

Black & White Scanning Guide

This guide covers the following machines:

- BH420/BH500/BH600/BH750
- Bizhub 250/350
- Bizhub 163/211
- Bizhub 130F
- 7145 IP432
- 7222/7228/7235 IP424 (Same configuration as 7145)
- 7155/7165/7255/7272 IP511/IP511A
- 7216/7220 (162/210)- IP418, Di1611/2011 Pi2001e

Version 6.0 Black & White V1.0

Most Common Error Codes on Thunderbolts	Page 30

<u>FTP</u>

- PageScope Cabinet and the FTP Utility will not run on Windows 2003 & Vista.

PageScope Cabinet needs to be open before scanning, or the FTP Service placed in the Startup folder of the PC. (see the Konica Minolta FTP & SMB Setup Guide for Windows)

<u>SMB</u>

* - On Windows 2003, you may find that you need to change a registry setting in order for this to work. This setting can be found under:

HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\LanManServer\Parameters\ RequireSecuritySignature (REG_DWORD)

You need to change the DWORD value from 1 to 0 to disable the SMB digital communication policy.

* This should only be changed by the customer

- Scanning to a mapped drive – make sure you place a / before the share name of the folder within that mapped drive.

<u>E-mail</u>

- If you are connecting to an Exchange Server, Relay must be enabled for the Konica Minolta device on the server itself.

- Alternatively a new account needs to be created on the SMTP server, and 'SMTP Authentication' needs to be enabled under the 'E-mail Transmission' settings on the MFP.

(Please note that 'SMTP Authentication' is not available on all machines)

- In order for ANY Fiery print controller to scan to e-mail, an e-mail account needs to be set up on the e-mail server as if the machine were a new employee.

- Remember to make sure Binary Division is disabled under the E-mail SMTP Settings.

<u>HDD</u>

- If using the PageScope Box Operator or the HDD TWAIN Driver to retrieve scans, please make sure you are using the correct version for the version of firmware the machine is running on.

Version 3.1.0.2 Box Operator should be backwardly compatible with all versions of firmware.

- Older versions of Box Operator will not connect to newer versions of firmware and need to be upgraded at the same time as the firmware.

The latest version of Box Operator can be downloaded from our website:

Bizhub 420/500/600/750

SCAN TO HDD

1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go

2) Click on 'Box' at the top of the screen

SCAN TO E-MAIL

1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go

2) Click on 'Logout' to logout of Public Mode. You will need to confirm you want to logout.

- 3) Log in to the Admin Mode by typing in the admin code of: 12345678
- 4) Click on the orange 'Network' tab at the top of the page
- 5) Click on 'E-mail Setting' down the left hand side of the page
- 6) Click on 'E-mail TX (SMTP)'
- 7) Ensure that 'E-mail TX Setting' and 'Scan to E-mail' are turned 'ON'
- 8) Enter in the IP address or Host Name of the E-mail server

9) Enter an 'Admin. Email Address' & 'Device Mail Address'. Neither of these addresses need to be real.

10) If required, turn on 'SMTP Authentication' and enter a user name and password of a user set up on the e-mail server. It is recommended that if you need to use this setting, that a new e-mail account for the Konica Minolta device is created on the e-mail server.

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the Konica Minolta FTP & SMB Setup Guide for Windows.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6

1) Using Internet Explorer, type the IP address of the machine into the address bar and press Go

- 2) Click on the 'Scan' tab at the top of the screen
- 3) Click on 'New Registration' and then choose 'FTP' from the list

4) Enter a 'Name' for your one touch button. (This is the name of the button that will appear on the machine).

