REMOTE BATTERY OPERATION

1. Press downwards on the compartment cover of the remote control to open battery compartment.
2. Place the battery (CR2032) into the battery compartment according to the polarity marking(place the "+" sign upwards).
3. Replace the cover by inserting the cover and pressing downwards. Make sure it snaps in.

** Battery Included **

Note: Remove the battery from the remote control if not in use for a long period of time. Do not mix normal batteries with rechargeable batteries. When the battery becomes weak, the remote control will not function to the best of its ability. Be sure to replace with a new battery if that happened.

BATTERY PRECAUTIONS
1. Please only use the battery type outlined in this manual.
2. Place the battery into the remote as outlined above only.
3. Be sure to follow the correct polarity when installing the battery as indicated in the battery compartment. Do not expose battery to heat.
LISTENING TO YOUR RADIO

Hints for better reception
This unit is fitted with a single lead wire DAB+/FM antenna, to obtain the best performance, you should fully extend the wire antenna and adjust the position as well as the direction until you find the best reception. For ideal DAB+ reception, always maintain the lead wire antenna in a vertical position is highly recommended.

Getting started DAB+ mode
When the unit is powered up for the first time, it will be in standby mode. The display will show as "00:00". Press the **STANDBY** Button to turn the on and it will automatically enter into the DAB+ mode and perform full station scan. During the scan the display will show "Scanning ..." together with a slide bar that indicates the progress of the scan and the amount of stations that have been found so far. (F. 1) (F. 2) (F. 3)

F1: MM:MM / 00:00

F2: Welcome! / Digital Radio

F3: Scanning...   0

Once the scan has finished, the radio will select the first station found. You can now with the **VOL/SCROLL** Control or press the **SCROLL** ▲ or ▼ Buttons explore the new DAB+ stations. Press the **SELECT** Button to select the station you wish to listen to.
Note: If there are no stations found after the full scan, the radio will enter into the Tune Select Menu and you can press the **SCROLL** ▲ or ▼ Buttons and the **SELECT** Button to Manually Scan for the DAB+ stations in your area. Visit www.digitalradioplus.com.au to check your postcodes receives digital radio.

Clock
The clock will only be shown and automatically updated if you can receive DAB+ signals in your location. While the clock synchronises to the current local time please keep the unit in DAB+ mode.

DAB+ Full Scan
When you conduct a Full Scan the unit will search for all available DAB+ stations. Once the scan is complete, the stations will be stored in alphanumerical order.
1.   To conduct a DAB+ Full Scan, press the **MENU** Button and scroll to the Tune Select Menu. Then press the **SCROLL** ▲ or ▼ Buttons to select "Full scan" and press the **SELECT** Button to confirm. The display will show "Scanning…" and a progressing slide bar. (F.4) (F.5)
2.   All the stations found will be stored automatically. To scroll through the stored stations rotate the **VOL/SCROLL** Control or press the **SCROLL** ▲ or ▼ Buttons and press the **SELECT** Button to confirm and play selected stations.

F4: DAB / <Full scan   >

F5: Scanning...   0
DAB+ Manual Scan
1.   To conduct a Manual Station Scan, press the **MENU** Button and enter the Tune Select Menu. Then press the **SCROLL** ▲ or ▼ Buttons to select "Manual tune". Press the **SELECT** Button to confirm. (F. 6)
2.   Rotate the **VOL/SCROLL** Control or press the **SCROLL** ▲ or ▼ Buttons to move through the DAB+ station frequencies. "5A to 13F" will display on the screen with their associated frequencies (F. 7)
3.   When your desired frequency appears on the display, press the **SELECT** Button to confirm. The name of the station group (ensemble/multiplex) will also be displayed.
4.   To listen to the station selected, press on the **SELECT** Button again.

F6: DAB / <Manual tune >

F7: Manual tune / <12B 225.648MHz>

LISTENING TO YOUR RADIO

DAB+ Display Modes
Every time you press the **DISPLAY/INFO** Button, the display will cycle through the following display information:

Time/Date ➡ Frequency ➡ Audio Bit Rate ➡ DLS

Ensemble/Multiplex (Group name) ⬅ Programme Type ⬅ Signal strength
Time and date
The time and date will be the time and date provided by the broadcaster. In the unlikely event that no clock information is received, the display will show "[No Time]".

Frequency
The frequency of the present station will be displayed.

Audio bit rate
The display will show the digital audio bit rate being received.

Signal strength
The display will show a slide bar to indicate the signal strength, the stronger the signal, the longer the bar will be from left to right.

DLS
DLS stands for Dynamic Label Segment which is the scrolling text information provided by the broadcaster. The information displayed may include song titles, album information etc.

Programme type
This describes the style of the programme that is being broadcast. If the information is not available, the display will show "[No PTY]".

Ensemble/Multiplex (Group name)
The Ensemble/Multiplex is the station broadcaster information.

Note: Press and hold the **DISPLAY/INFO** Button for longer than 2 seconds to view the software information.

FM Radio
1. To switch to FM, press the **DAB+/FM** Button. (F. 8)
2. To search for the next available frequency, press and hold the I◀ ◀ or ▶ ▶I Buttons. The search will stop automatically once a station has been found.
3. To manually search for the next available frequency, press the I◀ ◀ or ▶ ▶I Buttons or press the **SELECT** Button then rotate the **VOL/SCROLL** Control until the desired frequency is displayed on the screen.
4. To select audio mode, press the **PLAY/PAUSE** Button to toggle between the "Stereo" or "Mono" selection.

