. TAD speaker units have been used in many of the world's major recording studios and are regarded by many top artists as the reference monitor speakers for recording and digital remastering.

TAD speaker units feature proprietary Beryllium tweeter diaphragms. Beryllium is a very lightweight, yet exceptionally strong metal and can produce extremely clear and accurate sound extending well above the limit of human hearing, so that both SACD and DVD-Audio recordings can be enjoyed to the fullest.

TAD proprietary CST (Coherent Source Transducer) technology controls the phase and directivity of the drive unit. The perfect concentric setting of the acoustic centres of the tweeter and midrange transducers remarkably improves the sound image precision and the off-axis frequency response of the speaker system.

Precision Curve

A CABINET DESIGNED FOR PERFECTION

A speaker enclosure should add no noise of its own to the sound reproduction. The EX series cabinets are crafted from multiple layers of laminated MDF, ranging from a minimum of 30 mm up to a generous 100 mm, to ensure that the enclosure remains inert. In addition, thanks to Pioneer's proprietary Acoustic Balance Drive software, the internal structure of this ultra-strong and rigid cabinet was meticulously designed to minimise internal standing waves.

In an ideal system, all sounds produced by the loudspeakers arrive at the listener's ears simultaneously. But if the drivers of the speaker system are positioned at different distances from the listener, then the impression of the original performance is lost. The EX series' cabinets therefore feature a unique curvature and backward slope of the front baffle, which ensures that all sound waves reach the listener's ears at the exact same time, guaranteeing perfect sonic time alignment. The sound quality reaches a higher level than ever before, with exceptional clarity and focus.

AIR STUDIOS CERTIFIED

AIR STUDIOS

The most talented AIR Studios sound engineers helped finetune and test the final design of Pioneer's EX series. Situated in London, AIR Studios is regarded as one of the top music recording studios in the world, drawing some of the finest musicians and performers from across the globe.

Driven by ultra-deep tones?

Add one — or even two — Pioneer S-W250S subwoofers for sound so deep, it could be emanating from the earth's core.

For full features and specifications, please see pages 95 — 96.

S-V810A**Home Cinema Speaker Set**

**Front 130 W Max.
Rear & Centre 130 W Max.
Subwoofer 250 W RMS**

Detail back of front floor-standing speaker

MAIN FEATURES

- The S-V810A high-end 5.1 speaker system fulfils perfectly the needs of home cinema and music lovers. The superb real beech veneer finish combined with exceptional acoustic design using the latest technologies makes this speaker system unique in its kind.
- This set consists of two floor-standing front speakers (S-H810V), a centre speaker (S-C80), two rear bookshelf type speakers (S-F80) and the S-W250S active subwoofer. All speakers are magnetically shielded for video use.
- Each 4-way floor-standing and centre speaker features two 13 cm woofers with KEVLAR®* fibre cones, a 13 cm concentric midrange/tweeter including a 2.5 cm tweeter with metal dome and a Riffel-type super tweeter (only for S-H810V). These speaker units are assembled on a heavy and very rigid cabinet, which has been specially designed in order to minimise internal standing waves.
- Obtain deep bass quality sound reproduction thanks to the S-W250S active subwoofer (see page 71).
- This 5.1-channel speaker set can reproduce very high frequencies (up to 100 kHz for the front speakers and 50 kHz for centre and rear speakers).
- For a perfect music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-AX4AVi, VSX-AX2AV.

S-V80A**Home Cinema Speaker Set**

S-V520-QL

S-V520-QL

MAIN FEATURES

- This set comprises two bass-reflex-type floor-standing speakers, one centre speaker and two rear satellite speakers.
- Each floor-standing speaker features two 14 cm woofers (LDMC technology, see page 74) with glass fibre cones and a 2.5 cm tweeter with a cloth dome. The curved shape of the enclosure has been specially designed in order to minimise internal standing waves.
- The elegantly-designed matching 2-way centre speaker and rear satellite speakers complete this package perfectly by creating precise and homogeneous surround sound.
- Enjoy this set's pure and smooth lines with a choice of wood tones in a light design or a trendy dark wood with black details.
- For an optimal music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-1015, VSX-915.

**Front 130 W Max.
Rear & Centre 130 W Max.
Subwoofer 150 W RMS**

S-V710-III
with white grille

S-V710-III
with burgundy grille

MAIN FEATURES

- Enhance your audio-visual entertainment experience, as well as your interior with this majestic home cinema set.
- It comprises two floor-standing front speakers (S-H710V), centre and rear satellite speakers (S-ST70-CR) and a 150 W active subwoofer (S-W150S-K). All speakers in this set are magnetically shielded for video use.
- The design features natural elements, like an aluminium cabinet, wood front panel and zinc for the top and base of the floor-standing speakers.
- This versatile speaker package includes three different coloured grilles — black, burgundy and white — so you can change the look of the speakers to fit your interior or your mood.
- For a perfect music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-AX2AV, VSX-1015.