- * Specify the 'Index' under which your one touch button is to appear on the machine
- * Enter the IP address or Host Name of the PC running the FTP service
- * If you wish to scan to the root folder of the FTP server, you only need to enter a / in the 'File Path' field. If you wish to scan to a folder within the root folder, you need to enter / then the name of the folder. I.e. /Hotline
- * Enter a user name or password that is either configured within PageScope Cabinet, or if you are using IIS, that of a user on the PC

For information on configuring either PageScope Cabinet or IIS, please refer to the Konica Minolta FTP & SMB Setup Guide for Windows.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6

1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go

2) Click on the Fax/Scan tab

- 3) Rename the Index to FTP and click Apply
- 4) Select the box under the Index ---, then choose, TX: PC (FTP Server)
- 5) Click Next

6) Enter in a One Touch Name, the FTP Server Address (the IP address of the PC running either PageScope Cabinet or IIS) along with the User Name and Password that has been set up in PageScope Cabinet or the Windows user name and password set up for the PC (IIS).

* If in PageScope Cabinet/IIS you have set the FTP Root Folder to the actual folder on the PC where you wish the scans to be placed ("PC Root Folder"), the 'Directory' on the machine only needs to have a / (forward slash) typed into the box. The / means "root folder". If however you wants the scans to be placed in a folder which is inside the "PC Root Folder", lets say called Hotline you would need to put /Hotline

7) Click Apply

On the machine press the Fax/Scan button and a new Index will have appeared called FTP. Under this Index will be the One Touch button you have just created.

SCAN TO SMB

1) Create a shared folder on your C Drive as on pages 14 – 15 or 16 of the **Konica Minolta FTP & SMB Setup Guide for Windows**.

2) Using Internet Explorer, type the IP address of the machine into the address bar and press Go

- 3) Click on the Fax/Scan tab
- 4) Rename the Index to SMB and click Apply
- 5) Select the box under the Index ---, then choose, TX:PC(SMB)
- 6) Click Next

7) Enter in a One Touch Name, the IP address of the PC you want to scan to, the SHARE NAME of the folder you created in step 1, and the user name and password the client uses to log into their PC first thing in the morning. If this does not work, a new user will need to be set up on the PC for scan to SMB purposes. These user details are then input into the web page.

6) Click Apply

TO CREATE A SPEED DIAL BUTTON

1) Enter the IP address of the machine into the address bar of Internet Explorer and press Go

2) Login to Admin Mode using the password of: sysadm

3) Click on the Fax tab at the top of the screen

4) On the left of the screen, click on Speed Dial Setting

5) Click on the Speed Dial number you wish to register. This can range from 001 to 240.

6) Choose E-mail from the drop down list and click 'Apply'

7) On the next screen that appears, enter in a 'Destination Name' (this is the

name of the user) and a 'Destination Address' (this is the users e-mail address) 8) Click 'Apply' and log out of Admin Mode

You Speed Dial button is now configured and ready for use.

SCAN TO FTP

Before setting up scan to FTP, you must follow the instructions at the top of page 16 (points 1-6) and enter details under the SMTP & POP3 Configuration for your e-mail server. If you do not have an e-mail server, you can also enter false details. As long as there is something entered in to the top 4 fields, scan to FTP will work.

For information on configuring either PageScope Cabinet or IIS, please refer to the Konica Minolta FTP & SMB Setup Guide for Windows.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6

1) Enter the IP address of the Konica Minolta device into the address bar of Internet Explorer and press Go

2) Log in to Admin Mode using the password of: sysadm

3) Click on the Scan tab at the top of the screen and then select 'Speed Dial Setting' on the left.

4) Click on the box labelled 'Speed Dial List (FTP Server)'

Bizhub 130F

Scanning on the Bizhub 130F is easy as long as you follow the instructions on the CD. Without the CD, you cannot set up scanning or printing.

1) Put the CD in the CD drive

2) The CD should load automatically and you will see the following screen

KONICA MINOLTA 130f GDI	- InstallShield Wizard	_ 🗆 🛛
Choose Setup Language Select the language for the in:	stallation from the choices below.	
	Czech Dutch English French (Standard) German Italian Portuguese (Standard) Spanish	
InstallShield	< <u>B</u> ack <u>N</u> ext >	Cancel

- 3) Select English and click Next
- 4) The CD will then start the install

- 5) You will have to Agree to a License Agreement
- 6) You then get the option of installing the machine via USB, Network or Parallel

KONICA MINOLTA 130f GDI - Select Options Select the options you want to in	InstallShield Wizard 🛛 🔀
	To install a feature, click the check box next to it. If the check box is clear, that feature will not be installed. ● USB ● NETWORK ● PARALLEL
InstallShield	< Back Next > Cancel

7) Choose the appropriate connection and click next.

