

CCTV PRODUCT CATALOGUE

09-10

# FOREWORD

Dear Customers, Business Partners and Interested Parties,

In this catalogue you will find on 134 pages our entire product portfolio from optical components to electronic products. This revised edition both with a new register and a new structure will serve you as a well-arranged reference book in which you can find the wide variety of CBC products quickly and easily.

Video surveillance or closed circuit television (CCTV) has now become commonplace in many areas of public and industrial life. Here, CBC is in demand with its wide range of products.

With the computar brand – the CBC Group is one of the world's top three lens manufacturers – the company offers a comprehensive range of high-performance lenses with many features. CBC has specialised in meeting industrial demands especially with its new megapixel lenses. These high-quality lenses are characterised by precision and image quality and ensure the correct angle of view even in arduous conditions.

The GANZ brand has been the trademark of all electronic products and cameras since 1999. It combines video management, integrated camera systems, components as well as IT and transmission technology. The latest member of the GANZ family in the field of flat panel speakers is the GANZ Audio Division.

With VSolP, video surveillance over Internet protocol, CBC launched a high-performance video management system on the market which permits both the use of existing network structures and the integration of IP-ready and analog components into a comprehensive video surveillance solution.

The GANZ product range also includes the C-AllView camera. It offers professional video surveillance for demanding security areas and the highest requirements. For areas with particularly high demands on image quality, this camera is also available as a combined video and thermal camera or with ground radar for the parallel control of up to five C-AllViews.

CBC (Deutschland) GmbH is a Japanese wholesaler founded in 1925. 27 branches in Europe, America and Asia supply the numerous high-quality products all over the world. Our German headquarters is located in Düsseldorf. Video surveillance technology is the largest division at this location alongside chemicals, medical devices and flooring.

New challenges and the development of innovative sales markets are an important factor for our motivation. Our overriding objective is the continual improvement and new development of all products in order to be able to meet your requirements and demands at all times.

- Manual focus
- CS mount

### Manual iris

The light incidence is regulated in lenses using the iris and the iris setting. To be able to optimally regulate the light, the lenses from computer offer three possibilities of setting the iris. Depending on the field of application, you can choose a manual setting or automatic control electronics optionally in the lens (video) or in the camera (DC). Whereas automatic iris control should be used outdoors owing to the unavoidable fluctuations in lighting, lenses with a manual iris are only suitable for areas with constant light conditions.

Model	T2314FICS	T2616FICS	T0412FICS	T0812FICS	H1214FICS

# LENSES WITH DC IRIS

1/3" lenses with DC iris

LENSES

- Automatic iris (DC)
- Fixed focal length
- Manual focus
- CS mount

## Auto-iris (DC & video-controlled)

There are various types of auto-iris: DC, video and motor-controlled. The DC irises are regulated directly by the camera (DC iris = galvanometer). The video-controlled iris is controlled by the electronics of the lens. The camera supplies the lens with the operating voltage and the video signal for balance. Motorised irises are still sometimes used with motorised zoom lenses and so the iris can be manually controlled via an external control without having to come into contact with the lens itself.

## LENSES WITH VIDEO-CONTROLLED IRIS

*1/3" & 1/2" lenses with fixed focal length*

- Automatic iris (video)
- Fixed focal length
- Manual focus setting
- CS mount

With lenses with a fixed focal length the iris setting is regulated by automatic control electronics in the lens. A 4-pin connector which can be directly connected to the iris output of the camera is used on all lenses for connection. The focus is set manually.

Model	TG2314AFCS	TG2616AFCS	TG0412AFCS
Format	1/3"	1/3"	1/3"

# MANUAL VARIFOCAL LENSES

1/3" & 1/2" varifocal lenses with manual iris

LENSES

## Varifocal lenses

- Manual iris
- Manual focus
- Manually adjustable focal length
- CS mount
- IR-corrected varifocal lenses
- 1/3" and 1/2" models

Varifocal lenses: Thanks to the variable focal length, you no longer require a whole host of fixed focal lengths (4.0 mm; 8.0 mm, ...) but you can cover most applications with one single lens (e.g. 3.5 mm – 8.0 mm). Moreover, they are used when the required focal length for an application is not known in advance. The relevant connection cable is available in lengths of 9 or 31 cm.

Model	T2Z1816CS	T2Z3514CS	T3Z2910CS	T3Z2910CS-IR	T3Z3510CS

# VARIFOCAI LENSES WITH DC IRIS

1/3" lenses with DC iris

LENSES

- Automatic iris (DC)
- Manually adjustable focal length
- Manually adjustable focus
- IR-corrected varifocal lenses available
- 1/3" and 1/2" versions
- CS mount

With the further development of the DSPs in the cameras, the direct controls (DC-direct control) became more efficient and were equipped with additional properties which video-controlled irises did not have. DC-controlled lenses should always be used in WDR cameras so that the iris does not start to oscillate (undesirable vibrations) in certain light conditions. Connection cables are available as 9 or 31 cm version.

Model	TG2Z1816FCS	TG2Z3514FCS	TG3Z2312FCS	TG3Z2910FCS

# VARIFOCAL LENSES WITH VIDEO-CONTROLLED IRIS

1/3" & 1/2" varifocal lenses with variable focal length

LENSES

- Automatic iris (video)
- Manually adjustable focal length
- Manually adjustable focus
- IR-corrected varifocal lenses available
- 1/3" and 1/2" versions
- CS mount

Varifocal lenses are a flexible and practical solution if the picture detail of the camera can only be finally established on site or during installation. Thanks to the variable, manually adjustable focal length, a wide range of applications can be covered with one single lens.

# MANUAL ZOOM LENSES

1/3" & 1/2" zoom lenses with manual iris

LENSES

- Manual iris
- Manually adjustable focal length
- Manually adjustable focus
- 1/3", 1/2" and 2/3" versions
- CS or C mount

## Zoom lenses (manually controlled and motorised)

Zoom lenses are one of the most complicated types of lenses to manufacture. They exhibit a very variable focal length range. The difference to varifocal lenses is that you always obtain a sharply focused image when the lens is correctly adapted to the camera, regardless of the focal length. This is not possible with varifocal lenses as the sharpness (focus) always has to be reset when the focal length is changed. This type of lens is available as a manual or motorised version.

Model	T6Z5710-CS	H6Z0812	M6Z1212
Format	1/3"	1/2"	2/3"
Lens mount	CS	C	C
Focal length	5.7 mm – 34.2 mm	8.0 mm – 48.0 mm	2.5 mm – 75.0 mm
F-stop [F]	1.0 – 16C	1.2 – 16C	1.2 – 16C
Angle of view (HOR)	45.9° – 8.1°	44.6° – 8.0°	38.3° – 6.7°
M.L.D.	1.2 m	1.2 m	1 m
Filter thread at front (ØM x P)	49.0 mm × 0.75 mm	49.0 mm × 0.75 mm	55.0 mm × 0.75 mm
Dimensions (Ø x H)	55.2 mm × 82.5 mm	51.8 mm × 97.0 mm	59.9 mm × 114.5 mm

# MANUAL ZOOM LENSES WITH AUTOMATICALLY CONTROLLED IRIS

*1/3" & 1/2" zoom lenses with automatically controlled iris*

- Automatic iris (DC or video)
- Manually adjustable focal length
- Manually adjustable focus
- 1/3" and 1/2" versions
- CS or C mount

## Iris

The light incidence is regulated in lenses using the iris and the iris setting. To be able to optimally regulate the light, the lenses from computar offer three possibilities of setting the iris. Depending on the field of application, you can choose a manual setting or automatic control electronics optionally in the lens (video) or in the camera (DC). Whereas automatic iris control should be used outdoors owing to the unavoidable fluctuations in lighting, lenses with a manual iris are only suitable for areas with constant light conditions.

Model	T6Z5710AIDC-CS	H6Z0812AIDC
Format	1/3"	1/2"
Lens mount	CS	C
Iris control	DC	DC
Focal length	5.7 mm – 34.2 mm	8.0 mm – 48.0 mm
F-stop [F]	1.0 – 360C	1.2 – 560C

# MOTORISED ZOOM LENSES

1/3" motorised zoom lenses

LENSES

- Motorised focal length
- Motorised focus
- Automatic (DC, video) or motorised iris
- IR-corrected models
- 1/3" or 1/2" versions
- Models prepared for controlling fixed positions
- Override models

Motorised zoom lenses offer the possibility of changing the focal length and focus position using electric motors. The focal length range is indicated in line with the smallest and largest picture detail that can be obtained with this lens (e.g. 5–30 mm). Zoom lenses not only excel with their variable focal length ranges but also with sharply focused pictures, regardless of the focal length. Whereas with varifocal lenses the focus always has to be regulated if the focal length changes, this process is motorised in zoom lenses.

- Wide-angle (83.2°) pinhole lens
- Tapered opening, 4.8 mm
- 1/3" format
- CS mount
- Iris control manual, DC or video-controlled

A pinhole lens is always used where only small observation openings are available, for example for concealed surveillance or in the production of goods.

With the automatically controlled iris, pinhole lenses can be used where large differences in brightness occur. The CS mount also permits the use of high-quality CS-mount cameras.

# MEGAPIXEL LENSES

1/2" & 2/3" megapixel lenses

LENSES

- Lenses with up to 2 megapixel resolution
- Fixed or variable focal lengths
- Manual or DC iris
- 1/2" or 2/3" format
- C-mount connection
- Macro lens in megapixel resolution

Megapixel lenses are used together with cameras which have a higher resolution than standard CCTV cameras (approx. 450,000 pixels). This MP series has a resolution of 2 MP in the centre and 1 MP in the corners. The lenses are available in 2/3" or 1/2" format. If a 1/2" camera with 2 MP is used, the 2/3" lens can be deployed. Moreover, the combination of the MP lenses with 5 MP cameras is possible.

- 1/2", 2/3" and 1" formats
- Macro and telecentric lenses
- C mount
- Manual iris

In industry it's generally not a question of keeping people under surveillance but monitoring production. Cameras are used with image processing systems to quickly check the products. The lenses should exhibit as little distortion as possible for such applications. Telecentric lenses are also used for this purpose. In the meantime an increasing number of small-format sensors are also being increasingly used and the 1" lenses are still deployed as in this way only the centre of the lenses are required and therefore there are no distortions in the image.

# MEGAPIXEL LENSES WITH M12 X 0.5 MOUNT

1/2" megapixel lenses

LENSES

- Lenses with up to 2 megapixel resolution
- Various fixed focal lengths
- Up to 180° angle of view (fish-eye)
- Fixed iris
- 1/2" format
- M12 x 0.5 mount

Megapixel lenses are used together with cameras which have a higher resolution than standard CCTV cameras (approx. 450,000 pixels). This MP series has a resolution of 2 MP in the centre and 1 MP in the corners. As cameras have become ever smaller in recent years, the lenses are now following suit so that this camera feature can also be used. The fish-eye offers a 180° angle of view. In contrast to the normal fish-eye lenses, this one is a stereotype with almost no distortions at the edge.

## LENSES

# LENS ACCESSORIES

Accessories for CCTV lenses

- Adapter rings
- Test filters
- Extenders
- Viewfinders

Mounting accessories for a host of applications are available for the CCTV lenses. The required focal length can be determined with a viewfinder, a 5 mm adapter ring (VM400) permits the adaptation of the C-mount lenses to CS-mount cameras and an extender increases the focal length of the lenses (by a factor of 1.5 or 2).

