Preparing to Connect My Multifunction To My Network

Network Requirements

Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Wireless Connection

Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.

Next >>

Preparing to Connect My Multifunction To My Network

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.

<< Previous

Next >>

Notes on Network Connection

The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

The machine cannot be used over a wireless and wired connection at the same time.

Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of application software to be installed.)

IMPORTANT

- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions and do not remove the Setup CD-ROM during restarting. The installation resumes once your computer has restarted.

• If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.

Software Installation

Do not connect the wireless LAN setup cable yet. Software installation requires temporary use of the wireless LAN setup cable.

Step One

Turn on the computer, then insert the Setup **CD**-**ROM** into the CD-ROM drive.

Step Two

Double-click the **Setup** icon of the CD-ROM folder to proceed to the following screen.

<< Previous

Next >>

Step Three

Enter your administrator name and password. Click OK.

	Type your password to allow Setup to make changes.	
	Name: Student	
	Password:	
▶ Details		
?	Cancel	

If the CD-ROM folder does not open automatically, double-click the CD-ROM icon on the desktop.

If you do not know your administrator name or password, click Help ? , then follow the on-screen instructions.

Step Four

Click Easy Install. Click Install.

The drivers, application software, and on-screen manuals are installed. Note: If you want to select particular items to install, click Custom Install.

Step Five

Select Use the printer on network, then click Next.

Select the printer connection method
Use the printer via USB Select this option to use the printer via USB.
Use the printer on network Select this option to use the printer on network.
Back

Follow any on-screen instructions to proceed with the software installation.

Step Six

When the Printer Detection screen appears, click Next.

STEP 1	
License Agreemen	Printer Detection
STEP 2	
Installation	Start searching for the printer on the network. Click [Next].
STEP 3	Click [Cancel] to cancel the installation.

IMPORTANT

If the Printer Connection screen appears instead of the screen above, the connection method is not correctly selected in 5.

Follow on-screen instructions and proceed with the installation. Click Exit on the installation complete screen, then start again from 2 and be sure to select Use the printer on network in 5.

Step Seven

Make sure the machine is turned on, then click **OK**.

When the Set Up New Printer screen appears, click Next.

Note:

If the Detected Printers List screen appears, click Set Up New Printer.

Step Nine

When the **Connect Cable** screen appears, connect the machine to the computer with the wireless LAN setup cable. Follow the on-screen instructions and click **Next**.

Connect Cable

Follow this procedure.

1. Connect the printer and the computer using the wireless LAN setup cable.

2. Click [Next], and then wait until the printer is detected.

Printer detection may take some time. If the printer has not been detected, check that the printer is on and that the cable is connected, and then click [Next] again.

Cancel	Next
--------	------

Step Ten 10-A

If the **Detected Access Points List** screen appears: If the screen below does not appear, perform **10-B**.

Access Points

The following access points were detected. Select the access point to connect to, and click [Connect].

WPA2 abcdefig 6 WPA Mylletwork 11 Network Information Update fo connect to this access point, enter the network password, and then click Connect]. (2)	Level	Encryption	Access Point Name (SSID)	(1)	Channel

	0.00	upert to this	access point enter the ne	twork password	and then click
	Conne	ect].		twork password,	

- 1. Select the target access point name/network name (SSID).
- **2.** Enter the network key.

Enter upper and lower case letters of the alphabet correctly. Letters are case sensitive.

To use WEP key number 2, 3 or 4, click WEP Key Number, then specify the WEP key number.

3. Click Connect

Go to Step Eleven.

Note:

If the target access point is not displayed on the Detected Access Points List or Access Points screen, refer to the printed manual: Network Setup Troubleshooting.

For details on how to check the access point name/network name (SSID) and network key, refer to the manual supplied with your access point or contact its manufacturer.

Step Ten 10-B

If the Confirm Connection Access Point screen appears.

Confirm Connection Access Point

Printer's network connection will be set up by connecting to the following access point. Do you want to continue?

Access Point: seescothree

Clicking [Yes] will let this software obtain access point information saved in your keychain. If the 'Confirm Access to Keychain' dialog appears, click [Allow].

If you want to select the connection access point manually, click [No].

Make sure that the target access point is displayed, then click **Yes**. If a screen asking for permission to access the keychain appears, click **Allow** or **Allow Once**.

Canon IJ Network Tool wants to use your confidential information stored in " in your keychain.

The authenticity of "Canon IJ Network Tool" cannot be verified. Do you want to allow access to this item?

Note:

If the target access point is not displayed in the **Confirm Connection Access Point** screen, click **No**, then perform **10-A**.

Step Eleven

When the Disconnect Cable screen appears, remove the wireless LAN setup cable, then click **Next**.

Step Twelve

Click **Complete** or **OK** on the **Setup Completion** screen.
