MEGAWARE **KEELGUARD**

Also featured in this catalogue are the Freedom Hawk Fishing Kayaks from America along with a massive range of inflatable boats and accessories from Aristocraft.

ELECTRICAL

DIGITAL BATTERY METER

This handy pocket meter has backlit LCD for a clearer picture of battery voltage and charge level. The large LCD readout is easy to read even in bright sunlight. It displays remaining charge level as a percentage and with a 10-bar gauge-style display. There is also an exact voltage display. The design is compact and the construction is solid for longevity.

T10001

WATERSNAKE BATTERY METER

For fisho's using electric motors these meters are invaluable. The Watersnake Battery Meter will accurately measure the remaining charge available in your battery. Just don't leave the shore without one!

51004

BATTERY CLIP EXTENSION

Another great marine accessory item is the Jarvis Marine Battery Clip Extension. Made of corrosion resistant materials, the battery clip extension allows you to connect 12 volt accessories directly to the battery.

BATTERY CLIP EXTENSION
JM51012

WATERSNAKE BATTERY TERMINAL KIT

Watersnake Battery terminals are made of lead with brass wing nuts. The terminals will convert your battery post to a wing nut style for easy connection of trolling motors or any boating accessories. 51006

WATERSNAKE BATTERY CLIPS

The Watersnake 15 Amp clips are copper plated with a PVC coating on the grips. The Heavy Duty 50 Amp Clips are corrosion resistant with a rubber coating and wide jaw. Pair includes one red and one black clip.

JM51008 15AMP
JM51013 50AMP

WATERSNAKE WIRE TIE CABLES

These cable ties are very handy when rigging up your motor or other electrical boating accessories. Each pack contains 100 cable ties in various lengths.

51053

BATTERY TIE DOWN STRAPS

Jarvis Marine Battery Tie-Down Straps are 54" long. These straps are universal and also work great for fuel tanks and other small accessories.

BATTERY TIE DOWN
STRAPS JM51026

ELECTRICAL

BATTERY TRAYS

Jarvis Marine Battery Trays will keep your battery secure and snug to prevent damage to your boat, equipment and battery. Mounting hardware is included with the trays.

Available in 2 sizes: 24M and 27M

BATTERY TRAYS
24M JM51014
27M JM51016

BATTERY BOXES
24M JM51018
27M JM51020

BATTERY BOXES

Jarvis Marine Battery Boxes are made of rigid polypropylene: impervious to battery acid. Supplied with a battery strap, stainless steel mounting hardware and available in 2 sizes, 24M and 27M.

BATTERY POWER STATION JM51025

Determine battery conditions at the touch of a button with a Jarvis Marine Power Station. There are no more hassles opening a battery box to get at terminals. The Power Station includes a 12 volt plug to wire to almost any 12v accessory. A 10amp Circuit Breaker removes hassles of fuses. This unit also features a built in LED battery meter.

BATTERY POWER STATION
JM51025

BATTERY MASTER SWITCH JM51035

BATTERY MASTER SWITCH JM51035

A battery master selecting switch with off/1/all/2 positional settings.

SWITCH PANELS

Jarvis Marine Switch Panels are what you need to replace that jumble of in-line fuses and unswitched circuits. The new water resistant 3- and 5-gang panels are complete with fuses. The range also includes 4- and 6-gang panels, plus a 3-gang panel with a chart light. All switch panels are supplied with fuses and extra labels.

5 GANG POWER SOCKET
SWITCH PANEL JM51373

IN-LINE FUSE HOLDER JM51404

The Jarvis Marine In-Line Fuse Holder is waterproof and is supplied with a 20 amp Fuse. This inline fuse protects on board equipment from shorts and electrical problems. **JM51404**

Watersnake 50 Amp Fuse Kit

We strongly recommend the use of an in-line fuse kit to protect your motor from shorts and electrical problems that can lead to over heating of circuit boards in your trolling motor. Having other devices hooked up to your motor battery can cause power surges. Watersnake Fuse Kits come supplied with a 50 amp fuse and are completely waterproof. These simple to install kits are an essential accessory for your motor. **56002**

Watersnake Replacement Fuse

Replacement 50 Amp fuse to suit a Watersnake Fuse Kit. It's a good idea to always keep a spare!

JM52679

POWER SOCKET

Fitted with a waterproof cover and made from stainless steel. **JM51421**

TOGGLE BOOT

The toggle boot protects against moisture and dirt and has brass threads to resist corrosion. **JM51300**

ELECTRICAL CONNECTOR KIT

Whether salt water has corroded your wiring, or perhaps you are fitting a GPS unit into your boat, the Jarvis marine Electrical Kit has a selection of all the necessary connectors and terminals to do a professional repair or installation on any 12/24-volt electrical fittings. Includes heat shrink tubing for water resistant connections. **JM51062**

BRASS TOGGLE SWITCH

Features a chrome plated brass handle and with clearly marked on/off positions. Two screw terminals for easy installation. The switch will accommodate 15 amps at 12v. **JM51330**

2 POSITION JM51306
3 POSITION JM51307

BLACK TOGGLE SWITCHES

Black plastic paddle 2 position on/off switch is suitable for aerators or lights. The 3 position on/off/on black toggle switch is suitable for running lights or anchor lights. Both switches are fitted with locking rings, lever seals and knurled cap nuts.

2 POSITION JM51320
3 POSITION JM51321

ILLUMINATED TOGGLE SWITCHES

Supplied complete with locking ring and cap nut and features a red plastic paddle that illuminates under load. Available in 2 styles: On/Off or On/Off/On. Either switch will accommodate 15 amps at 12v.

2 POSITION JM51304
3 POSITION JM51305

PUSH-PULL SWITCHES

The 2 and 3 position switch has a brass body with a chrome plated plastic knob, brass face nut, washer and back up nut and a stainless steel spring for long life. Fits into panels up to 2.5cm thick.

LIGHTING

Don't run the risk of not being seen at night. Install a Jarvis Marine navigation light on your boat. Jarvis Marine has a great range of bow lights and stern lights; we've got everything you need to make safety a priority!

TWO PRONG STERN LIGHT BASES

Two prong bases that are required to operate all-round stern lights. Jarvis Marine Stern Bases are available in both nylon and stainless steel.

ANCHOR STERN LIGHT COMBO JM51260

Made from corrosion resistant stainless steel with 360° visibility, this combination anchor and stern light has a compact fold down design and 15.5" shaft length.

ALUMINIUM ALL ROUND STERN LIGHTS

Made using lightweight yet strong alloy material and available in 2 shaft lengths of 24" and 36".

STAINLESS STEEL ALL ROUND STERN LIGHTS

The Jarvis Marine all round stern lights are available in 2 sizes, 24" and 36" poles. Fits into a Jarvis Marine stern base fitting.

BI-COLOUR BOW LIGHT – PLUG IN STYLE JM51216

Stowaway bi-colour bow light features a convenient plug-in base that allows the light to be activated or removed quickly and easily and is complete with an anodised aluminium pole.

CLAMP-ON ALL ROUND LIGHT JM51278

Waterproof 360 degree all round light with 2 position aluminium clamp. Featuring a 24" pole length the all round light has a high visibility. The light operates with 2 D cell batteries.

CLAMP-ON BI-COLOUR BOW LIGHT JM51279

Waterproof red and green portable bow light with 2 position aluminium clamp. Small boat owners who don't run electrical systems will find the Jarvis Marine battery powered Clamp on Bow Lights offer a big cost saving and are simple to install. The light operates with 2 D cell batteries.