Model	VM100	VM300	VM400
Description	Extension ring kit 40; 20; 10; 5; 1; 0.5 mm	Viewfinder	5 mm adapter ring
Application	Attachment between lens and camera – reduces the minimum lens distance (M.L.D.)	Adjustable angle of view – helps in determining the focal length required	Attachment between lens and camera – adapts C-mount lenses to CS-mount cameras

Model	EX1.5CS	EX1.5C	EX2CS	EX2C
Description	1.5x extender for CS mount	1.5x extender for C mount	2x extender for C mount	2x extender for C mount
Application	Attachment between lens and camera – changes the focal length by a factor of 1.5	Attachment between lens and camera – changes the focal length by a factor of 1.5	Attachment between lens and camera – doubles the focal length	Attachment between lens and camera – doubles the focal length

## CAMERA SERIES 1/3" (ECONOMY)

FC/YC series, 1/3" cameras YC (colour) FC (black/white)

### FC/YC series

- Large range of models for all applications
- Rugged and compact design
- 1/3" IT CCD
- CS mount
- Mains synchronisation with phase adjustment, automatic white balance, backlight compensation, automatic gain control
- Four-pin standard jack for auto-iris lenses
- All models with high-resolution or standard CCD

The classic FC/YC series comprises high-quality b/w and colour cameras. Lenses with a DC, video or manual iris can be used. The cameras have a sturdy and compact housing. The models are attached at the top or bottom with a 1/4" screw. The cameras can be configured with the DIP switches.

Model	FC-25C/FC-30C	FCH-25C/FCH-30C	YC-25P/YC-30P	YCH-25P/YCH-30P

# CAMERA SERIES 1/3"

ZC-F series, b/w cameras ZC-F11C

CAMERAS

## ZC-F11C

- Rugged and compact design
- 1/3" IT CCD (SONY), high resolution or standard
- Power supply optionally 230 VAC or 24 VAC/12 VDC
- CS mount
- Mains synchronisation with phase adjustment, backlight compensation, automatic gain control
- Four-pin standard jack for auto-iris lenses

The ZC-F11C black/white camera series permits the use of DC, video-signal-controlled or manual lenses and is ideal for use in professional, commercial and industrial CCTV systems for indoor and outdoor surveillance. The cameras have a sturdy and compact housing and can be easily configured with DIP switches. Attachment is made at the top or bottom with a 1/4" screw. Standard and high-resolution models are available.

## ZC-Y11P cameras

- Rugged and compact design
- 1/3" IT CCD (SONY), high-resolution or standard
- Power supply optionally 230 VAC or 24 VAC/12 VDC
- CS mount
- Mains synchronisation with phase adjustment, auto. white balance, backlight compensation, automatic gain control
- Four-pin standard jack for auto-iris lenses

The ZC-Y11P camera series is based on a highly sensitive 1/3" IT CCD which offers numerous functions with optimum adaptation to the appropriate high-performance DSP. For example, difficult light conditions can be largely offset thanks to the AGC and BLC functions. The camera is suitable for the use of DC, video-signal-controlled or manual lenses and excel through their ease of handling and installation thanks to readily accessible DIP switches and control dials.

Low-volt cameras with 12 VDC and 24 VAC or the version with an integrated power supply unit and Euro connector are available. The high quality of the colour images and the outstanding reliability make this camera series an excellent choice for professional, commercial and industrial CCTV systems for indoor and outdoor surveillance.

Model	ZC-Y11P3	ZC-Y11P4
Video system	PAL	PAL
Operating voltage	230 VAC (50 Hz)	12 VDC, 24 VAC
Power consumption	4.5 W	3.5 W

The ZC-Y12 colour camera series has an HQ1 image sensor with a resolution of 540 TV lines and permits the use of lenses with DC, video or manual iris. The cameras have a sturdy and compact housing. Attachment is made at the bottom or top with a 1/4" screw. The ZC-Y12 series can be easily configured with the DIP switches.

The models are available as 12/24 Volt and 230 Volt versions. The PH5 model is supplied with an integrated twisted-pair transmitter (passive). As a result, the video signal can be transmitted via coaxial or twisted-pair cables.

# WDR COLOUR CAMERA 1/3"

WDR day/night camera ZC-YHW702P

## ZC-YHW702P

- HQ1 quality by means of 520 lines CCD
- Wide dynamic range (WDR) function
- Internal 60 dB signal processor
- Mechanical day/night toggling
- OSD control and RS-485 interface
- Low-light mode by means of slow scan/frame integration
- Motion detection and privacy masking

The WDR camera (wide dynamic range) is optimally suited for foyers or entrance halls, i.e. particularly in areas where not only the people entering but also the outdoor area has to be observed. The camera is set via the OSD with buttons and it can also be configured via the RS-485 interface using a PC. This "all-inclusive camera" also provides outstanding images in other fields of application, such as in casinos (with Casino Mode) or in day/night deployment.

Model	ZC-YHW702P
Video system	PAL
Image sensor	1/3" IT CCD
Horizontal resolution TVL	510 lines (colour); 520 lines (b/w)
Min. illumination	0.8 lux (colour); 0.1 lux (b/w) 0.025 lux (SENSup x 40 colour @ F 1.2 - 50 IRE)
Lens mount	CS mount
Iris control	DC/AES (Vp-p = 12 VDC, 60 mA max. signal = 0.7 Vp-p, high impedance)
Backlight compensation	Wide dynamic/on/off
Dynamic range	60 dB (wide dynamic on)
Power supply	12 VDC +/- 15 %; 24 VAC +/- 15 %
Power consumption	270 mA (24 VAC); 390 mA (12 VDC), 5 W
Operating environment	-10 °C ~ +50 °C (90 % humidity, non-condensing)
Weight (net)	330 g
Dimensions (W x H x D)	60 mm x 66 mm x 123 mm

# DAY/NIGHT CAMERAS 1/3"

1/3" day/night cameras ZC-NH258P

CAMERAS

## ZC-NH258P

- High-resolution 1/3" camera for day/night mode with 540 TV lines
- Brilliant colour pictures in daylight, high-contrast b/w pictures
- Fast manual day/night toggling
- Auto-iris control via DC or video signal
- Internal or mains synchronisation with phase adjustment
- Compact design and easy installation

The ZC-NH258P is a simple and uncomplicated day/night camera. The (mechanical) day/night toggling within one second is an advantage. This model is given preference for applications in corridors and stairwells where rapid colour and b/w toggling is required.

The camera can also be switched to night mode via an external contact. It remains in b/w mode until the contact is no longer closed.

Synchronisation can be selected and backlight compensation activated with the DIP switches.

Dimensions (W x H x D)	60 mm x 540 mm x 103.3 mm

## ZC-NH405P/405PE

- High-resolution 1/3" cameras for automated day/night mode
- Brilliant colour images in daylight, high-contrast b/w images
- Auto-iris control
- Options for automatic white balance
- Innovative design
- Power supply optionally 12 VDC/24 VAC or 230 VAC
- Configuration using on-screen menus
- Changing to night mode optionally using external contact

These day/night cameras have an OSD menu for camera settings. The menu is operated using a control pad which is located under a side cover.

A lens with a 31 cm control cable is required as the connection for the iris control is situated on the rear.

With these models 20-30 seconds are needed for toggling between day and night mode. This prevents immediate changeover to the colour mode where brief brightness differences frequently occur. These cameras are preferably used at entrances and exits.

Model	ZC-NH405P	ZC-NH405PE

Accessories and service

Thanks to the auto-focus module, this popular camera series greatly facilitates set-up. No ND or IR filter is required, the camera is correctly set in just a few minutes. It can be used for almost all applications owing to the large focal length range. It can also be configured via a serial interface or a resistance matrix.

Model	ZC-AF16	ZC-NAF27
Video system	PAL	PAL
Operating voltage	12 VDC, special jack	12 VDC, screw-type terminals
Power consumption	4.7 W maximal	5.3 W maximal

# MINI FINGER CAMERA 1/4"

1/4" CCD colour camera MTC-36

## MTC-36

- Inconspicuously small
- Discreet close-up surveillance
- Versatile use in the private sector
- Automatic electronic shutter
- Automatic gain control
- Rapid installation thanks to pre-wiring and mounting accessories

The splashwater-proof compact camera monitors cellars, house entrances, gardens or terraces at a glance. Its high-quality painted housing also permits deployment in covered outdoor areas. The MTC-36 integrates a lens with a 3.6 mm focal length for close-up surveillance. The electronic shutter readily copes with changing light conditions and ensures well-balanced image brightness. In addition, the mini finger camera offers automatic white balance. It can be screwed onto ceilings or flat surfaces. The ball joint made of stainless steel connects the housing and the bracket and permits free and permanent alignment of the camera.

Model	MTC-36
Video system	PAL
Image sensor	1/4" CCD, 512 × 582 pixels
Horizontal resolution TVL	330 lines
Video output	1 × composite signal, 1.0 Vp-p, 75 Ohm, BNC
Operating voltage	12 VDC ± 10%
Power consumption	90 mA
Focal length	3.6 mm
Min. illumination	2.0 lux (F-stop 2.0)
Electronic shutter	1/50 to 1/100.000 s
Horizontal angle of view	70°
Operating environment	-10 ~ +50 °C (< 80% rel. humidity)
Weight (net)	305 g
Dimensions (Ø × H)	26 mm x 85 mm

# COMPACT CAMERA SPOT-CAM

1/4" CCD colour camera SPOT-CAM ZC-L

CAMERAS

## ZC-L1210PHA

- High-resolution colour camera with fast varifocal lens
- DIP switches for
  - backlight compensation
  - synchronisation mode
- DC iris
- Locking screws for focus and focal length
- Mains synchronisation with phase adjustment
- Compatible with commercially available filters
- Optional bracket ZCA-LB101 for concealed cable routing

The "SPOT-CAM" owes its name to the design of a spotlight and, as a new edition of the successful LC camera series, combines time-tested features and innovation. The model has a 1/4" CCD and a high-performance digital signal processor. The high-quality, 4x varifocal lens covers a focal length range from 2.8 to 10.0 mm. Locking screws permanently secure the focus and focal length settings once they have been made. The housing pane can be replaced for special surveillance tasks with numerous commercially available filters with a diameter of 52 mm. In this way ND cut filters or polarisation filters frequently ensure more effective video surveillance.

## ZC-B series/MTC-EX4

- Compact design with wall bracket
- IR illumination >15 m
- Automatic day/night function (electronic or mechanical)
- Pre-wired with connector holder
- Fixed or varifocal versions available
- 350 TV line, 480 TV line or 540 TV line models
- Protection class up to IP66

The compact cameras in the outdoor housing with LEDs combine a compact design and a variety of functions in a smart housing which can also be used discreetly in private areas. The MTC-EX4 is fitted with a wide-angle lens of 4.0 mm and offers a resolution of 350 TV lines.

For the ZC-B models there are two camera versions and two varifocal lens versions with a DC iris. The 3039 models have a focal length of 3 – 9 mm and a resolution of 480 TV lines. With the 4312 models the focal length is 3.3 – 12 mm with a resolution of 540 TV lines. With the electronic day/night toggling only the colour burst is activated or deactivated. The mechanical day/night toggling also removes the IR cut filter in front of the image sensor. The mechanical day/night models also provide perfect colour images in direct sunlight.

The bracket included in the scope of delivery permits mounting on ceilings and walls. Thanks to the sunshield which is already integrated, the cameras are protected against overheating from direct sunlight.

