

*A Tyco International Company*

# Quick Setup Guide

**VideoEdge IP Outdoor Mini-dome**

***tyco***

Part Number 8200-2646-07 B0

## WARNING

At close range, infrared light can seriously damage a person's vision. Install this illuminator with a minimum safety zone of 1.22m ( 4 ft. ) between the illuminator and the closest possible human contact.

Note: 1.22m ( 4 ft. ) is the actual measurement of the strength of the IR Illuminators that are being used.

Note: CAMERA STARTS UP IN BLACK & WHITE BECAUSE THE IR ILLUMINATOR IS DISCONNECTED.

For safety reasons, the IR Illuminator is disconnected at the factory. If the IR Illuminator were to accidentally trigger during install, it may pose a hazard to those within 4 feet. Once the camera is installed, reconnect the power lead (see manual). Ensure that you do not cover the photo cell (see manual) after power is reconnected as that may trigger the IR illuminator.

## SERVICE WARNING

DO NOT LOOK DIRECTLY INTO AN OPERATIONAL IR ILLUMINATOR.

Since IR light is invisible to the human eye, the only method of verifying a malfunctioning IR illuminator is to observe the picture at the video output location.

## SAFETY PRECAUTIONS

All the following safety and operational instructions to prevent harm or injury to the operator(s) or other persons should be read carefully before the unit is activated.

### WARNING

- To prevent fire or shock hazard, avoid exposing this unit to rain or moisture.
- Do not block ventilation openings.
- Do not place anything on top of the unit that might spill or fall into it.
- Do not attempt to service this unit yourself, as opening or removing covers may expose you to dangerous voltage or other hazards. Please refer all servicing to your distributor / retailer.
- Do not use liquid cleaners or aerosols for cleaning.
- To prevent fire or electric shock, do not overload wall outlets or extension cord.
- This unit must be grounded to reduce the risk of electric shocks.
- The installation should be made by a qualified service person.
- PoE considered a Network Environment 0 per IEC TR62101, and thus the interconnected ITE circuits may be considered SELV.

### CAUTION

- RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.  
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