NEW FOR 2011

AQUA BRIGHT LED

These powerful 600 Lumen LED lights are ideal when fishing at night. They assist with your vision and work as a fish attractant. Aqua Bright lights are non-corrosive, low amp draw and are shock resistant. They come supplied with fittings and are available in white or blue.

UTILITY LED STRIP LIGHT

The utility strip lights are waterproof and feature six white LEDs. The low current consumption makes the Utility Light perfect for lighting decks, cabins or bilges. The Jarvis Marine Utility Light is non-corrosive, shock resistant and supplied with a pigtail wire connection.

LIVE WELL LED LIGHT

Light up your live-well with this white LED light. The cool white LED is long lasting, creates very little heat and draws less than 10 percent of the power used by incandescent bulbs. The Jarvis Marine LED Live-Well Light is built from non-corrosive materials and is totally resistant to moisture.

SAFETY & NAVIGATION

COMPASS SMALL JM58002

Don't go to sea without a compass, and never go without a compass you can see! The Jarvis Marine Compasses come with a mounting bracket and are very durable and reliable, the bulb glass is clear and the compass points easy to discern at a glance. On the small compass the compass points are etched in white against a black background.

COMPASS LARGE JM58004

The larger size of this compass makes it easier to read. Another feature of the large compass is that it is illuminated. The points are displayed in white against a blue background.

COMPASS
SMALL JM58002

COMPASS
LARGE JM58004

HORN SAFETY BLASTER JM58210

The Jarvis Marine Horn Safety Blaster is super loud. Mouth operated with light blows of air, it roars out at more than 120 decibels – loud enough to be heard more than a mile away. Environmentally friendly the Jarvis Marine Horn Blaster is also great for sporting events and is made from anti-corrosive materials that will never rust.

5 IN 1 SURVIVAL TOOL JM58306

The Jarvis Marine 5-in1 Safety Whistle has 5 functions including a whistle, compass, mirror, waterproof capsule and a match striker. Also works as a key float and includes a lanyard.

SAFETY WHISTLE JM58300

It is wise to attach a whistle to all life jackets on your boat. Jarvis Marine Safety Whistles are both made of durable ABS materials. The Jarvis Marine Safety Whistle is fitted with a stainless steel split ring and supplied with a lanyard.

OARS & PADDLES

TELESCOPIC PADDLE

The Jarvis Marine Telescopic Paddle is fitted with a dual telescopic locking device that reduces to 22in and extends to 42in. These paddles are ideal for kayaks and small boats where room is at a premium and oars too big and clumsy. Made from corrosion resistant aluminium shaft and high impact molded blade and handle.

PADDLES

Jarvis Marine Paddles feature aluminium shafts with high impact plastic handle and moulded blades, available in 4' and 5' lengths.

OARS

Lightweight and durable, Jarvis Marine Oars have an advanced blade design that is moulded to provide maximum power and minimum slippage for efficiency. The shaft is made from corrosion resistant aluminium and has a diameter of 1 1/4". Available in 5' and 6' lengths.

JARVIS MARINE KAYAK PADDLES

Lightweight black aluminium shafts in two piece construction for easy storage with 3 position adjustments for ease of use. With a length of 84" (2.10m) these kayak paddles are also fitted with drip guards and available in two blade styles; standard straight paddle or a curved rounded style paddle.

TELESCOPIC BOAT HOOK JM56112

Boat hooks are handy when berthing or picking up mooring buoys. The Jarvis Marine Boat Hook eliminates the need to have a big solid boat hook cluttering your vessel. Our boat hook is fitted with a non-slip cam lock for secure use and is telescopic, extending from 53in out to 92in.

GENERAL ACCESSORIES

ECONOMY DECK BRUSH JM52702

The Jarvis Marine Economy Deck Brush has a 4' aluminium handle and has soft bristles that won't harm your finish but will still clean.

DECK BRUSH JM52704

Constructed from anodized aluminium for corrosion resistance, the Jarvis Marine Deck Brush features a telescopic handle that extends from 42in to 63in and comes with a positive non-slip cam lock for more secure use and easy stowing. The Deck Brush attaches to a garden hose and has an on/off switch for water flow control. The Jarvis Marine Deck Brush is great for the boat, car or home.

ANTENNA DECK
MOUNT JM52253

GENERAL ACCESSORIES

FLOATING FOAM KEY RING HOLDER

The Watersnake Floating Key Ring Holder are bright and easy to find and if your keys go overboard the floating foam will keep your keys on top of the water for easy retrieval.

JM52284

TWO-PIECE KEY HOLDER JM52286

A floating key ring holder design that has an inner chamber that will remain dry inside even if dropped overboard.

JM52286

LOWER UNIT LUBE PUMP JM52610

Avoid smelly lubricant running down your arm! The Jarvis Marine Lower Unit Lube Pump fits bottles of lower unit lubricant and allows for mess free lube changes. Simply thread the fitting in the lower drain hole and pump until filled.

OUTBOARD MOTOR LOCK JM52612

If you are worried someone might want to borrow your outboard then try the Jarvis Marine Outboard Motor Lock. The lock will secure outboard motors to the transom and the EDC coated steel tube locks over the screws making them inaccessible to theft. The package includes a padlock that fits inside the tube making it difficult to cut.

FISHING ACCESSORIES

FISHING BAROMETER

Keeping a close eye on barometric pressure trends—for greater fishing success—is easy with a Trac Barometer. These barometers are easy to calibrate for local barometric pressure and simple instructions are included. It features an adjustable pressure change indicator and a colour-coded dial shows typical conditions for great, good or poor fishing. This unit is made from a sure-grip solid ABS housing and it's equipped with a braided lanyard.

FISHING
BAROMETER
T3002

DIGITAL FISHING SCALES

Get fast accurate weights of your fish, or set your reel drag with precision, using Trac Digital Fishing Scales. Trac Scales have a large easy to read display and will show weights in metric or imperial measurements. The case is high impact ABS and the large hook is corrosion-resistant. There are two models available: a 50lb scale with a lanyard; and a 75lb scale with a formed handle grip hook. Both models are powered by three AAA batteries.

T10029

SINGLE ROD HOLDER

A single rod holder that you can place anywhere on your boat. Made from a super tough long lasting material and supplied with stainless steel hardware.

JM52209

THREE RACK ROD HOLDER

Keep your rods ready for action and your tackle tidy. Jarvis Marine 3 Rack Rod Holders are built tough to last and are made from high density white plastic with UV stabilizers making them very durable. They feature a handy place to store your pliers and fillet knife and all mounting hardware is included.

JM52214

RAIL MOUNT HOLDER

If you want a tough long lasting rod holder that is easy to install then look no further than the Jarvis Marine Rail Mount Holder. Made from marine grade 316 stainless steel materials and will fit onto rail fittings of $\frac{3}{4}$ " and 1".

JM52228

FLUSH MOUNT ROD HOLDER

The Jarvis Marine Flush Mount Rod Holder is made from durable, corrosion free ABS materials. Mounts at a 30 degree angle and requires a 2" installation hole.

JM52208

TOURNAMENT ROD HOLDER

The Jarvis Marine Tournament Rod Holder pivots up and down and swivels 360 degrees. It is supplied with a side mounting and the holder. The unique locking system secures either spin or baitcaster outfits.