**** Point 8 & 9 describe USB ****

8) Click next twice and the following screen appears

9) Click next and the CD will install the device. Then click Finish

*** Points 10 to 12 describe the network set up ***

10) When you choose Network, the following screen is displayed

KONICA MINOLTA 130f GDI	- InstallShield Wizard	X
Select Features Select the features setup will in	nstall.	
	Select the features you want to install, and deselect the features you do not want to install. Printer Description Scanner Scanner 5.19 MB of space required on the C drive 24933.28 MB of space available on the C drive	
InstallShield	< <u>B</u> ack <u>N</u> ext > Cancel	

11) Click Next and you will be prompted for the IP address of the machine

CONICA MINOLTA 130f GDI - InstallShield Wizard 🛛 🛛 🔀			
A setup of a server's addres	\$		
	The IP address or server name of KONICA MINOLTA 130f to connect is inputted, and a [next] button is clicked.		
	10.120.3.130		
Install Shield	< <u>B</u> ack <u>N</u> ext > Cancel		

12) Click Next twice and it will begin the installation

If at any point the Found New Hardware Wizard pops up and asks you to locate files, browse to your C drive and you will find a new folder has been created automatically by the CD. This folder is called KONICA_MINOLTA_130f

	Done		🧐 Internet	

- 4) Choose 'Mail Address' as the Type
- 5) In the Number field, type the e-mail address you want the machine to send to
- 6) The Name is the name of the person
- 7) Click Save and then Back

AT THE MACHINE

1) Press the Copy/Scan/Fax button until the FAX light is illuminated

2) Press Speed Dial and type in the three-digit number you selected on the web interface

3) Press Start to scan the document. When all pages have been scanned, press Start again.

SCAN TO HDD

- 1) At the machine, press the Scan/Server button
- 2) Press Entry in the bottom right hand corner of the screen
- 3) Press on Box Register
- 4) Enter in the users Name and 4 digit Box Number

SCAN TO E-MAIL

- 1) First you need to input the settings for the e-mail server. Press on the Copy button and enter Key Ope. Mode
- 2) Press on Network
- 3) Press on E-mail (SMTP) Setup
- 4) Enter in the IP address of the SMTP Server
- 5) Once you have done this, you need to exit out of the Network settings and go into option 1, System/Copier to enter a FROM Address under Key Ope. Setting, Key Ope. Data, Email address.
- 6) Press on Key Operator Settings
- 7) Press on Key Ope. Data
- 8) Enter in an E-mail address at the bottom of the screen. This does not have to be an actual e-mail address registered on the e-mail server.
- 9) Once you have done this, exit Key Ope Mode and press on the Scan/Server button
- 10) Press Entry in the bottom right hand corner of the screen
- 11) Press on E-mail Register
- 12) Enter in the E-mail address of the user and the users Name. You also need to select the Character to Search. For example, if the users name is David, you would select the D- option.
- 13) You must then press ENTRY otherwise the information you have just input will not be saved.

*** Don't forget, if the customer is using an Exchange Server, Relay needs to be enabled for the Konica Minolta machine otherwise the machine will not be able to send scans via e-mail ***

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the Konica Minolta FTP & SMB Setup Guide for Windows.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6

- 1) At the machine, press the Scan/Server button
- 2) Press Entry in the bottom right hand corner of the screen
- 3) Press on FTP Register
- 4) The Host Address is the IP address of the running Pagescope Cabinet
- 5) The File Path is the directory you wish the scanned document to be placed. Enter the Login and Password that is set in PageScope Cabinet.
- 6) Press ENTRY

SCAN TO SMB

1) Create a shared folder on your C Drive as on pages 14 – 15 or 16 of the **Konica Minolta FTP & SMB Setup Guide for Windows**.

