Personal Listening Devices

Comfort Duett with Earphones
Model : HPU6035
<i>Comfort Audio</i>
Comfort Duett is a small, multi purpose personal listener. The Comfort Duett is the ideal tool for people with a mild hearing loss.
A built-in coil enables the user to listen to the sound from an induction loop, if there is one in the room. It can also amplify the sound from the TV/radio/hi-fi or telephone.
The Comfort Duett comes with either a neck loop OR headphones or earphones, depending the users preference and whether he/she wears hearing aids.
The Duett can be used with a telephone amplification kit and a TV amplification kit.
There is no need to replace the batteries the Comfort Duett comes with a charging unit. The charger unit can be connected to a TV/ radio/telephone to amplify sound.

Univox DLS 30 TV Loop Amplifier
Model : LAU1016
<i>Univox by Bo Edin</i>
<p>The UniVox DLS series of induction loop amplifiers have been designed for use in smaller locations.</p> <p>When you demand stability and reliability, the Univox DLS 30 TV will deliver, even in difficult environments. This loop amplifier has been designed specifically for LCD/plasma TV screens, which often have echo or delay problems when used in conjunction with an induction loop system.</p> <p>The system covers an area of 30m².</p> <p>The DLS 30 TV has a separate control, the TV Sync, with which the TV sound is synchronised correctly.</p> <p>With its built-in automatic scart control, it is easily connected to the scart output of your TV. The autoscart function is needed whenever you have one or more signal sources (digibov, VHS etc) connected to the TV. It secures the right sound in the loop.</p> <p>Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.</p> <p>This product comes with a 2 year warranty.</p> <p>If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. Conference Microphone DC-10
Model : MDU4005
<i>Comfort Audio</i>
<p>Conference Microphone DC-10</p> <p>The DC-10 is one of the main COMFORT DIGISYSTEM units. Despite its size and appearance, it is actually an advanced microphone, sound processor and transmitter. It captures the sound, cleans it up by removing all the racket and impulse noise, and the brings out speech which it transmits to your wireless receiver. The sound reaching the receiver is crystal clear.</p> <p>Unique Characteristics:</p> <p>SST Secure Stream Technology - digital sound transfer</p> <p>This unique digital sound transfer between the transmitter and the receiver eliminates all transmission noise. Moreover, the signals are encrypted, so no one can overhear what is being said. Unlike other conventional encrypted systems, SST is free from time lag and crystal clear.</p> <p>PSE (Perceptual Speech Enhancement) - digital sound processing</p> <p>The conference microphone DC-10 is equipped with a unique, high-power sound processing technique. The algorithms used to make this sound processing possible are the result of more than 20 years of research. Its main characteristic is the emphasis of the significant parts of speech, and at the same time, it suppresses noise, hiss and echoes.</p> <p>To find out more about this unit and how it works with the other units in the DigiSystem, please go to the PDF leaflet below. Alternatively, click on the link below to view the Comfort Audio Flash Presentation of the DigiSystem:</p> <p>DigiSystem Presentation</p> <p>Price excludes VAT. Please note that individual users may qualify for VAT exemption. Conference Microphone DC-20
Model : MDU4006
<i>Comfort Audio</i>
<p>Conference Microphone DC-20</p> <p>DC-20 is a conference microphone for both short and long distances. Placed in the middle of a conference table, for example, it captures the voices of people sitting around. The advanced digital sound processing technique filters the speech, removes disturbing background noises and transmits it to the wireless receiver - in crystal clear sound quality.</p> <p>The conference microphone DC-20 is even equipped with a receiver. Sound can be received from other DigiSystem microphones and sent on to one or more receivers. Due to this SST receiver, it is possible to listen to several sound sources at the same time.</p> <p>The DC-20 can be connected to mobile telephones via Bluetooth and to land line telephones via the original accessory Telelink. The conference microphone can also be used via remote control which will is available as an accessory.</p> <p>Unique Characteristics</p> <p>SST Secure Stream Technology - digital sound transfer</p> <p>This unique digital sound transfer between the transmitter and the receiver eliminates all transmission noise. Moreover, the signals are encrypted, so no one can overhear what is being said. Unlike other conventional encrypted systems, SST is free from time lag and crystal clear.</p> <p>PSE (Perceptual Speech Enhancement) - digital sound processing</p> <p>The conference microphone DC-20 is equipped with a unique, high-power sound processing technique. TEXT_PRODUCTS_PRICE£943.18