## MINI DOME CAMERAS

Compact cameras in the mini dome housing, MD series

### MD series

- Smallest dome housing with complete compact camera
- Easy integration into almost any indoor environment
- Fixed focal length 3.6 mm
- Colour camera with automatic white balance
- 1/3" or 1/4" CCD chip
- Up to 480 TV lines

The MDC-P36S is a compact dome camera with an integrated fixed lens. The focal length of 3.6 mm and more than 330 TV lines guarantee a good overview at all times. The high min. illumination of the high-quality 1/3" CCD (SONY) still produces a good image even in low-light conditions. The MDCH-P36S contains a high-resolution (480 TV lines) camera module. The colour camera MDC-36 has a high-quality SONY CCD in the format 1/4". Its automatic white balance levels colour temperatures which frequently fluctuate in the course of a day. The MD series can be integrated into almost any indoor environment for discreet surveillance owing to its small size.

Model	MDC-36	MDC-P36S	MDCH-P36S
Video system	PAL	PAL	PAL
Operating voltage	12 VDC	12 VDC +/-10 %	12 VDC +/-10 %
Power consumption	90 mA	100 mA	150 mA
Focal length	3.6 mm	3.6 mm	3.6 mm
Image sensor	1/4" CCD	1/3" CCD	1/3" CCD

Weight	approx. 100 g	126 g	126 g
Dimensions (Ø x H)	75 mm x 54 mm	96 mm x 75 mm	96 mm x 75 mm

# DOME CAMERAS (ECONOMY)

Dome cameras 2000 series

CAMERAS

## ZC-D2000 series

- Two high-quality dome cameras
- Optionally as indoor and outdoor domes
- Varifocal lenses with focal length 3.0 – 9.0 mm or 3.3 – 12.0 mm IR-corrected
- Outdoor model with built-in LEDs

The new camera pair is suitable for a host of application conditions. The ZC-D2039PHA is an indoor dome with electronic toggling between colour and b/w. This toggling feature produces a better image in low light than in the colour mode. However, if there is no lighting, the second model, the ZC-DT2312PHA-IR, is ideal.

This is an outdoor dome, additionally vandalism-proof, with integrated LEDs. It, too, has an electronic toggling feature. Even in complete darkness a clear image is provided by the LEDs which reproduce the IR light required.

Model	ZC-D2039PHA	ZC-DT2312PHA-IR
Description	Indoor dome	Outdoor dome in vandalism-proof housing
Image sensor	1/3" Sony CCD	1/3" Sony CCD
Video system	PAL	PAL
Horizontal resolution TVL	480 lines	480 lines

## ZC-D3210CHA

- High-resolution b/w camera with integrated varifocal lens
- DIP switches for backlight compensation
- Gain control
- Flicker reduction
- Quick and easy setting of angle of view and focus
- Housing protected against unauthorised opening without external screws

The black/white camera in the dome housing permits effective and inconspicuous surveillance. With its 3D mechanism it can be mounted both on ceilings, walls and inclined surfaces. The varifocal lens offers the possibility of adapting the angle of view to the application. The elegant housing fits well into any environment. This high-resolution (580 TVL) b/w model offers an outstanding image even in low light.

Model	ZC-D3210CHA
Video system	CCIR
Image sensor	1/4" IT CCD, 752 x 582 pixels
Horizontal resolution TVL	580 lines
Min. illumination	0.48 lux (50 IRE)
Focal length	2.8 mm – 10.0 mm
Operating voltage	24 VAC +/- 10 %, 50 Hz +/- 1 Hz
Power consumption (12 VDC)	1.5 W
Power consumption (24 VDC)	2.0 W, 155 mA
Operating environment	-10 °C ~ +50 °C (<85 % rel. humidity)
Weight	approx. 400 g
Dimensions (Ø x H)	128 mm x 101 mm

# DOME CAMERA 4039 SERIES

Mini cameras in dome housing with varifocal lenses

CAMERAS

## 4039 series

- Mini cameras integrated in a dome housing
- IR varifocal lenses with a focal length of 3.0 – 9.0 mm
- Flexible Installation thanks to 3-axis module
- Convenient mounting and adjustment
- In an indoor or vandalism-proof outdoor housing

Thanks to integrated Pixim sensors, the ZC-DW4039PHA camera models offer optimum contrast compensation for indoor and the ZC-DWT4039PHA for outdoor applications. The WDR version masters even the most difficult light conditions and automatically calculates the ideal values and so a high-definition video image of top quality is produced at all times. High-resolution recordings in perfect b/w presentation (up to 0.08 lux with an aperture of F 1.2), even in the dark, are guaranteed by the day/night model ZC-DNT4039PHA.

Model	ZC-DW4039PHA	ZC-DWT4039PHA	ZC-DNT4039PHA

## 4312 series

- Camera module integrated in dome housing
- Colour or day/night camera
- IR varifocal lenses with 3.3 mm – 12 mm focal length
- Flexible installation thanks to 3-axis module
- Comprehensive accessories
- Wide range of mounting options
- For indoor and outdoor applications with vandalism-proof features

The dome cameras of the 4312 series are available as colour or day/night cameras (with mechanical swivel-type IR cut filter), optionally with an indoor or vandalism-proof outdoor housing. An IR-corrected varifocal lens with DC iris and a variable focal length of 3.3 mm – 12.0 mm is integrated in both camera modules.

All camera modules of this series have a high-resolution 1/3" CCD sensor with 540 TV lines. Thanks to the 3-axis mechanism inside the dome, the desired position for the camera module can be set, whether for wall, ceiling or inclined installations. The use of the DC iris prevents the camera from overloading in the event of major light fluctuations (e.g. outdoors) producing too bright an image. Owing to the IR-corrected varifocal lens, the day/night dome always produces a sharp image when infrared light is used.

# ACCESSORIES FOR INDOOR INSTALLATION OF THE 4000 SERIES

## CAMERAS

### Rapid-installation adapter (ZCA-QIP400)

The clever technology of the ZCA-QIP400 adapter facilitates the installation of the indoor dome cameras in suspended ceilings. Fold-out locking arms which can be moved into the right position using a screwdriver dispense with removing the ceiling plates during mounting.

### Adapter for pendant mounting (ZCA-DMA400W)

A water pipe with a 1" thread can be screwed to the adapter.

### Fastening plate for a 4s box (ZCA-BMA400W)

Adapter to connect the camera to 4S boxes

### Corner mounting adapter (ZCA-CMA400W)

For mounting into the top corner (2x wall, 1x ceiling)

### Adapter for installation in suspended ceilings (ZCA-FMA400W)

After installation only the cover of the dome camera can be seen thanks to this adapter.

### Service cable (ZCA-SM400)

Serves to pick off the video signal via the service jack. The coaxial cable connected does not have to be removed. A new angle of view or the focus of the camera can be set using a service monitor.

### Passive twisted-pair transmitter for installation in the housing (ZCA-UTP400)

This module permits the video signal to be transmitted through a twisted-pair cable (e.g. UTP or CAT cable). The module is installed in the dome housing in such a way that no other connection boxes are required. Depending on the receiver, the signal can be transmitted up to 225 m (passive receiver) or 1,000 m (active receiver).

### Wall bracket for pendant mounting (ZCA-GN400)

The ZCA-GN400 is used when the dome is not to be installed directly on the wall. The adapter ZCA-DMA400W is required for this purpose.

### Tinted cover with fastening ring (ZCA-DCS40)

The tinted cover permits discreet surveillance as the camera direction cannot be seen.

### Dummy dome housing (ZC-D4000MM)

The appearance of this dummy is exactly like the indoor version of the 4000 series with tinted cover but it has no internals.

ZCA-DMA400W-T

### Adapter for pendant mounting (ZCA-DMA400W-T)

A water pipe with a 1" thread can be screwed to the adapter.

### Fastening adapter for a 4s box, white (ZCA-BMA400W-T)

To cover flush-mounted boxes

### Corner mounting adapter (ZCA-CMA400W-T)

For mounting into the top corner (2x wall, 1x ceiling)

### Service cable (ZCA-SM400)

Serves to pick off the video signal via the service jack. The coaxial cable connected does not have to be removed. A new angle of view or the focus of the camera can be set using a service monitor.

### Passive twisted-pair transmitter for installation in the housing (ZCA-UTP400-T)

The adapter permits the transmission of the video signal through twisted cables (e.g. CAT5). With a passive receiver the transmission range is up to 225 m, if an active receiver is used, up to 1,000 m. Furthermore, interference with the video signal is avoided as a result of the twisted-pair technology.

### Wall bracket for pendant mounting (ZCA-GN400)

The ZCA-GN400 is used when the dome is not to be installed directly on the wall. The adapter ZCA-DMA400W is required for this purpose.

### Tinted cover with fastening ring (ZCA-DCS40-T)

The tinted cover permits discreet surveillance as the camera direction cannot be seen.

# DOME CAMERAS ZC-D5000 SERIES

Mini cameras in dome housing with varifocal lenses

CAMERAS

## ZC-D5000 series

- HQ1 image resolution of 540 TV lines
- Day/night toggling (manual or electronic)
- Various CS-mount varifocal lenses
- Outdoor use also possible using accessories

The ZC-D5000 series is also ideally suited for video surveillance in difficult light conditions thanks to its min. illumination of up to 0.83 lux and an F-stop of 1.0. A host of varifocal lenses are available for this camera series. They range from a focal length of 5 – 50 mm down to a wide-angle lens with a focal length of 2.9 – 8.2 mm. The 5000 cameras are fitted with a sensitive 1/3" IT CCD light sensor which has a resolution of at least 540 lines. Moreover, the varifocal lenses of the day/night versions ZC-DN are IR-corrected.

# DOME CAMERA ZC-DT5000 SERIES

*Vandalism-proof outdoor cameras in dome housing*

## ZC-DT5000 series

- Vandalism-proof and weatherproof housing
- Protection class IP66
- Rugged cast aluminium material
- Colour camera and mechanical day/night camera module
- HQ1 resolution with 540 TV lines
- Comprehensive mounting accessories
- CS-mount varifocal lenses

In addition to the features of the 5000 series, these dome cameras have a vandalism-proof and weatherproof cast aluminium housing. This housing corresponds to the IP66 protection class and is prepared and pre-wired for surface mounting. Optionally, cable routing through a wall or ceiling or through a side thread connection is possible. With the optional heater, the dome camera can be used at down to -30 °C.

## ACCESSORIES FOR INDOOR INSTALLATION OF THE 5000 SERIES

CAMERAS

### Adapter for pendant mounting (ZC5-PM1)

A water pipe with a 1" thread can be screwed to the adapter.

### Wall mount for pendant mounting (ZC5-WM1)

The wall mount consists of the adapter for pendant mounting and matching bracket.

### Passive twisted-pair transmitter for installation in the housing (ZC5-NVT)

The adapter permits the transmission of the video signal through twisted cables (e.g. CAT5). With a passive receiver the range is up to 225 m, if an active receiver is used, up to 1,000 m. Moreover, interference with the video signal is avoided with the twisted-pair technology.

## ACCESSORIES FOR OUTDOOR INSTALLATION OF THE 5000 SERIES

CAMERAS

The above-mentioned adapter, wall mount for pendant mounting and passive twisted-pair transmitter are also available for outdoor installation in the camera housing. In addition, there are other accessories for outdoor installation:

### Vandalism-proof outdoor housing (ZC-OH5)

With this housing the 5000 series corresponds to the protection class IP66.

### Tinted cover for the vandalism-proof housing (ZCA-DCS50)

As the alignment of the camera cannot be seen with a tinted cover, this accessory permits more discreet surveillance.

### 24 VAC heater for installation in the housing (ZC5-HTR)

Fitted with this heater, the 5000 cameras are also reliably equipped for use in extreme winter temperatures.