## 1. Name of parts and functions

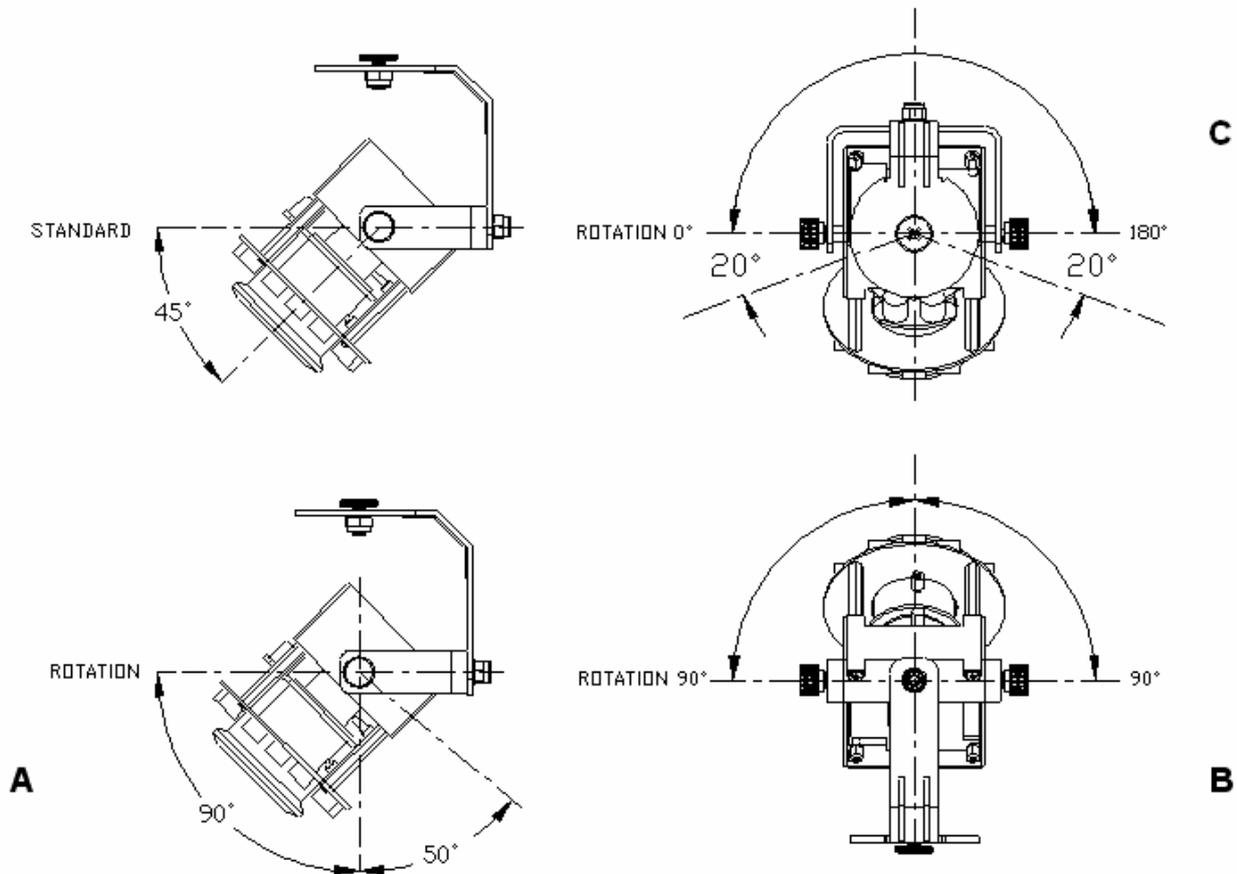

- A. Inner plate mounting holes
- B. DC level
- C. Reset
- D. PC assembly
- E. IP module
- F. USB plug
- G. Side conduct entry
- H. Back conduct entry
- I. SD card slot

## 2. Adjusting the camera zoom and focus

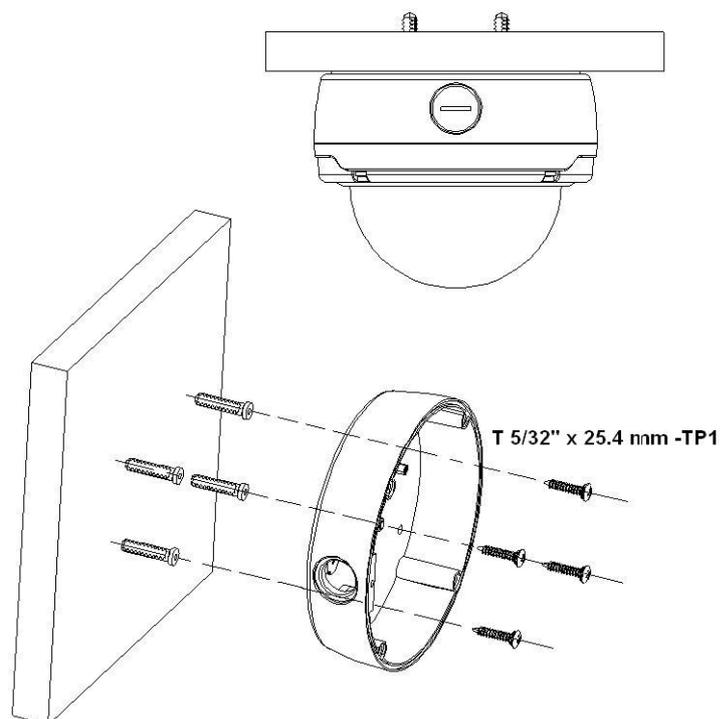

1. Loosen the zoom ring thumbscrew.
2. Turn the zoom ring to set the desired zoom.
3. Tighten the zoom ring thumbscrew.
4. Loosen the focus ring thumbscrew.
5. Turn the focus ring to set the desired focus.
6. Tighten the focus ring thumbscrew with the tool to adjust the focus.

### 3. Camera adjustment

1. Horizontal angle adjustment: turn the platform to adjust the horizontal angle B (90 degrees) and C (180 degrees).
2. Vertical angle adjustment: turn the platform to adjust the vertical angle A (90 degrees).