<p>Univox SLS 100 XF Loop Amplifier</p> <p>Model : LAU1211</p> <p><i>Univox by Bo Edin</i></p> <p>The Second Generation Induction Super Loop System with Hi-Fi Quality and 3-D Controlled Overspill.</p> <p>The SLS range are based upon tried and tested Univox induction loop amplifiers.</p> <p>The SLS 300 XF system covers an area of up to 170m².</p> <p>Professional induction loop system giving the hearing aid user convenience and clarity of sound.</p> <p>Suitable for new builds and retrofitting, in theatres, cinemas, conference halls and many other applications.</p> <p>Receivers are built in to most hearing aids, eliminating the need for users to wear additional receivers, unlike radio and infra-red systems. The hearing aid user just needs to switch to 'T'.</p> <p>The second generation of UniVox SLS series of amplifiers continues to build on two separate loop configurations, but they are now connected to one 19" rack mounted unit with matching power amplifiers.</p> <p>Lower distortion and an increased output voltage enhance the dynamics substantially, especially in the treble area (beyond 10kHz).</p> <p>Overspill is massively reduced. Reduced vertical and horizontal overspill allows installation of loops in adjoining rooms without interference.</p> <p>Can help to ensure privacy.</p> <p>No middle drop caused by interference from steel-reinforced concrete.</p> <p>Price excludes VAT.</p> <p>This product comes with a 2 year warranty.</p> <p>If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. Conference Folder
Model : HPU6010
<i>GN Transistor</i>
The Conference Folder makes it easier for people with impaired hearing to participate in meetings at work or at home.
The folder contains a built-in amplifier and two microphones which the user places on the table in front of them.
The microphones pick up speech from around the table and transmit sound to the amplifier.
Can be used with neck loop, mini loop or earphones.
Price excludes VAT
This product comes with a 1 year warranty.
You may experience problems opening the PDF leaflet if you have Internet Explorer version 6 or below. To resolve this please use the free download of Internet Explorer version 7 from www.microsoft.com . Alternatively you can click SAVE and then open.