S-V610**Home Cinema Speaker Set**

**Front 100 W Max.
Rear & Centre 100 W Max.
Subwoofer 120 W RMS**

MAIN FEATURES

- Enhance your cinematic sound experience, as well as your interior with this trendy speaker set.
- Consists of: S-H610V (2-way front floor-standing speakers), the S-C60 and S-F60 (2-way centre + rear satellite speakers), and the S-W110S-K active subwoofer. All speakers in this set are magnetically shielded for video use.
- The two floor-standing speakers have a ring-shaped base and a real aluminium body.
- The centre speaker also has a ring-shaped base, and both the centre and rear satellite speakers have matching real aluminium bodies.
- For an optimal music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-1015, VSX-915.

S-V410**Home Cinema Speaker Set**

**Front 100 W Max.
Rear & Centre 100 W Max.
Subwoofer 85 W RMS**

MAIN FEATURES

- This elegant and statuesque two-way speaker system is finished in real aluminium.
- Get brilliant audio from the stylish S-SP410, consisting of 4 floor-standing speakers (front and rear) with a matching slim-design centre speaker. All speakers in this package are magnetically shielded for video use.
- The square-type 85 W subwoofer (S-W90S) in this combination has a simple design, with pure lines in striking matt-black and silver.
- For an exciting music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-515, VSX-415.

S-V70-III**Home Cinema Speaker Set**

**Satellite 130 W Max.
Subwoofer 150 W RMS**

**MAIN FEATURES**

- Create a futuristic-looking home cinema system with this ultra-modern 2-way speaker set.
- It comprises front satellite speakers (S-ST70-F), centre and rear satellite speakers (S-ST70-CR) and a powerful subwoofer (S-W150S-K).
- Create powerful cinema sound with these five space-saving, magnetically shielded satellite speakers and the 150 W RMS active subwoofer.
- This versatile speaker package includes three different coloured grilles — black, burgundy and white.
- For a perfect music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-1015, VSX-915.

S-V70-III with white grille

S-V70-III with burgundy grille

S-V60**Home Cinema Speaker Set**

**Front 100 W Max.
Rear & Centre 100 W Max.
Subwoofer 120 W RMS**

**MAIN FEATURES**

- This elegant system consists of the S-F60 front and rear speakers, the S-C60 centre speaker and the S-W110S-K active subwoofer.
- Get great surround sound with 4 bookshelf-type satellite speakers, and a centre speaker in a matching design, all magnetically shielded and with an aluminium body.
- For an optimal music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-915, VSX-515.

S-V42**Home Cinema Speaker Set**

**Satellite 80 W Max.
Subwoofer 85 W RMS**

**MAIN FEATURES**

- This winning speaker combination finished in real aluminium is both tasteful and modern in design.
- It comprises 5 small, magnetically shielded S-SP42 satellite speakers in subtle silver and the S-W90S active subwoofer.
- The square-type 85 W subwoofer in this combination has a simple design, with pure lines in striking matt-black and silver.
- For an exciting music and home cinema experience, Pioneer acoustics engineers recommend the VSX-415 receiver.

S-VLF5**Home Cinema Speaker Set**

**Satellite 130 W Max.
Subwoofer 150 W RMS**

**MAIN FEATURES**

- This smart and modern speaker package is crafted from attractive natural materials — aluminium, zinc and 100% pure wood — which also provides strength to the cabinet for pure and accurate sound reproduction.
- It comprises 2 front speakers (S-LF5-F), 1 centre and 2 rear speakers (S-LF5-CR), all magnetically shielded and with a matching light wood and aluminium tone.
- The S-W150S active subwoofer, with its 150 W RMS total output power, complements the satellite speakers with its natural light wood tone.
- This versatile speaker package includes two different coloured cloth grilles (black and white) for a softer touch within a more traditional setting.
- This speaker set has a flat design, making it ideal for wall placement.
- For an optimal music and home cinema experience, Pioneer acoustics engineers recommend the following receivers: VSX-1015, VSX-915.

HOME CINEMA SPEAKERS TECHNOLOGY

WORLD-CLASS TAD SPEAKER DESIGN (S-1EX, S-7EX, S-2EX)

Only the very best speaker components were considered for Pioneer's new audio masterpiece: the EX series. So it's no surprise that TAD (Technical Audio Devices) speaker design is incorporated into these reference-class units. They were crafted with extreme precision by TAD experts, and adhere to their rigorous standards. TAD professional studio monitoring loudspeakers are first choice in recording studios across the globe. They have set a standard for audio excellence and reliability, as recognised by many world-famous performers and professional sound engineers.

The legacy began 30 years ago, and now TAD speakers can be found wherever the highest sound quality is required: studio monitors, concert hall speakers, cinema audio systems, and more.