DOCK, SKI & TUBE ROPES

DOCK LINES

How many times have you been caught out not having a dock rope? The Jarvis Marine dock lines are all hand spliced, 3-strand and 3/8" diameter. Make sure you have these lines on your boat. Available in 3 lengths, 15', 20' and 25'.

SHOCK DOCK STRAP

The Jarvis Marine dock strap is 20' in length and has a built in shock cord. This strap will absorb the shock caused by wakes and waves to protect your boat like no other dock line could ever do. This dock line will never rot and stores in a lot less space.

JM52506

STRETCH BUNGEE DOCK LINES

These great new dock lines from Jarvis Marine absorb shocks to your boat. The bungee cord is hidden inside the line and two foam floats protect the boat from chaffing. Available in 4', 5' and 6' lengths.

STRETCH BUNGEE DOCK LINE

Consists all the same features as the Bungee Dock Line but made to a greater breaking strain with a multi color line. Available in 5' length.

22 METRE SKI ROPE

Features a floating aluminium handle and made from 16 strand polypropylene. The Jarvis Marine Ski Rope is supplied with a velcro wrap for easy storage and has ultra-violet inhibitors to ensure it will last for many years. Stores wet. Safe Working Load: 95kg. Tensile strength: 476kg.

JM52427

22 METRE PRO CHAMP SKI ROPE

Ski like the pros with this quality rope from Jarvis Marine. Made from a 16 strand braided poly material and supplied with a floating handle. Ultra-violet inhibitors, Stores wet. Safe Working Load: 95kg. Tensile strength: 476kg.

JM52461

INFLATABLE TUBE TOW ROPE

Tow rope for inflatable tubes, 18 metres of rope with a 3 metre take down line and float supplied with a velcro wrap. Ultra-violet inhibitors, Stores wet. Safe Working Load: 235kg. Tensile strength: 1179kg.

JM52428

FENDERS & HOLDERS

FENDER STRAP

Very easy to install, adjustable and keeps fenders attached to railings and cleats. JM52100

FENDER ROPES

Tightly braided and long wearing, Jarvis Marine Fender Ropes are the ideal accessory to go with Jarvis Marine Fenders. The ropes are available in 3/8" diameter, 72 inch lengths in black, white or royal blue colors to suit the trim colors of your boat.

FENDERS

Jarvis Marine Fenders are durable, ribbed and inflatable and feature a UV inhibitor for long lasting protection. These fenders will protect your boat against scratches or worse damage when your boat is tied up to a jetty or mooring berth. Don't even consider attaching cheap inferior fenders to your boat. Inflatable fenders are the best by a mile! The fenders are all white in color and available in several sizes:

MARINE PLUMBING

BILGE PUMPS

It's comforting to know that when you have taken water in the boat, you can pump it out fast. The best way to achieve this is to install a Jarvis Marine Bilge Pump. Jarvis Marine submersible bilge pumps are fitted with a stainless steel shaft, oversized motor, tinned marine grade wiring and heavy-duty nylon housing which will provide years of carefree service. There is a wide selection to choose from, ranging from 600 gallons per hour, 800GPH, 1100GPH, 1500GPH up to the 2000GPH flow rate.

BILGE PUMP/FLOAT SWITCH KIT JM57418

Buy a bilge pump with a float switch and save.

BILGE PUMP FLOAT SWITCH JM57438

The Jarvis Marine Automatic Bilge Pump Float Switch uses a ball type switch with tinned marine grade wiring to hold up to the harshest conditions. The housing is resistant to oil, fuel, chemicals and salt exposure.

BILGE PUMP PLUMBING KIT JM57304

The Jarvis Marine Bilge Pump Plumbing Kit contains a 5' plastic bilge hose, plastic thru-hull fitting and two stainless steel hose clamps. All that is needed when you replace your bilge!

MARINE PLUMBING

TRAC

WASH DOWN KIT

The Trac Wash Down Kit contains everything that is needed to power wash your boat, caravan or vehicle in a convenient storage box.

Features a professional marine-grade pump which blasts 4 gallons per minute. Self priming pump can run dry without any damage and is completely sealed and will not overheat. Simply connect to a garden hose or use the supplied input hose to draw water directly from the ocean or lake.

Kit Includes: 16" x 11 1/2" x 8" Storage Box, 100PSI pump, spray nozzle, 6' input water hose with quick connect fittings and strainer, 20' spray hose with quick connect fittings and a cord for connection to a 12 volt power source

T10070

WASH DOWN KIT

With the Jarvis Marine Wash Down Kit you will be able to keep your boat clean on and off the water. The pump sends out 3.3 gallons of water a minute at 40 psi. The package includes nozzle, fittings, pump and filter – just connect to a hose and go. Keeping your boat clean on the water will save you hours of work when you come off the water.

JM57476

MANUAL BILGE PUMP

The self priming Jarvis Marine Manual Bilge Pump is great for evacuating small boats, bilges and dinghies or any place that water collects. Comes complete with a removable hose.

JM57004

1/2" TO 1" PR JM57206

5/8" TO 1.25" PR JM57210

HOSE CLAMPS

Plumbing can on occasions mean you need to replace hoses and hose clamps. Jarvis Marine Hose Clamps are made from 316 marine grade stainless steel. Three sizes are available that will fit a multitude of dimensions and are packed in 2 pieces per card.

ASSORTED HOSE CLAMP KIT

This 4 piece pack is made up of various sizes. Also made from stainless steel.

JM57214

SUBMERSIBLE LIVE WELL PUMP

Keeping live bait alive is not a problem with the Jarvis Marine Submersible Live Well Pump. Designed to be mounted inboard or out, the pump will push water through to your bait all day and keep them alive and refreshed.

JM57474

BAIT AERATOR

For coolers, buckets and live-wells, the Jarvis Marine Bait Aerator can be used in salt or freshwater. This unit has a 12 volt pump and is completely portable. Another great feature is the adjustable spray control which helps keep bait alive longer.

JM57102

FUEL ACCESSORIES

FUNNEL

A funnel is a necessity when filling fuel tanks with cans. The Jarvis Marine Funnel has a flexible hose making it simple to fill your tank without spilling a drop.

JM53282

UNIVERSAL MOTOR FLUSHER

The Jarvis Marine Universal motor flusher is used to flush out the cooling system of your motor and can also be used to test run your motor before heading for the water.

JM53300

UNIVERSAL LARGE MOTOR FLUSHER

The first thing anyone should do after spending a day on the water is flush the engine to get rid of salt and other impurities. The flusher allows the cooling system to be flushed out using a garden hose.

JM53302

DELUXE 2 WAY FLUSHER

For a more thorough flush the Jarvis Marine Deluxe 2 Way Flusher has a dual flow design that allows the system to be flushed out using a garden hose from both intakes.

JM53304

FUEL / WATER SEPARATING FILTER

Today's ethanol-blended fuels increase the chances of water in fuel tanks resulting in premature wear, poor performance and component damage. The Jarvis Marine Filter is a fuel-water separating filter with 10-micron filtration technology and a 90GPH cartridge.

JM53085

ANCHORS & ACCESSORIES

25LB ELECTRIC ANCHOR WINCH

The TRAC Fisherman Anchor winch offers simple, smooth operation while providing excellent holding power. The winch features a high-efficiency 12V DC motor that uses minimal battery power. The retrieval speed is 65-feet per minute. The Fisherman Anchor Winch is powered for both up and down operation and is fitted with an anti-reverse clutch to prevent free-spooling.