### 4. Mounting the housing

## 5. Install, configure and set the IP Dome Camera

The CAMERA default setting is DHCP OFF. Users can build the CAMERA working environment with a static IP address. The default static IP is **192.168.1.168**. You can set an IP address for the CAMERA if the LAN unit isn't connected to a DHCP server. Or turn on to use the DHCP protocol if the DHCP server is working in the LAN, the CAMERA will obtain an IP address automatically from the DHCP server. The CAMERA is linked by its Video Out connection via a BNC connector to a monitor's Video In connection. If this connection is there, you can see some information on the monitor screen, such as the CAMERA factory default Static IP address.

### 1. Check the IP class of your PC

**Step 1:** Select **Settings** from the **Start** menu, and then click **Control Panel**.

**Step 2:** Double-click the **Network Connections** icon. The **Network Connections** dialog box appears.

**Step 3:** Click the **Protocols** tab in the **Network Connections** dialog box.

**Step 4:** Select **Internet Protocol (TCP/IP)** and click **Properties**.

**Step 5:** Select **Use the following IP Address** to indicate that you do not wish to use DHCP, and assign IP Address 192.168.1.200 with Subnet mask 255.255.255.0. Click **OK** when you finish.

**Step 6:** Choose Close to finish the modification.

### 2. Install UPnP Packets of your PC

Microsoft Windows XP<sup>®</sup> does not start the UPnP service by default. Some packets must be installed before it is initialized, as described below.

**Step 1:** Select **Set Program Access and Default** from the **Start** menu.

**Step 2:** Click the **Add/Remove Windows Components** button when the **Add or Remove Programs** dialog box appears.

**Step 3:** Check the **Network Services** in the **Windows Component Wizard** dialog box, and then click **Details**.

**Step 4:** Check **UPnP User Interface**, and choose **OK**.

**Step 5:** Click **Next** when the original **Network Component Wizard** dialog box returns. After about one minute the UPnP installation is complete.

**Step 6:** Select **Finish** to close.

### 3. Turn on Services of your PC

After installation, turn on the relative services to start the UPnP protocol. The following procedures will demonstrate this.

**Step 1:** Select **Settings** from the **Start** menu, and then click **Control Panel**.

**Step 2:** Double-click the **Administrative Tools** icon. The **Administrative Tools** dialog box appears.

**Step 3:** Click the **Services** icon in the **Administrative Tools** dialog box.

**Step 4:** Double-click the **SSDP Discovery Service** icon when the **Services** dialog box shows up.

**Step 5:** Choose **Automatic** in the **Startup type**, and click **OK** to start it. The **Services** dialog box appears again.

**Step 6:** Double-click the **Universal Plug and Play Device Host** icon.

**Step 7:** Choose **Automatic** in the Startup type, press the **Start** button, and click **OK** to start it.

**Step 8:** Restart your system.

### 4. Set the static IP address in the IP Dome Camera.

**Step 1:** Plug in the IP Dome camera's power connection.

**Step 2:** Plug the USB connector to your PC and the USB socket on the left flank panel. A window pops up asking if you want to "Run the program", "Open folder to view files", or "Take no action".

**Step 3:** Choose "Run the program" and click "**OK**", and the "USB configuration" window will pop up.

**Step 4:** Set the Network setting and type in the IP address you desire. Before you change the IP address, you should note the factory default Static IP address ( 192.168.1.168 ).

**Step 5:** Click the "**Apply**" button in the "**USB Configuration**" window. A message pops up asking you to affirm the action as "**OK**".

**Step 6:** Click "**OK**", and remove the USB connection from the window.

**Step 7:** Click "**Exit**" at the bottom of the "**USB Configuration**" window to close the window. Or, choose the "**Launch**" button to see the local camera images directly. Before clicking "**Launch**", check your PC's IP address and use the Network connector ( RJ-45 ) to link up with your camera.

**Step 8:** If you can see the images, then the IP setting is complete.

### 5. Scan IP Dome Camera through "My Network Place"

After your installation and starting services, the UPnP protocol will take effect.

**Step 1:** Scan all **IP Dome Camera** in My Network Place.

**Step 2:** Double click the **IP Dome Camera** icon, and the video live stream will pop up automatically without assigning any IP address in Microsoft Internet Explorer.

