WARNINGS Safe installation Safety

THE EQUIPMENT CONTAINS NO USER SERVICEABLE COMPONENTS.

Installation and maintenance of the equipment must only be carried out by trained and authorised personnel.

Electrical installation

The mains lead must be connected to a supply outlet with a protective earth contact. The electrical supply at the socket outlet must provide over current protection of an appropriate rating.

For your protection all mains (110V or 230V) equipment used out of doors or in wet or damp conditions should be supplied from a correctly fused source and protected by an approved ground fault protection device (RCD, GFCI etc.)

IF IN DOUBT SEEK ADVICE FROM A QUALIFIED ELECTRICIAN.

Routine maintenance

To avoid the possibility of electric shock or damage to the machine, always switch off the machine and isolate from the power supply before carrying out any routine maintenance.

To avoid the risk of the machine falling, where applicable, ensure that it is placed securely on a flat and level surface.

Safe use

Caution - Cleaning the indicator/weigh head

Harsh abrasives, solvents, scouring cleaners and alkaline cleaning solutions, such as washing soda, should not be used especially on the display windows. Under no circumstances should you attempt to wipe the inside of the machine.

The outside of standard products may be wiped down with a clean cloth, moistened with water containing a small amount of washing up liquid.

The outside of products waterproofed to IP65, IP66 and IP67 may be washed down with water containing a small amount of proprietary detergent.

Training

Do not attempt to carry out any procedure on a machine unless you have received the appropriate training or read the Instruction Manual.

EMC compliance

The following may be applicable to your machine. WARNING:

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

RS-232 data commands for SBI protocol

The RS232 can be set so a bidirectional connection can be established between the indicator and the host. To establish this connection set parameter P4 to 7, and configure setting P5 (baud) and P6 (parity) to host device. Commands can then be sent from the host to the indicator using the following commands (ensure the letters entered are in CAPS) (<CR> - Enter)

Command	Action	Response
W <cr></cr>	Takes a reading	
	Over capacity - Under capacity - Zero point error - Reading (kg or lb)	<lf>^^^^^^u1u2<cr><lf>H1H2H3<cr><etx> <lf>u1u2<cr><lf>H1H2H3<cr><etx> <lf>u1u2<cr><lf>H1H2H3<cr><etx> <lf>u1u2<cr><lf>H1H2H3<cr><etx> <lf>w1w2w3w4w5w6<dp>w7u1u2<cr><lf>H1H2H3<cr><etx></etx></cr></lf></cr></dp></lf></etx></cr></lf></cr></lf></etx></cr></lf></cr></lf></etx></cr></lf></cr></lf></etx></cr></lf></cr></lf>
S <cr></cr>	Prints Status Bytes	<lf>H1H2H3<cr><etx></etx></cr></lf>

Scale calibration

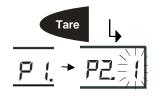

Calibration Configuration Settings -

The scale is configured from the factory to match the specified settings for each unit, as defined by the product specifications and sales brochure. Modification of the setting can be accomplished by altering user configuration settings P7-P10. **Caution:** Calibration and/or configuration of calibration settings of your scale should be accomplished by a trained service technician using certified weights to ensure proper operation and accuracy. Calibration is not covered under warranty.

300 kg x 0.2 kg	1500		06	1	1	0

Table 2a

You may choose to configure your scale for a higher resolution. The factory does not recommend increasing the resolution above 7,500 divisions for a stable weight reading. Certain environments may cause the scale to be unstable at factory settings, reduce the # of division settings to increase your stability.

Calibration Menu

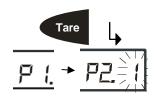

Service Configuration Settings

The scale is configured from the factory to match the specified settings for each unit, as defined by the product specifications and sales brochure. Modification of the setting can be accomplished by altering user configuration settings P11-P19. **Caution:** Configuration of the settings of your scale should be accomplished by a trained service technician to ensure proper operation and accuracy. Configuration is not covered under warranty.

Technical Specifications

Scale Indicator

 $\label{eq:model} \begin{array}{ll} \mbox{Input signal range:} & \mbox{0mV} \sim \mbox{+30mV} \\ \mbox{Sensitivity:} & \mbox{>0.2uV/grad} \end{array}$

Internal Resolution: Approximately 520,000 counts

Display Resolution: Can be selected between 500-100,000

System Linearity: Within 0.01% of FS

Loadcell excitation Voltage: +5 V_{DC} (MAX current: 85mA)

Loadcell

Sensitivity: 0.3mV/V --- 3mV/V (must be fit to >0.2uV/display grad.)

Input Resistor: $\geq 60 \ \Omega$ Output Resistor: $< 10 \ K\Omega$

Temperature

Operation: $5^{\circ}\text{C} - 35^{\circ}\text{C}$ Storage: $10^{\circ}\text{C} - 70^{\circ}\text{C}$

Humidity: ≤95%RH (no condensation)

Power

Battery: 6V4AH lead acid battery, 30 hrs continuous use

When the voltage of battery is below 5.7V, the "Low Bat" annunciator will be lighted, plug in AC adapter to charge the battery. When "Lo.bAt" and actual weight is displayed alternately, this indicates the voltage of battery is below 5.5V and the scale will be turned off in two minutes automatically.

AC Adapter:

 $10.5-12V_{DC}$ 600mA, with central positive, 5.7 VDC -9 VDC

Error Messages

Error Message	Definition	Required Solution/Troubleshooting
0:	Weight above range for calibrated zero point.	Remove load before zeroing Or Recalibrate the scale.
0 :	Weight below range for calibrated zero point.	Remove load before zeroing Or Recalibrate the scale.
:	Indicates an under range condition	Remove all loads and zero the scale.
:	Capacity exceeded	Remove the load and try again. If the load is great than 6 kg a scale with a larger capacity is required.
CAL-Er:	Calibration error	Restart calibration
Lo.bAt:	Low Battery	Recharge the battery. Upon initial use, it is recommended to charge battery for 8 hours prior to use.
EEP.E0	EEPROM can't be accessed	Replace S100 Indicator
EEP.E1	Configuration settings have changed and not been stored	Calibrate the scale to store settings
EEP.E2	P7-P9 settings exceed scale's normal range	Reconfigure P7-P9 setting

Declarations of Compliance

United States

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Canada

This digital apparatus does not exceed the Class A limits for the radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la Classe A prescrites dans le Règlement sur le brouillage radioélectrique edicté par le ministère des Communications du Canada.
