• Product Description •

Thank you for your using our product!

Thank you for using our product, and hopefully you can understand the product operation method conveniently and easily through the manual. Please read the manual carefully before use so as to operate the product safely and enjoy better amusement.

Main Functions

1. 7 /6.2 -inch 16: 9 TFT high resolution LCD screen.
2. Built-in radio, DVD player, etc..
3. Compatible with DVD/VCD/CD/WMA/JPEG, etc..
4. High sensibility FM/AM reception, can save 30 stations.
5. 3D graphic touch interface, all the functions can be realized through touch operation.
6. Built-in GPS intelligence navigation system (optional).
7. Built-in Bluetooth function, with handwritten + touch input functions.
8. Optional ipod control, can be operated by touch screen.
9. Connectable with parking sensor.
10. Two-way video output, Four-way audio output.
11. Auxiliary input function, optional external audio/video input.
12. With USB interface, supporting audio play and picture browse.
13. Auto identification of NTSC/PAL system.
14. 4×45 W high fidelity and high power output.
15. Digital TV Function(Optional)
16. Real time clock display function.
17. 3G connection ready(visit www.echowin.com for more details)

Product Application

The product adopts high resolution TFT touch LCD, can play majority of discs currently available in the market, provides functions such as navigation (optional), radio, analog TV, Bluetooth and visible reversing radar, and high fidelity power output, etc., extensively used in various cars, special purpose vehicles and buses, etc. with 1-DIN dimensions.

Main Specifications

Power voltage: 9.5-16V

Max. current: 15A

• Notice before Operation •

Safety Precautions

Please read all instructions in detail before installation, and it is recommended that the machine be installed by automobile sound profession sales agent.

The machine is applicable to car 12 V power supply system (requiring grounded wire). Please don't install the machine directly on the truck or bus with 24 V power. Otherwise, it may damage the machine.

Please use licensed discs, don't use inferior discs or nonstandard discs, otherwise it may cause machine failure or affect service life.

Never replace the fuse for power supply without instructions from professional personnel, using an improper fuse may cause machine damage and cause fire.

In order not to breach the traffic regulations, the driver should not watch the program and operate the machine while driving to prevent unnecessary traffic accident.

For safety and to ensure product normal application, please invite professional personnel from the sales dealer of the product to install. Never disassemble or repair the machine by yourself to prevent machine damage and accident. For detail, please consult with the local distributor of professional automobile sound system.

Please don't place the product in a damp environment and in water to prevent electric shock, unnecessary damage and fire due to short circuit.

The mechanic driving part of the product display screen adopts full-automatic precise driver assembly. Never push, pull and rotate the machine with strong force by hand and never bump the TFT display to prevent product damage.

For a safety drive, please keep the volume as low as possible for the purpose of the noting traffic and road surface condition.

Never insert foreign article into the disc loading mechanism.

The product is a laser product; therefore, please don't aim the laser beam to the eyes directly.

Note: To prevent short circuit, please remember turning off the automobile and disconnecting ACC and B+ before installation.

• Notice before Operation •

Precautions of Disc Application

- The machine supports 12 cm disc only, never insert 8 cm disc into the machine. Don't use adaptable accessory when inserting 12 cm disc, otherwise, the disc may not be removed from the machine.
- Don't expose the disc under direct sunlight. It must be put in the box. Otherwise, the disc may deform and can't be used normally.
- Don't use cracked or deformed disc. Otherwise, it may lead to a failure.
- Please don't use disc with adhesive such as prismatic glass membrane and rental identification, etc. If such disc is played in the player, it may be hard to take out, and it may lead to a failure.
- Don't use an irregular disc. Otherwise, it may cause machine damage.
- Please not use a disc with transparent or translucent data surface since it can't be inserted into, taken out or played normally.
- While using a new disc, there may exist bur at the inner and outer edges of the disc. If so, use a ball-point pen, etc. to clear it away. Otherwise, the bur may adhere to the disc's playing surface, resulting in jitter.

