USER'S GUIDE

Wi-Fi® Home Video Camera

Models: SCOUT66-B, SCOUT66-B/2, SCOUT66-S, SCOUT66-S/2, SCOUT66-W, SCOUT66-W/2

The features described in this user's guide are subject to modifications without prior notice.

Welcome...

to your new Motorola Wi-Fi® Home Video Camera!

Thank you for purchasing your new Motorola Wi-Fi® Home Video Camera.
If you have always wondered what happens when you are away, wonder no
more. Now you can monitor your children, pets or property with this easy to use
system. You can install the Camera only from your iPhone®/iPad® or devices for
Android™ and view the Camera video from your PC or Notebook, as well as
devices for Android™ or iPhone®/iPad®.

Please keep your original dated sales receipt for your records. For warranty
service of your Motorola product, you will need to provide a copy of your dated
sales receipt to confirm warranty status. Registration is not required for warranty
coverage.

For product related questions, please call:

Email: motorola@encompass.com

This User's Guide has all the information you need to make the most out of your
product.
Please read the Safety Instructions on pages 5 - 6 before you install the unit.

Inside the Box
- 1 x Wi-Fi® Camera Unit
- 1 x Power Adapter
- 1 x Quick Start Guide
- 1 x User Guide

Overview of your Camera

1. Power / Status indicator
2. Microphone
3. Photo Sensor (for night mode detection)
4. Camera Lens
5. Infrared LEDs (for night vision)

6. Speaker
7. ON/OFF Switch
8. Temperature Sensor
9. Micro USB socket
10. PAIR Button

Important guidelines for installing your Wi-Fi® Camera Unit
- Use of other 2.4 GHz products, such as other wireless networks, Bluetooth® systems or microwave ovens may cause interference with this product. Keep the Wi-Fi® Camera Unit away from these types of products, or turn them off if they appear to be causing interference.
- Always ensure that you have a good Wi-Fi® connection available.

1. Safety Instructions

⚠️ **WARNING:**

STRANGULATION HAZARD - In case this unit is being used to monitor infants or children, keep the unit and adapter cord more than 3 feet from the crib and out of their reach. Never place camera or cords within a crib or near a bed. Secure the cord away from children's reach. Never use extension cords with AC Adapters. Only use the AC Adapters provided.

As with any electrical device, supervision of your pet's usage should be exercised until your pet is acclimated to the product. If your pet is prone to chewing, we strongly recommend you keep this and all other electrical devices out of its reach.

Wi-Fi® CAMERA UNIT SET UP & USE:

● Determine a location for the Wi-Fi® Camera Unit that will provide the best view of your baby in the crib.

● Place the Wi-Fi® Camera Unit on a flat surface, such as a chest of drawers, bureau, shelf or wall-mount it using the keyhole slot in the base.

● NEVER place the Wi-Fi® Camera Unit or cords within the crib.

WARNING

This Wi-Fi® Camera Unit is compliant with all relevant electromagnetic field standards and is, when handled as described in the User's Guide, safe to use. Therefore, always read the instructions in this User's Guide carefully before using the device.

- Adult assembly is required due to small parts. Keep all small parts away from children.
- This product is not a toy. Do not allow children to play with it.
- This Wi-Fi® Camera Unit is not a substitute for responsible adult supervision.
- Keep this user's guide for future reference.
- Do not place the Wi-Fi® Camera Unit or cords in the crib or within reach of the baby (the unit should be least 3 feet away).
- Keep the cords out of reach of children.
- Do not cover the Wi-Fi® Camera Unit with a towel or blanket.
- Test the Wi-Fi® Camera Unit and all its functions so that you are familiar with it prior to use.
- Do not use the Wi-Fi® Camera Unit near water.
- Do not install the Wi-Fi® Camera Unit near a heat source.
- Only use the power adapter provided. Do not use other power adapters as this may damage the device.
- Never use extension cords with power adapters.
- Do not touch the plug contacts with sharp or metal objects.

motorola

2. System Requirements

Web Portal
- Windows® systems, 7 or 8 (Java browser plug-in needed)
- Mac OS® version 10.7 or above
- Internet Explorer® version 8.0 or above
- Firefox® version 11.0 or above
- Chrome™ version 18.0 or above
- Safari® version 5.1 or above
- Java™ version 7 or above

Android™ System
- Version 4.0 or above

iPhone®/iPad® iOS
- Version 7.0 or above

3. *Getting started - Connecting Devices*

How does it work?