The metal parts are protected with breakthrough Dacromet® anticorrosion coatings—a four-level technology that fights corrosion with barrier protections, galvanic action, passivation and a unique self-repairing action that fills damaged areas with zinc oxides and carbonates.

All assembly hardware and instructions are included with the winch, plus 100ft of pre-wound anchor rope, roller davit, automatic resetting circuit breaker, three-position switch and heavy gauge battery wire.

T10108

ANCHOR WINCH REMOTE CONTROL FOB

This handy, compact, key fob control with push button anchor operation gives you control of the Trac Anchor Winch from anywhere on the boat.

T10116

ANCHOR SWITCH KIT

This kit contains pre-made cables a three-position switch and bezel—everything you need to install an auxiliary control switch in the location of your choice.

T10115

ANCHORS & ACCESSORIES

DANFORTH ANCHORS

The Jarvis Marine Fluke or Danforth anchor is available in 8, 10, or 16 pounds. This fully galvanized traditional anchor offers proven holding power and is designed to penetrate sand, mud or grassy bottoms. Arc welded, the oversize flukes pivot downward into the bottom to set fast, stow away flat.

SLIP RING ANCHORS

The fully galvanized Jarvis Marine Slip Ring anchor can be used as an alternative to a Reef Anchor especially when conditions are extremely heavy. The advantage is when you want to up anchor it is possible to change direction of pull and so slide the anchor flukes out from under any rock or reef it may have jammed into. The Slip Ring anchor is available in 4lb, 5lb, and 6lb.

GRAPPLING ANCHORS

The Jarvis Marine Grappling Folding anchor is available in 5lb and 7lb and is ideal for small boats or inflatable boats. This anchor is easy to fold out and unfold and stow away.

ANCHOR CHAINS

Hot dipped galvanized anchor chains are available in 1/4" x 4' and 5/16" x 6'. The 1/4" chain has a safe working load of 1300lbs while the 5/16" chain has a safe working load of 1700lbs.

SHACKLES

Jarvis Marine Shackles are available in a wide range in both hot dipped galvanized and 316 stainless steel. Galvanized Anchor Shackle Sizes: 1/4", 5/16", 3/8" and 7/16" 316 Marine Grade Stainless Steel Anchor Shackle Size: 5/16" 316 Marine Grade Stainless Steel Straight D Shackle Sizes: 5/16", 3/8"

8MM JM53499
10MM JM52705
12MM JM52706

SILVERLINE ANCHOR ROPE

Jarvis Marine Silverline anchor rope is available in 42 metre lengths in 8, 10 and 12mm diameters. Super strong, this non-slip rope makes pulling up the anchor or tying up the boat easier on your hands. Silver rope is the most commonly used anchor rope and will not absorb water. All ropes are spliced at one end with a galvanized thimble.

TRAILER ACCESSORIES

ELECTRIC DAY RUNNER TRAILER WINCH

Gone are the days of retrieving your boat by hand! With a TRAC electric trailer winch just press the remote control button and watch your boat glide onto the trailer. The winch has a built-in light for user-friendly operation in low or no light, plus a smooth running heat-treated gear systems to help reduce wear and tear.

The metal parts are protected with breakthrough Dacromet® anticorrosion coatings—a four-level technology that fights corrosion with barrier protections, galvanic action, passivation and a unique self-repairing action that fills damaged areas with zinc oxides and carbonates.

The Day Runner winch is equipped with 30ft wire cable with a heavy-duty hook, a remote handle with a 10ft cable and a wireless remote fob. The Day Runner winch handles rolling boat weights up to 7000lb.

T10124

ELECTRIC LITE CRUISER TRAILER WINCH

The Lite Cruiser winch is suitable for larger craft and contains all the same features as the TRAC Day Runner winch, such as a built-in light for user-friendly operation in low or no light, plus a smooth running heat-treated gear systems to help reduce wear and tear. Mounting the winch is very easy: simply mount in place of your existing winch, plug in the remote cable and attach the battery cable to your power source.

The Lite Cruiser winch has a 20ft winch strap with a heavy-duty hook, a remote handle with a 10ft cable and a wireless remote fob. It handles rolling boat weights up to 9000lb.

The metal parts are protected with breakthrough Dacromet® anticorrosion coatings—a four-level technology that fights corrosion with barrier protections, galvanic action, passivation and a unique self-repairing action that fills damaged areas with zinc oxides and carbonates.

T10129

600LB TRAILER WINCH

The Jarvis Marine 600lb Trailer Winch is fully galvanized for corrosion protection and is fitted with a roller grip handle. Built with solid gear construction and a gear ratio of 3:1.

JM59230

1200LB TRAILER WINCH

The Jarvis Marine 1200lb Trailer Winch is fully galvanized and has an electrostatic coating that resists rust. Also features a two-way ratchet and is supplied with a 20' winch strap with heavy duty hook. Built with solid gear construction and a gear ratio of 4:1.

JM59236

1600LB DUAL DRIVE WINCH

The Jarvis Marine 1600lb Dual Drive Winch is a heavy duty galvanized winch with one-piece solid steel gears and gear pawl. The use of two gears allows for even load distribution eliminating frame torque. The roller handle allows for easy operation and this model is supplied with a 20' winch strap and a 316 grade stainless steel hook. The Dual Drive winch is built with solid gear construction and a gear ratio of 4:1.

JM59936

WINCH STRAP

Invariably winch straps will need replacing at some stage. The Jarvis Marine Winch Strap is made from wide polyester webbing that is 20' long and has a heavy duty galvanised hook attached.

JM59818

WINCH CABLE

Jarvis Marine Winch Cable is a galvanised aircraft grade cable that is 20' long and has a tensile strength of 4000lbs.

JM59281

COUPLER LOCK

For safety and peace of mind attach a Jarvis Marine Coupler Lock to your trailer. While the lock is in place the trailer cannot be used. Made of solid brass with stainless steel shackle pin and two keys are provided.

JM59402

TRAC

1000LB JACK T10140

1500LB JACK T10143

ELECTRIC TRAILER JACKS

This jack allows you to raise or lower the trailer coupler with the simple press of a button. It's easily installed with U-bolts onto the frame of the trailer and includes a 12-volt power cord that connects directly into your vehicle's trailer light plug. No vehicle wiring is necessary. The Power Jack has a high impact all-terrain wheel and a manual crank arm is supplied in the event power is not available.

The metal parts are protected with breakthrough Dacromet® anticorrosion coatings—a four-level technology that fights corrosion with barrier protections, galvanic action, passivation and a unique self-repairing action that fills damaged areas with zinc oxides and carbonates.

The TRAC Power Jack is available in two capacities: 1000lb and 1500lb

Jarvis Marine

TRAILER JACK

The Jarvis Marine Trailer Jack is EDC coated inside and out. The Jack features a spoked wheel, a power grip contoured handle, and an innovative built in grease fitting to keep gears and shaft well lubricated and a swivel swing-away design to keep the jack out of the way when trailering. Supplied with galvanised hardware for easy installation. Don't get caught out buying cheap trailer jacks, insist on a quality Jarvis Marine trailer jack.

JM59214

TRAILER JACK WHEEL STOPPER

The Jarvis Marine Trailer Jack Wheel Stopper is a great idea that will keep your trailer from moving around or putting scratches and dents in drive-ways.