2) At the machine, press the Scan\Server button

3) Press Entry in the bottom right hand corner of the screen

4) Press PC (SMB) Register to register a new button, or Address List to edit a button that has been previously configured.

5) Enter in the name for your scan button by pressing on the Name button

6) For the Host Name field, enter in the DNS name of the PC that the shared folder is located on

7) Enter in the **<u>SHARE</u>** name of the folder that you have set up for the scans to be placed in to.

8) Enter in a User Name and Password of a user that is set up on the PC where the shared folder is located.

9) Press ENTRY

10) Press Back twice to return to the scan screen

Konica 7155/7165/7255/7272 with the IP511/IP511a

SCAN TO HDD

1) Press the Mode button to highlight the Scan/Server screen

2) Press on Scan/Network

3) Press on the HDD tab

4) Press on Manual IP Address

5) Enter in the name of the button that is to appear on the machine under Entry Name

6) Enter in a 4 digit box number

7) Press ENTRY

SCAN TO E-MAIL

1) First you need to enter the details of the e-mail server. On the Print screen, scroll across and select Network Setup

2) Scroll down to E-mail SMTP Setup

3) Enter in the IP address of the e-mail server under SMTP Server Name

4) Scroll down and enter a From address

5) Once you have entered these details you will need to press the Cancel button until the machine displays 'NIC parameters have changed update its?' Select Yes and enter the password of sysadm when prompted.

6) Once the IP has reinitialised and it ready to print, press the Mode button to highlight the Scan/Server screen

7) Press on Scan/Network

8) Select the E-mail tab

9) Press on Manual IP address

10) Enter the name of the button you wish to appear on the machine under Entry Name

11) Add the e-mail address of the user

12) Press ENTRY

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the Konica Minolta FTP & SMB Setup Guide for Windows.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6

1) Press the Mode button to highlight the Scan/Server screen

2) Press on Scan/Network

3) Press on the FTP tab

4) Press on Manual IP Address

5) The Profile Name is the name of the button you wish to appear on the machine. The Host Address is the IP address of the PC where Pagescope Cabinet or IIS is running. The File Path is the directory you wish the scanned document to be placed. Enter the Login and Password that is set in Pagescope Cabinet.6) Press ENTRY

7216/7220 – KN419, Di1611/Di2011 – NC6, Bizhub 162/210 – NC502

10) On the machine itself, you need to make sure you are on the FAX screen before pressing Speed Dial. Once you have pressed Speed Dial, type in the Speed Dial number you chose to register in step 5 and press Start. You can now scan in your document.

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the Konica Minolta FTP & SMB Setup Guide for Windows.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6

1) Follow instructions for bullet points 1-6 at the top of page 27. All fields in bullet point 5 must be entered. They do not have to be the real settings but something needs to be entered in to all of those fields.

2) After inputting the settings as above, click on the Scan tab at the top of the screen

3) Click on the first available number in the File Destination List

4) Enter the Destination Name, the IP address of the FTP Server in the FTP Server Address field and the directory.

5) Click Apply

When you come to scan on the machine, you will need to press the button that looks like:

Then, press 'Speed Dial' and type the number you chose to set up as your FTP folder under the File Destination List

MOST COMMON ERROR CODES WHEN SCANNING (7145/7222/7228/7235)

Error Code	Cause	Estimated Abnormal Parts
N50	Network Scan Operation Abnormality • The SMTP server address is not set	SCB (System Control Board) Network Section
N52	 Network Scan Operation Abnormality The protocol has not been initialised 	SCB (System Control Board) Network Section
N54	 Network Scan Operation Abnormality The server is not started The port number is wrong An erroneous POP server authentication has been made for 'POP' before 'SMTP' The SMTP server connection is abnormal There is not sufficient free space left on the SMTP server 	SCB (System Control Board)
