Design

Simplified and sophisticated, Clarion's new design features a minimal number of physical keys and a graphical user interface with optimally laid-out on-screen controls. Buttons are thus larger and more ergonomic, while on-screen displays offer the information you need, clearly, intuitively and with a touch of style.

Navigation

Clarion's car navigation lineup includes everything from hide-away navigation unit and portable navigation device, to all-in-one AV/Navigation systems.

The navigation engine, with maps stored on 2GB flash memory, provide a perfect balance of performance and convenience.

Entertainment

Keep your audience smiling. Certain select models feature visual output for 2-zone entertainment, so rear seat and front seat passengers can view different content during the journey. And with DivX® playback support, you'll be able to enjoy a wider variety of compressed video programs such as movies.

Sound

Sculpt the sound to match your preference or environment, with audio features like Beat EQ's 3-band parametric equalizer, BBE® MP to improve the sound of compressed digital audio and Magna Bass EX to boost ultra-low frequencies for a richer sound with more impact, just for starters.

Connectivity

The music you love and carry can be enjoyed seamlessly in your car. iPod connectivity including full control and search functions, as well as USB and AUX connections to access music on portable devices and other external equipment, make sure you can take your tunes along for the ride.

Balance Your Drive with Precise Navigation and Premium

NX509
DVD Multimedia Station with
Built-in Navigation
& 7-inch Touch Panel Control

CEA 2006 Power Ratings
20W+4 RMS (4Ω) @ 14-4V ≤1% THD+N

- **Mutiple Road selection:** Unpaved Roads, Permit Needed Moter Ways, Toll Roads, Ferries, Border crossing, Carpool Lanes
- Smart Zoom and 3 preset zoom Buttons
- Quick Access to Quick Menu
- Lane Information & Signpost Information

New Graphical User Interface

The Clarion H.M.I. concept takes a unique form in the NX509's touch-panel graphical user interface with high-resolution on-screen display. A wide variety of functions, from car navigation to AV entertainment, are consolidated into this intuitive user-interface so there are only 3 physical buttons present on the front panel, contributing to the clean looks of this model. No steep learning curves, so you can enjoy it to the fullest from day one.

Built-in Navigation System

Nothing to add — it's all there from the get go. Count on GPS accuracy and the efficient Clarion Mobile Map engine to guide you to your destination. Navigation data is pre-stored on the internal flash memory for quick access. And with 3D rendered graphics including landmarks, you'll have an intuitively familiar view of the navigation route you are taking.

3D Rendering for Added Realism and Driving Accuracy

3D City Map

Cityscapes are realistically rendered in 3D, with buildings close to you drawn transparently to avoid obstructing the next intersection.

3D Landmarks

3D landmark data are seamlessly integrated into 3D graphic renderings, realistically depicting key points along your travel route.

3D Elevation Map

To make it easier to maneuver through complex junctions, roads and bridges are drawn using actual height information.

iPod Direct Control via USB

Just connect the USB cable that's included with your iPod to the NX509's Rear USB input to control your iPod from either side. Using an optional CCA723 cable will even let you watch iPod Video on the screen. The same USB terminal can also be used to connect a USB memory device with digital music files stored on it.

* To connect iPod, please use the USB cable included in your iPod.
* Please see the Clarion website for iPod models that can be connected.

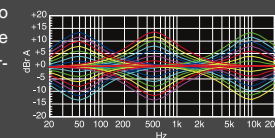

Digital Media Ready (DivX®)

DivX is a common media language that delivers a pure digital experience. Clarion has provided DivX playback on most AV products since 2008. DivX enriched video files deliver superior video quality and allow more information on a single disk. Once again Clarion delivers the features you expect.

Enhanced Sound Performance

Beat EQ's 3-band parametric equalizer helps you customize your sound, while MagnaBass EX boosts ultra-low frequencies so you can enjoy more solid bass performance.

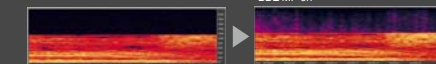

Audio Precision (Bass Midrange Treble)

BBE® MP for Better Sounding MP3/WMA/AAC Files

BBE MP (Minimized Polynomial Non-Linear Saturation) Process improves digitally compressed sound such as MP3/WMA/AAC by restoring the harmonics that are lost through compression, thereby reproducing the warmth, details and nuances that you would otherwise miss. BBE MP enhanced harmonics even serve to make regular CDs sound better.

