

StorageReview.com names the new WD Caviar™ 80 GB EIDE hard drive the king of the 7200 RPM capacity hill.

Ziff Davis WinBench 99

Windows 2000 Professional using NTFS

Read what **StorageReview.com** has to say about the new WD Caviar 80 GB 7200 RPM hard drive.

“The yield size of 80 gigs finally dethrones IBM’s long-standing 75 gig Deskstar 75GXP as the king of the 7200 RPM capacity hill.”

“With the [WD]800BB, Western Digital targets end-users seeking high performance without the added costs of going to a SCSI-based drive.”

“Featuring 27 gigs per platter, the [WD]800BB again allows WD to claim the 7200 RPM density crown.”