Access your Camera locally — View your Camera from any compatible device remotely

- The Hubble Server keeps track of the Cameras.
- When a user wants to access the Camera, the server authenticates the user and permits the user access to the Camera.

3.1   Setup

Connect the Camera to the power adapter and plug into an electrical outlet and make sure the power switch is in the ON position. The Camera must be within range of the Wi-Fi® router with which you want it to link. Make sure the password of the router is available for entering in the setup program.

Status of LED Indication:

- Pair / Setup state: LED in red and blue color and slow flashing
- Unconnected state: LED in red color and slow flashing
- Connect state: LED in blue color and always on
- Ready for connection state: LED in blue color and slow flashing

Note: You can only setup via a compatible smartphone or tablet and not via a PC.

3.2 User Account and Camera Setup: Working with devices for Android™

ENGLISH

What you need

• SCOUT66 camera

• SCOUT66 camera power adapter

• Device with Android™ system version 4.0 or above

3.2.1 Power on and Connect SCOUT66 camera

motorola
4.4 Camera Functions:
Working with PC/Notebook

• Go to URL: http://www.hubblehome.com/login/

• Enter your User Name and Password and then click Login if you have already created an account.

• Click on the Camera list paired in your account via Android™ device or iPhone®/iPad®, and the Camera view will appear on screen. You can easily stay connected with your favorite people, places and pets with live video streaming.

• At the website, you can change the settings by following the Menu instruction steps.

5. Procedure for resetting the Camera

Note: If your Camera is moved from one router (e.g. home) to another router (e.g. office) or you have Camera setup issues, then this Camera must be reset again. Please reset the Camera with the following procedure:

1. Slide the ON/OFF switch to ON.
2. Press and hold the PAIR button on the underside of the Camera for 5 seconds, until you hear "Ready start for Pairing".
3. Release the PAIR button and wait for the Camera to complete the internal reset procedure.
4. You can add your camera again by following the steps 3.2.4 for Android device or 3.3.4 of iOS device.

6. Help

Noise interference

To avoid background noise or echoes, ensure that there is enough distance between your device and the Wi-Fi® Camera Unit.

Use of other 2.4 GHz products, such as Bluetooth® systems or microwave ovens, may cause interference with this product. Keep the Wi-Fi® Camera Unit at least 5ft away from these types of products, or turn them off if they appear to be causing interference.

Lost connection

Check your Wi-Fi® settings. If necessary reconnect your Wi-Fi®. Ensure the Wi-Fi® Camera Unit is switched ON. Wait a few minutes to make the connection with the Wi-Fi® system.

If you forgot your password

If you do not remember your password, tap Forgot password and submit your e-mail address. A new password will be sent to your e-mail address immediately.

Category	Problem Description / Error	Solution
Account	I am unable to login even after registration.	Please check your user name and password.
Account	I receive an error message saying: "Email ID is not registered".	Please ensure that you have registered with us. Tap **Create Account** to create an account tobe able to use the Wi-Fi® Video Baby Monitor Camera.
Account	What do I do if I forgot my password?	Click on the "Forgot Password" link on the *http://www.hubble.in/*website OR your Android™ or iOS application. An email will be sent to your registered email address.

