Finishing solutions

In-house finishing

Turn your commercial environment into a one-stop finishing house. Capable of producing professionally finished documents instantly, at a fraction of the cost of outsourcing. Imagine how easy life would be, if you could execute programmed guillotine work, creasing and folding, tabbing, stapling and laminating on call.

Fuji Xerox has a booming range of compact machines that are ideally suited to small print shops and office print rooms. These capable machines are sourced from leading manufacturers around the globe, and backed with a 12 month manufacturer's warranty.

Don't take a chance with outsourced finishing when you can control the game.

Call 13 14 11 and ask for a demonstration.

Trimming and Guillotining

Card cutting machine

The programmable Zip-21 is ideal for schools, commercial and print room environments. The machine allows efficient and flexible card cutting. Cutting your own business cards in house is fast, accurate and easily done with the help of the Zip-21. Simply design your business cards and postcards, print them off and put them through the machine!

Now there's a versatile card cutting machine that's as fast as your digital print equipment

Zip-21 Card Cutter

The Zip-21 Card Cutter is a unique machine, capable of cutting up to 9,480 business cards per hour. What's more, its flexibility allows you to cut print-on-demand business cards, postcards, greeting cards and more. It's a real workhorse, requires very little training and has a small footprint.

With its interchangeable cassettes and SRA3 capability, the Zip-21 is a multifunctional machine.

	Zip-21 Card Cutter
Minimum cut size	40 x 45mm
Maximum cut size	300 x 230mm
Maximum sheet size	up to SRA3
Machine weight	68kg
Program memories	49
Maximum feed stack	50mm
Speed	158 cards/min (9480/hour)
Interchangeable cassettes	yes
Part number	058L11225

INTERCHANGEABLE CASSETTES

Single Card Cutting Cassette	058L11229
DL Cassette	058L11231

Note: Machine comes with a 12 month warranty. Please contact your Fuji Xerox Sales Representative for further details.

Trimming and Guillotining

TabCutter range

Fuji Xerox Document Supplies sells over 14 million tabs a year, from Colotech Series and Pre-Printed through to the standard 150 and 200gsm tabs, over 350 different types for direct printer throughput and hand insertion into documents. However, there is still a need to produce non-standard tabs. With the new range of tab cutting equipment you can tab cut into bound documents to produce 'waterfall' style tabs, or produce tabs in Island or Run Out style on demand.

TabCutter 7

TabCutter 6

Thumb
TabCutter

TabCutter 7 Electronic, For Bound or unbound Documents

For bound documents or unbound sheets, this unit will cut from 2 to 31 tabs in preset increments by simply programming a 210mm or 297mm edge, selecting the number of tabs you need and tab cutting using the foot pedal. The cutting head automatically follows you through to the last tab and then resets itself to the start again. Island or runout style tabs, up to 350gsm and 40 sheets* per cut. TabCutter 7 can also be used as a straight cut guillotine and has the ability to cut down from SRA3** if needed.

TabCutter 6 Electronic, For Loose leaf tabs

This unit cuts unbound documents into 2 through to 31 tabs. Simply set the device to tabcut on the 210mm or 297mm edge, set the number of tabs you need and tab cut using the foot pedal. Island tabs or runout, up to 40 sheets* per cut. The cutting head automatically follows you through to the last tab and then resets itself to the start again. Island or runout style tabs, up to 350gsm and 40 sheets per cut. TabCutter 6 can also be used as a straight cut guillotine and has the ability to cut down from SRA3** if needed.

ThumbTabCutter

This device cuts a thumb tab arc indentation along the edge of a bound document. The ThumbTabCutter cuts a 10mm arc into the side of the bound document ready for the users to 'thumb' through. This device bought into Australia to fulfill customer orders.

Description	Cuts tabbed sets	Operation	Unit of measure	Part number
TabCutter 7	2-31	Semi Automatic	1	055L10007
TabCutter 6	2-31	Semi Automatic	1	055L10006
ThumbTabCutter			1	055L10011

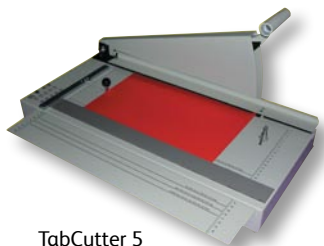

TabCutter Stands With or Without Wheels

Device that allows the operator to either stand or sit down at the TabCutter 6 or 7 device. Option to purchase with or without wheels.

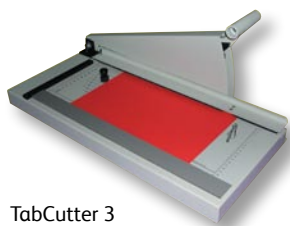

Stands for TabCutter 6 and 7	Unit of measure	Part number
No wheels	1 stand	055L10009
Including wheels	1 stand	055L10010

*Based on 80gsm. **Cutting SRA3 requires some aftermarket machine changes and adjustments.

Trimming and Guillotining

TabCutter 5

TabCutter 3

TabCutter 5 Electronic Backstop

Semi automatic with a pre-set short edge backstop that cuts 2 to 31 tabbed sets. Simply program either the 297 or the 210mm edge, select the number of tabs you need and the backstop moves with you as you drop the blade. Set the tab selector to '0' to use the blade as a straight guillotine. You can also cut your SRA3** full bleed stock down to island or runout style Tabs. Takes up to 15 sheets* per cut.

TabCutter 3 Manual Backstop

Produce from 2 to 12 island or run out style tabs by manually moving the short edge backstop in pre-set positions and dropping the guillotine blade. Also has a straight guillotine feature. Takes up to 15 sheets* per cut.

Diary Corner Puncher

Enables the punching of 1 to 1.5mm holes in the extreme corner of bound documents that can then be neatly torn away as each page is used.

Description	Cuts tabbed sets	Operation	Unit of measure	Part number
TabCutter 3	2-12	Manual	1	055L10003
TabCutter 5	2-31	Electric/Manual†	1	055L10005
Diary Corner Puncher/Perfer			1	055L10012

*Based on 80gsm. **Cutting SRA3 requires some aftermarket machine adjustments. †Electronic backstop.