JM59202

TRAILER BALL

The Jarvis Marine Trailer Ball is a chrome plated heavy duty, 50mm diameter steel ball supplied with washer and heavy duty nut that will outlast the life of your trailer and your car.

JM59001

TRAILER ACCESSORIES

TRAILER SAFETY CHAINS

Jarvis Marine Trailer Safety Chains are zinc plated welded linked chains. They will keep your trailer attached if your hitch fails. The Class I chain is 1 chain with quick link on each end and has a 2000lb rating. The Class 3 chain is two chains with quick links on each chain.

LICENSE HOLDER

The Jarvis Marine License Holder is made from durable plastic and will fit onto your trailer easily.

JM59102

TRANSMOM TIE DOWN STRAPS

Jarvis Marine Transom Tie Down Straps will secure the transom of the boat to the trailer. Sold in pairs, the straps are 2" wide, 4' in length and are fitted with vinyl coated 'S' hooks.

JM59810

HUB GREASE CAPS

Take the worry out of submerging your trailer wheel hubs during launching and loading with Jarvis Marine Hub Caps. Supplied with 2 hub caps and rubber plugs.

JM59060

BEARING PROTECTORS

Jarvis Marine Bearing Protectors will enhance the life of your trailer by providing permanent protection against damage from water and dirt entering the wheel bearings.

JM59031

CAM TIE DOWN STRAPS

For smaller boats and for greater adjustment the Jarvis Marine Cam Style Tie Down Straps will work great. These straps are 1" wide, 6' in length and sold in pairs.

JM59812

BEARING KITS

Don't get caught travelling with a hot, crumbling bearing. It pays to have a spare bearing kit with you whenever you travel and Jarvis Marine Bearing kits are available to suit both Ford and Holden. Kits include inner and outer bearings, stainless grease seal, dust cap and split pin.

TRANSMOM SUPPORT BRACKET

Take the strain off your motor when towing with the Jarvis Marine Adjustable Transom Support Bracket. The bracket hooks on to the trailer and then extends out to the desired length to suit the motor in the tilt position. Supporting the leg in this way eliminates the flex of a bouncing trailer that transfers through to the main engine support bracket, so there is no strain on the engine bracket.

JM59118

POLYMER TRAILER ROLLERS

The more discerning boater will appreciate the quality of the Jarvis Marine Polymer Rollers and Stoppers. These rollers are made from a durable moulded polymer blend and are non marking. Jarvis Marine Poly Rollers are resilient, shock-absorbing, roll easily when launching or retrieving your boat and will not be affected by oil, fuel or salt. The 3 Piece Super Bow Roller Kit includes two poly end bells, a poly bow roller and also provided is a ½" shaft. Also available in the Poly series are: Bow Stops, Bow Rollers, Spool Rollers and Wobbler Rollers.

RUBBER TRAILER ROLLERS

Nothing lasts forever and trailer rollers and bow stop rubbers often need replacing. Jarvis Marine Rubber Rollers and Stoppers are manufactured from the best quality rubber. Available in the Rubber series are: Bow Stops, Bow Rollers, Spool Rollers, Keel Rollers.

MARINE HARDWARE

CANVAS FASTENER KIT

A handy canvas snap repair kit for repairing bimini or any canvas covers, boat covers, sail covers or any heavy duty fabric. The kit includes an assortment of caps, studs, sockets and eyelets.

JM59410

81PC STAINLESS STEEL MACHINED SCREWS

The Jarvis Marine Machined Screw Kit is a convenient assorted mix of machined screws, washers and hex nuts that are ideal for marine purposes. The Jarvis Marine 81 pc Machine Screw kit contains 27 screws, 27 washers and 27 hex nuts all made from 316 stainless steel. Each kit holds a selection of screw sizes in lengths for most applications you are likely to encounter.

JM54402

68PC STAINLESS STEEL PAN HEAD SCREWS JM54404

The Jarvis Marine Pan Head Screw Kit is a convenient assorted mix of pan style Phillips head screws that are ideal for marine purposes. The kit contains various size screws and a total of 68 pieces.

JM54404

68PC STAINLESS STEEL SELF-TAPPING SCREWS JM54406

The Jarvis Marine Self-Tapping Screw Kit is a convenient assorted mix of oval counter sunk style Phillips head screws that are ideal for marine purposes. The kit contains various size screws and a total of 68 pieces.

JM54406

560PC STAINLESS STEEL SELF-TAPPING SCREW KIT

This kit contains a huge selection of 316 marine grade stainless steel self-tapping screws supplied in a handy carrying case. The Jarvis Marine 560pc kit includes a selection of both Phillips pan head and Phillips oval head screws. With this kit you'll have the right screw for your next project at your fingertips.

JM54410

328PC STAINLESS STEEL HARDWARE ASSORTMENT

Anyone who has owned a boat knows the value of having a few stainless steel screws on hand. Alternatively, you might be fitting some new device on your boat, and marine grade 316 stainless steel hardware is the only way to go. The Jarvis Marine 328 Piece Kit contains a variety of screw types and also includes washers and hex nuts. This kit is supplied in a convenient storage container.

JM54408

1120PC STAINLESS STEEL GIGANTIC HARDWARE ASSORTMENT

For the boatie who is always working on his craft the Jarvis Marine 1120 Piece Kit is a gigantic assortment of stainless steel screws, nuts, bolts and washers to ensure you always have the right hardware for any project. With this kit you'll always find the right screw, bolt, washer or nut when you need it.

JM54412

STAINLESS STEEL CLEATS

Many boaties prefer the look and quality of highly polished stainless steel cleats for their pride and joy. Jarvis Marine Stainless Steel Cleats are heavy duty and will remain looking good through the harshest marine environment.

6" JM54002 8" JM54004

ZAMAK CLEATS

Jarvis Marine Zamak Cleats are triple chrome plated for additional protection.

FISH FINDERS

Condor F-238 – 200kHz Fish Finder

This new fish finder raises the bar in terms of its quality-to-price ratio for a compact fish finder. With its fast processor and high-sensitivity receiver, this unit boasts performance that has been previously available only with much higher priced units.

42280

Specifications:

- Frequency: 200kHz
- Output Power: 1200W
- Operating voltage: 12v
- Coverage angle: 20 degrees @ -3dB
- High resolution 240 x 128 pixel with 4 levels of gray
- Features shallow water, fish and low battery alarms
- Adjustable chart speed
- Single plug connector for fast installation and removal
- Menus in 4 selectable languages
- Dual function Shadeline bottom display provides information on the nature of the water bottom

Condor F-247 – 50/200kHz Dual Frequency Fish Finder

The Condor F-247 has set new standards in fish finding performance. With its powerful dual-frequency 50/200kHz electronics and in combination with the high-sensitivity receiver this unit provides depth performance never before seen in such an affordable fish finder.

42279

Specifications:

- Frequency: 50/200kHz
- Output Power: 1200W
- Operating voltage: 12v
- Coverage angle: 20 degrees @ -3dB
- High resolution 240 x 160 pixel with 16 levels of gray
- Features shallow water, fish and low battery alarms
- Adjustable chart speed
- Single plug connector for fast installation and removal
- Menus in 16 selectable languages
- Dual function Shadeline bottom display provides information on the nature of the water bottom
- Saltwater/Freshwater selection function which automatically sets all parameters to appropriate water type

FEATURES

Condor Auto-Range

The advanced auto-range function of the Condor fish finder frees fishermen of the need to worry about range adjustment. With a Condor fish finder you can focus entirely on fishing. All suspended targets especially fish, are automatically displayed by the units sophisticated identification software, and appear on the screen as fish icons, with a digital readout of their depth. The high-tech, very sensitive receiver, with its advanced automatic gain-control system, offers exceptionally good depth performance.