Professional recording studio equipped with TAD speaker

TAD'S RIGID BERYLLIUM TWEETER FOR ACCURATE HIGH-FREQUENCY AUDIO REPRODUCTION

(S-1EX, S-7EX, S-2EX)

The EX series speakers were designed with such attention to detail, every element of the speaker units was considered so they can reproduce exceptionally accurate audio. The tweeter diaphragm is composed of Beryllium metal which is light and extremely rigid. This has resulted in an ultra-strong tweeter diaphragm with perfectly solid piston performance. It precisely reproduces the audio signal; absolutely no distortion or resonance is added to the audio performance. No other high-end audio loudspeaker today can match the damping characteristics of these speakers. It is this — pure and solid performing diaphragm — which makes Beryllium tweeters ideal for reproducing the high frequencies of DVD-Audio and SACD, up to 100 kHz. These revolutionary audio formats recreate sound as it actually exists in the real world, with all its original artistic qualities intact. The Beryllium tweeters enable rich and true DVD-Audio and SACD sound reproduction, covering large bandwidths and a wide dynamic range.

Beryllium diaphragm

THE PRECISE SOUND IMAGING OF TAD'S CST (COHERENT SOURCE TRANSDUCER)

[S-1EX, S-7EX, S-2EX]

To ensure that all sound — direct and reflected — arrives at the listening position with identical timbre, TAD's exclusive CST (Coherent Source Transducer) driver technology has been implemented in the EX series. The Beryllium tweeter is mounted in the centre of the magnesium midrange driver, allowing the sound directivity to be precisely controlled at all frequencies. The resulting aligned sound delivery is extremely smooth and coherent. Unlike with conventional drivers, the problems with phase and off-axis frequency response have been totally eradicated.

TAD's CST unit

AIR STUDIOS

THE MARK OF EXCELLENCE: AIR STUDIOS CERTIFICATION

[S-1EX, S-7EX, S-2EX]

The EX series speakers have undergone rigorous acoustic testing at AIR Studios in London, one of the world's leading recording studios, and therefore meet its strict studio replay standards. Some of the most talented AIR Studios sound engineers contributed an unquestionable amount of know-how to fine-tune the EX series speaker systems. So they can replicate a professional studio sound environment in your home, with ideally controlled acoustics.

Sir George Martin, the legendary Beatles producer and an Academy Award-nominated composer, founded AIR Studios in 1969. AIR Studios is now a state-of-the-art recording complex with matchless facilities for film scoring, rock, pop, classical and orchestral work, video game sound design, post-production and live events. Many popular and celebrated musical talents, like Madonna, Paul McCartney, Elton John, Robbie Williams, Oasis and Coldplay have recorded in this unique and inspirational recording environment.

AIR Studios control room

NEW PIONEER CONCENTRIC SPEAKER TECHNOLOGY FOR EXTENDED AND ACCURATE HIGH FREQUENCIES

[S-H810V, S-F80, S-C80]

These concentric speaker units were specially designed by Pioneer and TAD engineers. The 25 mm metal dome tweeter includes exclusive Pioneer technology, the Harmonised Synthetic Diaphragm Method (HSDM), which optimises and extends the high frequency response to 50 kHz. According to this method, the diaphragm is created by meticulous computer analysis. The piston motion and vibration are harmonised, resulting in more accurate musical timing. The perfect concentric setting of the concentric transducers improves the sound image precision as well. The speakers feature a die-cast aluminium frame for extremely solid support.

Concentric speaker units

NEW ULTRA-LIGHT RIFFEL SUPER TWEETER FOR DVD-AUDIO AND SACD

[S-H810V, S-H710V]

Pioneer's original Riffel-type super tweeters improve upon the typical 'folded-type', narrow gap design. Pioneer has created a new ultra-light diaphragm, made possible because the circuit of the voice coil is directly printed on a very thin plastic film. Thanks to this new design, the Pioneer Riffel Super Tweeter can accurately reproduce the very high frequencies — up to 100 kHz — of DVD-Audio and SACD.

Riffel-type super tweeter

LOW DISTORTION AT HIGH POWER LEVELS THANKS TO LDMC (LINEAR DRIVE MAGNETIC CIRCUIT) ORIGINAL TECHNOLOGY

[S-H520V]

Pioneer's newly developed Linear Drive Magnetic Circuit enables the creation of a loudspeaker with an extended low frequency range and with low distortion. This special magnetic structure improves the amplitude linearity at high power levels, which allows for true linear movement, more accurate musical reproduction and deeper bass.

Tap into the latest in sonic performance with Pioneer's audio speaker sets. Hi-fi audio reproduction has never been purer. Especially with premium professionally designed speakers. Create the ultimate home cinema speaker set and boost your surround sound to the max. Stylish designs, choice materials and expert construction — the choice is yours.

NEW

S-1EX-QL/W

EX Series Audio Speaker Set

200 W Max.

MAIN FEATURES

- The S-1EX is the most precise and linear speaker system that has been introduced in the European market by Pioneer and is designed to please even the most demanding audiophiles.
- All speaker units are designed by TAD (Technical Audio Devices) — the world-famous manufacturer of professional recording studio loudspeakers.
- The 200 W 3-way floor-standing speakers each feature two 18 cm TAD woofers with Carbon Aramid cones, a concentric TAD midrange/tweeter speaker unit including a 14 cm Magnesium midrange cone and a 3.5 cm Beryllium tweeter.
- The perfect setting of the acoustic centres of the S-1EX concentric transducers (midrange/tweeter) improves the sound image precision and the off-axis frequency response.
- Thanks to its fantastic TAD Beryllium Tweeter, the S-1EX does not need an additional super tweeter to reproduce the very high frequencies (up to 100 kHz) of DVD-Audio and SACD. For the best sound performance, it's recommended to combine these speakers with DVD-Audio and SACD compatible receiver and players.
- The heavy and rigid cabinet's internal structure was designed to eliminate the influence of internal standing waves.
- The curvature and backward slope of the front baffle ensures perfect sonic time alignment, meaning that all sound waves reach the listener's ear at the exact same time. The resulting sound has exceptional clarity and focus.
- The S-1EX is magnetically shielded to prevent interference to TV sets.
- Attractively finished in real beech veneer or trendy dark wood veneer, this eye-catching audio speaker set will stand out in any interior.