Trimming and Guillotining

Rotary Trimmers

Rotary Trimmers are used to cut and trim paper and material that required greater accuracy. These trimmers are equipped with a high quality rotating cutting blade to ensure a smooth, clean cut on a wide variety of material. With ergonomic design, these trimmers provide the combination of convenience, accuracy and safety. Ideal for office, school and medium volume paper cutting needs.

Jastek 3100 Cartridge Rotary Trimmer

Ideal for office, craft and school usage. This revolutionary trimmer offers patented cartridge cutting technology. This technology sees the cutting blade only exposed when the head is pressed, making the unit extremely safe and easy to use. Automatic clamping system and includes straight, wave and perforating cut blades with storage compartment.

Jastek 3315/4612 Rotary Trimmers

Jastek rotary trimmers are available in either A4 3315 model or A3 4612 model. These ergonomic trimmers offer a solid metal cutting table. Ideal for the office or school environment, these units have a clear clamping mechanism, paper guides, and cutting ruler.

Neolt 65, Neolt 80, Neolt 100 Rotary Trimmers

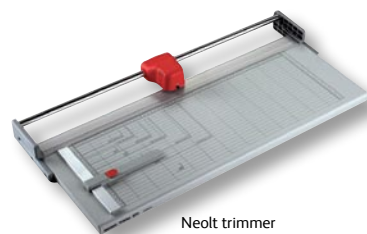

Desktop manual cutter with cutting unit and rotating blade. The working plane is a powder paint coated steel sheet, with a grid to ease the cutting in different formats and reference set-square. Marks are available in millimetres and inches. Paper guide optional.

WARRANTY: The Jastek and Neolt trimmers are covered under a manufacturer warranty for the period of two years and one year respectively. This excludes blades, lower knives and cutting sticks. Please contact your Fuji Xerox Sales Representative for further details.

Desktop and Larger Format Guillotines

Ideal for schools, commercial and print room environments, these guillotines are made of hardened steel and are equipped with high quality blades for all your cutting requirements. These machines provide accurate trimming, ensuring that your time is used effectively. All the equipment complies with both the European “CE” standards and Australian government regulations.

Ideal 1134 Office A4 Guillotine

For small to medium jobs • Metal construction • Fixed transparent guard • Precise gauges, transparent clamp bar and paper size table • Cutting line indicator

Ideal 1135 Paper A4 Guillotine

Automatic clamp for convenient cutting • Side lay with measuring scale • Standard paper sizes indicated on the table • Paper release function • Cutting line indicator • Format indications A4-A6

Ideal 1038 Paper A4 Guillotine

Automatic blade guard • Back gauge, side lay with measuring scale and paper size table • Solid hand clamp • Calibrated rotary knob for fine adjustment • Narrow strip cutting device

Ideal 1046 Paper A3 Guillotine

Automatic clamping • Side lay with measuring scale • Paper release function • Cutting line indicator

Ideal 1058 Paper A3 Guillotine

Automatic blade guard • Back gauge, side lay with measuring scale and paper size table • Lexan guard • Fold away paper supports • Narrow strip cutting device

Ideal 1071 Paper A2 Guillotine

Manual clamping • Fixed transparent Lexan guard • Back gauge, side lay with measuring scale and paper size table • Calibrated rotary knob for front gauge

Ideal 1080 Large Format Guillotine

Stand and foot pedal clamping • Collapsible extension table on the right side lay with measuring scale • Narrow strip cutting device • Blade locking device • Fixed transparent Lexan guard

Ideal 1110 Large Format Guillotine

Stand and foot pedal clamping • Collapsible extension table on the right side lay with measuring scale • Narrow strip cutting device • Blade locking device • Fixed transparent Lexan guard

Trimming and Guillotining

Wide format trimmers

Wide format trimmers are ideal for cutting photographs, drawing, poster and other large format documents. These trimming tools are equipped with a steel rotating blade to provide a smooth and precise cutting result. A range of different cutting widths is available from 100-250cm. The sturdy design ensures reliable and consistent operation.

Neolt Manual Trim

- Range of cutting widths available
- Smooth running rotary blade in hardened steel
- Sheet press made of transparent plastic
- Stand sold separately
- Comes standard with retrieval tray for trimming
- Optional roll holder available

Neolt Power Trimmers

Neolt Light Power Trim

Neolt PowerTrim Plus

Neolt Strong Trim Pro

Neolt Light Power Trim 145cm

Manual cutter with a steel rotating blade cutting unit, mounted on a rectangular sliding bar

- Working surface is sheet steel epoxydix powder coated, with grid to ease the cutting in different formats with one reference square
- Marks are available in millimetres and inches
- Includes stand which comes with retrieval tray for trimmings.

Neolt Power Trim Plus 145cm and 210cm

Manual cutters with rotating blade in hardened steel, mounted on a square sliding bar

- Robust blade holding carriage moving on bearings
- Fixed blade in painted stainless steel, mounted on a reinforced cutting plane
- Stand, moveable guide and retrieval tray for trimmings included
- Optional Accessories: roll-holder and lamp over cutting area.

Neolt Strong Trim Pro 130/180/230cm

Manual trimmer with two rotating blades for cutting in both directions

- Particularly strong for cutting thicker materials, strong blade holder carriage sliding on bearings mounted on a rectangular sliding bar
- Fixed blade in painted stainless steel mounted on a reinforced cutting plane
- Stand, paper collecting tray and movable reference square included
- Optional accessories: roll holder, lamp over cutting area and sheet holder.