Induction Loop Systems -/- Loop System Testing Equipment

Field Strength Meter
Model : ALL5002
<i>Univox by Bo Edin</i>
Field Strength Meter The Field Strength Meter is an Induction Loop Tester. It shows the performance of a loop installation to check if it complies with international standards. The system has a full range of test tracks to check the performance of the loop. The system delivers 2 second spot frequencies from 70Hz up to 10kHz to allow determination and correction of the frequency response of the loop system. Contains both male and female artificial standardised speech to allow accurate evaluation of the loop performance as experienced by the end user. Price excludes VAT. If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. Email info@gordonmorris.co.uk and inform us when you have set up your account. We will change your status to TRADE at our end. You may experience problems opening the PDF leaflet if you have Internet Explorer version 6 or below. UniVox Listener
Model : ALL5001
<i>Univox by Bo Edin</i>
<p>The UniVox Listener</p> <p>The UniVox Listener is a listening instrument for Audio Frequency Induction Loop Systems (AFILS).</p> <p>Use the Listener to check the level of the magnetic field. This will enable you to get the best quality sound from your loop system.</p> <p>The Listener is a small device which runs on two AAA (LR3) batteries, this gives the unit approximately 150-300 hours of running time.</p> <p>Two LED indicators flash to check the maximum and minimum levels of the magnetic field.</p> <p>The Blue LED indicates that the field strength is +6dB (200mA/m) and the Red LED indicates tester is switched on.</p> <p>The Listener can also be used as a personal listening device with the built in microphone.</p> <p>Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.</p> <p>If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. SI 30 IR Emitter 80m Master
Model : IRU2002
<i>Sennheiser</i>
<p>SI 30 Infrared Radiator Master Unit.</p> <p>The SI 30 is a wideband modulator with an integral radiator.</p> <p>It can be switched between operation on channel 1 (2.3 MHz), channel 2 (2.8 MHz) and stereo operation.</p> <p>Due to its compact size and relatively low radiating power, the SI 30 modulator/radiator and the SZI 30 radiator are an ideal choice for smaller or medium-sized rooms, for covering recesses or for applications which require transmission of audio information to well defined zones, e.g. in museums.</p> <p>Covers up to 80m².</p> <p>Price excludes VAT.</p> <p>Please note: When purchasing this radiator, you will also NEED to purchase a power supply unit and a wall mounting kit. Go to the infrared accessories page to view the options.</p> <p>We do sell infrared fixed systems complete with receivers and transmitters but in order to supply customers with a system that suits their specification we must know the following:</p> <ul style="list-style-type: none"> - How many receivers are required (how many hearing aid users need to hear)? - How many microphones are required (how many people need to be heard)? - How many radiators are required? - What is the approximate floor area? <p>When you have the answers to these questions, please email us and we will find you your perfect system.</p> <p>Email us</p> <p>If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. SZI 1029 5 Watt Radiator
Model : IRU2007
<i>Sennheiser</i>
<p>SZI 1029 5 Watt Radiator.</p> <p>This radiator is more powerful than the SZI 1015T radiators.</p> <p>The SZI 1029 is a 5-W high-power radiator for use with all wideband and narrow-band modulators. The radiator is automatically switched on by the RF carrier and can cover areas of up to 800 m² in single-channel operation. High-quality GaAlAs transmitting diodes have been arranged in 12 independent groups to ensure reliable transmission. A malfunction indicator is triggered when the radiating power is reduced by more than 30 %.</p> <p>Features:</p> <ul style="list-style-type: none"> - High-power radiator with a maximum coverage area of 800 m² (10 variant) - RF output for connecting additional radiators - Automatic on/off function - Versatile installation due to 5/8", 3/8" and 1/2" threads - Excellent reliability due to 12 independent groups of transmitting diodes and malfunction indicator <p>Price excludes VAT.</p> <p>Please note: When purchasing this radiator, you will also NEED to purchase a power supply unit and a wall mounting kit. Go to the infrared accessories page to view the options.</p> <p>We do sell infrared fixed systems complete with receivers and transmitters but in order to supply customers with a system that suits their specification we must know the following:</p> <ul style="list-style-type: none"> - How many receivers are required (how many hearing aid users need to hear)? - How many microphones are required (how many people need to be heard)? - How many radiators are required? - What is the approximate floor area? <p>When you have the answers to these questions, please email us and we will find you your perfect system.</p> <p>Email us</p> <p>If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. Email info@gordonmorris.co.uk and inform us when you have set up your account. We will change your status to TRADE at our end.</p> <p>Price excludes VAT.</p> <p>You may experience problems opening the PDF leaflet if you have Internet Explorer version 6 or below. SZI 30 IR Emitter 80m Slave
Model : IRU2001
<i>Sennheiser</i>
<p>SZI 30 Infrared Radiator Slave Unit.</p> <p>The SI 30 is a wideband modulator with an integral radiator. It can be switched between operation on channel 1 (2.3 MHz), channel 2 (2.8 MHz) and stereo operation.</p> <p>Due to its compact size and relatively low radiating power, the SI 30 modulator/radiator and the SZI 30 radiator are an ideal choice for smaller or medium-sized rooms, for covering recesses or for applications which require transmission of audio information to well defined zones, e.g. in museums.</p> <p>Covers up to 80m².</p> <p>Slaves from SI 30 master unit for larger areas.</p> <p>Can be used within a cluster.</p> <p>Features:</p> <ul style="list-style-type: none"> - Compact radiator and modulator/radiator for the carrier frequencies 2.3 MHz and 2.8 MHz - Easy installation and precise alignment <p>Price excludes VAT.</p> <p>Please note: When purchasing this radiator, you will also NEED to purchase a power supply unit and a wall mounting kit. Go to the infrared accessories page to view the options.</p> <p>We do sell infrared fixed systems complete with receivers and transmitters but in order to supply customers with a system that suits their specification we must know the following:</p> <ul style="list-style-type: none"> - How many receivers are required (how many hearing aid users need to hear)? - How many microphones are required (how many people need to be heard)? - How many radiators are required? - What is the approximate floor area? <p>When you have the answers to these questions, please email us and we will find you your perfect system.</p> <p>Email us</p> <p>If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. AT815B Line + Gradient Condenser Microphone
Model : MSU4001
<i>Audio Technica</i>
<p>AT8015 Line + Gradient Condenser Microphone</p> <p>Designed for video production and broadcast (ENG/EFP) audio acquisition, the AT8015 provides the narrow acceptance angle desirable for long-distance sound pickup, along with excellent sound rejection from the sides and rear of mic. The roll-off position reduces the pickup of low-frequency ambient noise (such as traffic, air-handling systems, etc.), room reverberation and mechanically coupled vibrations.</p>