S-1EX-QL

S-1EX-W

NEW

S-2EX-QL/W

EX Series Audio Speaker Set

200 W Max.

MAIN FEATURES

- All the high-end exclusive technologies of the S-1EX have also been used in this compact monitoring speaker type, the S-2EX.
- This compact model will equally please audio purists and music lovers looking for the same high-performance of the S-1EX.
- The two 200 W 3-way bookshelf-type speakers each feature a 18 cm TAD woofer with Carbon Aramid cone, a concentric TAD midrange/tweeter speaker unit with 14 cm Magnesium midrange cone and a 3.5 cm Beryllium tweeter.
- The S-2EX is magnetically shielded to prevent interference to TV sets.
- With its real beech veneer or trendy dark wood veneer finish this audio speaker set will effortlessly become the centre of attention.

S-2EX-QL

S-2EX-W

S-H810V**Audio Speaker Set
130 W Max.****MAIN FEATURES**

- This highly acclaimed audio speaker set produces a superb stereo environment with deep, rich bass and extremely precise and detailed musical information. Each floor-standing speaker features two 13 cm woofers with KEVLAR®* fibre cones, a 13 cm concentric midrange/tweeter including a 2.5 cm tweeter with metal dome and a Riffel-type super tweeter. They are assembled on a high and very strong cabinet with special curved design to minimise internal standing waves.
- The perfect setting of the acoustic centres of the midrange/tweeter speaker unit improves the sound image precision and the off-axis frequency response.
- The high-end 4-way network has been designed to match the phase of each way around the crossover frequencies, resulting in an accurate and non-directive sound. The transfer functions of each transducer associated with its network are 4th order Linkwitz-Riley type (24 dB/octave slopes).
- This 130 W magnetically shielded speaker set can reproduce very high frequencies (up to 100 kHz). In order to get the best sound performance, it's recommended to combine this set with DVD-Audio and SACD compatible receiver and players.
- These speakers are magnetically shielded to prevent interference to TV sets.
- This audio speaker set is attractively finished in real beech veneer.

Detail back of front floor-standing speaker

S-F80**Audio Speaker Set
130 W Max.****MAIN FEATURES**

- The elegantly designed 130 W 2-way bookshelf speakers (S-F80) produce extremely precise and homogeneous stereo sound. Each speaker features a KEVLAR®* fibre cone and concentric woofer/tweeter including a 2.5 cm metal dome type tweeter. They are assembled on a very strong cabinet with special curved design to minimise internal standing waves.
- The perfect setting of the acoustic centres of the midrange/tweeter speaker unit improves the sound image precision and the off-axis frequency response.
- The high-end 2-way network has been designed to match the phase of each way around the crossover frequencies, resulting in an accurate and non-directive sound. The transfer functions of each transducer associated with its network are 4th order Linkwitz-Riley type (24 dB/octave slopes).
- These speakers are magnetically shielded to prevent interference to TV sets.
- This audio speaker set is attractively finished in real beech veneer.

NEW**S-H520V-QL/W****Audio Speaker Set
130 W Max.**

S-H520V-QL

MAIN FEATURES

- The sound concept and philosophy of this elegant 130 W speaker system are based on the well-known S-H810V. These speakers deliver rich and detailed sound without coloration, for a pure audio experience.
- Each floor-standing speaker features two 14 cm woofers (LDMC technology, see page 74) with glass fibre cones and a 2.5 cm cloth dome tweeter. The curved shape of the enclosure has been designed to minimise internal standing waves.
- The 2-way network has been designed to match the phase of each way around the crossover frequency, resulting in an accurate and non-directive sound.
- These speakers are magnetically shielded to prevent interference to TV sets.
- Choose from two wood finishes — light or a trendy dark wood combined with black detailing.

the S-H520V-QL

S-H520V-W

NEW**S-H320V-QL/W****Audio Speaker Set
100 W Max.**

S-H320V-QL

MAIN FEATURES

- These 100 W 2-way floor-standing speakers each feature two 14 cm woofers with glass fibre cones and a 2.5 cm cloth dome tweeter assembled on a heavy and rigid cabinet to achieve clean and deep bass tones.
- The 2-way network has been designed to match the phase of each way around the crossover frequency, resulting in an accurate and non-directive sound.
- These speakers are magnetically shielded to prevent interference to TV sets.
- Choose from two wood finishes — light or a trendy dark wood combined with black detailing.