Ideal 4205 Guillotine (pictured with stand)

High-quality blade made from "Solingen steel" • Solid steel blade carrier • Weight 53kg (with stand) • Adjustable back gauge made of hardened steel • Patented fast flick action clamp • Side lay with measuring scale • Fine adjustment of measurement with calibrated scale on the back gauge handle

Ideal 4215 Guillotine (pictured with stand)

Electronically controlled true two-hand operation with safety guards, main switch and safety lock • Weight 90kg (with stand) • Patented fast flick action clamp • Precision side lay • Digital measurement readout for back gauge positioning • Optical cutting line

Ideal 4705 Guillotine

Powerful Manual Office guillotine • Weight 93kg • Transparent safety guard on the front table (locks automatically while cutting) • Transparent hand guard on the rear table • Safety catch (locks blade lever in upper position) • Safe and convenient blade change from the front without removing machine covers • Cuts large formats • Solid spindle clamp with hand wheel

Ideal 4810-95 Guillotine

Electronically controlled two hand operation • Electro-mechanical blade drive • Measuring scale located on front table and two side lays each on front and rear tables • 15 amp power

Ideal 4850-95 Guillotine (not pictured)

Electro-mechanical blade drive • Precise gauges and optical cutting line allow accurate cutting • Two side lays each on front and rear tables • 15 amp power

Ideal 4850-95EP Guillotine

Electro-mechanical blade drive • Fully programmable back gauge control module • Digital measurement readout • 15 amp power

Ideal 5221-95EP Guillotine (pictured with side tables)

Electro-mechanical blade drive • Digital measurement readout • Fully programmable back gauge control module • 15 amp power • Side table optional

Ideal 5222 Guillotine (pictured with side tables)

• Electromechanical blade drive & hydraulic clamp drive • Foot pedal for pre-clamping plus cutting line indicator • Power back gauge with fully programmable back gauge control module • Light beam safety curtain on front table • Safe and convenient blade change without removing machine covers • 15 amp power

Ideal 6550-95EP Guillotine

Electro-mechanical blade drive • Fully programmable back gauge control module • Digital measurement readout • 15 amp power

Ideal 7228-06LT Guillotine (pictured with side tables)

• Electro-mechanical blade drive • Programmable EP-back gauge • Infinitely adjustable clamping pressure with optical indicators • Spindle guided electro-mechanical back gauge drive for precise positioning • Air table on front and rear table • Optical cutting line indicator with LEDs • Automatic measuring correction in case of back gauge displacement • Self-diagnostic system with error indication on display • Motor capacity: 1.5 kW

Stapling and Booklet Makers

Finisher staples

Note that some finishers fit onto wide ranges of machines, in some instances a particular machine type may have 1, 2 or even three alternate types of finisher depending on user needs when the printer was bought. Once you have identified your specific needs we recommend you note the exact machine/finisher configuration(s) in the 'Regulars' section of the 'on-line' ordering site (xeroxsupplies.com.au). This will save you time when reordering.

A type finisher

Finisher type and designation	Location information as appropriate	Part number
A type		CWAA0540
B type		CWAA0455
Office finisher		108R00053
C finisher		CWAA0540
C finisher + booklet maker	Top section (R1)	CWAA0540

*D2 Finisher Staple pack includes staples waste hopper (designated R5). D2 Finisher prevalent in the Fuhjin equipment in late '07 onwards.

Identify your finisher – advice when ordering staples

Advanced finisher

Production/
Professional finisher
(with booklet maker)

C finisher

C+ finisher
(with booklet
maker)

B finisher

D finisher

When ordering staples the first question you need to answer is:

Q: Where will your staples be used?

A1: Inside the printer – see the online table on the top of page 120.

A2: For your Standalone stapler – see the table on the bottom of page 120.

A3: For your Finisher – see above and compare the pictures above to your equipment.

Shown above are some of the most popular finishers currently available. Identify the unit you have then refer to A/B/C/C+ or D etc in the table above. We recommend you then build this into your web ordering regime, once identified it stays identified for all future orders.

Stapling and Booklet Makers

Offline Stapling Options

With over a billion staples being used in Australia every year, off-line electric or manual staplers offer an economical and efficient method of document preparation and finishing. These electric and manual off-line staplers ensure that all your documents will remain collated and organised. These machines are made from the highest quality materials and come with a manufacturer warranty. Please contact your Fuji Xerox Sales Representative for further details.

Office duty

Rapid E26/E28

Stapling and Booklet Makers

Booklet Makers

Entry level

BM 60
Booklet Maker

BM 60 Booklet Maker

The BM 60 Booklet Maker allows the production of up to 1800 A4 or A5 booklets per hour. A low cost finishing alternative for the smaller digital print shops willing to expand their business.

Compact and user-friendly • Booklet maker for hand feeding • Able to saddle staple and fold, side and corner staple • Media ranging from 60-250gsm and up to 22 sheets • Accepts formats from SRA3 down to A5 • Engage or disengage various functions on the operator panel, manual or automatic mode, stapling off for folding only or folding off for stapling only • A trimmer or collator can not be added to the BM 60

BM 61 Booklet Maker

The BM 61 Booklet Maker allows for more production booklets, a step up from the BM 60 (shown above). This has the option to purchase the machine and upgrade to attach 10 bin collator or feeder. Reliable, extremely operator friendly and it has a small footprint. The BM 61 can also be handfed for one off booklets.

Plockmatic 104 Squarefold

The Plockmatic 104 Squarefold module can be used as a stand alone unit or be added to the BM 60 Binder. This enhances the booklet quality radically and gives that flat professional magazine look. Squarefolding is now becoming standard in the industry and the SQF 104 provides a low cost finishing alternative for the smaller digital print shop willing to expand the business.

Plockmatic System 40, 70 and 100

The system 40 integrates collating and booklet making. It combines the 510 series collator/feeder hybrid (shown on page 130) with the BM 61 booklet maker.

The system 70 integrates booklet making and square folding. It combines the BM 61 booklet maker and 104 Squarefold module.

The system 100 combines collating, booklet making and square folding. This office system can handle large volumes at a reasonable speed without compromising the quality of the finished book. It combines the 510 series collator/feeder hybrid (shown on page 130) with the BM 61 booklet maker and the 104 Squarefold module.

For further information on these systems please call your Fuji Xerox Sales Representative.

Light production

Plockmatic System 200, shown with BM 200, SQF 200 Squarefolder, FTR 200 Trimmer and 510 Series 10 bin feeder.