### Adapter for pole mounting (PMA1)

Pole-mounting adapter for the bracket for pendant mounting

### Adapter (ZC5-PM2)

Adapter for pendant mounting

### Wall bracket (ZC5-WM2)

Wall bracket for pendant mounting, incl. ZC5-PM2

### Passive twisted-pair transmitter (ZC5-NVT)

Passive twisted-pair transmitter for installation in the camera housing

# MOTORISED DOME CAMERA SYSTEM ZC-PT

*Motorised dome camera series for indoor and outdoor applications*

ZC-PT223P

ZC-PT226PXT

## ZC-PT

- Five high-quality camera models with a 12x, 22x, 23x, 26x and 35x optical zoom
- | Position control for up to 256 fixed positions
- | Auto-pan, tour and cruise at up to 32.4 km/h (moving to fixed position)
- | Control using joystick controllers (e.g. ZCA-SC201, C-KBD2) or DVRs
- | Housing without external screw fittings
- | Variety of options for mounting on ceilings, walls and in corners
- | Protection class IP66

The ZC-PT series is a complete motorised dome series for indoor and outdoor applications with a 12x to 35x optical zoom. Various camera modules offer a range of functions, from day/night toggling through a WDR function down to privacy masking.

All domes have alarm inputs which can be triggered via a preset function or tour. This series can be equipped for all applications thanks to extensive accessories.

# C-ALLVIEW HIGH SPEED PTZ

*PTZ speed day/night camera in outdoor housing*

## C-AllView

- Day/night camera
- High-speed, pan-and-tilt system
- 18x and 36x zoom
- Vandalism-proof
- Protection class IP67
- Built-in wiper unit
- Control using joystick controllers (e.g. ZCA-SC201, C-KBD2) or DVRs

Equipped with a high speed pan and tilt head, the C-AllView can overlook more than 180° per second in continuous rotation, can tilt up to 290° and can respond as fast as lightning from every position. The day/night camera comes with a zoom lens with a focal length from 4.1 mm – 73.8 mm. With this 18x zoom option you can catch essential pictures in excellent quality. Moreover it is also available in a 36x zoom version with a focal length of 3.4 mm – 122.4 mm. A wiper for cleaning the screen is included in the scope of delivery while a washer is available as an option.

Model	C-ADN3X18PT-W/C-ADN3X18PT-B	C-ADN3X36YPT-W/C-ADN3X36YPT-B

# C-ALLVIEW THERMAL HIGH SPEED PTZ

PTZ speed thermal camera in outdoor housing

CAMERAS

## C-AllView Thermal

- Surveillance with and without additional lighting
- Identification of people (thermal) up to 1,000 m
- High-resolution day/night camera
- Dual principle (thermal/optical)
- Angle of pan 360 degrees
- 36x optical zoom
- Built-in wiper unit
- Flat front glass to prevent distortion
- Protection class IP67

As a combined video and thermal camera, the C-AllView Thermal also permits a thermal image in addition to a video image with 36x zoom function – even under arduous vision conditions or in complete darkness. As a result, it is ideally suited for professional video surveillance in the short and long ranges, both for challenging environments with the highest demands as well as for outdoor use in extreme weather conditions.

Wall mounting arm for upright mounting, approx. 458 mm long, RAL9002

**Joystick controller (C-KBD2)**

Control unit with 3-axis joystick and multi-protocol control, for controlling C-AllViews, ZC-PTs and DVRs; with three independent RS-485 outputs and large display on the control unit.

# THERMAL CAMERAS

Thermal cameras HT-04R25FB, HT-04R50FB

CAMERAS

## Thermal cameras

- Surveillance without additional lighting
- Surveillance in all weathers (in fog, rain, snow, smoke)
- Identification of people up to 700 m
- Available as dome version and in cylindrical housing
- Protection class IP67
- Angle of view: 12°, 25° and 50°

Thermal cameras are ideally suited to satisfy growing security demands in a wide field of applications, e.g. for general security purposes, major industrial works, bridges, airports, underground railways and similar sectors. In contrast to conventional video technology, they have the advantage that there is no need for low light or infrared spotlights. Moreover, objects can be easily identified by their heat signature even during the day. Thermal cameras produce clear and sharp video images even in slight fog, rain or smoke.

## DUMMIES

*Dummy cameras and lenses*

These dummy cameras are identical to the original models, the only difference being that they have no internals. They therefore merely serve to deter potential thieves, and are suitable, for example, for kiosks and supermarkets.

Model	ZC-F00	ZC-YH212MM	DL-00	ZC-D5000MM	ZC-D4000MM
Description/ Application	Dummy camera, without lens, comparable with the ZC-F11C series	Dummy camera, without lens, comparable with the ZC-Y12PH/NH258	Manual dummy lens, C/CS	Dummy dome camera, comparable with the 5000 indoor dome series	Dummy dome camera, comparable with the 4000 indoor dome series

## WALL MOUNTINGS FOR CAMERAS

*Wall brackets for mounting indoors*

Various wall brackets are available for easy mounting. The ZP-B10 plastic bracket was developed for quick installation, especially of compact cameras indoors. Fitted with a ball joint, this bracket permits simple manual alignment of the camera without any tools. The internal cable routing ensures clean installation.

The BK140 and BCV140 brackets are made of sturdy aluminium and have a wall mount made of plastic. Both brackets are suitable for ceiling and wall mounting and permit rapid manual alignment of the camera by means of a ball joint.

Model	ZP-B10	BK140	BCV140	BKX	ZCA-LB101
Description/ Application	Bracket 18 cm, made of plastic, white, optionally grey, internal cable routing, adjustment without tools	Bracket 14 cm, made of metal, optionally white, adjustment with tools	Bracket 14 cm, made of metal, black, optionally white, adjustment without tools using union nut	Extension for BK/BCV, 50 mm, black, optionally white	Only for SPOT-CAM 12 VDC/24 VAC: bracket 9 cm, made of plastic, grey, internal cable routing

# POWER SUPPLY UNITS

Power supply units for supplying 12 VDC, 24 VAC or 28 VAC

CAMERAS

## Power supply units

- Reliable power supply
- 230 VAC input voltage
- 12 VDC, 24 VAC or 28 VAC output voltage
- Plug-type, flush-mounted, fixed and rack installation power supply units

A selection of power supply units is available to operate the cameras with different power supplies. They offer optionally a power supply of 12 VDC, 24 VAC or 28 VAC. The power supply units CV12-II and CV24-II are particularly suitable for fixed mounting. Two bores for screws (8 mm) permit rapid attachment to walls. All power supply units for fixed mounting offer thermal overvoltage protection.

The power supply unit CV12P is a plug-type power supply unit. It is made of space-saving SMD components.

Moreover, a flush-mounted power supply unit is available, ideally suited for concealed mounting when used in building automation, from telecommunications as well as security and surveillance technology down to light technology applications. It is optimally suited for decentralised power supply, e.g. in building automation, and has an output power of 12 W with 12 VDC output voltage.

## V4FCD

- Elegant housing in dome shape
- Easy mounting in suspended ceilings
- Cover of various designs
- Camera alignment can be changed horizontally and vertically
- Space for compact varifocal lenses

The V4FCD series consists of indoor dome housings for mounting in suspended ceilings for CS/C-mount cameras. These models are available with a cover in white, black, smoked and mirrored. The housings are fitted with a flexible nylon fabric as a rear cover to protect against dust. This resilient fabric also permits the use of a large number of camera/lens combinations.

# INDOOR HOUSING GH-FI

*Housing for indoor installation*

PROTEC-  
TION  
HOUSINGS

## GH-FI

- Dust-proof housing (IP66) of the GH-FAST series
- User-friendly operation
- External and concealed cable routing
- High resistance (IK10)

Made of polycarbonate, the GH-FI housing is not only lighter than an aluminium or stainless steel housing, it is also considerably more resistant to scratches or deformation. It retains its durability owing to the plastic coating even when exposed to high loads.

Model	GH-FI
Heater	No
Maximum power inside	20 W (-20 °C ~ +50 °C)
Operating environment	0 °C ~ +55 °C
Storage environment	-30 °C ~ +55 °C RH 85 % non-condensing
Sunshield	No
Material of the pane	Polycarbonate
Pre-wired bracket	No
High-strength cable glands PG9	2
PG11	1
Attachment points for accessories/Opening possibility	2x M5 left & right
Vandalism resistance class IK	IK10 as per EN50102
Self-extinguishing fire behaviour	V2 as per UL94
Weight	1.46 kg

## GH series

- Complete housing incl. wall bracket with ball joint (KIT), sunshield and heater
- Pre-wired with internal cable routing
- Protection class IP67
- Simple mounting and positioning
- Fold-up sunshield and rapid-action locks for great ease of maintenance

The outdoor housings of the GH-KIT series offer protection against extreme weather conditions. The internal cable routing dispenses with the complicated sealing of high-strength cable glands to maintain the protection class IP67. The GH-KIT is designed as a complete housing and permits easy mounting. A sunshield prevents the housing from overheating. The heater with thermostat keeps the temperature inside the housing constant and protects the front pane from fogging up. The protection housings of the GH-KIT series are available in three different designs for different power supplies (12 VDC, 24 VAC, 230 VAC).

The GH housing is supplied without a wall bracket (GH-WM) and the cables are introduced into the housing through the high-strength cable glands. Otherwise, the GH housing corresponds to the GH-KIT. With an additional adapter, the housing fits onto all common pan-and-tilt heads.

# OUTDOOR HOUSINGS GH-FAST

Weatherproof housing series GH-FAST

PROTECTION  
HOUSINGS

## GH-FAST series

- Outdoor housings with sunshield and heater
- Protection class IP66
- User-friendly operation (can be opened on both sides)
- External and concealed cable routing
- High resistance
- Also available as compact housings with wall bracket

The GH-FAST weatherproof housing series offers reliable protection of the cameras against dust, water and even brief flooding and therefore has the protection class IP66. Fitted with a sunshield and built-in heater, the housings are also equipped to withstand extreme weather conditions, optionally also down to -40 °C by means of a double heater. The innovative housing series consists of resistant, plastic-coated polycarbonate, can be installed either with external or concealed cable routing (internal cable duct through the wall bracket) and is available in three voltage versions.

# ACCESSORIES FOR OUTDOOR HOUSINGS GH AND GH-FAST

*Brackets, adapters, mounting accessories, power supply units, heaters, fans and alarm contacts for the weatherproof housings GH and GH-Fast*

PROTECTION  
HOUSINGS

## GH series

- A host of combinations
- Easy mounting at virtually any location
- Rugged aluminium construction
- Attractive design

The accessories for the GH and GH-Fast weatherproof housings offer a host of combination and application possibilities. The well-conceived design guarantees easy mounting. All brackets are made of sturdy aluminium and are covered with a rugged protective paint for permanently reliable use outdoors. All accessory components are colour-matched.

The GH-CM mount, in conjunction with the GH-KIT, permits concealed cable routing, even with ceiling installation. Two adapters are available for mounting on poles. Both adapters are simply screwed to the GH-WM bracket. The GH-PAR adapter is intended for poles with a diameter of 60 to 140 mm. The GH-PA adapter is suitable for poles with a diameter of over 140 mm. Lateral surface-mounted cable routing is possible with the GH-SM distance plate. The weatherproof housing can be combined for professional use outdoors using the GH-PT adapter with a pan-and-tilt head of the PTH series.

The wall bracket (GH-FWM) of the GH-FAST series has an area prepared for the cabling. This can be broken open on both sides so that the cable can also be routed through the sides. This dispenses with the need for the GH-SM.

If the power supply of the GH-FAST and the camera is to be provided by means of PoE, we can offer the appropriate PoE splitter.

