Safety information

Before first use

This appliance is intended to be used in household.

To ensure best use of your appliance, carefully read this User Manual which contains a description of the product and useful advice.

Keep these instructions for future reference.

1. After unpacking the appliance, make sure it is not damaged and that the door closes properly.
Any functional fault must be reported to IKEA After Sales Service as soon as possible.
2. Wait at least two hours before switching the appliance on, to ensure that the refrigerant circuit is fully efficient.
3. The electrical installation and the electrical connection must be carried out by a qualified technician according to the manufacturer's instructions and in compliance with the local safety regulations.
4. Clean the inside of the appliance before using it.

Precautions and general recommendations

Installation and connection

- The appliance must be handled and installed by two or more persons.
- Be careful not to damage the floors (e.g. parquet) when moving the appliance.
- During installation, make sure the appliance does not damage the power cable.
- Make sure the appliance is not near a heat source.
- To guarantee adequate ventilation, leave a space on both sides and above the appliance and follow the installation instructions.
- Keep the appliance ventilation openings free.
- Do not damage the appliance refrigerant circuit pipes.
- Install and level the appliance on a floor strong enough to take its weight and in a place suitable for its size and use.
- Install the appliance in a dry and well-ventilated place. The appliance is arranged for operation in places where the temperature comes within the following ranges, according to the climatic class

given on the rating plate. The appliance may not work properly if it is left for a long time at a temperature outside the specified range.

Climatic Class	Amb. T. (°C)	Amb. T. (°F)
SN	From 10 to 32	From 50 to 90
N	From 16 to 32	From 61 to 90
ST	From 16 to 38	From 61 to 100
T	From 16 to 43	From 61 to 110

- Make sure the voltage specified on the rating plate corresponds to that of your home.
- Do not use single/multi adapters or extension cords.
- For the water connection, use the pipe supplied with the new appliance; do not reuse that of the previous appliance.
- Power cable modification or replacement must only be carried out by qualified personnel or by After-sales Service.
- It must be possible to disconnect the appliance from the power supply by unplugging it or by means of a mains two-pole switch installed upstream of the socket.

Safety

- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- Do not store or use petrol, flammable liquids or gas in the vicinity of this or other electrical appliances. The fumes can cause fires or explosions.
- Do not use mechanical, electric or chemical means other than those recommended by the Manufacturer to speed up the defrost process.
- Do not use or place electrical devices inside the appliance compartments if they are not of the type expressly authorised by the Manufacturer.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

- To avoid the risk of children becoming trapped and suffocating, do not allow them to play or hide inside the appliance.
- Do not swallow the contents (non-toxic) of the ice packs (in some models).
- Do not eat ice cubes or ice lollies immediately after taking them out of the freezer since they may cause cold burns.

Use

- Before carrying out any maintenance or cleaning operation, unplug the appliance or disconnect it from the power supply.
- All appliances equipped with an automatic ice-maker and water dispenser must be connected to a water supply that only delivers drinking water (with mains water pressure of between 0.17 and 0.81 Mpa (1.7 and 8.1 bar)). Automatic ice-makers and/or water dispensers not directly connected to the water supply must be filled with drinking water only.
- Use the refrigerator compartment only for storing fresh food and the freezer compartment only for storing frozen food, freezing fresh food and making ice cubes.
- Do not store glass containers with liquids in the freezer since they may burst.

The Manufacturer declines any liability if the above advice and precautions are not respected.

Cleaning, sanitization and maintenance of the ice and water dispenser (if present)

Failure to observe the sanitization instructions provided may compromise the hygiene and safety of water dispensed.