- Designed for video production and broadcast (ENG/EFP) audio acquisition
- Provides the narrow acceptance angle desirable for long-distance sound pickup
- Excellent sound rejection from the sides and rear of mic
- Switchable low-frequency roll-off
- Operates on battery or phantom power
- RoHS compliant—free from all substances specified in the EU directive on hazardous substances

SPECIFICATIONS

ELEMENT Fixed-charge back plate, permanently polarized condenser

POLAR PATTERN Line + gradient

FREQUENCY RESPONSE 40-20,000 Hz

LOW FREQUENCY ROLL-OFF 80 Hz, 12 dB/octave

OPEN CIRCUIT SENSITIVITY Phantom: -38 dB (12.5 mV) re 1V at 1 Pa

Battery: -39 dB (11.2 mV) re 1V at 1 Pa

IMPEDANCE Phantom: 250 ohms

Battery: 300 ohms

MAXIMUM INPUT SOUND LEVEL Phantom: 132 dB SPL, 1 kHz at 1% T.H.D.

Battery: 120 dB SPL, 1 kHz at 1% T.H.D.

DYNAMIC RANGE (typical) Phantom: 110 dB, 1 kHz at Max SPL

Battery: 98 dB, 1 kHz at Max SPL

SIGNAL-TO-NOISE RATIO 72 dB, 1 kHz at 1 Pa

PHANTOM POWER REQUIREMENTS 11-52V DC, 2 mA typical

BATTERY TYPE 1.5V AA/UM3

BATTERY CURRENT / LIFE 0.4 mA / 1200 hours typical

(alkaline)

SWITCH Flat, roll-off

WEIGHT 195 g (6.9 oz)

DIMENSIONS 460.0 mm (18.11") long,

21.0 mm (0.83") diameter

OUTPUT CONNECTOR Integral 3-pin XLRM-type

Price excludes VAT.

ES945 360 Degree Boundary Ceiling Mount Microphone
Model : MBU4002
<i>Audio Technica</i>
Audio-Technica ES945 Omni-directional Condenser Boundary Microphones
The new Engineered Sound. Contractor-exclusive innovations for every acoustical challenge. And safe haven from RFI.
This low-profile omnidirectional condenser boundary microphone is designed for clear, highly intelligible sound reinforcement, professional recording and teleconferencing in table-, ceiling-, or panel-mount applications.
The microphone is equipped with a self-contained power module with an XLRM-type output connector, eliminating the need for an external power module.
The microphone offers unsurpassed immunity from radio frequency interference thanks to Audio-Technica's UniGuard innovations.
Protected by a rugged all-metal case with a two-layer steel mesh grille, the microphone has a 360° pickup angle, and is available in two colors: black (ES945) and white (ES945W).
Features:
<ul style="list-style-type: none"> • Designed for surface-mount applications such as high-quality sound reinforcement, professional recording and teleconferencing • Low-profile element provides uniform omnidirectional polar pattern with 360 degree acceptance angle • Mounts unobtrusively in table-tops, ceilings and wall panels • Self-contained power module with XLRM-type output connector • Rugged all-metal case with a two-layer steel mesh grille • Isolators provide mechanical dampening of mounting-surface vibration • Requires 11V to 52V DC phantom power

- UniGuard RFI-shielding technology offers outstanding rejection of radio frequency interference (RFI)
- RoHS compliant-free from all substances specified in the EU directive on hazardous substances

