## 1. BEFORE STARTING

1. This set is exclusively for use in cars with a negative ground 12 V power supply.
2. Read these instructions carefully.
3. Be sure to disconnect the battery “⊖” terminal before starting. This is to prevent short circuits during installation. (Figure 1)

Figure 1

## 2. PACKAGE CONTENTS

## 3. GENERAL CAUTIONS

1. Do not open the case. There are no user serviceable parts inside. If you drop anything into the unit during installation, consult your dealer or an authorized CLARION service centre.
2. Use a soft, dry cloth to clean the case. Never use a rough cloth, thinner, benzine, or alcohol, etc. For tough dirt, apply a little cold or warm water to a soft cloth and wipe off the dirt gently.

## 4. CAUTIONS ON INSTALLATION

1. Prepare all articles necessary for installing the main unit before starting.
2. This model is used with the LCD panel slid forwards (shell loading system). On some types of cars, the LCD panel may touch the dashboard or shift lever, in which case it cannot be installed. Check that the set will not hamper operation of the shift lever before choosing the place of installation. (Figure 2)

Figure 2

3. Install the unit within 30° of the horizontal plane. (Figure 3)

Figure 3

4. If you have to do any work on the car body, such as drilling holes, consult your car dealer beforehand.

5. Use the enclosed screws for installation. Using other screws can cause damage. (Figure 4)

Figure 4

6. The source unit has mounting screw holes for NISSAN (N marks) and TOYOTA (T marks) vehicles.

Figure 5

## 5. INSTALLING THE MAIN UNIT

### ■ Universal Mount

1. Place the universal mounting bracket into the instrument panel, use a screwdriver to bend each stopper of the universal mounting bracket inward, then secure the stopper as shown in Figure 6.
2. Wire as shown in Section 8.
3. Insert the main unit into the universal mounting bracket until it locks.
4. Mount the outer escutcheon so that all the hooks are locked.

#### Notes:

- 1) Some car models require special mounting kits for proper installation. Consult your Clarion dealer for details.
- 2) Fasten the front stopper securely to prevent the main unit from coming loose.

#### • Console opening dimensions

Figure 6

## ■ Fixed Mount (TOYOTA, NISSAN and other ISO/DIN equipped vehicles)

This unit is designed for fixed installation in the dashboard.

If the vehicle is equipped with a factory-installed radio, install the main unit with the parts and screws marked (\*). (Figure 8)

If the vehicle is not equipped with a factory-installed radio, obtain an installation kit to install the main unit in the following procedure.

1. Remove the screws from both side of the main unit. Then, at either side, lift the leaf spring until the engaging claws are released from the holes, and slide the spring to the di-

rection of arrow to remove it. Repeat the same for the other side to remove the springs from the both sides. (Figure 7)

2. Secure the mounting brackets to the chassis as shown in Figure 8. Holes are pre-tapped for TOYOTA and NISSAN vehicles; modification, such as drilling new holes, of the mounting brackets may be required for other models.
3. Wire as shown in Section 8.
4. Secure the unit in the dashboard, and then reassemble the dashboard and the centre panel.

Figure 7

Figure 8

\*: The screws with this mark are enclosed in this set.

★: The parts and screws with this mark are used to install radio or included in the installation kit.

Note 2

**Note 1:** In some cases, the centre panel may require some modification (trimming, filling, etc.).

**Note 2:** If a hook on the installation bracket interferes with the unit, bend and flatten it with a nipper or a similar tool.

## 6. REMOVING THE MAIN UNIT

1. When the rear of the main unit has been secured with the method shown in Figure 6 unfasten the special screw.
2. Remove the outer escutcheon.
3. Insert the hook plate between the spring and the universal mounting bracket, fit tab (B) of the spring into hole (A) of the hook plate, then

pull the main unit out by the hook plate. (Insert both the right and left edges of the hook plate.) (Figure 9)

**Note:** Keep the hook plate. You cannot remove the main unit without disengaging the hook plate.

Figure 9

## 7. CAUTIONS ON WIRING

1. Be sure to turn the power off before wiring.
2. Be particularly careful where you route the wires.

Keep them well away from the engine, and exhaust pipe, etc. Heat may damage the wires.