S-H320V-W

NEW**S-H240V-QL/W****Audio Speaker Set
80 W Max.**

S-H240V-QL

MAIN FEATURES

- These 80 W 3-way bass-reflex floor-standing speakers each feature a 14 cm woofer, a 7 cm midrange and a 2.5 cm tweeter. They ensure dynamic and well-balanced sound, ideal for a hi-fi system.
- These speakers are magnetically shielded to prevent interference to TV sets.
- Attractively finished in a choice of two wood tones, this hi-fi speaker set blends in harmoniously with any interior.

S-H240V-W

**S-H710V****Audio Speaker Set
130 W Max.****MAIN FEATURES**

- Consisting of two woofers, a tweeter and a super tweeter, this magnetically shielded speaker set creates brilliant DVD-Audio and SACD sound with a wide frequency range.
- The design features natural elements, like an aluminium cabinet, wood front panel and zinc for the top, base and centre flange of these floor-standing speakers.
- This versatile 130 W speaker package includes three different coloured grilles — black, burgundy and white — so you can change the look of your speakers to fit your interior or your mood.
- The S-H710V speaker package is magnetically shielded to prevent interference to TV sets, and can therefore also double as a home cinema speaker set.

S-H710V with white and burgundy grille

**S-H610V****Audio Speaker Set
100 W Max.****MAIN FEATURES**

- Bring high-performance sound to any living space thanks to these elegant 2-way 100 W speakers.
- These powerful speakers with ultra-modern design and ring-shaped base are sure to make a style statement.
- The S-H610V speaker set, fashioned in 100 % aluminium, is magnetically shielded to prevent interference to TV sets, and can therefore also double as a home cinema speaker set.

**CS-7070****Audio Speaker Set
190 W Max.****MAIN FEATURES**

- Enjoy the pure and powerful sound of these 3-way speakers with 190 W of audio power.
- These speakers are an excellent choice for any hi-fi system.
- The CS-7070 set is magnetically shielded to prevent interference to TV sets, and can therefore also double as a home cinema speaker set.

**CS-5070****Audio Speaker Set
140 W Max.****MAIN FEATURES**

- Get great sound thanks to these 3-way speakers with 140 W of audio power.
- These speakers are an excellent choice for any hi-fi system.
- The CS-5070 set is magnetically shielded to prevent interference to TV sets, and can therefore also double as a home cinema speaker set.

**CS-3070****Audio Speaker Set
120 W Max.****MAIN FEATURES**

- Opt for these subtle and compact 120 watt, 3-way speakers — a space-saving, quality audio solution.
- The CS-3070 set is magnetically shielded to prevent interference to TV sets, and can therefore also double as a home cinema speaker set.

Breathe life into your audio system with the superior sound and design quality of a Pioneer audio component. Whether you are starting from scratch or upgrading your system, Pioneer has just what you need to create a custom-fit sound. Choose from a range of CD recorders, CD players, cassette deck and amplifiers. For those who love music, it doesn't get any better than this.

CD RECORDER

Digital discs stand the test of time, every time. With a Pioneer CD recorder, selection, recording, searching and retrieval of tracks is simplicity itself. Mix all your favourite tunes, even from analogue sources, in whatever order you like. Any way you play it, you win.

PDR-W839

CD Recorder

MAIN FEATURES

- Record from one to three CDs onto your own personalised CD
- 'Rec This' button for automatic recording
- Fast record thanks to the improved 2 x finalisation process and double speed dubbing
- Create and edit personalised CD Text via the front panel input connection for a keyboard

CD PLAYERS

Compact, convenient and reliable, the appeal of CDs and CD players will never fade away. With standards as high as ever, Pioneer CD players stand out. There are even CD players for filing away up to 301 CDs that can access any track immediately. So there's never an end to your listening pleasure.

PD-F1009 301 CDs

File-Type CD Player

MAIN FEATURES

- Unique loading roulette rack system and single loader for storage of 301 CDs in a surprisingly compact unit
- Wide selection of listening modes, CD Text and CD-RW playback capability
- Legato Link Conversion for more faithful reproduction of the original sound
- Low power consumption

PD-F1007 301 CDs

File-Type CD Player

PD-F958 101 CDs

File-Type CD Player

PD-F706 25 + 1 CDs

File-Type CD Player

PD-F607 25 CDs

File-Type CD Player

PD-M426

Multi CD Player

MAIN FEATURES

- Store up to six discs in a separate loader
- Anti-resonance and anti-vibrating design for stable sound output
- Pick up listening where you left off with the Last Disc Memory function

PD-M406

Multi CD Player

JD-M300

6-CD Magazine

MAIN FEATURES

- Sort your favourite CDs into a separate loader
- For use with the PD-M426 and PD-M406 Multi Compact Disc players

AMPLIFIERS

Power, precision and purity all contribute to a sound's unadulterated impact. Pioneer amplifiers provide it all. Every performance is a clear, distortion-free listening experience. Peak power is pumped out with outstanding efficiency. Extra connections make these powerhouses easy to integrate into any audio system.