Specifications:

- ELEMENT: Fixed-charge back plate, permanently polarized condenser
- POLAR PATTERN: Omnidirectional
- FREQUENCY RESPONSE: 40-18,000 Hz
- OPEN CIRCUIT SENSITIVITY: -42 dB (7.9 mV) re 1V at 1 Pa
- IMPEDANCE: 200 ohms
- MAXIMUM INPUT SOUND LEVEL: 142 dB SPL, 1 kHz at 1% T.H.D.
- DYNAMIC RANGE (typical): 112 dB, 1 kHz at Max SPL
- SIGNAL-TO-NOISE RATIO: 64 dB, 1 kHz at 1 Pa
- PHANTOM POWER REQUIREMENTS: 11-52V DC, 2 mA typical
- WEIGHT: 63 g (2.2 oz)
- DIMENSIONS: 69.0 mm (2.72") long, 28.0 mm (1.10") diameter
- OUTPUT CONNECTOR: Integral 3-pin XLRM-type
- ACCESSORY FURNISHED: One pair isolators

Price excludes VAT.

- Isolators provide mechanical dampening of mounting-surface vibration
- Requires 11V to 52V DC phantom power
- UniGuard RFI-shielding technology offers outstanding rejection of radio frequency interference (RFI)
- RoHS compliant-free from all substances specified in the EU directive on hazardous substances

Specifications:

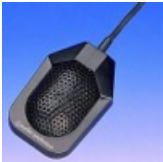

- ELEMENT: Fixed-charge back plate, permanently polarized condenser
- POLAR PATTERN: Omnidirectional
- FREQUENCY RESPONSE: 40-18,000 Hz
- OPEN CIRCUIT SENSITIVITY: -42 dB (7.9 mV) re 1V at 1 Pa
- IMPEDANCE: 200 ohms
- MAXIMUM INPUT SOUND LEVEL: 142 dB SPL, 1 kHz at 1% T.H.D.
- DYNAMIC RANGE (typical): 112 dB, 1 kHz at Max SPL
- SIGNAL-TO-NOISE RATIO: 64 dB, 1 kHz at 1 Pa
- PHANTOM POWER REQUIREMENTS: 11-52V DC, 2 mA typical
- WEIGHT: 63 g (2.2 oz)
- DIMENSIONS: 69.0 mm (2.72") long, 28.0 mm (1.10") diameter
- OUTPUT CONNECTOR: Integral 3-pin XLRM-type
- ACCESSORY FURNISHED: One pair isolators

Price excludes VAT.

With a condenser design for studio vocal and instrument applications, the microphone features: battery/phantom operation; rugged all-metal construction; soft-touch finish; extended response for smooth, natural sonic characteristics; corrosion-resistant contacts from gold-plated XLRM-type connector; on/off switch.</p> <p>Features:</p> <p>Introductory studio-quality microphone—the clear price/performance leader</p> <p>Condenser design for studio-quality vocal and instrument applications</p> <p>Extended response for smooth, natural sonic characteristics</p> <p>Rugged all-metal construction and on/off switch</p> <p>Soft-touch finish for a secure, comfortable grip and reduced mechanical noise</p> <p>Battery/phantom operation for maximum versatility</p> <p>Corrosion-resistant gold-plated XLRM-type connector</p> <p>5-year warranty</p> <p>Specifications:</p>

Element: Fixed-charge back plate, permanently polarized condenser
 Polar Pattern: Cardioid
 Frequency Response: 80-20,000 Hz
 Open Circuit Sensitivity: Phantom: -46 dB (5.0 mV) re 1V at 1 Pa; Battery: -48 dB (3.9 mV) re 1V at 1 Pa
 Impedance: Phantom: 200 ohms; Battery: 250 ohms
 Maximum Input Sound Level: Phantom: 137 dB SPL, 1 kHz at 1% T.H.D.; Battery: 125 dB SPL, 1 kHz at 1% T.H.D.
 Dynamic Range (typical): Phantom: 113 dB, 1 kHz at Max SPL; Battery: 101 dB, 1 kHz at Max SPL
 Signal-to-Noise Ratio: 70 dB, 1 kHz at 1 Pa
 Phantom Power Requirements: 11-52V DC, 2 mA typical
 Battery Type: 1.5V AA/UM3
 Battery Current/Life: 0.4 mA/1200 hours typical
 Switch: On/off
 Weight: 6.4 oz
 Dimensions: 8.10" long, 1.64" head diameter
 Output Connector: Integral 3-pin gold-plated XLRM-type
 Cable: 15' XLR-F-XLRM
 Accessories: AT8405a stand clamp for 5/8"-27 threaded stands; 5/8"-27 to 3/8"-16 threaded adapter, battery, soft protective pouch.