- When using the appliance for the first time, discard the first 9-14 litres of water, equivalent to 6-7 minutes of dispensing (not necessarily consecutive, but before initial consumption) and discard the ice produced in the first 24 hours.
- Reposition the removable water dispenser (if present), ensuring your hands are hygienically clean.
- Periodically clean the ice bucket or drawer under running water only.
- Every six months, sanitize the water and ice dispenser system using a food grade disinfectant solution (with sodium hypochlorite) which does not taint the appliance materials. Rinse with water before use.
- Replacement of any parts of the ice and water dispenser must be carried out using original spare parts provided by the Manufacturer.
- Any work on the appliance must be carried out by a qualified technician or the After-sales Service.

Product description

Carefully read the operating instructions before using the appliance.

- 1 Control panel
- 2 Top drawer
- 3 Bottom drawer

Notes: The number and shape the of accessories may vary according to the model. With the exception of the vertical glass separator, all accessories can be removed.

Caution: The refrigerator accessories must not be placed in a dishwasher.

Accessories

Bottle rack

Trays

Milk / fruit juice cartons compartment

1x

2x

1x

Control panel

- 1 Thermostat control knob
- 2 Appliance "On" warning light
- 3 "Tropical" function yellow light
- 4 "Tropical" function button

Temperature adjustment

To change the temperatures in the compartments, turn the thermostat setting knob:

- on the lowest numbers, 1-2 (MIN) for the LEAST COLD temperature;
- on the highest numbers, 3-4 (MAX), for the COLDEST temperature.

Important:

The fan will **ONLY** operate when the compressor is on and the upper drawer is closed. Pay attention not to obstruct the vent openings on the drawers walls.

Note: ambient temperature, frequency of drawer opening and position of the appliance can affect the temperature inside the refrigerator compartment. These factors should therefore be taken into account when setting temperatures.

First use

Connect the appliance to the mains power supply. The ideal temperatures for preserving food have already been set at the factory (2-3/MED).

Note: After switching the appliance on, it will be

necessary to wait for 2 to 3 hours before a temperature suitable for a standard appliance load is reached.

Daily use

Operation of the refrigerator

This appliance is a drawers refrigerator which enables the storage of fresh foods and beverages. Refrigerator compartment defrosting is completely automatic.

Optimum performance depends on the climatic class indicated on the rating plate. This product is fitted with a drawers' internal ventilation system. For this reason, attention should be paid to the ventilation holes. Foods and beverages should be stored in closed containers or covered with film.

Switching the appliance on and temperature adjustment.

Switch the power to the appliance on. The ideal temperatures for preserving foods are already factory set.

Notes:

- 4-5 hours are required for the refrigerator compartment to reach a temperature suitable for storage.
- Ambient temperature, frequency of drawer opening and position of the appliance can affect the temperature inside. These factors should therefore be taken into account when setting temperatures.

- In storing the food in the drawers, ensure vents are not obstructed.
- Do not place hot food in the compartments.
- Store liquids in closed containers.
- Storing vegetables with high water content can cause condensation to form: this does not affect correct appliance operation.

Temperature adjustment

To change the temperatures in the compartments, turn the thermostat setting knob:

- on the lowest numbers, 1-2 (MIN) for the LEAST COLD temperature;
- on the highest numbers, 3-4 (MAX), for the COLDEST temperature.

Switching the refrigerator off

Rotate the thermostat knob (1) on ●: the appliance is switched off and the green LED (2) goes off. To switch the refrigerator back on rotate the knob (1) clockwise. The green LED (2) comes on.

“Tropical” function (removes condensation)

This function is used in case of condensation on the drawers seals. Press the button (4) and the yellow LED (3) will come on. To deactivate the function press the same button (4) again.

Cleaning and maintenance

Before carrying out any cleaning or maintenance operations, switch the appliance off by pressing button (1) on ●, then unplug or disconnect the appliance from the power supply.

Cleaning the refrigerator

Refrigerator defrosting is completely automatic. Droplets of water on the back wall behind the drawer, indicate that the automatic defrost phase is in progress.

The defrost water is automatically run into a drain hole and collected in a container, where it evaporates.