• Manufactured under license from BBE Sound, Inc.
• Licensed by BBE Sound, Inc. under one or more of the following US patents: 5510752, 5736897. BBE and BBE symbol are registered trademarks of BBE Sound, Inc.

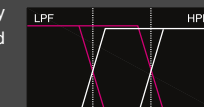

• BBE MP Process

• This Diagram shows only image for function of BBE MP

Built-in HPF and LPF

The internal High Pass and Low Pass Filters allow your music to be played at the precise levels that they were meant to be heard. Enjoy bass with more muscle and highs with more clarity.

24-Bit D/A Converter

Fully enjoy the sonic impact of DVD movie soundtracks or music videos. 24-bit technology actually oversamples the digital signal, providing excellent results that just weren't possible with older 16-bit systems.

2-Zone Entertainment

This allows rear seat passengers to enjoy a DVD movie or iPod Video while the front seat passengers enjoy their favorite radio station or music from a USB memory device.

Sirius/XM Ready

Connect to a Sirius or XM Satellite Radio receiver via CeNET interface and enjoy over 130 channels of music, news, talk shows, sports and traffic information with digital quality sound throughout the U.S. and Canada.

iPod USB Direct for playback through USB cable provided with iPod.

USB Connector even supports playback of WMA/MP3/AAC files.

6ch RCA Outputs let you freely add external power amplifiers to create a more powerful, sophisticated audio system.

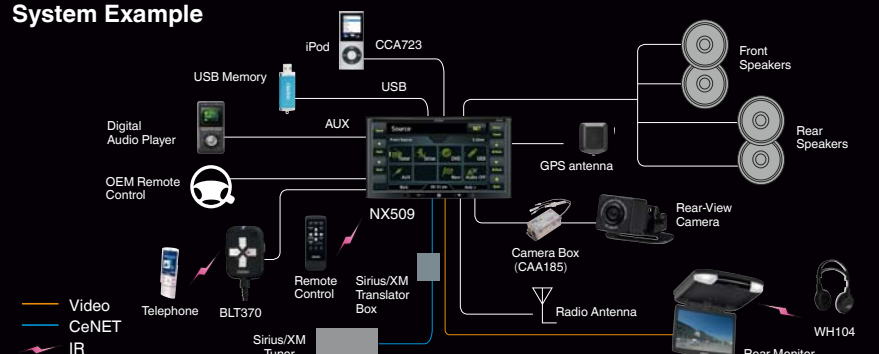

24-Bit D/A Converter

Bluetooth-ready with BLT370

Hands-free conversations (HSP/HFP) on Bluetooth-ready mobile phones, promote safe driving. This is possible via wireless connection of the phones to the vehicle's audio systems. With the A2DP Advanced Audio Distribution Profile, you can enjoy music reproduction from many new mobile phones or portable media players and control them via AVRCP (Audio Video Remote Control Profile).

CEA 2006 Power Ratings
19W+4 RMS (4Q@14.4V ≤1% THD+N)
S/N 77dB (Ref:1W into 4Ω)

GPS Antenna Remote Control

Easy-view Sub Display

In addition to its main LCD screen, while "closed", the NZ409 shows you its informative 12-digit blue LCD display for maximum visibility within a space-saving profile.

iPod Direct Control via USB

Just connect the USB cable that's included with your iPod to the source unit's USB input to control your iPod. Using an optional CCA723 cable will even let you watch iPod Video on the screen. The same USB terminal can also be used to connect a USB memory device with digital music files stored on it.

*To connect iPod, please use the USB cable included in your iPod.
*For video playback, optional CCA723 cable required.
*Please see the Clarion website for iPod models that can be connected.

Front and Rear AV Input

NX409 is equipped with AV inputs on the front as well as the rear, making it twice as easy to plug-in a portable audio device or portable satellite radio for instantaneous enjoyment.

24-bit D/A Converter for Superb Sound Reproduction

Fully enjoy the sonic impact of DVD movie soundtracks or music videos. 24-bit technology actually oversamples the digital signal, providing excellent results that just weren't possible with older 16-bit systems.

Built-in Navigation System

Nothing to add — it's all there from the get go. Count on GPS accuracy, an efficient navigation engine, and intuitive 2D/3D map screens to guide you to your destination. Navigation data is pre-stored on the internal flash memory for quick access and response.

Sirius SSP Direct Connection Ready

Connect to a Sirius Satellite Radio receiver without any need for a interface box — and enjoy over 130 channels of music, news, talk shows, sports and traffic information with digital quality sound throughout the U.S. and Canada.