Account	I am unable to receive a new password although I have used the "Forgot password" option.	1. The e-mail might have been sent to your Junk Mail Folder. Please check your Junk Mail Folder. 2. There might be a delay in getting your e-mail. Please wait a few minutes and refresh your email account.
Connectivity Issues	I get a message: We are having problems accessing your camera. This could be due to lack of internet connection. Please wait and try again later.	1. Please try again in a few minutes. This could be because of any issue with your internet connection. 2. If the problem remains, please restart your Camera to check if this fixes the problem. 3. Please restart your Wireless Router.
Viewing Camera	When I am in "remote mode", the video stops after 5 minutes. How do I view for longer?	When you are accessing your Camera via a network different from your home network (over internet) your video times out after 5 minutes. You can click on the Camera again from the Android™/iOS application to start streaming again. If you are accessing from your web-browser, then you can press on the **Reload** button to start viewing your Camera video stream again.
Features	The sound alert setting threshold is not right.	You can Adjust Sound Sensitivity to trigger notifications under Camera Setting menu.

motorola

Connectivity Issues	My Phone application displays the following message: "Unable to connect to BMS server".	1. Check the Wi-Fi® network strength. 2. Check if you are connected to the internet by starting the phone browser and going to a website like www.google.com. 3. Try again if you are successful connecting to the internet.
Setting Up	While I am adding a new camera to my account, I am not able to find any Cameras to add.	If you are trying to add a Camera which has previously been added into your account or another account, you will first have to reset the Camera. This can be done by pressing and holding the PAIR button at the bottom of the Camera for 5 seconds.
General	What are the supported browsers for accessing from my PC/Mac®?	On PC and Mac®, we recommend to use Google Chrome. However the following browsers are also supported: PC: Internet Explorer 8 and above. Mac®: Safari.

motorola

General	What is the significance of LED flashing?	A blinking LED indicates the following status: Slow blinking: 1. Your Camera is in setup mode. You can add the Camera to your account in this mode. Out of the box, the Camera is in setup mode. To reset to setup mode, press and hold the PAIR button on the bottom of the Camera untill you hear a beep. Slow blinking: 2. The Camera is either connecting to the router or lost the link to the router. Please ensure that the Camera is in the Wi-Fi® signal range. LED is stable: The Camera is connected to the Wi-Fi® network.
Connectivity Issues	I am not able to access my Camera.	Please check if the Camera is within Wi-Fi® range. If the LED on your Camera is slow blinking, please try to move the Camera closer to the router for better Wi-Fi® range and try again.
Setting Up	During setup on device for Android™ and iOS, during the last step I am not able to find my Camera and the setup fails.	Please reset the Camera to setup mode and try again. Press and hold the PAIR button on the bottom of the Camera untill you hear a beep. Wait for a minute for the Camera to restart. When the Camera LED is blinking, indicating that it is in setup mode. Now restart the setup from your Smartphone again.

motorola

Connectivity Issues	Even though I am accessing my Camera from the same Wi-Fi® network, I still find my Camera is shown as remote. I can only access it for 5 minutes at a time.	Please check your wireless router settings. For example, in Buffalo brand routers there is an option called Wireless Isolation. Please disable this option.
Camera	When I try to view the Camera, I get a prompt for Camera firmware upgrade. What should I do?	Please upgrade your firmware. This takes around 5 minutes. We push upgrades from time to time to improve the Camera features.
General	Which platforms are supported for accessing my Camera?	Windows® 7*, Windows® 8* *Java browser plug-in needed Mac iOS version 10.7 or above Internet Explorer® version 8.0 or above Firefox® version 11.0 or above Chrome™ version 18.0 or above Safari® version 5.1 or above Java™ version 7 or above Android™ version 4.0 or above iPhone®/iPad® iOS version 7.0 or above.
General	I do not hear sound when I am accessing a remote Camera.	You can tap on the speaker icon in the video stream screen to hear audio. By default the audio is not ON when you are accessing a remote Camera.