- Don't touch a disc's playing surface (sending out colorful iridescence). Otherwise, fingerprint may be left on the disc surface, resulting in jitter phenomena.

- If a disc with dirt is played, it may result in the disc score or jitter. If a disc is dirty, it may be cleaned with disc cleaning agent sold on the market, and it can be wiped out lightly from the inner disc outward.

Machine Maintenance

- Use soft cloth to clean dirt (silicone resin cloth, etc.). When it is very dirty, it is required to use a piece of cloth soaked with diluted kitchen cleaning agent and wipe it after wringing the cloth dry. Then wipe it with a piece of dry cloth. The LCD screen is easy scoring, so, please wipe it carefully. While adopting the chemical dish cloth, please wipe it as per the Operation Manual.
- Don't use volatile agent such as benzene or sparse agent, etc. Otherwise, it may be deteriorated or the lacquer on it may shed off.

Schematic diagram of remote controller

Note: Please take off the battery plate before using the remote control.

1. Remote Control Buttons

2. Function Instruction

- ⏻ Power on/off: press once to turn on/off.
- MUTE Button: Mute function.
- MODE switch button: Press once to switch to Radio/DVD/AUX/TV/GPS.
- ▲ Eject button.
- DVD Button: press this button direct to enter DVD mode.
- STOP Button.
- VOL+/VOL- button.
 - ▶▶ Play/pause button.
- GPS Navigation Button.
 - ◀▶ In the radio to the low / high-frequency semi-automatic search radio stations, in the player when the song / next song (chapter).
- OK confirm button.
- TV Button.
- BAND Radio button.
- AUDIO switch button, on TV mode to switch audio, on DVD TO switch left/right sound.
- 0.1.2....10+ Select the current band. Chapters. Preset radio stations, enter the number Button.
- GOTO Search type player.
- RPT Repeat Button.

● Basic Operation ●

Functional description of remote controller

1. : Power key.
2. MOD: switch mode.
3. : DVD load in and out.
4. : Mute ON/OFF.
5. AMS: browse function at radio mode, auto search at TV mode.
6. PU/LOC: Set up local/remote search under radio mode.
7. ST: Set up stereo/mono under radio mode.
8. BAND: Band FM1/FM2/FM3/AM1/AM2; AUTO/NTSC/PAL system switch at DVD; System switch at TV.
9. VOL-: Decrease volume.
10. L/R: switch track when playing VCD at DVD mode, language selection when playing DVD.
11. VOL+: Increase volume.
12. PBC: PBC function under DVD mode.
13. RPT: Set up repeat play function under DVD mode.
14. PD/RDM: Set up random play function under DVD mode (requiring disc support).
15. SCAN: browse at CD/VCD mode.
16. PROG: Programming play function under DVD mode.
17. Numeric key: 0~9
18. If the digital input exceeds 10 under DVD mode, it is required to press respectively two numeric keys, e.g.: 1 and 2, meaning 12.
19. DEL: Clear function under Bluetooth mode.
20. : Stop play function under DVD mode.
21. : Play/Pause switch function under DVD mode.
22. GOTO: Selecting function under DVD mode.
23. SUB-T: Subtitle function (requiring disc support) under DVD mode.
24. MENU: Enter/Exit menu setup under DVD mode.
25. : Menu operation direction key.
26. ENTER: Menu operation confirmation key.
27. EXIT: Exit the current status, and enter the main menu.
28. OSD: Display OSD information under DVD mode.
29. ZOOM: DVD image zoom.
30. ANGLE: Angle switch function under DVD mode (requiring disc support).
31. SLOW: Slow play function under DVD mode.
32. TITLE: Display title menu under DVD mode.
33. : Screen UP/DOWN, used to adjust the view angle.
34. : Long press for manual station search function under radio mode. Short press for auto search function; Previous/Next chapter when playing DVD.

● OSD Operation ●

Function Operation:

The car multimedia play system provides DVD play, radio, USB, built-in Bluetooth, built-in navigation (optional), AUX input, IPOD connection, rear view lens and OFF screen mode, can realize the relative function operation.