An ideal solution
for producing
professionally
folded and stapled
booklets

Plockmatic System 200

The system 200 integrates collating, booklet making, trimming and square folding. It combines the 510 series collator/feeder hybrid (shown on page 130) with the BM 200 booklet maker, the FTR 200 Trimmer and the SQF 200 Squarefold module.

For further information on this system please call your Fuji Xerox Sales Representative.

BM 200 Booklet Maker

The BM 200 Booklet Maker is able to handle up to 25 sheets giving a 100 page booklet.

Patented two step folder rollers have given a sharp fold without marking and reduces the risk of tearing • 10 open memories for storing of frequent jobs • The BM 200 can also be fed manually by hand or have a collator attached (see page 130).

BM 200 Booklet Maker

Stapling and Booklet Makers

Booklet Makers

Production

- Ultimate booklet making system for most printing applications
- More professional requirements including more sophisticated features than in light production
- Maximum monthly volume 100,000 booklets
- It can include from one to three highly versatile VF 1008 Suction towers, plus the BM 2000 Binder, FTR 2000 front edge trimmer, and the unique SQR SquareFolder.

VF 1008 Feeder

A completely new concept in vacuum feeding/collating that offers a unique combination of advanced feeding applications and traditional collating. Use it as a smart feeder for pre-sorted printer outputs or as a traditional collator for normal collating jobs. Combined you have a truly flexible and versatile system. Merge colour prints from your offset/digital press with pre-sorted b/w and colour outputs from your printer.

Plockmatic BM 2000 Booklet Maker

A booklet maker for the production segment that handles a wide variety of formats and substrates and with a capacity to produce up to 3000 booklets per hour regardless of format. Special attention has been given to handle digital colour prints and to avoid smearing and scratching. Adjustable staple position allows operator to "hide" staples behind the spine. Patented two step fold roller system gives a sharp fold without marking.

Plockmatic FTR 2000 Trimmer

Front edge trimming is a must for booklets with more than 3-4 sheets. The FTR 2000 is despite its small foot print, equipped with a large trim scrap bin and air jets make sure trim scrap is separated from the books. Automatic set up through the BM 2000 operator interface.

Plockmatic SQF 2000 Squarefolder

Adding the squarefolder gives you the same professional flat finish as a perfect bound book but at a fraction of the price. Enhance the appearance with text printed on the spine and get that magazine look. Faster, less expensive and without the negatives of glue binding such as a long warm up time, odours, foot print. Automatic set up through the BM 2000 operator interface.

Plockmatic System 1000

The system 1000 integrates collating, booklet making, trimming and square folding. It combines the VF 1008 Feeder, BM 2000 Booklet Maker, FTR 2000 Trimmer and SQF 2000 Squarefolder.

For further information on this system please call your Fuji Xerox Sales Representative.

WARRANTY: Plockmatic machines are covered by a 12 month third party warranty. Please contact your Fuji Xerox Sales Representative for further details.

Creasing, Folding and Pressure Sealers

Creasers

Manual creasers

DC460

Morgana
Docu-Crease 52

DC460 Manual Creaser

Easy to operate • Heavy duty creasing machine • Designed for small volume applications • Hand-operated machine • 2 adjustable stops for multi creasing down the sheet

Morgana Docu-Crease 52

520mm hand creaser • Ergonomically designed for right or left handed operation • Designed to overcome cracking • Perfect for low volume usage • Fast set up • Easy indicating scale

	DC460 Manual Creaser	Morgana Docu-Crease 52
Minimum crease length		25mm
Maximum crease length		520mm
Maximum crease width	460mm	
Stock weight	70-400gsm	70-400gsm
Part number	048L00460	048L93024

Semi automated creasers

Morgana
Electro-Creaser
52

Morgana Electro-Creaser 52

520mm electric creaser • Foot operated • Compact tabletop unit • Overcomes cracking when folding • Fast set up • Perfect for low to medium volume usage • Easy indicating scale

	Morgana Electro-Creaser 52
Dimensions	L 780 x W 640 x H 220mm
Weight	27.5kg
Minimum crease length	30mm
Maximum crease length	520mm
Maximum crease width	520mm
Stock weight	70 – 400gsm
Power requirements	Single phase 230/240V
Part number	048L93044

Automatic Creasers

AutoCreaser 33

Medium to high volume usage • Stand alone console • Easy to use controls • Features such as perforating and batch counting as standard • Joystick controlled • Head up display • Heavy duty creasing die and matrix • Reversible blades for inverse creasing

Morgana AutoCreaser 50

Includes an inline register table and suction table for accurate and error free feeding • Nine pre-set programs • Joystick electronic controls for setting the crease position • Very simple adjustment of the crease position • Reversible blades for inverse creasing • Includes perforating and batch combing as a standard feature

Bacciottini DG Line Creaser

• Machine for medium to high volume creasing • Stand alone console • Uses a heavy duty creasing matrix • Easy to use controls • Speed: Up to 6500 sheets/hour (A4) • Min distance between creases: 0.1mm • Programs: 200 program and memory capacity of 100 creasing • Interchangeable dies for precise perforating and creasing

Bacciottini Pit Stop Mini Speed Creaser

• Machine for medium to large volume creasing • Stand alone console • Uses a heavy duty creasing matrix • Easy to use controls • Max sheet size: 500 x 700mm (500 x 850mm with extension feeder) • Min distance between creases: 0.1mm • Programs: 200 program and memory capacity of 100 creasing • Interchangeable dies for precise perforating and creasing

Creasing, Folding and Pressure Sealers

Folders

Friction Folders

Mail outs, promotions, invoices and your daily office requirements are no longer a problem. Using these fast and efficient machines these tasks will only take a few minutes saving you time and money.