Rear Vision Camera RCA Input

This RCA input enables you to smoothly connect a rear camera to display the area behind your vehicle. The increased view encourages and facilitates safer driving.

6ch/2V RCA Output

With 3 sets of RCA outputs, you are free to add external power amplifiers to create a more powerful, sophisticated audio system.

Bluetooth Ready

Used with the optional BLT370 Bluetooth transceiver, you will be able to enjoy the benefits of hands-free calling as well as audio streaming of music you have stored on your mobile phone.

iPod USB Direct for playback (Video Playback, Optional CCA723 Cable)
USB Connector even supports playback of WMA/MP3 files.
Front AUX Input for connection of portable audio player or other equipment.
6ch output assures system flexibility and expandability.

New Graphical User Interface

With a lion's share of functions controllable from VZ509 touch panel, there are only 4 physical buttons to deal with. Operation is streamlined, simplified, and beautifully enhanced with the high-resolution on-screen display.

New Graphic IC

By incorporating an integrated video IC, on-screen graphics switch more quickly and smoothly, and usability has been enhanced by allowing touch panel operation even while a video image is being shown in a small window.

Navigation Touch Panel Operation

The NP509 hide-away navigation system can be connected to the VZ509 directly and controlled through its touch panel. So with this multimedia station, you can upgrade to a car navigation system at any time. Count on voice guidance messages and high-resolution map displays to get you safely to your destination.

Digital Media Ready (DivX)

DivX is a common media language that delivers a pure digital experience. Clarion has provided DivX playback on most AV products since 2008. DivX enriched video files deliver superior video quality and allow more information on a single disk. Once again Clarion delivers the features you expect.

4-Hard Key

Direct USB iPod Control

Just connect the USB cable that's included with your iPod to the Clarion head unit's USB input and you get complete control over your favorite music including iPod ABC Search, using iPod's control wheel. And by connecting the iPod to VZ509 via optional CCA723 cable, it will be possible to enjoy iPod Video on the VZ509's monitor screen.

* To connect iPod, please use the USB cable included in your iPod.
* Please see the Clarion website for iPod models that can be connected.

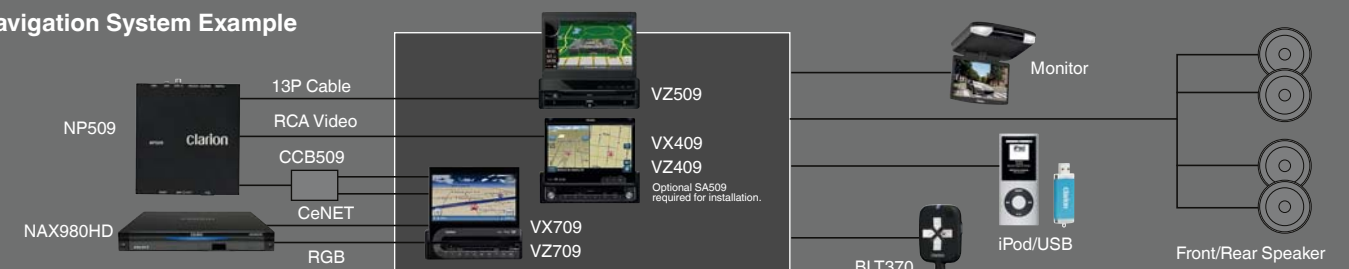

Advanced Technologies for Sound Satisfaction

BBE MP (Minimized Polynomial Non-Linear Saturation) Process improves digitally compressed sound such as MP3/WMA/AAC by restoring the harmonics that are lost through compression. What's more, Beat EQ's 3-band parametric equalizer helps you customize your sound, while Magna-Bass EX boosts ultra-low frequencies so you can enjoy more solid bass performance.

Built-in Battery

Your life is on the go, so should your portable navigation device. The EZD580 includes a long life Lithium Ion Battery, for your on-the-go lifestyle. With up to 4 hours of continuous use it is sure to be ready when ever you. Go ahead, charge it up and get moving.

12 Million POIs Preloaded

Looking for somewhere to eat? Or maybe your gas tank is empty? Let the EZD580 guide you to your required destination by accessing its 12 Million Points of Interest. National Parks, Gas Stations, and Restaurants are a simple touch and select away, simply select the POI guide, pick your destination and watch the EZD580 do its magic and display your route in precise detail.

FM-TMC for Traffic Information

Let's face it, knowing where you are going is only half battle, arriving on time is winning the war. The EZD580 features the Total Traffic Network as an available option for 2009. Total Traffic guides you through the heaviest of traffic situations, allowing you to alter your route and avoid road delays.

