Excellent for applying sealers where precise control is needed. Equipped with Xtreme® Seals to handle most extreme chemicals and high concentrations of Acetone®, Naphtha®, Xylene® and Toluene®.

DEF Dispensing Products

New

PIUSI THREE25 TOTE DISPENSERS

Created to ensure optimum durability and efficiency, the Piusi Three25 administers a 32.5% urea solution that is protected by our 3D DEF filter which prevents the contamination of your DEF and in turn allows for an increased life of the catalyst.

This kit features our latest SB325 nozzle with break-away stainless steel spout, revolutionary AdBlue® 3D DEF filter, original Piusi Dispense Coupler (PDC) and more! With a fortified new mounting bracket and updates such as crimped DEF hose, this kit brings a whole new way to dispense DEF.

The Piusi Three25 is equipped with the SB325 automatic nozzle, featuring a sleek, innovative tecnhopolymer design that is reliable, ergonomic, and has a flexible shell that protects it from weathering and UV radiation. The spout is used in conjunction with our Piusi Magnetic adaptor to prevent a potential miss-fill. If the magnetic adapter is not in that allocated tank then the nozzle will not engage. Safety is also guaranteed by the break-away system. In the event that a vehicle accidentally drives away with the nozzle still in the tank, the spout is designed to detach from the nozzle. This system allows for a quick repair by merely fitting a new spout on the nozzle.

LIFT SUPPORT

Gas Spring Lift Supports

GAS SPRINGS

• Gas Springs are typically used for assisting in lifting a lid as well as holding it open, similar to how a hatchback on a car operates. They are also used on access covers, doors, windows, conveyors, adjustable table and seats, and more. • All gas springs contain pressurized nitrogen gas as well as hydraulic fluid that lubricates the seal and provides slam-resistant dampening at the end of the stroke. You should store and install gas springs rod-end down for longer service life. • The chart below shows universal lift supports which are not application specific,
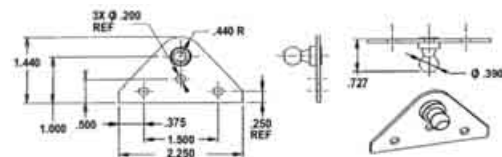

BLACK NITRATED "B" SERIES GAS SPRINGS

All measurements are taken from center of eye or ball stud located at 18 mm centers. The Nitrate Gas Springs come with composite end fittings.
