Some televisions allow you to key in the transmission channel number in their tuning set-up menu.
- In case there will be interference problems with other transmission channels when the player outputs a signal on transmission channel 52, the AUTO SEARCH process usually recommends an alternative, as in step 4.
- There is a another way of setting RF output channel, if needed please see 'Connections and Assembling on page 35'. It does not apply to models which do not generate the RF output signal.

1 Press ⏻ on the remote control and RF52 will be displayed on the front of your player.

Press the [OK/ENTER] button of the player's remote control again longer than 5 seconds to release the test picture.
2 • If the quality of the test picture transmitted to the TV is poor due to interference caused by a station transmitting on channel 52, you can tune the player to a different transmitting channel. Find a free channel between 21 and 69 on your TV.

Call the player's "SETUP" choose "VCR SETUP" then "RF OUTPUT SET".

Type in the free channel.

Store and exit.