3. If the fuse should blow, check to see if the wiring is correct.  
If it is, replace the fuse with a new one with the same amperage rating as the original.
4. To replace the fuse, remove the old fuse of the power supply lead and insert the new one. (Figure10)

\* Power supply lead for the tuner amp unit : 15A FUSE

\* Power supply lead for the main unit : 3A FUSE

**Note:** There are various types of fuse holder. Do not let the battery side touch other metal parts.

### ⚠ CAUTION

After the connection, fix the lead by a clamp or insulation tape for protection.

Figure 10

# 8. WIRE CONNECTION

\*1: When the unit is installed in a **1998 or later Volkswagen** model, make sure to interrupt the <<Remote>> output. Disconnect the <<blue/white>> wire and insulate the front ends of this lead. A breakdown may occur if the lead is not disconnected, or front ends are not insulated.

\*2: In certain vehicles - **Volkswagen/Opel/Vauxhall** - it is necessary to exchange the accessory <<Red>> and the main power <<Yellow>> connection, to avoid overload and loss of memory.

\*3: Connecting the PHONE MUTE Terminal

The lead included with the unit must be connected to the specified position of the vehicle's connector in order to use the "**triggered audio mute for cellular telephones**" function.

\*4: Use the attached extension lead when necessary. (Provided with this unit)

**Note** : Before making any installation, disconnect the car battery - (negative) cable.

\*5: If a 5.1 ch Surround Decoder (DVH923, sold separately) is connected and the amp of this unit is used, set the select switch to "**LINE IN**". Then the AUDIO OUT (IN) terminal of the Tuner Amp Unit is only available for audio input, not outputting the audio.

(LINE IN) D N (LINE OUT)

\*6: Connect to a separately sold external amplifier with a separately sold RCA cord (L, R).

**Note** : When the 5.1 ch Surround Decoder is connected, these terminals are only available for audio input.

\*7: Connect to a Rear View Monitor (sold separately) for the rear seat.

\*8: Connect to separately sold VTR equipment with a separately sold connection cord or CCD camera (Sold separately).

\*9: Connect to a separately sold navigation device.

## ■ Connecting the Accessories

### • Connection to the external amplifier

The external amplifier can be connected unless the 5.1 ch Surround Decoder is connected. For detailed information, refer to the instruction manual of the 5.1 ch Surround Decoder.

### • Connection to the CCD camera for vehicle

The CCD camera for vehicle can be connected to CCD/VISUAL 2 terminal on the tuner amp unit. For detailed information, refer to the instruction sheet or manual for the CCD camera.

#### Notes:

- A power supply box (sold separately) is required for connection of the main unit and the CCD camera.
- While the CCD camera is used, the navigation cannot be turned on.
- The power supply box for camera CAA147 cannot be used. Please use the CAA188 instead.

### • If the specified lead of the cellular phone is connected to the phone mute lead of the source unit, the audio mute is available when the cellular telephone is used.

For audio mute setting in cellular telephone use, see page 63.

### • DAB (Digital Audio Broadcasting)

When the DAB is to be connected, use the CeNET connector. For detailed information, refer to the instruction manual of the DAB.

For DAB connection, the DAH913 can only be connected. The DAH9500Z cannot be connected.

### • TV Tuner

When the TV TUNER is to be connected, connect the CeNET connector and RCA PIN (yellow). For detailed information, refer to the instruction manual of the TV TUNER.

## ■ Connecting the parking brake lead

Connect the lead to parking brake lamp earth in the meter panel.