A-607R

Integrated Amplifier

120 W x 2 DIN

MAIN FEATURES

- Pump out pure sound with a superb low frequency range and exceptionally low noise
- High-quality Direct Energy MOS FET circuit drives low impedance speakers and delivers clean hi-fi sound throughout the frequency range
- Symmetrical design adds to the perfect stereo sound

A-509R

Integrated Amplifier

90 W x 2 DIN

A-307R

Integrated Amplifier

80 W x 2 DIN

A-209R

Integrated Amplifier

60 W x 2 DIN

A-109

Integrated Amplifier

40 W x 2 DIN

CASSETTE DECK

Your cassette tapes are still around after all of these years... A Pioneer cassette deck will make them sound as good as ever. With up-to-date noise reducing technology, your analogue sources will be enhanced. Low-noise recording and playback means a new lease on life for all your old favourites.

CT-W208R

Double Cassette Deck

MAIN FEATURES

- This quality double cassette deck is a perfect addition to any audio system

TURNTABLE

PL-990

Full Automatic Stereo Turntable

MAIN FEATURES

- Full automatic operation: To provide easy hands-off operation
- Low-mass straight tone arm: Highly sensitive and resistant to resonance, track records better
- Precision DC servo motor: Pioneer Stable Hanging Rotor ends spindle wobble for smoother and more accurate platter rotation
- Universal-type cartridge connector
- Phono EQ included
- Dimensions (W x H x D): 420 x 100 x 342 mm
- Weight: 2.65 kg

1) DVD-R/DVD-RW/DVD-RAM/DVD+R/DVD+RW/CD-R/CD-RW playback: Disc may not be played back because of following reasons: recording characteristics of recorder, characteristics of disc, scratches and dust on disc, dust and condensation on pickup lens. CD-R/CD-RW playback: CD-R/CD-RW discs for Audio, recorded in CD Audio, VideoCD, WMA/MP3 audio or JPEG formatting can be played back. Unfinalised discs except CD audio formatting cannot be played back. Only CD audio is not compatible with multi-session discs. Only the first session of a multi-session disc will be recognised. For DVD-RAM playback, please take the disc out of the cartridge before use. Only DVD+R/DVD+RW discs recorded in 'Video Mode [DVD Video Mode]' which have been finalised, can be played back. However, some editing made during the recording may not be played back accurately. DVD-RAM, DVD+R/DVD+RW discs are playback compatible only. No recording compatibility. 2) WMA content can be encoded by using Windows Media[®] Player version 9, Windows Media[®] Player for Windows[®] XP, or Windows Media[®] Player 10 Series. Compatible with sampling rate of 44.1 or 48 kHz. Not compatible with loss-less-encoding or variable bit-rate (VBR) WMA files. WMA files encoded with DRM (Digital Rights Management) copy protection will not play. Up to 99 folders and 999 tracks (MP3 and WMA) in total can be played. 3) Compatible with MPEG1 Audio Layer 3 44.1 kHz and 48 kHz formats. MP3 file name requires MP3 or mp3 as an extension. Compatible with VBR (Variable Bit Rate) (however the time display may not be shown correctly). Up to 99 folders and 999 tracks (MP3 and WMA) can be played in total. 4) JPEG file compatibility: This recorder is compatible with FUJICOLOR CD and KODAK Picture CD formats, as well as CD-R/CD-RW/CD-ROMs containing JPEG files. Baseline JPEG and EXIF files up to 19 megapixels are supported (maximum vertical resolution is 3840 pixels and horizontal resolution is 5120 pixels). 5) Recording format should be in accordance with ISO9660 CD-ROM file system. Both Romeo and Joliet file systems can be played. On DVR-230, playback of Romeo file systems is not assured. CD physical format: Mode1, Mode2 XA Form 1. Chinese characters cannot be displayed, although files featuring such names can be played. 6) Only for DVD-RW Ver. 1.1/2x, Ver. 1.2/4x disc or Ver. 1.2/6x. 7) Sound output by means of Dolby Digital and Linear PCM audio only. Dialogue may not be clearly reproduced, depending on the recording conditions. No sound during DVD Chase Play. Chase Play is not available on DVR-230. 8) For DVD-R discs, remaining volume is not increased after erasing titles. For DVD-RW discs, remaining volume is increased when erasing the last title. 9) High-Speed Copy from DVD to HDD is only available for the original title in 'VR Mode [DVD Video Recording Mode]' (except One Touch Copy). High-Speed Copy from the titles recorded with computers or other DVD recorders may not be available. 10) Only for finalized DVD-R/DVD-RW discs recorded in 'Video Mode [DVD Video Mode]'. 11) Available only for input line system (625 system for all models). 12) "LINK" and "LINK" Logo are trademarks. Can be connected to video DV decks and DV camcorders. (Some models are not compatible). Cannot be connected to DVD players and A/V amplifiers.