Ideal 8324 Folding Machine

Efficient folding machine for A4 sized paper • Quick selection knob for fold type • 300 sheets stacking capacity (based on 70gsm) • High fold speed of 7,000 per hour • Extensible de-stacking tray with capacity of 30-80 sheets (depending on fold type)

Uchida F30N Folding Machine

Electric folding machine with manual settings • Single sheet friction fed • Seven different fold types • Feeding tray holds up to 500 sheets (64gsm)

Uchida F43N Folding Machine

Electric folding machine with automatic settings • Easy to use • Single sheet friction fed • Seven different fold types • Automatic paper size recognition • Stops automatically when preset count is reached or an entire paper stack is folded • Handy test button folds two sheets for the operator's inspection • Audible signal and digital display alerts the user in case of incorrect operation • Three roller friction paper feed system • Four digit digital counter • Feeding tray holds up to 500 sheets (64gsm) • Perforator/scoring unit available

Uchida F47N Folding Machine

Electric folding machine with automatic settings • Desktop folder with adjustable feed pressure for coated and specialty stocks • Separate manual feed tray enables folding of up to 3 stapled sheets (based on 80gsm) • Optional perforating and scoring units available • Automatic feeding and paper stacking • Extended delivery unit for large jobs

Creasing, Folding and Pressure Sealers

Folders

Suction Fed Folders

Baum 714XLT

Morgana Major Fold

Baum 714XLT

Heavy duty folding machine for medium to high volume usage • Compact air feed folder that compatible with both coated, glossy and commodity stock • Extra long feed table is designed to accommodate larger • Compact air fed folder with built-in air blower • Convenient operator control panel • Sound covers comes as standard • Multiple air adjustments for consistent feeding • Built in batch counter • Features a folding chart on the delivery tray to illustrate the standard 7 folds with their required settings • Extended length delivery stacker • Stand comes as standard making the machine mobile as it comes on lockable castors • Optional micro perf / scoring unit available (Part Number: 058L00205) • Ability to upgrade to the "Flow Thru" unit so that it can be configured for either a right angle fold or in tandem folds

Morgana Major Fold

Heavy duty folding for medium to high volume usage • Easy to use controls • Perforating and scoring wheels standard • Counting and batching standard • Register table aligns sheets before folding for extra accuracy • Double sheet/anti-jam detection • Pulse or streamfed mode • Variable speed • Fast set up • Extra long delivery table • LED on fold plates to 0.1mm

	Baum 714XLT	Morgana Major Fold
Load capacity	51mm	1,000 sheets (80gsm)
Speed variable	35,000	Up to 27,500 sheets/hour
Sheet size	Minimum	76 x 127mm
	Maximum	330 x 448mm
Stock weight	55-160gsm	56 – 240gsm
Part number	058L00200	048L48837

WARRANTY: Baum and Morgana machines are covered a 12 month third party warranty covering material and production defects. Please contact your Fuji Xerox Sales Representative for further details.

Creasers and Folders

Digifold 5000P

Integrates the function of creasing and folding in a single compact unit • Provides a highly productive, easy to use, mobile finishing centre • Equally effective with digital output or with printed by conventional means • Eliminates cracking and scratching • Heavy duty suction feed • Load on the run • Fully programmable • Automatic setup • Program memories: 9

	Digifold 5000P
Stock weight	100-400gsm
Maximum sheet size	700 x 385mm
Minimum sheet size	210 x 140mm
Maximum number folds/sheet	2
Maximum speed A4 sheets/hour	5000+
Part number	048L48836

Creasing, Folding and Pressure Sealers

Pressure sealers

Machines

The Pressure Seal range provides the office and inplant printer environment with a new level of production and manpower benefits.

This is an investment which enables companies to have full control of the distribution and print handling of secure documents. These machines act as a folder and inserter for single sheet documents.

Officemate 2D

Desktop unit • Small-medium monthly volumes • Simple fold settings • Advanced patented in-feed technology • Form size and folding positions are easy to adjust and can be set in a matter of seconds • Tool to clear jams with no technical experience required • Low noise when in operation to a max 48 decibels

Postmate 5

Revolutionary folding unit – form size and folding positions are easy to adjust and set in seconds • Unique sliding design – entire folding unit slides out and glides for easy maintenance • Manual feeder – allows the processing of single or damaged forms • Jam free pressure roller – automatically reverses the direction and kicks back any form that is jammed in the pressure rollers

Postmate 3M

Large capacity in-feed tray – easy to load, auto-lift in-feed tray • Friction Reverse Roller (FRR) – unique system automatically detects, singulates and feeds without any operator intervention • Optional auto-extending Conveyor Stacker – extends dependent on the number of forms being processed • Easy and friendly user interface – includes an easy to use auto stop and auto re-start function, electronic thickness detection and batch counter

Postmate 6

Large Capacity input tray • Auto lift in-feed hopper • Form size and folding positions are easy to adjust and can be set in a matter of seconds • Friction Reverse Roller (FRR) automatically detects, singulates and feeds without any operator intervention • Auto-extending conveyor stacker (optional), stacking up to 700 processed forms • 4 Roller Sealing unit ensuring sealing quality • Adjustable speed • Folds: Z, C, V, Double • Batch Counter: Auto start for job separation • Infeed Type: Friction Reverse Roller (FRR) with cooling fan

Postmate 6HD

Large Capacity input tray • Auto lift in feed hopper • Form size and folding positions are easy to adjust and can be set in a matter of seconds • Friction Reverse Roller (FRR) automatically detects, singulates and feeds without any operator intervention • Auto-extending conveyor stacker (optional), stacking up to 700 processed forms • 4 Roller Sealing unit ensuring sealing quality • Adjustable speed • Folds: Z, C, V, Double • Batch Counter: Auto start for job separation • Infeed Type: Friction Reverse Roller (FRR) with cooling fan

Creasing, Folding and Pressure Sealers

Pressure sealers

Consumables

Secura Fast Forms

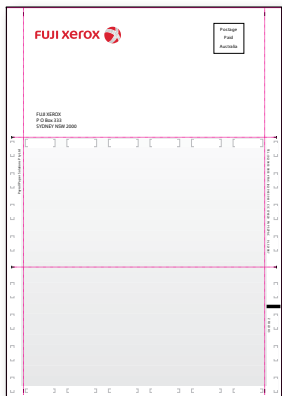

Forms based on uncoated A4 90gsm stock. Secura Fast Forms are in a permanent seal, of which once opened cannot be resealed. They are fed through laser printers and are sealed by one of the off line machines shown on page 136.