Note: The radio will automatically switch between stereo and mono mode, but you can override this and switch this function manually which is helpful for poor signal reception.

FACTORY RESET

To conduct a Factory Reset, please follow the below instructions. Please note this will clear all settings.
1. Press and hold the **MENU** Button until the display shows "Press SELECT to confirm reset".
2. Release the **MENU** Button and press the **SELECT** Button, the display will show "Restarting …" and once reset is complete it will then perform full station scan.
3. After the scan has finished, the radio will select and display the first station found.

Note: All of your stored DAB+ & FM presets will be lost once the reset has taken place.

LISTENING TO YOUR COMPACT DISCS

NOTE : Although this CD/MP3 player can read CD-R and CD-RW discs in addition to normal CDs, the playability of CD-R and CD-RW discs may be affected by the type of software that was used to create the discs, as well as the quality and condition of the blank media you are using.
This is not an indication of a problem with the player.

Playing a CD
1. Press the **iPod/CD** Button to select CD function. The display will show "CD" and "NO DISC" if you have not yet inserted your CD. (F.12) (F.13)
2. Press the **OPEN** Button on the top panel to open the CD door, load the disc with the printed label side facing up and then close the CD door. The display will first show "READING" and then the total track number and time. (F.14)
3. To start playback from the beginning, press the **PLAY/PAUSE** Button, the display will show the current track number and the elapsed time. (F.15)
4. If a CD/MP3 disc is being played, the display will show "MP3" together with the current folder and track number. To see the ID3 tag if available, press the **DISPLAY/INFO** Button.
5. Press the **PLAY/PAUSE** Button to play or pause the CD. The display will show " **II** " when the unit is paused. (F.16)
6. To resume playback, press the **PLAY/PAUSE** Button again.
7. To stop playback, press the ■ Button.

LISTENING TO YOUR COMPACT DISCS

Selecting a different track during play
1. To select a different track during play, press the I◀◀ or ▶▶I Buttons until your desired track number is displayed. Release the button for playback.
2. To select other folders in the MP3 disc, press the **NAVIGATE/FOLDER** Buttons on the remote control.
3. To play the next track, press the ▶▶I Button.
4. To play the current track again from the beginning during play, press the I◀◀ Button.
5. To play the previous track, press the I◀◀ Button twice.

Repeat play (remote control only)
During normal playback, you can press the **REPEAT** Button on the remote control to select the repeat play function:
1. To repeat the same track, press the **REPEAT** Button once, the display will show " ↺ 1 " (F. 17)
2. To repeat the entire disc, press the **REPEAT** Button again, the display will show "↺↺ ". (F. 18)
3. If you are playing a MP3 disc, an additional " ↺▯ " option will appear. This will repeat the current folder. (F. 19)
4. To cancel repeat play, repeatedly press the **REPEAT** Button until the repeat icon disappears from the display.

Random play (remote control only)
1. During CD operation, press the **RANDOM** Button to start random play, the display will show "RANDOM" and the tracks will be played randomly. (F.20)
2. To resume normal playback, press the **RANDOM** Button again and "RANDOM" will disappear from the display.
3. To cancel random play, press the ■ Button.

Program play (remote control only)
You can use the program play feature to play up to 20 tracks on a disc in any desired order. You may also program a particular track to play several times within a programmed sequence.
1. Load your disc as usual and wait until the display shows the total number of tracks on the disc.
2. Ensure it is in CD mode, press the **PROGRAM** Button on the remote control once, the display will show "MEM" and "P-01".(F.21)
3. Press the I◀◀ or ▶▶I Buttons to select the first track number to be programmed. When the desired track number appears in the display, press the **PROGRAM** Button to confirm and it is programmed. The program memory number will advance to "P-02" and ready for the next entry.
4. If an MP3 disc is being loaded, press the **NAVIGATE/FOLDER** Buttons to select the folder.
5. Repeat the above steps to program other tracks, a maximum number of 20 tracks can be programmed. When you have completed programming, press the **PLAY/PAUSE** Button to begin program play, playback will be started on the first track you programmed and will continue until the last programmed track has played.
6. When the program play is completed, the player stops and "PROG" will be displayed. The player remains in the program play mode. Press the **PLAY/PAUSE** Button will play the programmed sequence again.
7. To erase the program, in CD stop mode, press the ■ Button once; in CD play mode, press the ■ Button twice. "PROG" will disappear in the display.

Warranty

Please keep your receipt as proof of purchase. This product is warranted for any defect in materials or workmanship for one year after the original date of purchase. This product is for normal domestic and office use only. This warranty does not cover damage from misuse or neglect, accidental damage, vermin infestation, excessive voltages such us lightning or power surges or any alternation that affects the performance or reliability of the product.

In the unlikely event that your product fails to work normally, please contact the **Bush Warranty on 1800 509 394 (Australia) or 0800 450 259 (New Zealand)** and have your receipt of purchase on hand.

This warranty is subject to the following provisions:

● It is only valid within boundaries of the country of purchase;

● The product must be correctly assembled and operated in accordance with the instructions contained in the manual;

● This product must be used solely for domestic purposes;

● The warranty does not cover accidental damage;

● The warranty will be rendered invalid if the product is resold or has been damaged by inexpert repair;

● The manufacturer disclaims any liability for incidental or consequential damaged.

This warranty is in addition to, and does not diminish, your statutory or legal rights.