Condor Software

The software in the Condor fish finder has a four-tab menu and is easy to use in keeping with our attempts to provide anglers with user-friendly equipment. Each of the four on screen windows clearly displays the appropriate settings and adjustments can be made with the arrow keys and can be monitored on a horizontal graphic bar. Therefore, the innovative nature of the control system of the Condor is further enhanced by setting standards never before attained in this class of fish finder.

Condor Memory Settings

Adjustments and settings are permanently stored in the unit's memory, even when the unit is turned off. Whenever you turn the unit back on, you will find the settings from the last session.

Condor Housing and Mounting Bracket

The compact housing of the Condor fish finder easily fits to any dash board. The flexible mounting bracket allows the unit to be tilted or swiveled in any direction while its single jack makes it possible to install and remove the unit quickly and conveniently.

Condor Screens

The F-238 has a large 4.3" supertwist LCD screen while the F-247 model has a larger 4.5" screen. The Condor screens provide visibility at any angle and in all lighting conditions, even when wearing polarized lens sunglasses. The cold cathode high-intensity backlighting is fully dimmable, for ideal ease of night time viewing.

CONDOR F-238
TRANSDUCER

CONDOR F-247 DF
TRANSDUCER

Condor Transducer

The transom mount transducer included with the package, features a special hydro-dynamic profile and works perfectly even at high speeds. The built in temp-sensor makes it possible to continuously monitor a water surface temperature read-out on the screen.

BOSS® marine AUDIO SYSTEMS

It's always important when purchasing anything that you select a product that will be best suited for its intended use. In the case of purchasing a stereo for your boat it is extremely important that you select a marine audio system. Audio equipment in your car as an example lives inside a waterproof, climate controlled box. Your boat punishes audio components with spray, moisture, salt and UV radiation. If you installed an automotive-grade audio system on your boat the marine environment will kill it in a few months or at best a single season. Therefore buying cheap car audio systems is a huge mistake. All Boss Marine Audio systems are MARINIZED and will last and endure all harsh saltwater environments.

Marine stereos also need to be heard over wind, engines, waves, bilge pumps and other noises and are

often pouring sound into an open boat area instead of a confined space such as a car. With this in mind Boss have designed their receivers to have plenty of power and feature either 60W or 80W per channel.

Boss Marine offers a wide range of products including receivers that feature AM/FM radio, CD, MP3, DVD, and iPod docking stations. Also included in this very comprehensive range are speakers, subwoofers, amplifiers and even a public address system.

If you want to enjoy your favorite music out on the water then look no further. Boss Marine audio systems are made of the highest quality and due to their high power output of either 60W or 80W x 4 channels they pump plenty of power through to the speakers that produces a crisp, clear sound.

MR2080W Receiver

This is a real serious unit from Boss. Get maximum playback versatility with the enhanced functionality of this high powered receiver. The Boss MR2080W MP3 will also read CD's in any format (CD-R or CD-RW) plus it is compatible with audio output of iPod. The output power of this receiver is 80W x 4 channels and a wired remote control unit is supplied.

MR3.6V Receiver

Boss has packed all the features into this receiver. With a 3.6" widescreen TFT monitor this receiver is WMA/MP4/MP3/DVD/SVCD/VCD/CDR/CDRW & SDVD compatible!! Also features USB & SD memory card ports, front panel auxiliary input, 24 station preset and a remote control. Output power is 80W x 4 channels.

MR1620W Receiver

A high quality AM/FM/MP3/CD receiver that is CD-R and CDRW compatible and features a full detachable front panel, illuminated control buttons, 30 station preset, separate bass and treble, and supplied with a wired remote control unit. The output power is 60W x 4 channels.

MR1600W Receiver

The Boss MR1600W CD and AM/FM receiver features a full detachable front panel, illuminated control buttons, 30 station preset, separate bass and treble, and supplied with a wired remote control unit. The output power is 60W x 4 channels.

MR1560DI Receiver with Wireless Remote

Bring the latest technology to your boats audio system. This unit is a fully functional on-board sound system packed full of features. Combining an iPod docking station with iPod connector, MP3 compatibility and an AM/FM tuner this receiver offers a wide range of listening options. Also features USB and SD memory ports, front panel auxiliary input, PLL synthesized tuner with 30 station presets and wireless remote control. Output power is 80W x 4 channels.

MR1525UI Receiver with Wireless Remote

The Boss MR1525UI unit features full iPod control. The unit has an in-dash CD receiver and is MP3/CD-R & CDRW compatible. The AM/FM tuner has 24 station presets. The MR1525UI also features USB and SD memory ports, front panel auxiliary input and a wireless remote control is supplied. Output power is 80W x 4 channels.

MR1520UA Receiver with Wireless Remote

The Boss MR1520UA unit has an in-dash CD receiver and is MP3/CD-R & CDRW compatible. The AM/FM tuner has 24 station presets. The MR1520UA also features USB and SD memory ports, front panel auxiliary input and a wireless remote control is supplied. Output power is 80W x 4 channels.

BOSS[®] marine AUDIO SYSTEMS

MR1420W Receiver

A versatile MP3/CD/AM FM receiver from Boss Marine that produces excellent sound. Features a full detachable front panel, front panel auxiliary input, PLL synthesized tuner with 24 station presets and fully marinated to ensure long lasting performance. Output power is 60W x 4 channels.

MR1400W Receiver

The MR1400W model is a CD/AM/FM receiver from Boss Marine at an affordable price. Features a full detachable front panel, front panel auxiliary input, PLL synthesized tuner with 24 station presets and fully marinated to ensure long lasting performance.

SUBWOOFERS

Add deep, rich bass to your on-board sound system with a Boss Subwoofer. These subwoofers have heaps of power and everyone in your wake will feel the thump.

BOSS® marine AMPLIFIERS

Arm your on-board sound system with a Boss Marine amplifier for a pulse-pounding sound explosion on the water. All Boss amplifiers have a unique rubber door attached which tightly seals all control panel openings when not in use. In-line weatherproof connectors are used for all input and output connections. These are run through grommets openings in end panels. A remote subwoofer level control is supplied with all amplifiers and these units have plenty of power and can be bridged.

MR800	Marine Amplifier 2 channel 400W X 2
MR1000	Marine Amplifier 4 channel 250W x 4
MR 1200PA	Marine Amplifier 4 channel 300W x 4 with public address system and microphone.

Public Address System Controller

The Boss MR20PA public address system is a versatile unit that can be used as a front end for any marine or car audio amplifier, turning it into a fully-featured public address system. Supplied with the unit is remote subwoofer level control and microphone.

MR20PA Marine Public Address System

ACCESSORIES

Dipole Antenna

The Boss dipole antenna helps achieve better reception without spending a bundle on a longer permanent AM/FM antenna.

MRANT10 Dipole Antenna

Rubber Antenna

An adjustable base antenna that is flexible so that it can take the bumps and whacks on board the boat.

MRANT12 Rubber Antenna

Universal Radio Cover & Housing

These two accessory items will enhance the life of your receiver. The radio cover is designed to shrug off any splashes and spray and has a flip up front. The radio housing unit acts as a capsule for complete protection and is fitted with a flip up door.