About Dual Disc Playback: A DualDisc is a new two-sided disc: one side contains DVD content — video, audio, etc. — while the other side contains non-DVD content, such as digital audio material. The non-DVD [audio] side of the disc is not compliant with the CD Audio specification, and therefore may not play. It is possible that when loading or ejecting a DualDisc, the non-playing side of the disc could be scratched. Scratched discs may not play properly. The DVD side of a DualDisc plays in this product. DVD-Audio content will not play. For more detailed information on DualDisc specifications, please refer to the disc manufacturer or disc retailer.

Note VHS: Only video tapes having the VHS mark can be used. Video tapes with the HQ mark use VHS high-quality picture technology. Compatible with normal VHS format.

Video tapes recorded in LP mode cannot be played back on VCRs with SP mode playback only.

DVR-RT601H-S:

1) DVD-R/DVD-RW/DVD-RAM/DVD-R/DVD+R/CD-R/CD-RW playback: Disc may not be played back because of following reasons: recording characteristics of recorder, characteristics of disc, scratches and dust on disc, dust and condensation on pickup lens. CD-R/CD-RW playback: CD-R/CD-RW discs for Audio, recorded in CD Audio, VideoCD, WMA/MP3 audio or JPEG formatting can be played back. Unfinalised discs except CD audio formatting cannot be played back. Only CD audio is not compatible with multi-session discs. Only the first session of a multi-session disc will be recognised. For DVD-RAM playback, please take the disc out of the cartridge before use. Only DVD-R/DVD+R discs recorded in Video Mode [DVD Video Mode] which have been finalised, can be played back. However, some editing made during the recording may not be played back accurately. DVD-RAM, DVD+R/DVD+RW discs are playback compatible only. No recording compatibility. 2) WMA content can be encoded by using Windows Media® Player version 9, or Windows Media® Player for Windows® XP. Compatible with sampling rate of 44.1 or 48 kHz. Not compatible with loss-less-encoding or variable bit-rate [VBR] WMA files. WMA files encoded with DRM [Digital Rights Management] copy protection will not play. Up to 99 folders and 999 tracks [MP3 and WMA] in total can be played. 3) Compatible with MPEG1 Audio Layer 3 44.1 kHz and 48 kHz formats. MP3 file name requires MP3 or mp3 as an extension. Compatible with VBR [Variable Bit Rate] (however the time display may not be shown correctly). Up to 99 folders and 999 tracks [MP3 and WMA] can be played in total. 4) JPEG file compatibility: This recorder is compatible with FUJICOLOR CD and KODAK Picture CD formats, as well as CD-R/CD-RW/CD-ROMs containing JPEG files. Baseline JPEG and EXIF files up to 19 megapixels are supported (maximum vertical is 3840 pixels and horizontal resolution is 5120 pixels). 5) Recording format should be in accordance with ISO9660 level 2 CD-ROM file system. Both Romeo and Joliet file systems are playable. CD physical format: Mode1, Mode2 XA Form 1. Chinese characters cannot be displayed, although files featuring such names can be played. 6) Only for DVD-RW Ver. 1.1/2x, Ver. 1.2/4x disc or Ver. 1.2/8x. 7) Sound output by means of Dolby Digital and Linear PCM audio only. Dialogue may not be clearly reproduced, depending on the recording conditions. No sound during DVD chase play. 8) For DVD-R discs, remaining volume is not increased after erasing titles. For DVD-RW discs, remaining volume is increased when erasing the last title. 9) High-Speed Copy from DVD to HDD is only available for the original title in 'VR Mode [Video Recording Mode]' (except One Touch Copy). High-Speed Copy from the titles recorded with computers or other DVD recorders may not be available. 10) Only for finalised DVD-R/DVD-RW discs recorded in 'Video Mode [DVD Video Mode]'. 11) Available only for input line system [625 system for all models].

Notes: Copying of "record only once" programme to the VHS is not allowed. Programmed recording for VHS is not possible.

DVR-RT501-S:

Note DVD: This unit may not be able to record to or playback from discs that have been recorded on other units due to the recording conditions, surface dirt or scratches. Other units may not be able to record to or playback from discs that have been recorded on this unit due to the recording conditions, surface dirt or scratches. 13) DVD/CD-R/CD-RW playback: Disc may not be played back because of following reasons: recording characteristics of recorder, characteristics of disc, scratches and dust on disc, dust and condensation on pickup lens. CD-R/CD-RW playback: CD-R/CD-RW discs for Audio, recorded in CD Audio, WMA/MP3 audio or JPEG formatting can be played back. Unfinalised discs except CD audio formatting cannot be played back. Only CD audio is not compatible with multi-session discs. 14) WMA content can be encoded by using Windows Media® Player version 9, or Windows Media® Player for Windows® XP. Compatible with sampling rate of 44.1 or 48 kHz. Not compatible with loss-less-encoding or variable bit-rate [VBR] WMA files. WMA files encoded with DRM [Digital Rights Management] copy protection will not play. Up to 50 folders and 200 tracks [MP3 and WMA] in total can be played. Compatible with MPEG1 Audio 32 kHz, 44.1 kHz, 48 kHz [32 kbps to 320 kbps] formats. MP3 file name requires .mp3 as an extension. Compatible with VBR [Variable Bit Rate] (however the time display may not be shown correctly). Up to 50 folders and 200 tracks [MP3 and WMA] can be played in total. 15) Recording in 'VR Mode [Video Recording Mode]' on DVD-R disc is not possible. Recording to 8x DVD-R media and 4x DVD-RW media is possible. 16) Recording time is based on 4.7 GB disc. 17) Records 30 mins, 1hr, 1 hr 30 mins, 2 hrs, 3 hrs, 5 hrs, 6 hrs with each push of the button. 18) 'Chapter Combine' function can work as 'Erase Chapter' function. 19) At FL OFF. In recording mode with VPS/PDC OFF.