# OUTDOOR HOUSINGS CH SERIES

Protection housings CHEM/CHEB and CHOV

PROTECTION  
HOUSINGS

## CH Serie

- High-quality aluminium weatherproof housings up to IP66
- Free access to the camera technology
- Internal cable routing possible
- Standard includes sunshield and heater
- Heaters available as 12 VDC/24 VAC or 230 VAC
- Wide variety of accessories for individual requirements

The CHEM housing version is characterised by small dimensions and is suitable for cameras without a motorised zoom lens. The sunshield can be removed completely or pushed forwards to protect the camera against dazzle.

The CHEB standard housing for applications with pan-and-tilt heads also accommodates motorised zoom lenses. Its particular quality is the possibility of complete internal cable routing. Just as with the CHEM housing, the sunshield can be positioned in line with the focal length or removed completely.

The CHOV housing version with the fold-up sides facilitates the installation of the camera and lens. As with the other models, the sunshield can be adapted to suit the individual focal length. The internal cable routing and an optional fan guarantee reliable and sustained use.

The CHEG housing is compatible with most video cameras and lenses thanks to its large inside dimensions. Owing to the removable body the internal slide for attaching the camera and lenses is completely revealed. This facilitates the mounting and setting of the camera. In conjunction with an optional double heater, the housing withstands a temperature range of -40 °C to +50°C.

SFP

The wall brackets for all outdoor housings of the CHEM, CHEB and CHOV series offer ideal mounting conditions with their variety of applications and flexibility. They are made of cast aluminium and coated with a rugged protective paint in the housing colour. The model WBOV/P also has a junction box arranged on the side which permits internal cable routing.

The CM4 and CM5 ceiling mounts offer attractive and reliable possibilities of ceiling installation for all housings. The models can be easily installed and perfectly aligned. The model CM4 has a mounting head specially for the CHOV and CHEB housings, therefore offering the possibility of complete internal cable routing.

In addition, a number of adapters is available for special mounting applications, e.g. the CW for corner mounting, the 4PVT for mounting on horizontal surfaces and the SFP for mounting on poles.

Description/ Application	Camera power supply unit for installation in CHEB housing, 24 VAC, 400 mA	Camera power supply unit for installation in CHOV-2 housing, 12 VDC, 1 A	Camera power supply unit for installation in CHOV-2 housing, 24 VAC, 400 mA

As the CHEG housing is supplied in RAL9002, the accessories described above are not colour-matched to it. If you require the accessories for the CHEG housing, please always add **"RAL9002"**.

# VANDALISM-PROOF PROTECTION HOUSINGS AND ACCESSORIES

Protection housings TPSK and TPSC for the surveillance of vandalism-endangered areas

PROTECTION  
HOUSINGS

## TPSK/TPSC

- For installation inside buildings
- Steel plate design
- Penetration-resistant polycarbonate glass (TPSK)
- Epoxy powder paintwork
- Can be locked with key

The TPSK and TPSC housings were developed for the surveillance of vandalism-endangered areas, e.g. underground garages, underground stations, prisons, police stations and supermarkets. The housing is made of steel plate coated with epoxy powder and fitted with an internal bracket for the attachment and positioning of the video camera. The TPSK housing is protected at the front by a penetration-resistant polycarbonate pane. Both housing versions can, on request, be fitted with a heater, camera power supply unit and alarm contact which emits an alarm in the event of it being opened.

Model	TPSK-2	TPSC

ZMA-RK8

## ZM-L series

- Automatic PAL/NTSC switch-over
- Up to 500 TV lines horizontal video resolution
- PIP function: Adjustable PIP dimensions, variable position, simultaneous display of the PC and video signal
- DC 12 V power output for the power supply to one single camera
- Light-weight and sturdy aluminium housing
- User-friendly control elements and multilingual menu
- Keylock function

The extremely wide range of models of the ZM-L series comprises a host of different LCD colour monitors for diverse application possibilities. The compact ZM-L208C is ideally suited for installation in pairs in a 19" rack. Thanks to its low weight, it is also suitable for changing locations or the private sector. Other models are available with screen sizes of 15", 17" and 19" and all in the economy version in a black plastic housing or in the high-performance H versions in the more elegant aluminium housing.

All LCD monitors offer sophisticated technical features. They provide outstanding image quality thanks to their excellent resolution, the differentiated contrast and impressive brightness. Moreover, the various inputs and outputs open up a wide variety of connection possibilities. For example, the ZM-L208C has two composite signal inputs and outputs and an audio input and output.

The time-tested 8" monitor is supplied including a monitor bracket, the other units with a desktop base. Optionally available wall and installation accessories round off the series.

## CEM

- 1,200 TV lines resolution
- 9", 12", 15" and 20" CRT sizes
- Audio function in all models
- Industrial housings of metallic design

The CRT monitors of the CEM series show brilliant and high-contrast b/w pictures. All monitors have a high resolution and support the CCIR video norm. The CEM-09A and CEM-12A versions are also EIA-compatible. Moreover they are suitable for operation in various power networks and can therefore be used internationally. All models also have an internal loudspeaker. The standard cinch plugs are available for the connection of audio sources and connection to other loudspeakers. CRT monitors are still best suited for showing video images of analog cameras. They are standardised to the PAL standard and operate without interpolation in contrast to TFT monitors. In addition, the images are displayed in top quality free of distortion.

Model	CEM-09A	CEM-12A	CEM-15A	CEM-20A
Bildschirmdiagonale	23 cm (9")	30.5 cm (12")	38.1 cm (15")	50.8 cm (20")

# COLOUR MONITORS WITH FLAT CRT

CRT monitor ZM-CR series

MONITORS

## ZM-CR series

- Flat, low-reflection CRTs
- 15" (38 cm) and 21" (53 cm)
- Brilliant colour reproduction
- 2 camera inputs and outputs
- Audio function integrated per channel
- 15" model also available as high-resolution version
- 400 to 800 TV lines
- Robust metal housing
- Integrated loudspeaker

The absolutely flat CRTs of the ZM-CR series relieve strain on the eyes because the video picture is also displayed with absolutely no distortions at the edges. Moreover, the risk of disturbing reflections is almost completely excluded thanks to the flat screen surface. All monitors permit extremely sharp and brilliant colour reproduction. The very large screen area of the ZM-CR321NP is also particularly suitable for surveillance with split screen displays. The ZM-CR series integrates two separate video channels with an independent audio function in all models. High-performance loudspeakers are already incorporated into the monitor housings.

Model	ZM-CR315NP	ZM-CRH115NP	ZM-CR321NP

## BRACKETS FOR CRT MONITORS

*Brackets for 9" – 12", 12" – 14", 14" – 21" and 21" – 28" CCTV monitors*

### Brackets

- Individual and space-saving mounting of CCTV CRT monitors
- For screen sizes between 9" and 28"
- Heavy-duty brackets with infinitely variable extension
- Wall and ceiling brackets
- Also suitable for large, heavy monitors
- MIS9-12 for CEM09A or CEM12A
- MIS12-14 for CEM12A, CEM15A, ZM-CR315NP or ZM-CRH115NP
- MID14-21 for CEM-20A or ZM-CR321NP

The modular design of the monitor brackets permits virtually any arrangement in the room. In order to be able to hold each monitor with a screen size between 9" and 28", the heavy-duty brackets MIS and MID have infinitely extendible threaded rods. MIS and MID are suitable for combination with the wall bracket MWM, the ceiling brackets MCM and their extension CMP. Various elements made of light-weight but load-bearing aluminium tube serve to attach the monitor brackets to walls and ceilings. The module MWM was designed for the wall mounting of the MIS brackets, the MWM14/28 for the MIS models.

Model	MIS9-12	MIS12-14	MID14-21	MID21-28
Inside dimensions (W)	212.5 mm – 325.0 mm	275.0 mm – 377.5 mm	367.5 mm – 532.5 mm	510.0 mm – 675.0 mm

# SERVICE MONITORS

4" LCD monitor ZM-L304

MONITORS

## ZM-L304

- 4" LCD
- Light-weight and manageable
- Protective bag with screen cover and belt
- Battery case
- 9 VDC power input, power supply unit is also supplied

The light-weight, handy monitor simplifies adjustment work to the cameras. Thanks to its battery case, it is independent of a 230 VAC power supply but can also be operated with the power supply unit supplied. The belt and screen cover leave both hands free to adjust the camera and lens. Six AA batteries are required for the battery case. The monitor also has a looping output. As a result, the picture can be viewed on the camera on site and passed on to headquarters.

Model	ZM-L304
Video norm	PAL/NTSC
Screen diagonal	4"

## CTR-4000 series

- 24 hours (CTR-4024) to 960 hours (CTR-4960) maximum recording time on an E-180 cassette
- Reliable, continuous operation at a high recording density
- Direct access to important control elements
- Search function for alarm recordings and storage alarm data
- Forward and reverse playback and frame-by-frame switching
- Alarm ready even with the unit switched off
- Cascading of several VCRs and automatic switch-over possible
- Programmable timer
- Locking of all key functions possible for automatic operation
- Convenient programming with on-screen menus

The time lapse video recorders of the CTR-4000 series offer sophisticated technology for continuous video surveillance and recording. All parameters for automatic operation can be programmed using on-screen menus. Various search functions permit effective and quick work. Modern drive technology ensures trouble-free operation with long maintenance intervals. The large display panel shows the current settings and operation functions at a glance. Alarms are indicated by optical and acoustic signals. All models can be configured either for colour or high-resolution b/w recordings.

Model	XF180
Description/ Application	VHS tape, 180 minutes

Model	CTR-4024	CTR-4960

# EMBEDDED DIGITAL RECORDERS

DIGIMASTER digital recorder series

RECORDING  
EQUIPMENT

## DIGIMASTER 200

- 4, 8, 16-channel digital recorders
- 2CIF, 4CIF, CIF resolution
- Up to 3 internal hard disks without capacity limit
- Fast data export via integrated CD/DVD burner and USB interface
- Operation/configuration on the unit, via infrared remote control and Ethernet (remote software included)
- "Watermark" function

The digital recorders of the DIGIMASTER 200 series are suitable for permanent video surveillance. Easy to install, the recorders can be readily connected to any standard CCTV monitor using the composite output. The DIGIMASTER 204 has 4 channels, the models 208 and 216 have 8 and 16 channels respectively. All units offer MPEG-4 compression, permitting efficient and space-saving storage of the video sequences. The data can be stored on up to three internal hard disks. Moreover, it is also possible to export and archive the data via the USB interfaces and the integrated CD-/DVD burner.

Model	DIGIMASTER 204 lite	DIGIMASTER 204 (DR-4N-DVD)
Video norm	PAL/CCIR, NTSC/EIA	PAL/CCIR, NTSC/EIA

# EMBEDDED DIGITAL RECORDERS

DIGIMASTER digital recorder series

RECORDING  
EQUIPMENT

## DIGIMASTER 300

- 8, 16-channel digital recorders
- Recording of 200 or 400 fps
- 2CIF, 4CIF, CIF resolution
- Up to 3 internal hard disks without capacity limit
- Fast data export thanks to integrated CD-/DVD burner and USB interface
- Operation/configuration on the unit using infrared remote control and Ethernet (remote software included)
- "Watermark" function
- Special OSD for mouse control

Like the 200 series, the DIGIMASTER 300 series is ideally suited for permanent video surveillance and satisfies all the requirements placed on cost-effectiveness, reliability and easy operation. The DIGIMASTER 308 has 8 channels, the model 316 has 16 channels. The resolution, image quality and refresh rate can be individually adjusted for each channel. This permits the display and recording of videos in real time and with excellent image quality. The models of the 300 series are genuine pentaplex recorders with all the advantages in terms of live mode, recording, playback, network connection and backup.