Price excludes VAT.

SDR 20/SWE173 Receiver
Model : MRU4019
<i>Comfort Audio</i>
SDR 20/SWE173 Receiver
Works from 173.800 MHz - 177.800 MHz.
16 channel diversity receiver SDR-20 is a stationary FM receiver, adapted to the needs of the hearing impaired. Together with Selecta T10 or Comfort Conference DRS-H, a very good sound quality and a noise-free sound transmission is achieved.
Diversity Full diversity means optimal reception. SDR-20 uses which ever of the two receivers that at any given moment has the strongest reception.
High deviation: SDR-20 works with high deviation. This gives a very good signal/noise ratio.
4 x 16 channels: SDR-20 has a channel selector for 16 different channels. To maximise flexibility and to give the possibility to use many systems within the same area, SDR-20 is available with four different channel sets.
Functional: Volume control, squelch-level control and channel selector are easy to adjust at the same time as easy-to-read indicators shows both the RF level and the AF level.
Easy to install: The dimensions of SDR-20 is only 220 x 150 x 40 mm and is powered by a convenient plug-in power supply. The antennas are screwed in place, but they can also be mounted externally via cable, e.g. if you would like to place the receiver in a cabinet. SDR-20 has both a balanced and an unbalanced output.
Price excludes VAT.
If you are a TRADE customer, you must set up an account to see and purchase with TRADE PRICES. Email info@gordonmorris.co.uk and inform us when you have set up your account. We will change your status to TRADE at our end.

**Comfort Conference Single User Infrared Case**

Model : PIU3207

Comfort Audio

The Comfort Conference is a superb personal and portable infrared hearing system, which works as a complement to a personal hearing aid.

This EX DEMONSTRATION CASE is in great condition and at a massivley discounted price for you, the customer.

In situations such as group meetings Comfort Conference can help hearing aid users to hear more clearly.

A digital signal processor filters the sound to reduce background noise and make speech more intelligible.

The user wears a neckloop receiver which transmits the sound directly to the hearing aid.

The case is ideal for meetings, small conferences, educational environments and home discussions.

The easy-to-use unit has personal tone and volume controls to put the user firmly in control.

The Comfort Conference Single User Case contains:

1 x DRS 23 omni-directional microphone with charger unit

1 x Neck loop or headphones

1 x Sennheiser Infrared receiver

1 x 2 way charger & power supply.

Price excludes VAT.

This product comes with a 6 month warranty.

You may experience problems opening the PDF leaflet if you have Internet Explorer version 6 or below. To resolve this please use the free download of Internet Explorer version 7 from www.microsoft.com. Alternatively you can click SAVE and then open.