Clean the defrost water drain hole regularly using

the tool supplied, in order to ensure the constant and correct flow of defrost water.

Important

- The vertical glass separators inside the drawers are part of the structure and should not be removed.
- The drawers sliding guides are coated with a food compatible lubricant which helps opening and closing. Never remove the lubricant and ensure that no foreign objects fall on the sliding guides, preventing them from operating correctly.

Cleaning the appliance:

1. Rotate the control knob (1) on ● .
2. Empty the drawer.
3. Remove all food and beverages accessories.
4. Clean the refrigerator drawers with a sponge soaked in a solution of lukewarm water and/or mild detergent. Do not use abrasive substances or tools.
5. Rinse and dry with a soft cloth.
6. Replace the accessories.
7. Rotate the control knob (1) clockwise to turn the fridge compartment back on.

Removing the baskets

For a more thorough cleaning of the appliance or for removing foods which may have fallen on the back of the baskets, these can be removed, giving a better accessibility inside the appliance. To remove the baskets proceed as follows:

1. Open the drawer and switch the appliance off, following the procedure in the section “Cleaning the appliance”.
2. Remove all food, beverages and accessories from the drawers; this will make the drawer lighter, facilitating the removal operation. Facing the appliance, hold the top edges of both sides of the basket (halfway down the length).

3. Lift the basket, releasing it from the hooks (hooks “A”).
4. Push the basket inside the appliance.

5. Use a rotation movement to lift the front of the drawer and pull out. To replace the basket follow the inverse procedure.

NOTE: Before placing accessories and foods back, ensure that the hooks “A” are correctly placed. The above procedure should be followed for both baskets.

Note: in high humidity conditions (normal during the summer months or in extremely humid environments), external condensation could appear on the lower drawer seals. Using a soft cloth, remove this condensation on the seals and if necessary on the front of the drawer, and activate the “Tropical” function (4) on the control panel. The function is activated when the yellow light (3) is on. To deactivate, press the same button again.

If the refrigerator is not used for prolonged periods, it is advisable to leave the drawers open to prevent the formation of mould, odors and oxidation.

Storing food

Wrap food so that no water, moisture or condensate can enter; this will prevent odours or aromas going from one part to another in the refrigerator, ensuring better preservation of foods.

If the appliance is not going to be used

Disconnect the appliance from the power supply, remove all the food, defrost and clean. Leave the doors open enough for air to circulate inside the compartments. This will prevent the formation of mould and bad odours.

In case of power failures

Keep the doors of the appliance closed. In this way the stored food will stay cold as long as possible.

What to do if...

Problem	Possible cause	Solution
The control panel is off and the appliance does not operate	There might be a problem with the electric power supply to the appliance.	Check that: <ul style="list-style-type: none"> • there isn't a power supply failure • the power plug is correctly inserted in the power socket and the two-pole switch, if present, is in the correct position (on) • the electric circuit safety devices installed in the house are fully functional • the power supply cable is not broken
The temperature inside the compartments is not cold enough.	There may be several causes (see "Solutions")	Check that: <ul style="list-style-type: none"> • the drawers are closed correctly • the appliance is not placed near a heat source • the temperature set is appropriate • air circulation through the ventilation grills at the bottom of the appliance is not obstructed
There is water at the bottom of the refrigerator compartment	The defrost water drain is obstructed.	Clean the defrost water drain hole (see "Cleaning and maintenance").
The front edge of the appliance is hot at the door seal edge.	This is not a fault. It is part of the design to prevent the formation of condensation.	No solution is necessary.

Note:

- Gurgling, hissing and humming noises from the refrigerating system are normal.

Before contacting the After-sales service:

Switch the appliance on again to see if the problem has disappeared. If not, switch it off again and repeat the operation after an hour.

If your appliance still does not work properly after carrying out the checks listed in the troubleshooting guide and switching the appliance on again, contact the After-sales service, clearly explaining the problem and specifying:

- the type of fault;
- the model;
- the type and serial number of the appliance (given on the rating plate);
- the Service number (the number after the word SERVICE on the rating plate inside the appliance).