Transmit Voice Prompt/TTS

Clarion continues to create products that make your daily trips safer and more convenient. The EZD580 features a selectable voice guided prompt, which allows you to follow this smart devices instruction without ever having to take your eyes off the road. TTS(TEXT to speech) technology lets voice prompts announce the street name so you can exactly your way.

- Speed limit information • Interactive 2D & 3D map view
- Smart zoom technology • Cross border routing, 50 POI categories
- Extremely fast route calculation and rerouting

Bluetooth wireless connection supports safe handsfree calls. This ensures safer driving and transforms the in-car environment to a more amenity-rich environment. Connect your mobile phone to the EZD580 and see phone information on the screen to manage calls and dial numbers with ease.

No Tools Required

Turn it on and bam; off we go. Its built-in power source allows you to go anywhere. Use the touch screen display to enter your destination and follow along as your route is displayed in rich detail. Connectivity leads to convenience and entertainment. Whether you're listening to music from the SD card or transferring data through the USB port, Clarion enriches the mobile experience.

Mini USB port SD card slot

Always with You. Navigate Your Life.

ClarionMiND is a completely new type of mobile Internet device created by the car audio and navigation expert Clarion. As a Next Generation Navigation plus Internet-Based Entertainment device, it provides GPS navigation, and with Wi-Fi and Bluetooth-enabled cellphone, the Internet can be accessed via a full browser anytime and anywhere. ClarionMiND has a new interface that allows you to navigate the real-world and the unlimited possibilities of the Internet at the touch of a finger. The possibilities for ClarionMiND are endless.

Powering ClarionMiND: the Mighty Intel® Atom™ Processor

ClarionMiND is powered by Intel's smallest processor – the Intel® Atom™ Processor – which packs an astonishing 47 million transistors. Despite its small size, it is powerful enough to deliver a full range of Internet services and many useful applications.

ClarionMiND

NEXT-GENERATION NAVIGATION

Navigation / Send from Google Maps to your device / Portable and Dockable

Full-featured navigation system from Clarion, a leading car audio and navigation manufacturer.

Navigation

ClarionMiND is a full-fledged navigation system that guides you accurately to your destination.

Google Maps provides extensive local information.

Send from Google Maps to your device

In addition to pre-installed POIs, use ClarionMiND to guide you to your selected destination using the information supplied by Google Maps. Once you find your destination on Google Maps, click the Send button to transfer it to your ClarionMiND and navigate directly.

Google Maps

POIs downloaded from Google Maps

Independent operating modes for portable and in-car use.

Portable and Dockable

As a portable device, ClarionMiND allows you to use it in the home or office, or when you are out and about. In your car, the navigation mode starts as soon as the unit is placed in the standard cradle or the optional Car Dock.

For more information, see the Clarion website at <http://my.clarion.com>

INTERNET BASED ENTERTAINMENT

Browser / YouTube / MySpace

A step beyond mobile devices: full browser.

Browser

Using the Firefox-based web browser, you can navigate the Web the same way you do on your PC. Find where you want to go, such as restaurants, concert venues and shops by checking the information on the Internet.

Full Browser

Enjoy YouTube and MySpace via the unique interface.

The YouTube icon on the Home Screen gives you one-touch access to one of the world's most popular video community — you don't need to activate the browser.

YouTube Browser

Use the MySpace icon to go directly to this popular social networking website with over 100 million members. The easy to operate MySpace browser has enhanced viewer functions to make MySpace even more fun to use than with a PC.

MySpace Browser

USER INTERFACE

Mobile Mode / Car Mode

ClarionMiND provides an intuitive H.M.I. (Human Machine Interface). The graphics for the button size and layout, map design and menus are designed to provide excellent visibility to allow safe operation of the touchscreen.

Mobile Mode

The icon layout can be switched between Slide View and Carousel View, and the icon arrangement order and categories can be changed as well. Enjoy faster access by grouping and displaying the icons of functions used most often.

Slide View

Carousel View

Car Mode

The special Car Mode interface was designed for safety and comfort. Installing the standard cradle (included) and Car Dock (sold separately) allows the navigation to start up automatically and switch to a screen that restricts certain functions for increased safety while the vehicle is moving.

Car Mode

Some of ClarionMiND's many convenient functions.

- Weather (Powered by The Weather Channel)
- News Reader
- Real Player (Music/Movie/Photo)
- e-mail