### 6. Change the IP Dome Camera's control and operational settings.

**Step 1:** Enter the IP address in the IE Browser. You will now see the IP Dome camera images.

## Quick Setup Guide

**Step 2:** Use the buttons below the images to enter any other operational settings pages.

**Step 3:** When you change any setting, please remember to click the "**Submit**" button in each page.

**NOTE: Enable DHCP Function:** This function can only work if the LAN, which the unit is connected to, has a DHCP server. If the DHCP server is working, the IP Dome Camera will obtain an IP address automatically from the DHCP server.

**NOTE:** The default "User Name" and "Password" are admin and 9999 respectively. If either the user name or the password is incorrect, please check the input data and rectify it as necessary.

**NOTE:** When only one unit of the IP Dome Camera is connected to a computer or LAN, you can freely assign an IP address for the IP Dome Camera. For example, there is a range of IP Dome Camera IP addresses from 192.168.1.1 to 192.168.1.255. You can pick one for use from the range of the IP. It's not necessary to set MASK and GATEWAY; leave the settings as default.  
When an IP Dome Camera is connected to a WAN, you must acquire a unique, permanent IP address and correctly configure the MASK and GATEWAY settings according to your network architecture. If you have any questions regarding those settings, please consult a qualified MIS professional or your ISP.

## Specifications

Model	ADCIPE3712OCN	VideoEdge IP Outdoor Mini-dome, 3.7-12mm, clear, NTSC, w/PS
	ADCIPE3712OCPE	VideoEdge IP Outdoor Mini-dome, 3.7-12mm, clear, PAL, EU Plug, w/PS
	ADCIPE3712OCPU	VideoEdge IP Outdoor Mini-dome, 3.7-12mm, clear, PAL, UK Plug, w/PS
	ADCIPE3712OSN	VideoEdge IP Outdoor Mini-dome, 3.7-12mm, smoke, NTSC, w/PS
	ADCIPE3712OSPE	VideoEdge IP Outdoor Mini-dome, 3.7-12mm, smoke, PAL, EU Plug, w/PS
	ADCIPE3712OSPU	VideoEdge IP Outdoor Mini-dome, 3.7-12mm, smoke, PAL, UK Plug, w/PS
Camera	Image device	1/3" Sony Super-HAD CCD
	Effective Pixels	NTSC:768 x 494, PAL:752 x 582
	System	NTSC/ PAL
	CCD Setting	BLC, AGC, AWB, FL / Mirror / Shutter Speed 1/1000
	IR wavelength / IR Length	700~1100nm (built-in 850nm) / 25m
	Min. Illumination	0.5 Lux @F1.6, 0 Lux IR on
	Lens	3.7~12mm Vari-focal auto iris DC drive lens
Image	Compression	MJPEG / MPEG4
	Resolution	D1/ 2CIF/ CIF
	Frame-rate	30 (25) / 24 / 15, 5 fps, adjustable
	Picture size (quality)	MJPEG: 4~64KB MPEG4: 64Kbps ~ 8Mbps (Bit-rate)
	Motion detection	Motion Detection (96 zones, 5 levels)
Network	Interface	Ethernet (RJ-45 wired, 10/100 base-tx), MDIX support
	Protocols	TCP/IP, DHCP, HTTP, ICMP, UPnP, ARP, DNS, DDNS, PPPoE, *FTP, *SMTP, RTP, RTSP
	Throughput	2.0M bytes/sec
Software	Web browser	Microsoft IE 6.0 or above
	Development tools	ActiveX / HTTP-API / SDK
	Security	Multiple level / Multiple users / IP address filtering
Connectors	Video output	1.0 Vpp, 75 ohm, composite, negative, BNC x 1
	Alarm I/O/Reset	1 / 1 / 1
	SD card	Alarm and Schedule recording / update
	USB	Mini Type , 1.1 Slave for Configuration / Update
	Reset	Factory Default
Others	Power requirement	POE/802.3af class 3, DC 12V/750mA
	Power current consumption	700mA IR On, 500mA IR OFF
	Operating Temperature	0°C ~ 50°C (32°F ~ 122°F)
	Dimensions	110mm(High) X 142 mm (Diagram)
	Approvals	FCC, CE, RoHS
	Accessories	User manual x 1

\*Specifications are subject to change without notice.

\*\*FTP and SMTP functions for PAL version only.