SERVICE 0000 000 00000

Note:

Reversing of appliance door opening is not covered by the warranty.

Environmental concerns

1. Packing ♻️

The packing material is 100% recyclable and bears the recycling symbol. For disposal, comply with the local regulations. Keep the packing materials (plastic bags, polystyrene parts, etc.) out of the reach of children, as they are a potential source of danger.

2. Scrapping/Disposal

The appliance is manufactured using recyclable material. This appliance is marked in compliance with European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). By

ensuring the correct disposal of this appliance, you can help prevent potentially negative consequences for the environment and the health of persons.

The symbol  on the appliance, or on the accompanying documents, indicates that this appliance should not be treated as domestic waste but must be taken to a special collection centre for the recycling of electrical and electronic equipment. When scrapping the appliance, make it unusable by cutting off the power cable and removing the doors

and shelves so that children cannot easily climb inside and become trapped.
 Scrap the appliance in compliance with local regulations on waste disposal, taking it to a special collection centre; do not leave the appliance unattended even for a few days, since it is a potential source of danger for children.
 For further information on the treatment, recovery and recycling of this product, contact your competent local office, the household waste collection service or the shop where you purchased the appliance.

Information:

This appliance does not contain CFCs. The refrigerant circuit contains R600a (HC) (see the rating plate inside the appliance).
 Appliances with Isobutane (R600a): isobutane is a natural gas without environmental impact, but is flammable. Therefore, make sure the refrigerant circuit pipes are not damaged.

Declaration of conformity

- This appliance has been designed for preserving food and is manufactured in compliance with Regulation (CE) No. 1935/2004.

- This appliance has been designed, manufactured and marketed in compliance with:
 - safety objectives of the “Low Voltage” Directive 2006/95/CE (which replaces 73/23/CEE and subsequent amendments);
 - the protection requirements of Directive “EMC” 2004/108/EC.

Electrical safety of the appliance can only be guaranteed if it is correctly connected to an approved earthing system.

Electrical connection for Great Britain and Ireland only

Warning - this appliance must be earthed

Fuse replacement

If the mains lead of this appliance is fitted with a BS 1363A 13amp fused plug, to change a fuse in this type of plug use an A.S.T.A. approved fuse to BS 1362 type and proceed as follows:

1. Remove the fuse cover (A) and fuse (B).
2. Fit replacement 13A fuse into fuse cover.
3. Refit both into plug.

Important:

The fuse cover must be refitted when changing a fuse and if the fuse cover is lost the plug must not be used until a correct replacement is fitted. Correct replacement are identified by the colour insert or the colour embossed in words on the base of the plug.
 Replacement fuse covers are available from your local electrical store.

For the Republic of Ireland only

The information given in respect of Great Britain will frequently apply, but a third type of plug and socket is also used, the 2-pin, side earth type.

Socket outlet / plug (valid for both countries)

If the fitted plug is not suitable for your socket outlet, please contact After-sales Service for further instruction. Please do not attempt to change plug yourself. This procedure needs to be carried out by a qualified technician in compliance with the manufactures instructions and current standard safety regulations.

IKEA GUARANTEE

How long is the IKEA guarantee valid?

This guarantee is valid for five (5) years from the original date of purchase of your appliance at IKEA, unless the appliance is named LAGAN in which case two (2) years of guarantee apply. The original sales receipt, is required as proof of purchase. If service work is carried out under guarantee, this will not extend the guarantee period for the appliance.

Which appliances are not covered by the IKEA five (5) years guarantee?

The range of appliances named LAGAN and all appliances purchased in IKEA before 1st of August 2007.

Who will execute the service?

IKEA service provider will provide the service through its own service operations or authorized service partner network.

What does this guarantee cover?