Note: DualDisc Playback: The non-DVD side of a DualDisc is not compliant with the Compact Disc Digital Audio Specification and may therefore not be able to be played back.

The use of DualDisc may cause playback malfunctioning or damage to disc and/or player. Please refer to www.pioneer-eur.com for further information.

1) CD-R/CD-RW DVD-R/DVD-RW playback: Disc may not be played back because of following reasons: recording characteristics of recorder, characteristics of disc, scratches and dust on disc, dust and condensation on pickup lens. CD-R/CD-RW Playback: CD-R/CD-RW discs for Audio, recording in CD Audio, VideoCD or MP3/WMA audio formatting can be played back. Unfinalised discs cannot be played back. DVD-R/DVD-RW Playback: Unfinalised discs cannot be played back. 2) Compatible with MPEG1 Audio Layer3 format with a sampling rate of 32, 44.1 or 48 kHz. Recording format should be in accordance with ISO9660 CD-ROM file system. Both Romeo and Joliet file systems can be played. On RCS-55, playback of Romeo is not assured. Note that if the file structure is very complex, you may not be able to read/play all files on the disc. 3) WMA content can be encoded by using Windows Media® Player version 8 (or less), or Windows Media® Player for Windows® XP. Compatible with sampling rate of 32, 44.1 or 48 kHz. 4) JPEG file compatibility: This player is compatible with FUJICOLOR CD and KODAK Picture CD formats, as well as CD-R/CD-RW/CD-RMs containing JPEG files. 5) "All Repeat" is available for DVD-R and DVD-RW (Video Mode). 6) "All Repeat" is unavailable for DVD-R, DVD-RW (Video Mode), DivX® and WMA/MP3 discs. "A-B Repeat" is unavailable for DivX® and WMA/MP3 discs. 7) "Programme Play" and "Random Play" are unavailable for DVD-RW (VR Mode [DVD Video Recording Mode]), SVCD/VCD in PBC mode, DivX® and WMA/MP3 discs. 8) Does not work when input is coming from a tuner or other external equipment.

* Please see page 83 — 84 for RCS-77H and RCS-55 DVD Recorder specifications. ** Official DivX® Certified product. Plays DivX® 5, DivX® 4, DivX® 3 and DivX® VOD video content (in compliance with DivX® Certified technical requirements).

1) CD-R/CD-RW DVD-R/DVD-RW playback: Disc may not be played back because of following reasons: recording characteristics of recorder, characteristics of disc, scratches and dust on disc, dust and condensation on pickup lens. CD-R/CD-RW Playback: CD-R/CD-RW discs for Audio, recorded in CD Audio, VideoCD or MP3/WMA audio formatting can be played back. Unfinalised discs cannot be played back. DVD-R/DVD-RW Playback: Unfinalised discs cannot be played back. 2) Official DivX® Certified Product. Plays DivX® 5, DivX®4, DivX®3 and DivX® VOD video content (in compliance with DivX® Certified technical requirements). 3) JPEG file compatibility: This player is compatible with FUJICOLOR CD and KODAK Picture CD formats, as well as CD-R/CD-RW/CD-ROMs containing JPEG files. 4) Compatible with MPEG1 Audio Layer3 format with a sampling rate of 32, 44.1 or 48 kHz. Recording format should be in accordance with ISO9660 Level 1 or Level 2 CD-ROM file system. Note that if the file structure is very complex, you may not be able to read/play all files on the disc. 5) WMA content can be encoded by using Windows Media® Player version 8 (or less), or Windows Media® Player for Windows® XP. Compatible with sampling rate of 32, 44.1 or 48 kHz. 6) Other than DVD-Audio and SACD. 7) 'A-B Repeat' is available for DVD, CD Audio, VideoCD, SVCD. Not available for WMA/MP3. 'All Repeat' is unavailable for DivX®. 8) 'Programme Play' is unavailable for 'VR Mode [DVD Video Recording Mode]' format DVD-RW discs, VideoCD/SVCD in PBC mode, DivX®, WMA/MP3 discs, or while a DVD disc menu is being displayed. 9) Except VCD, SVCD, DivX®, DivX® Video and 'VR Mode [DVD Video Recording Mode]' format DVD-RW reverse. 10) Not available for DivX®, WMA/MP3 files. 11) DV-585A only. 12) Search functions are not available with VideoCD/SVCD in PBC mode, or with WMA/MP3 discs. 'Time Search' is available for DivX®, 'Time Search' is unavailable for DVD-Audio, or SACD.

For detailed information on the playback conditions, please refer to the owners manual.