Model	DIGIMASTER 308 (DR-8NRT-DVD)	DIGIMASTER 316 (DR-16NRT-DVD)
Video norm	PAL/CCIR, NTSC/EIA	PAL/CCIR, NTSC/EIA

## C-MP series

- Operation-friendly embedded system for small to medium-scale applications
- 4, 8 or 16 channels
- MPEG-4 compression
- Motion sensors
- Flexible access using web browser and client software

With a choice of 4, 8, or 16 channels, the C-MP series offers a reasonably priced, high-performance alternative to PC-based management systems or video cards. The 16-channel model provides 400 fields in CIF format. The optimised MPEG-4 real-time process compresses the data rate without a loss in quality. Archiving can be performed with up to 2.25 TB in the recorder itself.

Model	C-MPDVR VGA	C-MPDVR Rack	ZRA-HDD250	ZRA-HDD500
Description/ Application	VGA adapter for C-MP series	19" adapter for rack mounting	ATA hard disk 250 GB for ZR-DHD, C-MP recorder and DIGIMASTER for 24/7 operation	ATA hard disk 500 GB for ZR-DHD, C-MP recorder and DIGIMASTER for 24/7 operation

## ZR-DHC series

- Intuitive graphic user interface
- Recording process MPEG-4 with up to 400 fps
- Remote access via LAN with client and browser
- Internal storage capacity up to 2.5 TB (external up to 6 TB)
- Integrated DVD/CD-RW drive
- 8, 16 and 32 channels available

The video management systems of the ZR-DHC series satisfy the growing demands in security management and offer the flexibility of a PC. Thanks to MPEG-4 compression, real-time recordings are possible with a total of 400 fps. The models offer unique features owing to their pentaplex functions. Immediate playback and backup as well as drag & drop features ensure user-friendly operation. As a PC-based system, the ZR-DHC series has RS-232, RS-485, LPT1 and USB interfaces as well as alarm and audio channels. In addition to the VGA monitor output, the systems are equipped with a composite signal video output for multi-image display, as well as two separate composite signal spot monitor outputs. Optionally, cash register systems, cash dispensers, barcode scanners and scales can be connected using an additional module.

ZN-YH305

ZN-D2024

ZV-S306

## IP video series

- Economic launch pad into IP technology
- Large selection of cameras and lenses
- Various resolutions freely selectable
- Existing analog units can still be used
- Software included in the scope of delivery
- PTZ IP camera, also with WLAN function (for ZN-PT)

The CS-mount camera ZN-YH305 is primarily designed for use in the private sector. The inconspicuous mini dome camera ZN-D2024 is particularly suitable for discreet installation indoors and is fitted with a varifocal lens whose wide angle also permits the surveillance of smaller rooms. The use of the ZV-S306 video server converts the signals from analog cameras into IP data (MPEG-4), permitting the upgrading of existing analog systems to IP.

The IP camera series ZN-PT304 has an automatic pan-and-tilt feature and an intelligent motion sensor. A range of some 350° can be viewed owing to the pan mimic and roughly 125° with the tilt mimic. The built-in microphone produces synchronous live playback of audio and video data. MPEG-4 compression permits optimum bandwidth utilisation at up to 30 fps.

## ZN-9000

- Advanced hybrid technology
- Transmission in MPEG-4 or M-JPEG format
- Versatile day/night and colour cameras
- Convenient video and data transmission
- Video server also available as audio version

The ZN-9000 IP series comprises IP camera models as well as video transmitters/receivers and is ideally used for the upgrading of existing analog CCTV systems.

Individual transmitters and receivers optionally form an independent system and, as a result, no PC is required to show the videos. The compact cameras ZN-L9210PHA and ZN-LN9039PHA have varifocal lenses with a focal length range of 2.8 mm – 10.0 mm and 3.0 mm – 9.0 mm. The ZN-C9000 can be fitted with all CS-mount lenses of the computer range, optionally with manual or DC iris. All models integrate various alarm functions and are all equipped with BNC and LAN connections.

## MP series

- Resolution can be selected from 1.3 – 5 megapixels
- Day/night function by means of dual-ocular toggling
- Power supply via network (power over Ethernet)
- Motion detection
- Zoom function in live and playback modes
- Control of automatic lenses
- Handy and space-saving

The megapixel network camera series excels with its appealing design and outstanding image quality at a resolution of up to 5 megapixels. In combination with an image refresh rate of up to 30 fps, this ensures cinema quality. The CMOS sensor also guarantees an optimum and dynamic contrast compensation even under the most difficult environment conditions. Another special feature is the auto-Iris lens mount on the rear (on MP-2A, MP-3A and MP-5A), which, for example, permits the use of megapixel varifocal lenses with automatic iris control.

## IP video megapixels

- Complete series of H.264 megapixel cameras
- H.264 (MPEG-4 Part10) compression standard
- High luminous efficiency due to the 1/2" CMOS sensor
- 1,3, 2, 3 or 5 megapixel resolution
- Multi-streaming, up to 8 different streams
- Real Time Streaming Protocol (RTSP)
- Up to 30 fps depending on the resolution
- Day/night C/CS-mount cameras
- Power over Ethernet (PoE)
- Digital zooming in live and archive images possible

The special "MegaVideo"® architecture for image processing performs over 80 billion calculations per second and permits encoding in H.264. The new H.264 compression standard is up to 25 times more efficient than the M-JPEG standard. As a result, the network bandwidth used is reduced considerably and the recording time prolonged by the same factor. The large CMOS sensor is particularly light-sensitive. The cameras offer high resolution as well as crystal-clear images and can replace a large number of PAL cameras – with optimum resolution and significantly lower costs. No additional power supply unit is required if the camera is supplied via the Ethernet cable (power over Ethernet). Any picture detail can be digitally zoomed and displayed both in live and archive images. With their accuracy of detail, they are especially suited for the surveillance of very large areas (shops, service stations, schools, offices and banks). The cameras can also be used outdoors with the appropriate weatherproof housings. All H.264 cameras in this series are suitable for night operation (IR light) and fitted with a swivel-type IR cut filter.

# ETHERNET OVER COAXIAL CABLES

Converter to transmit Ethernet signals over coaxial cables

IP SYS-  
TEMS AND  
TRANS-  
MISSION

## Coaxi.Net

- Permits high-speed IP over coaxial cables
- For using existing 75 Ohm coaxial cables
- No configuration required
- Installation without MAC and IP addresses
- Immediate recognition in the network

With Coaxi.Net an already existing coaxial cable can be converted in an easy and reasonably priced way into a reliable IP-based connection with a high transmission speed. The advantages of the Ethernet can be used for every unit in the network via the full duplex Ethernet connection according to the IEEE standard. The converters are immediately recognised without the registration of MAC or IP addresses and integrated into the network. Coaxi.Net automatically adapts to the transmission conditions and, if required, automatically reduces the transmission bandwidth. Moreover, distances of up to 250 m can be covered with the installation of Coaxi.Net in conjunction with an RG-59 video cable at full data transmission rate.

Model	CN-HWC
Connections	Analog (BNC)/network (RJ-45)
Cable type	75 Ohm (RG-59 video cable or similar)/direct, "crossover"; autom. detection
Distances supported	250 m max. distance with full bandwidth, 10 Base-T, 100 Base-T, autom. switch-over
Power supply connection	Screw connection with removable plug
Operating voltage	Nominal 12 VDC (9 ~ 24 V working range) or 24 VAC (autom. detection of type and polarity)
Power consumption	200 mA (12 V), 100 mA (24 V)
Operating environment	-10°C ~ 50°C, 85% without condensation
Dimensions (W x H x L)	54 mm x 23 mm x 104 mm (length without connections – 83 mm)
Weight	110 g

Model	CN-WMB	CN-1U	CN-RMPSU
Description/Application	Wall mount for a single CN-HWC	19" rack mount holder for 8 single CN-HWCs, 1 HE	Power supply unit for 19" rack installation for max. 8 single CN-HWCs

## MILESTONE XPROTECT BASIS+

*IP viewing, administration and recording software (NVR)*

### XProtect Basis+

- Single-server video management system for up to 25 cameras
- Remote access with basic options
- Supports all common IP network units
- Tailor-made concepts for individual applications
- Fast and simple export
- Reliable, robust and stable
- H.264, M-JPEG, MPEG-4
- Simultaneous live and playback modes
- Intelligent PTZ control

XProtect Basis+ is a single-server video management system for up to 25 cameras per server incl. basic remote access possibility. It was developed with all the basic features for small-scale applications. The software is available with the following camera licence packages:

Model	XPB+04	XPB+06	XPB+09	XPB+16	XPB+25
Description/ Application	XProtect Basis+ 4.0 for 4 cameras	XProtect Basis+ 4.0 for 6 cameras	XProtect Basis+ 4.0 for 9 cameras	XProtect Basis+ 4.0 for 16 cameras	XProtect Basis+ 4.0 for 25 cameras

Accessories and service

The extended single-server video management system XProtect Professional is suitable for up to 64 cameras per server and offers extensive remote access possibilities. The Smart Client software can be installed as often as you want without additional licence fees. The software was developed for medium-scale applications and is available with the following camera licence packages:

Model	XPP01	XPP04	XPP09	XPP16
Description/ Application	XProtect Professional 6.0 for 1 camera	XProtect Professional 6.0 for 4 cameras	XProtect Professional 6.0 for 9 cameras	XProtect Professional 6.0 for 16 cameras

Model	XPP25	XPP36	XPP50	XPP64
Description/ Application	XProtect Professional 6.0 for 25 cameras	XProtect Professional 6.0 for 36 cameras	XProtect Professional 6.0 for 50 cameras	XProtect Professional 6.0 for 64 cameras

## XProtect Enterprise

- Multi-server video management system
- Convenient remote access possibilities
- Supports all common IP network units
- Tailor-made concepts for individual applications
- Scalable solution
- Open architecture
- Fast and easy export
- Licensing per channel
- Reliable, robust and stable
- JPEG, MPEG-4, MPEG-4 ASP, MxPEG, H.264
- Simultaneous live and playback modes
- Intelligent PTZ control (patrol and tours)
- OPC data access support

The XProtect Enterprise software is a perfect solution for applications which require a stable multi-server video surveillance system and can also be integrated into an existing IP video security system.

The system supports an unlimited number of cameras, servers and users and can be upgraded in stages. Control is convenient by means of a user-friendly user interface.

XProtect Enterprise supports the latest video compression technologies (H.264, MPEG-4 ASP, MxPEG) and, as a result, the network traffic is also minimised without the video quality suffering. The well documented software development kit (SDK) offers easy access to the application-programmed interface (API). This also permits integration with other security systems. OPC data access also allows connection to industrial and building environments.

Model	XPEBL	XPECL
Description/Application	XProtect Enterprise 6.0 basic licence	XProtect Enterprise 6.0 camera licence

## VSoIP3

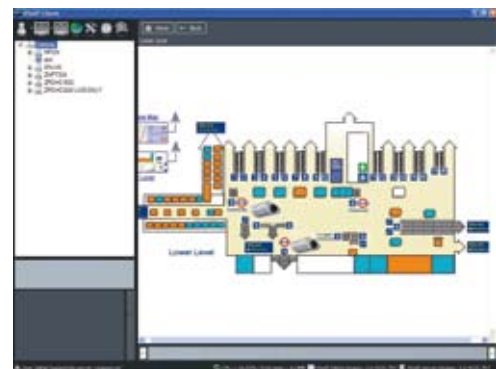

- Location-independent online configuration and surveillance
- Network recording
- Flexible recording configuration
- Multiple monitors for displaying live videos or the receiver status
- 16 or 32-channel NVR (network recorder)
- Immediate recording
- Picture-in-picture PTZ control
- Central audit trails
- Central alarm management
- Installation and user-friendly

VSoIP 3 is an intelligent network-based software solution for video surveillance over IP. The video management system consists of the software modules VSoIP-Client and VSoIP-Recorder (the relevant server is always included in the scope of delivery). The system permits both the use of existing network structures and the integration of IP-ready and analog components into a comprehensive video surveillance network.