Tour Guide Systems -/- DigiSystem Tour Guide Cases

DigiSystem Tour Guide Case (1)
Model : PDU3001
<i>Comfort Audio</i>
<p>A REVOLUTION IN ASSISTIVE LISTENING TECHNOLOGY.... THE IDEAL SYSTEM FOR GUIDED TOURS</p> <p>Gordon Morris Ltd. are proud to introduce the Comfort DigiSystem Tour Guide Case.</p> <p>Sound from the tour guides' voice is transmitted from the microphone to the receiver... crystal clear... with no delay or echo... And without anyone else being able to hear it...</p> <p>The range of transmission is up to 30 metres, depending on the environment, and the operating time of the receivers and transmitters is up to 10 hours .</p> <p>System 1 contains:</p> <ul style="list-style-type: none"> 1 x DM-10 Microphone 2 x DH-10 Receiver 2 x Neck Loop 1 x Case 2 x Headphones <p>If you require a smaller system such as this one, you may want a small carry pouch (as pictured below) instead of the larger silver case. This option is available and is slightly cheaper but headphones must be bought separately and units do not charge in the case. Please enquire for more details (01458 272121).</p> <p>Gordon Morris Ltd. will help you find a system that fits your specific requirements - you can specify how many receivers and transmitters you need depending on the site and the budget - so if the set systems are not suitable, please call us on + 44 (0)1458 272121. We will endeavour to find the perfect system for you.</p> <p>See leaflet for further details.</p> <p>Price excludes VAT.</p> <p>This product comes with a 2 year warranty.</p> <p>You may experience problems opening the PDF leaflet if you have Internet Explorer version 6 or below. <i>Comfort Audio</i>
T10 Blue Tooth
<p>Selecta BT Z combines Bluetooth technology with FM technology for hearing impaired people. Selecta BT Z works as a link between two telephones and the hearing aid at the same time. It can also be used as a wireless microphone.</p> <p>Wireless communication with two telephones</p> <p>Selecta BT Z is connected with your mobile and your wireless telephone via Bluetooth™ and the sound from the telephone is transmitted further on up to the receiver at the hearing aid via FM technology. The microphone in Selecta BT Z picks up your voice and that sound is transmitted via Bluetooth™ to the telephone. The directional microphone setting effectively reduces disturbing background sounds in noisy environments.</p> <p>Comfortable telephone communication</p> <p>Just by pressing one button on Selecta BT Z you activate the voice controlled ringing of the telephone, answering incoming calls or disconnecting a call. Selecta BT Z change automatically between working as a wireless microphone and transferring telephone sound. It is also possible to adjust the sound level by pressing buttons on Selecta BT Z. Bluetooth™ technology implies that you do not even have to wear the telephone as the range is up to 10 metres.</p> <p>A unique FM transmitter for many applications</p> <p>The FM transmitter covers the total band 169,4 - 218 MHz and it may be programmed to any normally used frequencies in that band. Selecta BT Z may be attached directly to the clothes via a clip or it can be used with a clip on microphone. Other sound sources can be connected as well, e.g. TV/Video.</p> <p>Small and light</p> <p>Only 85 x 25 x 35 mm and weighing just 50 grams, including battery! Selecta BT Z is flexible both as a wireless microphone at a seminar and when making a phone call. An elegant design gives Selecta T10 BT Z a sophisticated look.</p> <p>Low power</p> <p>Selecta BT Z is operated by one ordinary AAA battery or one rechargeable NiMH battery. Selecta BT Z has an integrated charge control circuit.</p> <p>Price excludes VAT</p>

Car Loop Interface Kit This kit allows the hearing aid user to completely cut out annoying and disturbing background noises when driving or as a passenger in the car. The car loop interface kit must be fitted by a qualified electrician. Please contact us on 01458 272121 if you have any queries. Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.
TEXT_PRODUCTS_SPECIALS_PRICE£660.77

Comfort Audio Headphones
Model : AIH5003
<i>Comfort Audio</i>
Comfort Audio Headphones. To be used in conjunction with any Comfort Audio product - Contego, Duett, DigiSystem etc. Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.
TEXT_PRODUCTS_SPECIALS_PRICE£660.77

DLS-50 Mounting Plate
Model : ACM5008
<i>Univox by Bo Edin</i>
DLS-50 Mounting Plate. For use in conjunction with the DLS-50 loop amplifier.
Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.
TEXT_PRODUCTS_SPECIALS_PRICE£660.77

Duett External Microphone
Model : HPU6055
<i>Comfort Audio</i>
Duett External Microphone To be used in conjunction with the Comfort Duett to listen to the television and other sound sources.
Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.
TEXT_PRODUCTS_SPECIALS_PRICE£660.77

Duett Neck Loop
Model : AIN5004
<i>Comfort Audio</i>
Duett Neck Loop. To be used in conjunction with the Comfort Duett.
Price excludes VAT. Please note that individual users may qualify for VAT exemption. For more information, go to the VAT Exempt Form tab on the left hand side of the screen.
TEXT_PRODUCTS_SPECIALS_PRICE£660.77