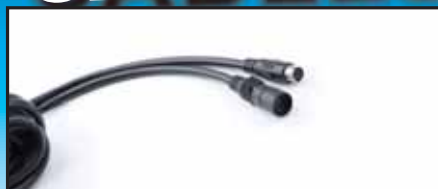

MRC5 Radio Cover
MRH7 Radio Housing

BOSS[®] marine CABLES

If you require additional cabling Boss Marine has 25' extension cable and an iPod integration cable.

MEGAWARE KEELGUARD®

Never scratch your boat again! The patented easy to apply keel protector from KeelGuard provides a permanent buffer between rocks, sandy shorelines, concrete ramps and your boat's valuable finish, keeping contaminants from grinding away at your hull. Constant wear and damage to your boat's keel can break down its protective finish which allows water to reach and destroy the fibreglass laminates. KeelGuard is made from abrasive-resistant blends of polymers and urethanes which achieve optimal durability and pliability. A pressure-sensitive adhesive from 3M creates strength, while permanently bonding and sealing KeelGuard's contoured edges to the hull surface. KeelGuard is the only safe, sure way to prevent damage when beaching your boat-and KeelGuard's tests have shown this product can actually improve performance and handling characteristics, especially with smaller craft.

MEGAWARE SCUFFBUSTER™

The Scuffbuster from KeelGuard protects the bow of your boat from scratches, abrasions, rubbing lines, clamps and will also minimize roller and trailer scuffs. Scuffbuster will bend to conform to the shape of the hull and attaches to your boat's surface with 3M pressure-sensitive adhesive.

Freedom Hawk Kayaks are designed by avid fishermen and outdoor enthusiasts who have incorporated unprecedented innovation. Its patented easy-to-deploy outrigger system and related features provide a solid sporting platform that makes it the only kayak to truly let you "Stand and Fish" with 100 percent confidence. Don't settle for clumsy add-on outriggers. Get the real deal: a kayak that's designed from the waterline up to incorporate a stabilisation system that's easy to deploy. With a Freedom Hawk kayak you can stalk fish with less drag and water movement, or gain additional paddling stability in more challenging paddling conditions.

12 KAYAK

The Freedom 12 represents the next generation of Freedom Hawk Kayaks, taking Stand-Up Kayak Fishing to a new level. This ultimate fishing machine features a patented inline outrigger system, giving anglers a choice of three outrigger positions. It paddles like a conventional kayak when in the first position. Position two offers additional stability when fishing or rigging a rod. The third position fully extends the outriggers into their patented 'inline position' for maximum efficiency when paddling, fishing, polling, or motoring (with the optional motor mount). Now you can stalk fish with less drag and water movement, or gain additional paddling stability in more challenging paddling conditions.

The Freedom 12 also features a new lightweight hull, featuring a break down carrying weight of just over 50 pounds (23kg).

AVAILABLE IN THREE COLOURS

SAND
FH2110

YELLOW
FH2100

Two Flush Mount Rod Holders

Each Freedom 12 comes standard with two Flush Mount Rod Holders, allowing you to effortlessly paddle or stand with your favorite poles in close proximity.

Reinforced Floor

Freedom Hawk is the only fishing kayak that features a reinforced floor suitable for the extra stresses of stand-up fishing.

Watertight Storage

The Freedom 12 provides two watertight storage compartments for storing essential gear that you need to remain dry and out of the way while you are working the water.

Freedom 14 Kayaks are designed by avid fishermen and outdoors enthusiasts who have incorporated unprecedented innovation into kayak design. Its patented easy-to-deploy outrigger system and related features provide a solid sporting platform that really works. Imagine switching from kayak efficiency and simplicity to Jon Boat stability with the flick of a lever. The Freedom Hawk is the only kayak to truly let you 'Stand and Fish' with 100% confidence. Switch from cruising to fishing in seconds. Don't settle for clumsy add-on outriggers. Get the real deal: a kayak that's designed from the waterline up to incorporate a stabilisation system that's easy to deploy.

Freedom 14 Kayaks excel as small watercraft for fishing, duck hunting, scuba diving, snorkelling, swimming, exploring and wildlife photography.

Adjustable Foot Rests

Provides proper fit and performance, keeping things comfortable by tailoring the boat to anyone at the controls.

On-Board Storage

The Freedom 14 offers ample On-board Storage, including a watertight storage compartment. The hull has a recess for storing the 12' push pole and is ideal for a scuba tank, snorkel gear or fishing box.

Flush Mount Rod Holders

Each Freedom 14 comes standard with two flush mount rod holders, allowing you to effortlessly paddle or stand with your favorite poles in close proximity.

High-back Seat

The adjustable High Back Seat provides comfort and performance for hours on end.

ACCESSORIES

Rail-mount rod holder

This rugged attractive rod holder can be used on vertical or horizontal rails and works perfect on the casting brace of the Freedom Hawk 14. It attaches in seconds and adjusts to multiple positions. It's designed for fly rods (not included) and also works great with most spin and casting rods.

Fly Rod Adaptor

This patented fly rod holder fits snugging into rocket launcher style rod holders found standard on most fishing kayaks. It will accept both butted and un-butted fly rods, fresh or salt, 2-12 weight.

Motor Mount (12 Kayak)

This transom-style motor mount adaptor allows anglers to modify their kayak into a motorised fishing vessel. It's made of saltwater-corrosion-proof materials and can be added in minutes to the Freedom 12 kayak. Maximum thrust recommended is 30-44lb. The Watersnake ETW34/26 is an ideal motor for this craft.

Deluxe High Seatback

This Deluxe High Seatback is four-inches taller than our standard seat. It's for paddlers seeking maximum comfort for a full day on the water. It's one of the best upgrades available.

Anchor Boom

The Anchor Boom allows for super convenient anchor deployment from the seated position with the flip of a lever.

Basic Paddle

This 2.3m two-piece take down economical paddle features lightweight fiberglass-filled synthetic blades and a durable aluminum shaft.

Deluxe Paddle

This 2.3m two-piece paddle features lightweight fibreglass-filled synthetic blades and an ergonomic fibreglass shaft. It's a step above the basic paddle and provides a feel that is perfect for longer outings.

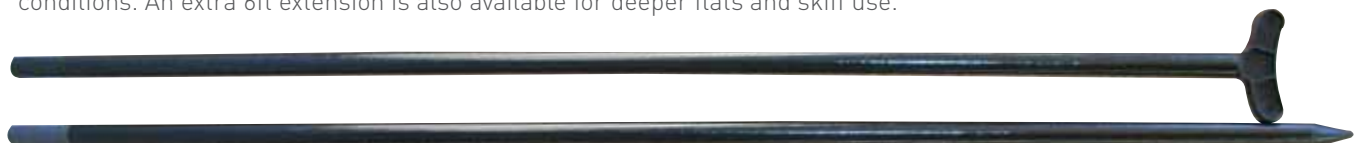

Basic Push Pole

Navigate the shallows easily with this high-quality 12ft two-piece aluminium push pole. It has a custom foot on one end and a blunt cap on the other to work in all bottom conditions. The stainless steel push-button mechanism collapses easily and resists salt water corrosion.

Deluxe Push Pole

The Deluxe Push Pole combines the durability and strength of composite materials and is a must for discerning flats fishermen. The 12ft two-piece configuration is convenient and other features include durable ferrules, a pointy stake end and custom wide foot to work in all conditions. An extra 6ft extension is also available for deeper flats and skiff use.