All available settings and displays are controlled and used via the VSoIP-Client. Operation itself is simple and user-friendly. Using "drag&drop" functions, connections can be made to other cameras or PTZ-ready units can be controlled. Operation-friendly playback buttons facilitate the set-up of a mixed multiple monitor for live and playback cameras. In addition, a special multi-channel window is available for the immediate and synchronised image data display of remote cameras.

The VSoIP recorder is responsible for the actual recording and storage of all video signals. Theoretically, there is no limit to the storage capacity as the necessary hard disk capacities can be retrofitted or existing recordings can be exported onto optical storage media.

All users, units, maps and system configuration rights and setting parameters are stored in a database on the VSoIP server. At the start of recording it automatically activates the NVR (network recorder). Another function of the VSoIP server is the preparation of audit trails where all system and alarm events are registered and recorded. All server settings are made via the VSoIP Client, thus permitting easy and user-friendly configuration.

## TP-T20/TP-R20A

- Twisted-pair transmitter and receiver, for twisted cables
- Weatherproof housing IP66
- Small dimensions
- 230 VAC power supply
- Signal transmission up to 1,000 m
- Adjustable cable equalisation at the receiver

The TP-T20 creates a differential signal pair from a coaxially transmitted video signal and transmits it through a standard twisted-pair cable. This produces advantages in terms of cable costs and signal quality, especially with very long transmission routes. The twisted-pair receiver TP-R20A converts the differential signal pair back into a coaxially transmitted signal at the end of the transmission route.

Model	TP-T20	TP-R20A
Description/ Application	Twisted-pair transmitter, IP66 housing, integrated power supply unit	Twisted-pair receiver, IP66 housing, integrated power supply unit

In addition, we offer you the complete series of NVT transmission technology: Passive, active, digital transmitters/receivers, PVD (power, video, data) components, also incl. audio transmission. Request the detailed catalogue free of charge at [info@cbc-de.com](mailto:info@cbc-de.com).

### Signal amplification

- Video signal amplification, up to 1,000 m via coaxial cable
- Potential separation
- No quality losses thanks to signal amplification from 4 to 8 and 8 to 16 video distributors
- Easy installation and quick settings with jumper and potentiometer

The video distributor amplifiers VD4.8P and VD8.16P double the analog video signals from 4 to 8 or from 8 to 16 channels. Flexible configuration options permit adaptation to the input and output sources so that, for example, 1 input channel can be distributed to 15 outputs. This allows professional internal distribution to various video sources, such as digital recorders, switchers, image splitters, monitors and other end units. The ZVA-A100 video amplifier also offers electrical isolation in addition to the actual amplification of an analog video signal. Disruptive potentials or inductive interference can be suppressed or fully offset using an intermediate amplifier.

Model	ZVA-A100	VD4.8P	VD8.16P
Operating voltage	12VDC $\pm 10\%$	12 VDC (plug-type power supply unit 230 VAC)	12 VDC (plug-type power supply unit 230 VAC)
Video inputs	1 Vp-p, 75 Ohm, BNC	4 x 1 Vp-p, 75 Ohm, BNC	8 x 1 Vp-p, 75 Ohm, BNC
Video outputs	1 Vp-p, 75 Ohm $\pm 3$ dB, BNC	8 x 1 Vp-p, 75 Ohm, BNC	16 x 1 Vp-p, 75 Ohm, BNC
Output voltage	Max. 3 Vp-p	Max. 2 Vp-p	Max. 2 Vp-p
Weight	0.247 kg	1.6 kg	2.0 kg

## SW4.1B/SW8.1B

- 4/8 inputs, 1 output
- Selection of the camera input manual/automatic
- Identification of the active input by LED
- Skip function of the switching inputs not connected
- Automatic scanning by a potentiometer infinitely variable between 0.5 and 30 sec.

The SW4.1B and SW8.1B units are video switchers in an aluminium housing. They have 4 or 8 video inputs and one output each. The video input can be selected by hand or automatic switching. During automatic mode the switching duration is set with a potentiometer (from 0.5 to 30 sec.). The enabled video input and automatic mode are displayed by the red LEDs integrated in the keys.

Model	SW4.1B	SW8.1B

# MATRIX SYSTEMS AND TELEMETRY

*Microprocessor-controlled video matrix systems*

**SWITCHERS  
AND  
MATRIX**

- 4, 8, 16 or 32 video inputs
- 2 or 4 independent monitor outputs
- Remote control with up to 4 control units
- Telemetry control output
- Protective function "privacy video masking"

The video matrix systems are microprocessor-controlled and can be operated with up to 4 control units. The cameras connected can be displayed and controlled independently on up to 4 monitor outputs. The menu of the units is available in 4 languages. A programmed password protects the matrix against improper use. The telemetry can be controlled via coaxial cable or the RS-485 output. Various control elements are available to control the matrix. Telemetry receivers are also available in various designs and with various functions.

Model	SM42A	SM84A	SM164A	SM328A	DCBD
Description/ Application	4 to 2 matrices incl. telemetry function to control the DTRX3 and DTMRX receivers, desktop control unit for direct operation, remote control via DCBD	8 to 4 matrices incl. telemetry function to control the DTRX3 and DTMRX receivers, 19" version, can be controlled via DCBD, DCTEL etc.	16 to 4 matrices incl. telemetry function to control the DTRX3 and DTMRX receivers, 19" version, can be controlled via DCBD, DCTEL etc.	32 to 8 matrices incl. telemetry function to control the DTRX3 and DTMRX receivers, 19" version, can be controlled via DCK and DCJ, can be cascaded up to 9 systems	Control panel for matrix SM series up to 16 channels, no telemetry control, 12 VDC, incl. power supply unit

Model	DCTEL	DCIR	DCK	DCJ	DTMRX
Description/ Application	Control panel for matrix SM series up to 16 channels, or RS-485 telemetry receiver, desktop control unit, max. 16 cameras, 12 VDC, incl. power supply unit	IR remote control for matrix SM series up to 16 channels or RS-485 telemetry receiver, basis 12 VDC, incl. power supply unit	Control panel for matrix SM series, desktop control unit with LCD display, RS-485 to the matrix, no telemetry control, 12 VDC, incl. power supply unit	Control panel with joystick for matrix of the SM series or RS-485 telemetry receiver, desktop control unit with LCD display, implemented dome protocols of leading manufacturers, 12 VDC, incl. power supply unit	Telemetry receiver for pan-and-tilt heads, 12 functions, no preset, 230 VAC

Model	DTMRX24	DTRX3	DTCOAX
Description/ Application	Telemetry receiver for pan-and-tilt heads, 12 functions, no preset, 230 VAC	Telemetry receiver for pan-and-tilt heads, 12 functions, no preset, 230 VAC	Interface for DTRX3, to transmit the control signals via the video cable, for use with SM matrix series

## IPTH 720/721

- Flexible and very reliable
- For up to 5 kg load when used indoors
- Auto-pan function
- Dust-proof plastic housing
- Power supply either with 230 VAC or 24 VAC
- Complete with wall mount and terminal strip

Pan-and-tilt heads permit the situation-related alignment of the camera technology. They are ideally used in conjunction with motorised zoom lenses. This permits both the adaptation of the angle and the size of the close-ups. The pan-and-tilt heads can be aligned by remote control within the pan range from max. 320° and over the tilt range of 90° at any angles. Alternatively, the auto-pan function performs continuous automatic scanning between the left and right stops.

Model	IPTH720	IPTH721
Operating voltage	230 VAC	24 VAC (292 mA)
Field of application	Indoors	Indoors
Protection class	IP60	IP60
Dimensions (L × W × H)	230 mm × 120 mm × 190 mm	230 mm × 120 mm × 190 mm
Weight	2.4 kg	2.4 kg
Pan range	320°	320°
Tilt range	90°	90°
Pan speed	6°/s	6°/s
Tilt speed	3°/s	3°/s
Maximum load	5 kg	5 kg
Operating temperature	-10 ~ +45 °C	-10 ~ +45 °C

# PAN-AND-TILT HEADS OUTDOORS

Pan-and-tilt heads PTH310/910

PAN-AND-TILT HEADS

## PTH310/910

- Weatherproof to IP66
- Auto-pan with reverse delay
- Programmable fixed positions
- Robust and accurate
- For loads up to 30 kg

Pan-and-tilt heads are particularly suitable for outdoors and permit effective surveillance of open terrain. The pan-and-tilt stops in the units of the PTH series can be set individually within the feasible motion ranges of up to 345° in the horizontal and up to 360° in the vertical. The auto-pan function with reverse delay permits the automatic scanning between the stops. The PTH series contains an optional model for programming fixed positions. The pan-and-tilt heads are available for power supplies of 24 VAC and 230 VAC. A wide range of mounts and adapters are available for special locations or for the installation of additional equipment.

## DIRECT CONTROL FOR PAN-AND-TILT HEADS

*Pan-and-tilt head and lens control unit, in panel housing*

### CBZ230/CBZ24

- Housing of aluminium and membrane control panel made of polycarbonate
- Connection and power supply provided direct on the pan head
- Auto-pan control function
- Lenses with common line or polarity reversal, 6/12 VDC
- Versions 24 VAC and 230 VAC, 50/60 Hz

CBZ is a direct control unit for pan-and-tilt heads. The connection and the direct feed of the function is achieved with a multi-core cable. Motorised lenses (zoom, focus, iris) can be controlled with a common cable or with reverse polarity. 6 VDC or 12 VDC can be set as the voltage. The control is available in the versions 230 VAC or 24 VAC. In view of their favourable price and their self-explanatory, intuitive operation, these units are ideal for small-scale CCTV control systems.

Model	CBZ230	CBZ24

## RADAR surveillance

- 24/7 surveillance in all weathers
- Sophisticated and field-proven technology
- Built-in self-test and self-adjustment
- Low in maintenance
- 360° all-round surveillance
- Large detection range (800 m for vehicles, 500 m for people)
- Can be used in all weather and light conditions
- Also operates over water
- Simultaneous control of 5 PTZ cameras, e.g. C-AllView
- Pre-alarm zones
- Acoustic warning signal

The radar surveillance system is the ideal choice for large-area perimeter surveillance when early alarms and tracking of people and vehicles are required. An intruder can be identified and tracked within a radius of up to 500 m. The security team responsible is informed in this case by an acoustic signal and visual alarm. This dispenses with constant manual monitoring of the screen. The radar can control 5 separate PTZ cameras and track the intruder at the same time.

The radar system scans 360° and works in all weather and light conditions. As a result, the area to be observed can be monitored 24 hours a day. If the C-AllView thermal camera is used, a 24-hour video image is also possible. The RADAR system can even be used over expanses of water.