Main Menu

1.DVD touch key (without DISC, no DVD status)

Touch lightly the key to enter DVD status. (For relevant operation, refer to DVD operation interface)

2.TV touch key

Touch lightly the key to enter TV status. (For relevant operation, refer to TV operation interface)

3.IPOD touch key (without IPOD, no IPOD status)

Touch lightly the key to enter IPOD status. (For relevant operation, refer to IPOD operation interface)

4.RADIO touch key

Touch lightly the key to enter radio status. (For relevant operation, refer to radio operation interface)

5.CAMERA touch key

Touch lightly the key to enter camera status. (For relevant operation, refer to camera operation interface)

6.USB touch key (without USB, no USB status)

Touch lightly the key to enter USB status. (For relevant operation, refer to USB operation interface)

7.SD touch key

Touch lightly the key to enter SD card status. (For relevant operation, refer to SD operation interface)

8. NAVI touch key

Touch lightly the key to enter NAVI card status. (For relevant operation, refer to NAVI operation interface)

9.Bluetooth touch key (optional)

Touch lightly the key to enter Bluetooth (BT) status. (For relevant operation, refer to Bluetooth (BT) operation interface)

10.AUX touch key

Touch lightly the key to enter AUX status. (For relevant operation, refer to AUX operation interface)

11.SETTING touch key

Touch lightly the key to enter parameter setup. (For relevant operation, refer to parameter setup of operation interface)

12. RETURNING touch key

Touch lightly the key to enter previous page.

DVD function

DVD play

Warning: Please use standard licensed disc, keep the disc clean, and develop a good usage habit to guarantee the normal service life of the system.

DVD disc play

Load the disc slightly onto the disc entry port, the disc will be attracted into the machine automatically, and the system will read the disc automatically. In the disc play process, clicks the touch screen "EXIT" to return to the main interface of system.

• OSD Operation •

1.Mute Key

Touch lightly the key to stop the voice.

2.Previous track Key

Touch lightly the key for previous track

3.Next track Key

Touch lightly the key for next track

4.Play/Pause Key

Touch lightly the key, the DVD will switch between play and pause position.

5.Stop Key

Touch lightly the key to stop play.

6.Exit Key

Touch lightly the key to exit.

7.More Key

Touch lightly the key to display conceal menu.

8.RPT Key

Touch lightly the key to select among repeat chapter, repeat title, repeat play, and repeat close modes.

9.RDM Key

Touch lightly the key to switch ON/OFF random play

10.L/R Key

Touch lightly the key to choose Left or Right channel

11.EQ Key

Touch lightly the key to setup the EQ.

12.OSD key

Touch lightly the key to display screen information.

13.SUB_T Key

Touch lightly the key to convert subtitles in different languages (CD-ROM titles such as no more information will be invalid clicks)

14.MENU Key

Touch lightly the key for menu play

15.UP Key

Touch lightly the key for UP selection of menu, after selecting the menu, touch lightly "OK" key to run the operation selected.

16.DOWN key

Touch lightly the key for DOWN selection of menu, after selecting the menu, touch lightly "OK"key to run the operation selected.

17.RIGHT key

Touch lightly the key for the next menu, after selecting the menu, touch lightly "OK" key

to run the operation selected

18. LEFT key

Touch lightly the key for the previous menu, after selecting the menu, touch lightly "OK" key to run the operation selected

19.OK Key

Press the key lightly to confirm after selecting the menu.

USB Function

USB/SD OSD:

Interface keys:

1.touch ① key lightly to listen to the musics.

2.touch ② key lightly to watch the pictures.

3.touch ③ key lightly to watch the movies.

4.touch ④ or ⑤ key lightly to turn to last page or next page

5.touch ⑥ or ⑦ key lightly to choose last song or next song.

• OSD Operation •

Radio function (system default being radio interface)

1. BAND touch key

Touch lightly the key to switch among FM1,FM2,FM2,AM1 and AM2
