## Multi-point function

BLUETREK Crescendo supports multipoint technology, which allows you to use one headset with two different Bluetooth mobile phones. Please see the instructions as below:

### Enable the multi-point function

1. Pair the headset to the mobile A (Please refer to "pairing" section).
2. Long press the Vol + and the Vol - button together on the headset under stand-by mode, when heard a "beep", release the buttons and you will hear "Multi-point on" prompt to finish, the multi-point function will be enabled.
3. Press Main button and the Vol - button together to reset the hardware, the headset will turn off automatically.
4. Press and hold the Main button for about 5 seconds to enter into pairing mode, then pair it to the mobile B.(Please refer to "pairing" section).
5. Turn off and turn on again the headset. The 2 mobiles will be connected automatically.

## Disable the multi-point function

Long press the Vol + and the Vol - button together on the headset under stand-by mode, when heard a “beep”, release the buttons and you will hear “Multi-point off” prompt to finish, the multi-point function will be disabled.

Answer a call while talking on the other paired phone

- To answer the second call and put the current call on hold, double press the Main button to swap
- To answer the second call and terminate current call , press once on the Main Button
- If reject the second call, press the Main Button for 2 seconds

\* To avoid issues switching between calls, suggest use the call control button on the headset rather than your phone controls.

## Setting menu

Under setting menu, you can set.

**“Say a command prompt”** - Enables or Disables the **“Say a command prompt”**. With it disabled, you will hear a beep instead of voice command.

- Incoming call announce - Enables or Disable the Incoming call ID prompt and voice answer functions (this function may not available on some phones).
- Save favorite - A phone number can be saved on the headset after you received an incoming call.
- Voice control help
- Turn off voice control - Turns off the voice control. To re-enable, hold the “Vol+” and “Vol-” button simultaneously for about 6 seconds.

### Reset the Crescendo headset

If the headset fail to communicate or any abnormal behavior, you may need to reset your headset. Reset the headset will deletes all pairing information, reset the voice interface and reboot headset back to pairing mode.

To reset your headset, press main button together with “Vol +” for 6 sec until the red LED flashes.