Model	RV-W200	RV-W500	RV-W800H	RV-RPU	RV-24PSU
Description/ Application	RadarVision detection head, intruder detection in a radius of 200 m, incl. NS3-CT software	RadarVision detection head, intruder detection in a radius of 500 m, incl. NS3-CT software	RadarVision detection head, intruder detection in a radius of 800 m, incl. ## ZS-MD4-2

- Professional outdoor surveillance
- 4 camera images simultaneously
- Reliable filter functions to suppress false alarms caused by the weather
- Intelligent alarm and sabotage detection
- Fully automatic tracking of moving objects
- 19" rack

The ZS-MD4-2 motion detector achieves a very high level of triggering reliability and is therefore particularly suitable for the surveillance of outdoor facilities, buildings and driveways. It automatically distinguishes movements with surveillance implications in the video image from harmless factors caused by the weather. Moreover, the ZS-MD4-2 takes into account differences in sizes in terms of perspective in the evaluation of movements at a distance. With 1,024 sensor fields, four surveillance zones can be defined for each camera location. In the event of motion alarms the motion detector automatically activates moving camera units. With this tracking function a suspicious object can be kept under continuous surveillance even if it passes several camera locations. Sabotage warnings and alarms are reliably detected by the ZS-MD4-2 and can be forwarded via freely programmable RS-232/RS-485 interfaces and a relay contact per channel. Alarm indicators, for example, can be connected to the relay outputs. The user-friendly software supplied permits the motion detector to be configured from a PC or laptop.

Model	ZS-MD4-2
Video norm	PAL
Operating voltage	Switch-type power supply unit 9 – 12 VDC, 800 mA
Power consumption	(12 VDC) 620 mA
Video sensor	32 × 32 sensor cells per channel, differential measurement: 256 grey scales integrated in one sensor cell
Video inputs	4× composite signal 1.0 Vp-p, 75 Ohm, BNC, termination resistors switchable
Video outputs	4× composite signal 1.0 Vp-p, 75 Ohm, BNC
Switch inputs	9 (4 alarms), passively protected
Alarm outputs	4× changeover contact
Alarm functions	Activation of the external alarm input, motion detector alarm, signal interruption, automatic restart, after signal interruption
Interfaces	1× Sub-D, 25-pin, alarm/relay; 1× Sub-D, 9-pin, RS-232; 1× Sub-D, 9-pin, RS-422/RS-485; 1× PS/2 for PC keyboard

## ZP-IR series

- Powerful IR LEDs
- Ranges up to 300 m
- 880 nm wavelength (optionally 950 nm)
- Long service life
- IP65 suitability for outdoors
- Compact and rugged design
- 12 VDC operating voltage
- Low power consumption

The LED illuminators of the ZP-IR series generate illumination in the 880 nm wavelength. Ranges of up to 100 m can be achieved with the models listed below. IR illuminators for greater distances are also available. Thanks to the combination of different beam angles, the scene to be monitored can be properly illuminated with a broad angle and at special points. Owing to their low power consumption the high-performance LEDs cut running costs by up to 65% compared with conventional lighting.

Model	ZP-IR21/25/60	ZP-IR56/20/60	ZP-IR294/20/60/120
Operating voltage	12 VDC	12 VDC	12 VDC

## IR30i series

- Integrated photosensor
- Simple installation
- Incl. wall bracket
- 12 VDC/24 VAC operating voltage
- Low power consumption and low running costs
- Even illumination
- Vandalism-proof

The IR30i series of the integrated LED infrared illuminators is the right choice for the short and medium illumination range. With the integrated Black Diamond technology, this series achieves a range of up to 30 m. The IR30i series can be supplied with 12 VDC or 24 VAC. The illumination is switched ON and OFF automatically with the integrated photocell. The low energy consumption and the long service life of the LED technology cuts running and maintenance costs. Thanks to the rugged, resistant and appealing design, the IR30i series is ideal for both indoor and outdoor applications.

Model	IR30i/30	IR30i/60	IR30i/120
Operating voltage	12 VDC/24 VAC	12 VDC/24 VAC	12 VDC/24 VAC
Power consumption	max. 15 W	max. 15 W	max. 15 W

## IR series

- IR illumination up to 300 m
- Even illumination
- Latest LED technology
- Adaptive illumination
- 10°-180° beam angle
- Incl. power supply unit und photocell
- Wide-range power supply unit 100 – 240 VAC
- Adaptive photocell
- Special heat dissipation to prolong the service life
- Vandalism-proof

The advantages of varifocal lenses have already been exploited for years in the CCTV sector and with this series you are now gaining the flexibility of variable settings with an IR light. Various models with the following beam angles are available: 10° – 20°, 20° – 60°, 50° – 100° or 120° – 180°. The illumination is very efficient, requires less than 100 W and has a very high luminous intensity and a very long service life (approx. 10 years). As a result, the running costs of this type of illumination are very low compared with conventional IR lighting or even normal visible lighting. The IR series is also supplied with a power supply unit and U-bracket. Optional accessories and special power supply units are also available.

Model	IR750/50180	IR500/1020/2060/50100/120180	IR300/1020/2060/50100/120180

Model	PB360	PBC-1	WB1
Description/ Application	This pole mounting bracket is installed between the dome and the pole in order to combine IR spotlights with a dome camera. PB360 is the 360° version. It has 2" and 4" PCDs for attachment.	If you want to attach the IR spotlights to a pole, you require the PBC-1. This adapter is supplied with clips for a pole diameter of 45 – 170 mm.	Is a small L-mount for mounting the IR spotlight and the U-bracket supplied to the wall.

Infrared lighting

Accessories and service

## UL series

- High light output
- Even illumination thanks to cosec lens technology
- Completely inconspicuous beam
- High performance in spite of low power consumption
- Long service life
- Equipped with different filters and lenses
- Optional power supply units and brackets for the connection of one or two lights

The IR lights of the UL series were developed for the inconspicuous surveillance of low-light environments. Their application is suitable where conventional spotlights cause interference or hazards. The series optionally works with wavelengths in the discreet range. The UL500 and UL300 lights are extremely powerful despite their low power consumption. Versions with cosec lenses illuminate large areas uniformly and virtually without any overexposure or underexposure. The UL-Mini model comprises small, light-weight IR compact illuminators. Their limited range is ideal for the surveillance of building entrances or indoors. Both model series are available with wavelengths of 730 nm, 830 nm or 950 nm.

Model	UL500	UL300	UL-Mini
Luminosity	500 W	300 W	100 W

## AEGIS series

- Constant luminosity
- Black Diamond technology
- 12 VDC/24 VAC operating voltage
- Integrated photocell for automatic switching on and off
- Beam angles 10°, 20°, 30°, 60°, 95°, 120°
- Incl. wall bracket (U-format)

The AEGIS series is the first infrared illuminator with constant light technology. This compensates for the LED attenuation which occurs with all LED lighting systems and therefore permits constant illumination during the entire service life.

Thanks to Black Diamond technology, AEGIS UFLED permits such an even illumination of the foreground and background of a scene that no hot spots or underexposed areas occur. In view of the low power consumption of the efficient LEDs, the AEGIS series is environmentally friendly and cost-saving. The operating voltage can be selected using the built-in electronics: 12 VDC or 24 VAC, max. 45 W. The illuminator has the protection class IP67 and is supplied with a separate 5 m connection cable incl. plug.

Model	UFLED10-8BD	UFLED20-8BD	UFLED30-8BD	UFLED60-8BD	UFLED95-8BD	UFLED95-8BD
No. of LEDs	19 LEDs Arrays	19 LEDs Arrays	19 LEDs Arrays	19 LEDs Arrays	19 LEDs Arrays	19 LEDs Arrays
Max. distance	220 m	150 m	110 m	70 m	50 m	35 m
Horiz. beam angle	10°	20°	30°	60°	95°	120°

# BLACK DIAMOND SUPER LEDS

High Fidelity™ LED infrared illuminators

INFRARED  
LIGHTING

## BDS series

- Black Diamond technology
- Uniform illumination
- Micro-refractive lenses
- Infrared illumination up to 300 m
- Beam angles 10°, 20°, 30°, 60°, 95°, 135°
- Incl. wall bracket (U-format)
- Power supply unit included in scope of delivery

Black Diamond technology permits uniform illumination of the foreground and background of a scene and so no hot spots or underexposed areas occur. Micro-refractive lenses increase the range and horizontal illumination considerably.

Dimensions	280 mm x 180 mm x 100 mm
Weight	3.8 kg

## REG-Sentry™

- Complete access control system with automatic registration plate identification
- Independent operation, easy installation and installation software
- Round-the-clock identification with REG cameras for vehicle registration plate identification
- Different identification distances – 7.5 m/15 m/18 m
- Selectable security levels ensure maximum flexibility
- Identification library for vehicle registration plates of various regions included in scope of delivery

**REG-Sentry™** is the first automated access control system. It consists of a control unit with an integrated processor, a camera for vehicle registration plate identification at the necessary identification distance and the easy-to-use Sentry Viewer software. The system represents a flexible, user-friendly solution for vehicle registration plate identification and is suitable for a host of access control applications.

The **REG-Sentry™** system was designed so that it can be used as an independent system or integrated into an already existing access control system. The system can be configured by the user so that access to a secured location can be granted or denied to vehicles on the basis of a user-defined registration plate list.

Registration data can be uploaded using the PC-based Sentry Viewer software in order to create a user-defined list. The REG camera records the registration of all vehicles which approach an access control point and transmits these data to the control unit where the data are processed and compared with the list. Then access is granted or denied.

The **REG-Sentry™** system can be used, for example, for the controlling access to car parks, enclosed residential estates, factories, warehouses, offices, schools and universities.

## ZC-HF02

- UHF modulator
- Integrated power supply unit
- Can be set with Dip switch

The UHF video modulator transmits the standard video signal 1 Vp-p on an HF carrier frequency so that it can be received with any TV set on the channels 21 – 69 (depending on the channel set on the modulator). Several modulators can be connected in series. Moreover, terrestrial TV or BK signals can be supplied to the HF input which are then available at the HF output together with the modulated video signal for feeding into the building distribution network.

Model	ZC-HF02
Description/ Application	UHF modulator for converting composite UHF, with built-in power supply unit, 230 VAC

# POWER SUPPLY UNITS

Power supply units for supplying power with 12 VDC, 24 VAC or 28 VAC

ACCESSORIES  
AND  
SERVICE

## Power supply units

- Reliable power supply
- 230 VAC input voltage
- 12 VDC, 24 VAC or 28 VAC output voltage
- Plug-type, flush-mounted, fixed-installation and rack-mounted power supply units

A selection of power supply units is available for operating the cameras with different voltages. They offer a voltage supply of either 12 VDC, 24 VAC or 28 VAC. The CV12-II and CV24-II power supply units are particularly suitable for fixed installation. Two bores for screws (8 mm) permit quick mounting on walls. All power supply units offer thermal overvoltage protection.

The CV12P is a plug-type power supply unit made of space-saving SMD components.

Furthermore, a flush-mounted power supply unit is available, ideally suited for concealed installation for use in building automation, from telecommunications, security and surveillance technology down to light technology applications. It is optimally suited for decentralised power supply, e.g. in building automation, and has an output rating of 12 W with 12 VDC output voltage.

Model	CV12P	CV12UP	CV12-II	CV24-II
Description/ Application	Plug-type power supply unit, 12 VDC, 1,000 mA	Compact, fully encapsulated switch-type power supply module with connection wires suitable for installation in flush-mounted boxes on plane surfaces	Power supply unit for fixed installation, 12 VDC, 800 mA	Power supply unit for fixed installation, 24 VAC, 400 mA

Model	CV2408-6A	CV2416-12A
Description/ Application	19" rack installation, primary input reversible; 110/230 VAC 2.4/1.2 A, 8 secondary outputs, 24/28 VAC, 1 A max. per camera, 6 A together, coloured function display (LED) for each channel	19" rack installation, primary input reversible; 110/230 VAC 4.8/2.4 A, 16 secondary outputs, 24/28 VAC, 1 A max. per camera, 12 A together, coloured function display (LED) for each channel