PERMANENT SEAL (PS) is for high security documents such as pay slips where the perforated edges have to be removed to reveal the document within.

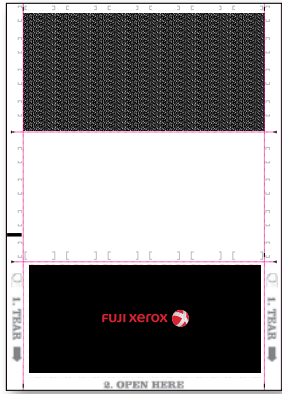

Description		Qty per box	Part number
Secura Fast	Permanent Z Fold – PS	1,000	047L01216
	Permanent V Fold – PS	500	047L01224
	Permanent C Fold – PS	1,000	047L01215

For further details on the pressure seal range, please speak with your Fuji Xerox Sales Representative.

All machines come with a 12 month warranty. Please contact your Fuji Xerox Sales Representative for further details.

Binding Equipment

Punch Binding

Exclusive to Fuji Xerox this dynamic new range of binding machines from Rhin-O-Tuff allows you to handle multiple punch binding in one piece of equipment. The Rhin-O-Tuff range reduces the amount of workspace required as closers and inserters can be attached to the machine or used as stand alone devices.

Interchangeable Die Machines Rhin-O-Tuff Office Duty

OD4012
Shown with optional palm switch

- 297mm open ended punch with patented quick change die system
- Punches up to 25 sheets of 80gsm stock
- Manual and auto reverse feature to prevent jams
- Adjustable binding edge with vertical punching
- Patented anti-jam feature, trigger and auto reversing function
- Quick and easy set up
- 20 interchangeable dies available
- Foot pedal or optional palm switch operation
- All metal construction
- 12 month warranty. Please contact your Fuji Xerox Sales Representative for further details.

Rhin-O-Tuff OD4012 – electric punch

It may be the most compact machine in the range, but the Rhin-O-Tuff OD4012 is an ultra reliable and extremely powerful machine that's perfect for schools, copy shops and businesses with small workspaces and a heavy duty demand.

It features the patented 'quick change' die system and has easy paper to pin sign alignment for balanced hole to edge margins.

Binding Equipment

Punch Binding

Closing and Inserting Machines Plastic comb closer

Rhin-O-Tuff – Plastic Comb Closer

Built for ease of operation • Bind documents up to 51mm thick and 356mm wide • Adjustable ring opener control for exact book placement • Can be used as a stand alone or in combination with any vertical punch machine in the OD or HD series • A mounting kit is required to attach the closer.

Product	Description	Part number
Plastic Comb Closer	Stand alone or machine attachable for HD & OD series	052L00113
Mounting Kit	For HD series	052L00117
	For OD series	052L00407

- Easily adjustable for any size comb
- Lightweight and portable
- Fast and accurate

WARRANTY: 12 months. Please contact your Fuji Xerox Sales Representative for further details.

Closing and Inserting Machines Wire closers

Rhin-O-Tuff – Manual Wire Closer

All metal construction • Easy to use • Adjustable for different wire sizes from 4.8mm up to 38mm • Adjustable angle back to give you better viewing and wire positioning • Can be mounted to any HD vertical or OD series machine with a mounting kit.

Optional Wire Hanger, which attaches to the front of the machine, for loading documents on the wire.

Coil Inserters

Roll-a-Coil

Electric coil inserter allows for quick and easy coil insertion • Built-in book thickness gauge • Alignment channel to form the correct profile for easier initial insertion of coil.

Electric operation: Allows the operators to use both hands for complete document insertion control • Foot pedal operated

Finish @ Coil E1

Electric coil inserter features a built in electric crimper • Designed to maximise productivity whilst requiring the minimum efforts from the operator • Adjustable full-size rollers make this high-capacity electric coil inserter extremely fast and easy • Built-in electric coil crimper • Built-in book thickness gauge • Alignment channel to form the correct profile for easier initial insertion of coil • Quality rubberised main roller with adjustable idle roller for easier insertion of coils, especially larger coils • Foot pedal operated

	Roll-a-Coil	Finish @ Coil E1
Closes	All Pitches	All Pitches
Coil diameter	6 to 50mm	6 to 50mm
Part number	052L04175	052L04176

Note: All machines comes with a 12 month warranty. Service issues are handled by a third party service provider. Please contact your Fuji Xerox Sales Representative for further details.

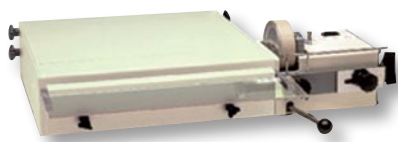

- Accurate coil insertion
- Book thickness gauge
- Coil sizing gauge
- Includes crimping pliers and holder
- Inserts all pitches and diameters
- Superior rubber formula grabs coil better

Rhin-O-Roll Coil Inserting Machine

304mm dual powered adjustable rollers make coil binding fast and easy • Innovative unit features a book thickness gauge and a coil sizing gauge • Can be used as a stand alone production coil inserter • Built in crimper pliers holder on the side of the machine • Can easily be fitted on all OD and HD series machines with a mounting kit.

Rhin-O-Roll Coil Inserter	Stand alone or machine attachable for HD & OD series	052L00322
Mounting Kit	For HD series	052L00117
	For OD series	052L00407

WARRANTY: 12 months. Please contact your Fuji Xerox Sales Representative for further details.

- More flexibility with coil lengths from 152mm to 914mm
- Crimper pliers included
- Superior rubber formula grabs coil better

Coil Inserter & Work Station

This innovative unit can effortlessly bind books with up to a 32mm coil diameter.

With the capacity to handle coil lengths from 152mm to 914mm, the unit is easy to operate and will give you more flexibility for large jobs.