#### Notes:

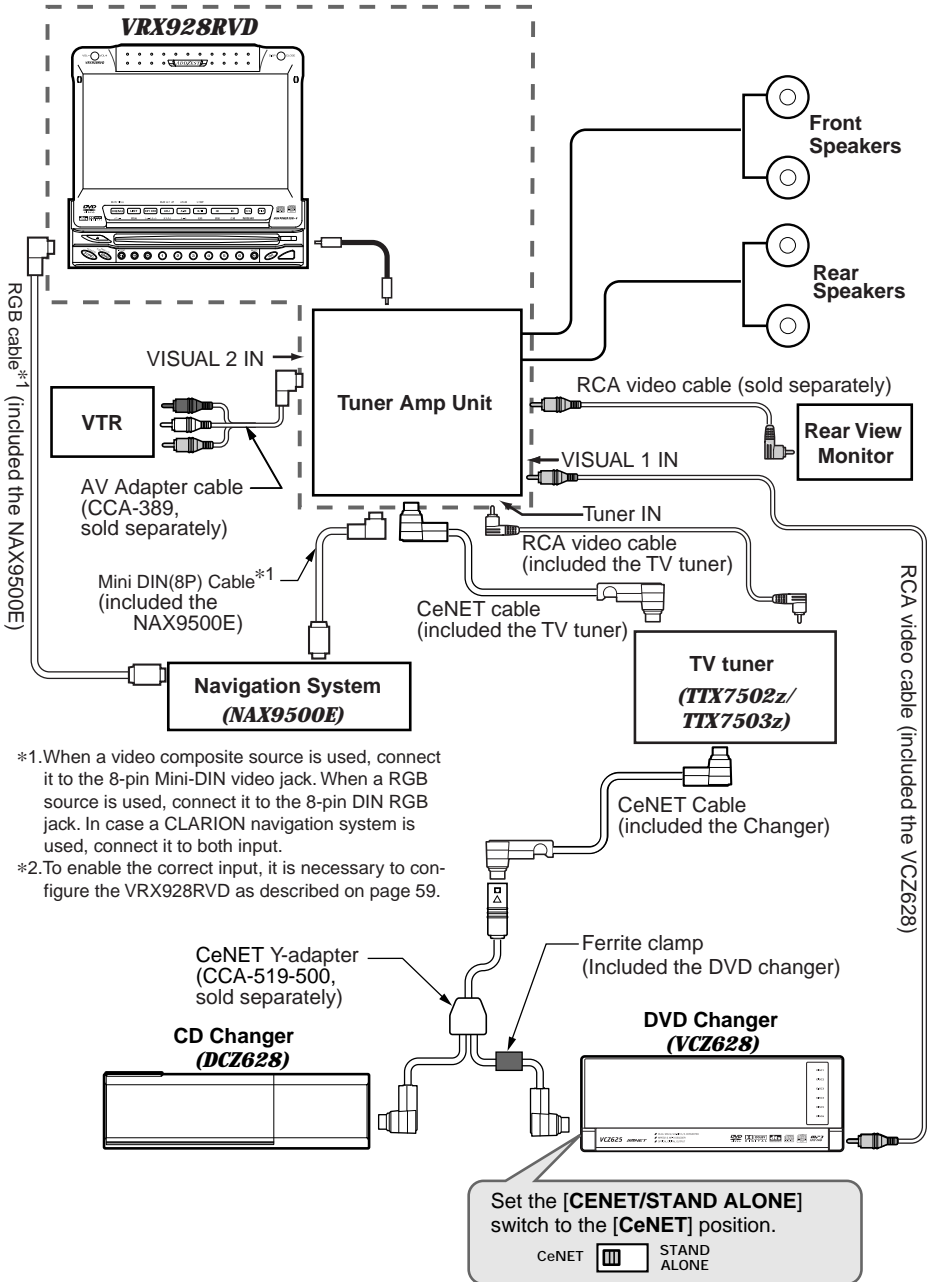

- Connecting the parking brake lead to lamp earth allows you to watch TV/VTR/DVD video/video CD when the parking brake is engaged.
- When the parking brake lead is not connected, the monitor will stay off.