General	What is the meaning of "Local Camera" and "Remote Camera"?	When you are accessing your camera from the same wireless network (Home) in which it is configured, it is a local camera. When you are accessing your Camera away from your home it is a remote camera. You may be using 3G, 4G or 4G LTE or a Wi-Fi® connection outside of your home.
General	I am having problems accessing my Cameras from Internet Explorer. What should I do?	The following links take you to the troubleshooting guide for Internet Explorer related issues. http://www.hubble.in/
General	I am having problems accessing my Cameras from Google Chrome™. What should I do?	The following links take you to the troubleshooting guide for Google Chrome™ related issues. http://www.hubble.in/
General	I am having problems accessing my Cameras from Google Chrome™. What should I do?	The following links take you to the troubleshooting guide for Safari on Mac®. http://www.hubble.in/
General	I am not able to access my Cameras on Internet Explorer®. I am using Internet Explorer® version 6 OR version 7.	You need to be on Internet Explorer® version 8.0 or above. Please upgrade your browser. You can also use Google Chrome™ to access.
General	How do I find information which version of the APP I am running?	When you are viewing your camera, you can tap on the GEAR icon to go to the Camera settings page. Select the Information option to view the APP and Camera versions.

motorola

| General | How do I download the APP for Android™ and iOS devices? | **Android™:**
- Open Google Play APP on your Android™ device.
- Select Search
- Type "Hubble Home"
- The results will have Monitor Everywhere APP by Binatone
- select to install it.
iOS Device:
- Open iOS APP Store^{SM}
- Select search
- Type "Hubble Home"
- The results will have Monitor Everywhere APP by Binatone
- Select to install it. |
| Setting up | When the video is cut off, the application attempts to reconnect and and results in lost sound and choppy video. | You will need to turn off the auto lock function of your smart device to ensure continuous video/audio feeding. |

ENGLISH

Features	How many users can access the Camera at one time?	1. If you are accessing in Local mode (your Smartphone/PC is connected to the same network as your Camera), up to four users can view your Camera at the same time and a remote user is not allowed. Remote users trying to access the same Camera will get a 'camera busy' notification. 2. If you are accessing in Remote mode (from an outside network different from where you have your Camera, e.g. 3G, 4G or 4G LTE or your office network), only two remote user plus two local users are allowed to access the same Camera. Note that when one user is accessing the camera from Remote mode, other users trying to access the same Camera through remote networks, will get a 'camera busy' notification.
Connectivity issues	I found interference caused by my other web cam devices.	Video streaming performance is related to internet bandwidth, especially if you have 2 or more video streaming devices that are working through the same router.

Products or Accessories with (a) serial numbers or date tags that have been removed, altered or obliterated; (b) broken seals or that show evidence of tampering; (c) mismatched board serial numbers; or (d) nonconforming or non-Motorola branded housings, or parts, are excluded from coverage.

Communication Services. Defects, damages, or the failure of Products or Accessories due to any communication service or signal you may subscribe to or use with the Products or Accessories is excluded from coverage.

How to Obtain Warranty Service or Other Information?

To obtain service or information, please call:

US and Canada 1-888-331-3383

Email: motorola@encompass.com

You will receive instructions on how to ship the Products or Accessories at your expense and risk, to a BINATONE Authorized Repair Center.

To obtain service, you must include: (a) the Product or Accessory; (b) the original proof of purchase (receipt) which includes the date, place and seller of the Product; (c) if a warranty card was included in your box, a completed warranty card showing the serial number of the Product; (d) a written description of the problem; and, most importantly; (e) your address and telephone number.

These terms and conditions constitute the complete warranty agreement between you and BINATONE regarding the Products or Accessories purchased by you, and supersede any prior agreement or representations, including representations made in any literature publications or promotional materials issued by BINATONE or representations made by any agent employee or staff of BINATONE, that may have been made in connection with the said purchase.

FCC and IC regulations
FCC Part l5

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Privacy of communications may not be ensured when using this device.

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product. This product has been tested and found to comply with the FCC criteria.

This Class B digital apparatus complies with Canadian ICES-003.

CAN ICES-3(B)/NMB-3(B)

WARNING

Changes or modifications, to this equipment not expressively approved by the party responsible for compliance could void the user's authority to operate the equipment.

The socket-outlet shall be installed near the equipment and shall be easily accessible.
