

Sima Audio Video Switcher with Component Video

Provides the necessary A/V inputs for adding components to your TV and home theater system. Has five audio/video inputs including component video, S-video and digital audio plus dual outputs to feed your TV and either a receiver or VCR for recording. The VS-502 will help make the transition to HDTV easy! **Features:** • **Easy video conversion:** Switch between three different video types including up-converting composite to S-video and composite and S-video to component video. • **Auto input sensing:** Detects the current unit in use and automatically connects to that input, without having to push any buttons! • **Automatic volume stabilization:** Volume compression setting pulls loud and soft sounds toward a mid-point in the dynamic range. • **Two independent output channels:** Two outputs let you select one source for viewing (like the DVD) to watch on your TV and a second source for recording (like the DSS) to feed to your VCR for recording at the same time.

Sima GoDVD! VHS and DVD Enhanced Duplicator

Sima's GoDVD! makes copying between VHS and DVD formats a snap. This single unit will copy DVD to VHS, VHS to DVD and DVD to DVD. Both NTSC and PAL conversions are included for videos recorded or viewed overseas. The GoDVD! digitizes the video signal to reduce sync "noise" and features four output settings to improve image quality. The CT-200 adds a color bar feature for calibration and an enhancement mode. **Features:** • Easy connection to any DVD recorder • Stabilizes video signals for crisp copies • Digital technology reduces noise in video sync • S-VHS, VHS-C, VHS, 8mm and DVD compatible • Four output signal enhancement modes: Normal, enhanced, darker and black/white • Supports NTSC and PAL formats • Makes perfect copies of any video automatically **Notice:** Use of this product for unauthorized duplication of copyrighted material from DVD, VHS or other media is prohibited under federal copyright laws unless the copy qualifies as a fair use under the Copyright Laws.

Sima Digital Video Effects Mixer

For professional quality mixing results without professional studio prices. Digital signal processing maintains the integrity of video signals keeping down "noise" while producing vibrant colors and crystal clear picture quality. Use strobe, mosaic, paint, still and negative effects to maximize the impact of your images on both A and B channels. Select the size and position of special effects areas with joystick accuracy. Create PIP windows and use the joystick to move location on the screen. Circle, bar, cross-hatch, corner and wedge wipes along with fade to black and fade to white effects. You can pre-set the speed of wipes and fades for one-touch automatic control. Use the chroma key (blue screen) or the luminance key (black screen) to isolate images and superimpose onto other scenes. Four inputs: Two audio/video inputs and two S-video inputs give editorial flexibility and increase options.

D-VHS NTSC
Home Theater Set-Up

"Digital Video Essentials", the long-awaited follow-up to the best-selling "Video Essentials", is the most advanced program for calibrating today's high-definition displays. Featuring the visual work of renowned cinematographer Allen Daviau ("E.T.-The Extra Terrestrial", "Empire Of The Sun", "The Color Purple"), "DVE" is the one calibration program that will render all of the other existing calibration discs obsolete. This is an essential resource for calibrating all high-definition displays when the source machine is a JVC HM-DH30000, HM-DH40000, or Marantz MV8300 HD digital VCR. **Limited quantities.**

TERK Remote Control Extenders

Leapfrog's remote control extender converts the infrared signal from a remote control into a long-range RF radio signal, allowing A/V systems to be controlled from virtually anywhere in the home without the need for additional equipment or wiring. Remote control extenders use the 418MHz frequency band to command components through any obstacle, including walls and floors. The product is ready to use in seconds, simply by mounting the sending unit to the remote and plugging in the receiver. Remote control extenders come with all the required equipment, including batteries. Just take it out of the box, set it up, and enjoy your components from wherever you choose. RCA and Dishnetwork extenders are designed specifically for your satellite receivers and the RCA units work with most RCA equipment.

X10 PRO

Powermid™ IR Extender Set

The Infrared Remote Control Extender includes one transmitter and one receiver.

The transmitter receives signals from any infrared remote control and converts them to wireless (RF) signals. These signals are transmitted to another location in the home and received by the receiver which converts the signals back to identical infrared signals to operate your TV, stereo, CD player, cable converter, etc. This lets you control all your audio and video products using your existing remote controls, from anywhere in the home! Plug a #RX569 extender into the back of the receiver if you want to place the receiver on top of a TV or stereo etc. (instead of in front of it).

Cartridges/Styli

DJs all over the world claim very high demands on their professional equipment, among which cartridges "plays" their decisive part by realizing the artistic

scratching-back-cuing and mixing work, as a big part of the show. Reliability and robustness is vital, when the cartridges night after night will have to withstand these demands in environments with extreme sound pressure and vibration. Many years of experience from producing cartridges, and a close contact to customers have now resulted in Ortofon versions directly addressed to the user by name.