BOATING RANGE

The quality, toughness and exceptional value for money of our Aristocraft line up is obvious at a glance. Boasting large diameter tubes, quality fittings and workmanship, Aristocraft inflatable boats have proven to be very dry, stable and reliable craft.

Though advanced innovative technology Aristocraft inflatable boats have set our boats apart from the opposition. Many Australians are now Aristocraft owners and extolling the virtues of our Aristocraft inflatable boats. There is no finer way to have fun in the outdoors than with an Aristocraft inflatable. Whether you are rowing the trout streams or shooting wild rivers or in the surf, or perhaps doing a days diving, Aristocraft have a boat to suit.

BUILT TO LAST
Aristocraft boats are
made of only the
finest materials.

LITTLE BUDDY

The first choice for many yachties is the Little Buddy. Compact, light weight and packs away in seconds the Little Buddy is an excellent choice when one needs a compact boat for ship to shore work or when space is at a premium. Very easy and responsive to row, featuring 2+1 safety chambers to assist buoyancy and stability. The Little Buddy features our Easyride air-mat floor that is cleverly designed with thousands of polyester threads criss-crossing one another. The Easyride floor when inflated to a high pressure proves to be as tough and rigid as a conventional wooden floor, while still offering a fast pack down when needed. The Easyride floor acts as the third safety chamber and reduces the weight while offering a very comfortable ride.

Available in three popular sizes, the 2m boat shown above is only 20KG and is very easy to handle. It sports a sturdy comfortable inflatable thwart seat. Sturdy wooden thwart seats are found on the 2.35m and 2.65m.

Models:

CASTAWAY

Castaway tenders have inflatable keels—for improved performance and handling—and heavy-duty transoms. All Castaway sizes have 3+1 independent internal safety chambers to ensure that if something drastic happens to one chamber, the boat will maintain its buoyancy and stability. There are separate chambers in the bow and both the port and starboard sides. The alloy and wood flooring system is full-length and removable, ensuring Aristocraft boats are secure under foot and can take the knocks.

The Castaway design is easy to row and each boat comes with two-piece alloy oars attached to swivelling oarlocks. Just snap the rear section of the oar out of the oar-clasp and the oarlock will pivot out for instant use. The oars can be removed quickly from the oar-clasp when you want roll up the boats for easy storage or transport.

Features:

- Reinforced Stern Cones
- Heavy Duty Aluminium Floor and Frame
- 3 + 1 Independent Airtight Safety Chambers
- Inflatable Keel
- Heavy Duty Foot Pump
- Repair Kit

BAYRUNNER

Bayrunner Sports Boats offer years of pleasure and excitement for the family. The inflatable keels deliver performance speed and handling. The hulls are quick under power and responsive, with an ability to turn, track and manoeuvre in most conditions.

Aristocraft offer seven popular sizes in this model, from the compact 2.3m two-person craft, up to a sleek 4.2m seven-person boat. All models have 3+1 independent internal safety chambers to ensure that if something drastic happens to one chamber, the boat will maintain its buoyancy and stability. Each Bayrunner comes standard with an aluminium floor that has exceptional resistance to all types of impact. The aluminium flooring is a favourite among divers and fans of high-performance boats. It can be removed quickly and easily for maintenance and cleaning and it remains cool even under direct sunlight.

Features:

- Reinforced Stern Cones
- Heavy Duty Aluminium Floor and Frame
- 3 + 1 Independent Airtight Safety Chambers
- Inflatable Keel
- Heavy Duty Foot Pump
- Repair Kit

AIR-O-GLASS

Fibreglass Deep-V

The Air-O-Glass rigid tender provides the best of both boating worlds and has proven to be a standout in a competitive market. Large generous tubes are bonded to a rugged fibreglass hull. The advanced hull design makes these nifty tenders a dream to operate. Lifting strakes are moulded into the fibreglass hull to provide extra lift with minimal power. This added lift enables the boat to plane faster and save fuel. Consumer feedback has been excellent and many satisfied customers comment on the superior smooth ride, the large tubes and dry ride.

Air-O-Glass tenders have three independent internal safety chambers that are totally separate to ensure buoyancy and stability in the event of a single chamber failure. The deep-V internal nature of the Air-O-Glass tender makes this RIB one of the driest and smoothest riding boats on the market.

Features:

- GRP Rigid Hull With Built In Lifting Strakes
- HD Transom With Self Bailer Valve
- 3 Cold Welded Oversize Tubes
- Stainless Steel Tow Point
- Heavy Duty Foot Pump
- Repair Kit

AIR-O-GLASS CLASSIC

Fibreglass Flat Floor

The Air-O-Glass HSP rigid inflatable boats (RIB) feature a heavy-duty dual-skin flat floor made from beautifully crafted fibreglass. The hull demonstrates a new improved design that planes faster and also keeps you dry! Our heavy-duty PVC tubes are hand bonded to this new hull design using a clever anti-rub system. The new Endurance range of RIBs come in a range of models from 2.2m to 3.3m, the latter being available with an optional jockey console which can be rigged anyway you like. All models come with multiple lifting and towing points and a boat cover.

Features:

- GRP Rigid Hull With Flat Floor
- HD Transom
- 3 Oversize Tubes
- Stainless Steel Fittings
- Port and Starboard D-Rings
- Full length rub rails
- Grab Lines
- Lock Down Oar Clamps
- Heavy Duty Foot Pump
- Repair Kit

VENUS SERIES

The flagship from Aristocraft Leisure is the H-Venus Deluxe rigid inflatable, its proven hull design is a standout boasting a very sharp entry point designed to slice through choppy conditions. Finished in sparkling white gell cote this series of rigid inflatable will suit the most fastidious buyer. Only the highest quality fittings many from France and Italy have been selected to produce the H-Venus and every attention to detail has been taken care of. The H-Venus is constructed using the French brand of ORCA Hypalon chosen for its dependability and longevity and hand glue using the finest glue available today. With a very long list of features as standard, you will go a long way to find better value boat.

Features:

- Heavy duty fibreglass Deep-V hull
- ORCA Hypalon tubes
- Steering console
- Cable steering
- Italian sport steering wheel
- Fuel sender and gauge
- Battery box
- Isolator switch
- Navigation lights
- All round white light
- Switch panel
- Bilge pump with float switch

A GREAT ALL ROUNDER

KAYAKS

The K-Series kayak is constructed using the very same heavy duty PVC as our popular inflatable boat range. Unique to the K-Series kayak is the built in Air-mat floor providing a light weight rigid platform. Boasting large tube design, rear water resistant storage area; carry handles, front stretch cord storage, paddle, carry bag, repair kit and heavy duty foot pump. Aristocraft Leisure offers a kayak that is light in weight, easy to handle and do not require a roof rack.

BIG BOY FENDERS

With the ever growing popularity of our Aristocraft Big Boy fenders we had no option but to expand the range. So this year we see a total of 4 Big Boy fenders in the range and one Wedge Fender. Made from 1.2mm PVC material with a recessed valve and fitted with D-rings top and bottom, also fitted to the top D-Ring is a tie off rope. The one constant theme with all our fenders is the ability to deflate and pack away when not required, the bane of every boat owner where do you store the fenders? No longer is it a problem, simply deflate roll up and store in cupboards and bulkheads. Aristocraft Big Boy fenders can be used in two popular ways; they can be hung vertically when mooring up against other craft or floating jetties. Create the perfect barrier between your boat and Gel chipping aluminium.