The guarantee covers faults of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This guarantee applies to domestic use only. The exceptions are specified under the headline "What is not covered under this guarantee?" Within the guarantee period, the costs to remedy the fault e.g. repairs, parts, labour and travel will be covered, provided that the appliance is accessible for repair without special expenditure. On these conditions the EU guidelines (Nr. 99/44/EG) and the respective local regulations are applicable. Replaced parts become the property of IKEA.

What will IKEA do to correct the problem?

IKEA appointed service provider will examine the product and decide, at its sole discretion, if it is covered under this guarantee. If considered covered, IKEA Service Provider or its authorized service partner through its own service operations, will then, at its sole discretion, either repair the defective product or replace it with the same or a comparable product.

What is not covered under this guarantee?

- Normal wear and tear.
- Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, damage caused by chemical or

electrochemical reaction, rust, corrosion or water damage including but not limited to damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions.

- Consumable parts including batteries and lamps.
- Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible color differences.
- Accidental damage caused by foreign objects or substances and cleaning or unblocking of filters, drainage systems or soap drawers.
- Damage to the following parts: ceramic glass, accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to have been caused by production faults.
- Cases where no fault could be found during a technician's visit.
- Repairs not carried out by our appointed service providers and/or an authorized service contractual partner or where non-original parts have been used.
- Repairs caused by installation which is faulty or not according to specification.
- The use of the appliance in a non-domestic environment i.e. professional use.
- Transportation damages. If a customer transports the product to his home or another address, IKEA is not liable for any damage that may occur during transport. However, if IKEA delivers the product to the customer's delivery address, then damage to the product that occurs during this delivery will be covered by IKEA.
- Cost for carrying out the initial installation of the IKEA appliance.

However, if an IKEA appointed Service Provider or its authorized service partner repairs or replaces the appliance under the terms of this guarantee, the appointed Service Provider or its authorized service partner will reinstall the repaired appliance or install the replacement, if necessary. This does not apply within Ireland, customer should contact the local IKEA dedicated after sales line or the appointed Service Provider for further information.

These restrictions do not apply to fault-free work carried out by a qualified specialist using our original parts in order to adapt the appliance to the technical safety specifications of another EU country.

How country law applies

The IKEA guarantee gives you specific legal rights, which cover or exceed all the local legal demands. However these conditions do not limit in any way consumer rights described in the local legislation.

Area of validity

For appliances which are purchased in one EU country and taken to another EU country, the services will be provided in the framework of the guarantee conditions normal in the new country. An obligation to carry out services in the framework of the guarantee exists only if the appliance complies and is installed in accordance with:

- the technical specifications of the country in which the guarantee claim is made;
- the Assembly Instructions and User Manual Safety Information.

The dedicated AFTER SALES for IKEA appliances

Please don't hesitate to contact IKEA appointed After Sales Service Provider to:

- make a service request under this guarantee;
- ask for clarifications on installation of the IKEA appliance in the dedicated IKEA kitchen furniture;
- ask for clarification on functions of IKEA appliances.

To ensure that we provide you with the best assistance, please read carefully the Assembly Instructions and/or the User Manual before contacting us.

How to reach us if you need our service

Please refer to the last page of this manual for the full list of IKEA appointed After Sales Service Provider and relative national phone numbers.

- i** **In order to provide you a quicker service, we recommend to use the specific phone numbers listed on this manual. Always refer to the numbers listed in the booklet of the specific appliance you need an assistance for. Please also always refer to the IKEA article number (8 digit code) and 12 digit service number placed on the rating plate of your appliance.**

i **SAVE THE SALES RECEIPT!**

It is your proof of purchase and required for the guarantee to apply. The sales receipt also reports the IKEA name and article number (8 digit code) for each of the appliances you have purchased.

Do you need extra help?

For any additional questions not related to After Sales of your appliances please contact your nearest IKEA store call centre. We recommend you read the appliance documentation carefully before contacting us.