Featuring the patented Lexan Guide for easier insertion of all coils, this unit makes light work of electric coil inserting.

The inserter can easily be fitted to the side of an OD series machine or it can be used as a stand alone Production Coil Inserter.

Its lightweight and portable design provides flexibility, allowing you to move the inserter if needed.

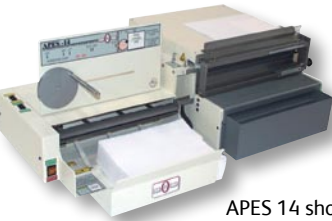

Coil Inserter/Work Station	Stand alone or machine attachable to OD series	052L00122

WARRANTY: 12 months. Please contact your Fuji Xerox Sales Representative for further details.

Binding Equipment

Punch Binding

Paper Pickers and Ejectors Rhin-O-Tuff

APES 14 shown with the HD7000

- Accurate paper count
- Handles stock sizes from 140 x 140mm to 356 x 356mm
- Combines with an existing APES-14 or APES-14-77 attachment
- Can be used in standard mode for odd jobs while still attached

- Accurate paper count
- Handles stock sizes from 140 x 140mm to 356 x 356mm
- Combines with an existing APES-14 or APES-14-77 attachment

APES – Auto Paper Ejector and Stacker

Versatile and fast in preparation • Eject and stack-in one simple, time saving operation • Can increase productivity by up to 50 per cent • Extends the useful life of your existing equipment • APES-14-77 is compatible with the HD7700 • APES-14 is designed to work with the HD7000

	Description	Part number
APES 14-77	Auto Ejection System for HD7700 (vertical only)	052L00405
APES 14	Auto Ejection System for HD7000	052L00409

WARRANTY: 12 months. Please contact your Fuji Xerox Sales Representative for further details.

PAL-14 – Piks-A-Lift

Smart and efficient machine does all the work for you • It selects the optimum amount of paper you can punch in relation to the Rhin-O-Tuff machine in operation • Increases punching capacity by around 30 per cent • Provides average paper count accuracy of +/- one sheet for each lift • Compact in design • Fits on any vertical HD or OD series punch machine • Able to combine with an existing APES-14 or APES-14-77 attachment.

	Description	Part number
PAL-14 "Piks-A-Lift"	For HD & OD series	052L00406

WARRANTY: 12 months. Please contact your Fuji Xerox Sales Representative for further details.

Leathergrain backing with Matt Cover

Bindomatic Covers don't always have to be customised with covers that are able to be printed. The below covers are a black Leathergrain backing with a matt PVC cover. These covers are the easiest to use as its simply, insert into the cover, bind and the document is ready for use.

Finish	Colour	Size	Sheet Capacity	Spine size	Covers per pack	Part number
Leathergrain	Black Matt	A4	1-15	1.5mm	20	048L01007
			16-30	3mm	20	048L01008
			31-60	6mm	20	048L01009
			61-90	9mm	20	048L01010
			91-120	12mm	20	048L01011

Covers are available in different finishes, larger pack sizes, as well as being pre-printed. Speak with your Fuji Xerox sales representative for more information.

Tape Binding

Tape Binding Machine

Planax Copy Binder 5

Convenient and economical for an in-house binding solution • High binding durability and stability • Fast, precise and neat processing • Binding thickness up to 33mm width (from 5-330 pages without cover and final sheet) • Electronic recommendation of the correct binding strip width • Editing device, (e.g. page replacement) • Sizes: A4 Standard (A5 option) • Binding rate 200 bindings/hr • Machine dimension: D 355mm x W 588mm x H 283mm • Energy saving automatic standby mode

Finish	Binding thickness	Binds*	Part number
Planax Copy Binder 5	33mm	5-330 pages	056L00400

* Based on 80gsm

Note: The Planax machine comes with a 12 month warranty. Please contact your Fuji Xerox Sales Representative for further details.

Tape Binding

Binding Strips

- Cobi Strips adhere perfectly to the document providing a high quality, elegant appearance whilst being extremely durable
- Made from linen and coated on one side with Planatol hot melt glue
- A4 binding strips are 297mm in length

Binding Equipment

Thermal Binding

Docutech Binder Tapes and Tapes for the Xerox Tape Binder

Xerox Binder Tapes allow you to take advantage of the binding features in-built on many Xerox machines. Binder Tape gives equipment like the Xerox Docutech series the ability to automatically bind up to 125 pages in four colours.

The Xerox Tape Binder (XTB) is a new finisher unit sold primarily with the Nuvera Series of Xerox laser printer. Tapes for the XTB are in pre-cut strips of five packs of 100 tapes per box. Other colours (red) may be introduced as the popularity of this device increases.

Type	Colour	Tape length	Package type	Part number
Docutech	White	125m (420 tapes)	1 reel	008R07187
	Black	125m (420 tapes)	1 reel	008R07186
	Grey	125m (420 tapes)	1 reel	008R07188
	Blue	125m (420 tapes)	1 reel	008R07189
Xerox Binder Tapes	Black	500 tapes	5 packs of 100	008R13049
	White	500 tapes	5 packs of 100	008R13050
	Blue	500 tapes	5 packs of 100	008R13051

Binding Consumables

Plastic Combs – 20R

Plastic comb binding is one of the most popular forms of binding. Plastic combs are not only durable, but simple and very cost effective. It also allows your document to lie flat for easy page turning. It is ideal for the entry level to medium duty binding user. Its simple controls ensure a perfect bind first time.

Binding Consumables

Wire Coils

Wire hangers

Wire hangers are used to support calendars and wall charts.

These are available in 2 sizes, being supplied loose with 100 units per pack.

The longer 15mm hanger is used to support A3 long edge documents with the 7mm size being used with A3 short edge or A4 long edge documents.

These can be manually inserted or used with the JBI Hanger Feeder (052L00508) for an automated insertion.

Size (mm)	Description	Colour	Qty/pack	Part number
7mm	Wire Hanger	Black	100	052L00228
15mm	Wire Hanger	Black	100	052L00229

Wire Spools

Wire is not only available in the cut form in 34 loop or 23 loop, it's also available in spools. This is ideal for production environments where automated wire inserters are present.