# 9. SAMPLE SYSTEMS

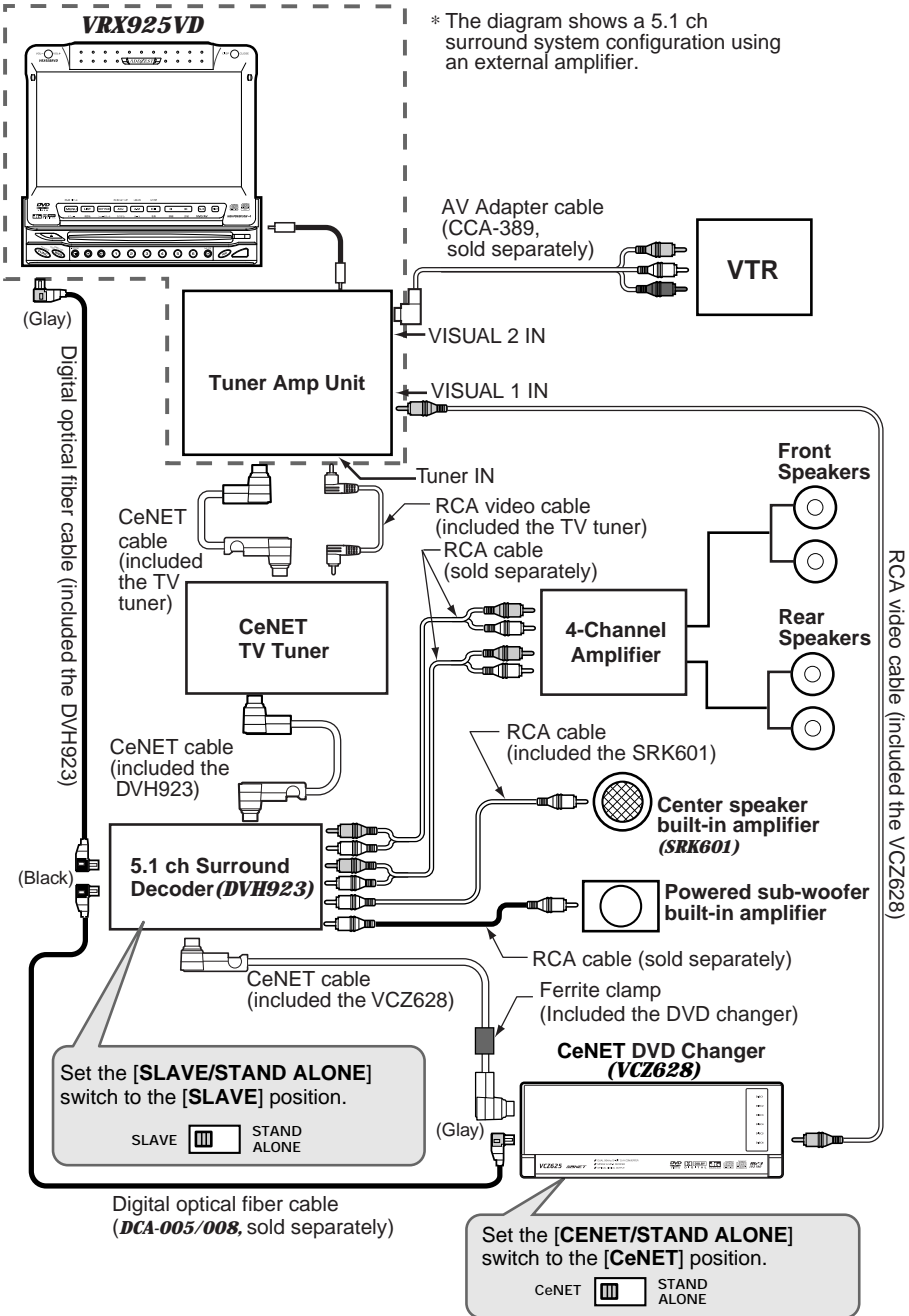

## ■ Sample System 1

\*1. When a video composite source is used, connect it to the 8-pin Mini-DIN video jack. When a RGB source is used, connect it to the 8-pin DIN RGB jack. In case a CLARION navigation system is used, connect it to both input.

\*2. To enable the correct input, it is necessary to configure the VRX928RVD as described on page 59.

■ Sample System 2

### ■ Sample System 3

A 5.1 ch surround system configuration is made using the built-in amplifier of the Tuner Amp Unit. The diagram below shows the different part from Sample system 2.