Binding Consumables

4:1 Pitch Coils

These coils are a simple, effective way to professionally finish documents. For A4 4:1 pitch documents 46 holes are punched on the long edge. This binding process allows documents to lie flat for easy turning and allows a maximum of 270 sheets* to be bound in one document.

Shredders

The Kobra Shredders are designed and manufactured in Italy and are leaders in the area of high security shredders. All machines are equipped with an “Energy Smart” system with optical illuminated indicators for zero power consumption in “Stand-by mode” and environmental protection. All machines include steel gears for durability as well as a 24 hour Continuous Duty motor, so no downtime and no overheating.

Personal Shredders

Kobra+1 SS4

Kobra+1 SS4 Straight-cut shredder

Convenient and wide entry opening for easy feeding of paper, CDs, DVDs and credit cards
 • Carbon hardened cutting knives unaffected by staples and clips • Energy Smart System: zero power consumption on stand-by mode • 24 hours low noise continuous duty motor without overheating or duty cycles • Automatic Start/Stop through electronic eyes with stand-by function • Equipped with a removable waste bin for easy emptying with a front transparent window indicating the level of the shredded paper • Automatic stop for bin removal

Kobra+1 CC4 Cross-cut shredder

Carbon hardened cutting knives unaffected by staples and clips • Convenient and wide entry opening for easy feeding of paper and credit cards • “Energy Smart” System: zero power consumption on stand-by mode • 24 hours low noise continuous duty motor without overheating or duty cycles • Automatic Start/Stop through electronic eyes with stand-by function • Removable waste bin, with transparent window • Automatic stop for bin removal

Kobra+3 C4

Kobra+3 C4 Cross-cut shredder

Special “Throw and Shred” system with automatic feeder for shredding even crumpled paper • Transparent opening lid with automatic suspension closing • Capable of shredding CD, DVDs and credit cards and crumpled paper • 2 separate sets of cutting blades: one for paper and one for CD-ROMs, DVDs and credit cards • 2 distinct integrated removable containers to separate shredded paper and plastic and no bags • “Mobile Protection System” security with dual electronic sensors which cut off machine as soon as the lid is raised • “Energy Smart” System: zero power consumption on stand-by mode • 24 hours continuous duty motor without overheating or duty cycles • Automatic Start/Stop, with stand-by function

Kobra 240C4

Kobra 240 C4 Cross-cut shredder

24 hours continuous duty motor • Heavy duty chain drive with steel gears “Super Potential Power Unit” • Automatic Start/Stop through electronic eyes with stand-by function • Automatic Stop when waste bin is out with light signal • “Energy Smart” System: zero power consumption on stand-by mode • Carbon hardened cutting shafts take staples and paper clips

	Small	570 x 800	50 pack	054L00137

Print Room Accessories

Stackwagons

FX600 StackWagon

FX600 StackWagon conveniently transfer volumes of paper in mailrooms, offices, and print rooms • The centre slope design ensures that the inner stacks square themselves against the inner divider • Heavy-gauge steel construction • Fully Assembled upon delivery • On castors (2 lockable)

	FX600
Dividers	2
Maximum sheet size	400 x 600mm
Maximum stacking height	700mm
Part number	057L00057

Challenge joggers

Paper joggers are used to help eliminate static in your documents and to ensure that all the sheets in the stack are aligned. This results in the stock being easily fed into either printing machines or converting devices such as punching, binding or guillotining.

Challenge Handy Jog

Front-side loading • Three trays to choose from: standard tray, check tray or large tray • Up to 280 x 430mm stock size • Tray dimensions 286 x 337mm • Powerful jogging action • Quiet operation • Maintenance-free drive mechanism • Optional “Instant-On” footswitch

Challenge I-Jog

Robust, electro-mechanical jogging action • Front-side loading • Foot pedal control • Adjustable air flow – dial from zero to 112 CFM • Two jogging speeds • Three operating modes – air off all the time, air on all the time, or air on for an adjustable length of time during the jogging action • Rugged, heavy duty construction • Optional stand is also available

	Challenge Handy Jog	Challenge I-Jog
Maximum pile height	76mm	102mm
Stock size	Up to 280 x 430mm	Up to 305 x 407mm
Part number	048L63286	048L63280

Note: All Challenge machines comes with a 12 month warranty. Service issues are handled by a third party service provider. Please contact your Fuji Xerox Sales Representative for further details.

Print Room Accessories

Round Cornering Machines

Office Duty Round Corner Cutter

Create professional round corners quickly and easily • Specially designed to cut through multiple sheets with the least effort and with minimum die depreciation • Professional results form all standard materials including PVC, polyester, leather, paper stocks and other specialty media • Ergonomic manual punch • Includes L guides for the radius guide alignment with a 6.4mm radius die • Other interchangeable dies available including 3mm, 9.5mm radius, 45 degrees (straight), half moon, and hole punch

	Office Duty Round Corner Cutter
Punch capacity maximum	10mm
Part number	052L00231

Note: The machine comes with a 12 month warranty. Service issues are handled by a third party service provider. Please contact your Fuji Xerox Sales Representative for further details.

MACHINE OPTION: CALENDAR CUTTER KIT

Optional attachment for calendar applications allows the operator to perform half moons to be cut with the knock up guide

- Part number: 052L00232

Stago ESM20 Round Cornering Machine

Round cornering machine for a wide range of stocks including paper and card • Various radius sizes available allowing angular cuts and round corners to be executed cleanly and precisely • Mobile under frame • For material sizes up to A3 in size • Infinitely adjustable side guides • Side guides swivel for exact positioning • Knives made of hardened and grinded high-performance steel are quickly exchanged

	Stago ESM20 Round Cornering Machine
Punching capacity max	40mm (is equivalent to 400 sheets of 80g paper)
Paper size	Up to A3
Part number	057L00200

Note: The Stago machine comes with a 12 month warranty. Please contact your Fuji Xerox Sales Representative for further details.
