Honeywell

F300E-Series

Honeywell's Most Efficient Air Cleaner

It's The High-Performance, Low-Maintenance Solution To Cleaner Air!

Advanced Technology – Places an electric charge to collect up to 99%* of airborne particles.

Highly Effective – Captures both microscopic particles like dust and smoke in addition to larger contaminants like mold spores and pet dander.

Low Maintenance – No replacement needed. Requires only periodic washing of air cleaner cells.

Superior Performance – The F300E is up to 30 times more efficient at capturing airborne particles compared to a standard one-inch filter.

*Sold separately

Helpful Reminder – The optional wireless AirWatch™ system* reminds you when to wash the air cleaner.

5-YEAR WARRANTY

Three-Stage Filtration – Particles enter three layers of filtering, with optional exclusive electrostatic postfilter.

Exclusive 10-year Clean Coil Guarantee™ – Gives you added peace of mind.

Meets American Lung Association® Health House® Guidelines.

Whole-House – Cleans the air in all rooms throughout the home.

Widely Compatible – Works with all gas, oil and electric forced air furnaces and air conditioning systems.

Easy to Upgrade – Get even higher performance by adding an optional postfilter.

Description:

The Honeywell F300E Whole-House Electronic Air Cleaner

is the most advanced and easy-to-use solution for improving a home's indoor air quality. When installed into the home's heating and cooling system, an Electronic Air Cleaner traps and filters up to **99%*** of airborne particles passing through the system to make sure cleaner air is distributed to all rooms in the home. It works by placing a charge on airborne particles and then collecting them like a magnet. Plus, Electronic Air Cleaners are low maintenance – simply wash the cells in a dishwasher or sink when needed.

With an exclusive 10-year Clean Coil Guarantee™, stylish looks and optional AirWatch™ system, the F300E is the high-performance air cleaning solution.

5 of 110

One Easy Number: (952) 929-1618

The Average Person Breathes 3,400 Gallons of Air Each Day* What Are You Breathing In?

Highly Effective – Deep-pleated media filters have a large surface area to capture more airborne particles. Captures both microscopic particles like dust and smoke in addition to larger contaminants like mold spores and pet dander.

Replace Less Often – Lasts up to four times longer than a standard one-inch furnace filter. Replace every 6-12 months versus monthly or quarterly changes.

Simple Maintenance – Simply open the door to replace the filter.

Easy to Upgrade – The F200E can be easily converted to a higher-performance electronic air cleaner.

Superior Performance – The F200E is up to 40 times more effective and is up to 97% more efficient at capturing airborne particles compared to a standard one-inch filter.

Whole-House – Cleans the air in all rooms throughout the home.

Widely Compatible – Works with all gas, oil and electric forced air furnaces and air conditioning systems.

Meets American Lung Association® Health House® Guidelines.

154970	EA	1	F100F 1038 HW 20" x 25" Media AC

* Based on initial efficiency testing of new filters tested at 3-10 micron particles at 492 feet per minute of airflow.

Did you know...

that 99% of particles in the air are invisible to the naked eye?

Standard one-inch air filters trap **less than 1%** of those invisible particles, allowing them to re-circulate in the home. The Honeywell F500A captures **99.97%** — which is about as close to “**all**” as you can get — of particles as small as 0.3 microns that pass through it. This includes pet dander, bacteria, pollens and more which can trigger allergies and irritate eyes and throats. Best of all, the F500A is used for forced air systems and cleans the air in an entire home, unlike portable cleaners that are limited to select areas.

HEPA stands for high-efficiency particle arresting, which most physicians recommend for allergy treatment programs. The Honeywell F500A Whole-House HEPA Air Cleaner provides powerful, **3-stage filtration** to deliver the cleanest air possible throughout the home.

HEPA — media filter captures at least 99.97% of 0.3 micron particles that pass through it.

Helpful Reminders — Wireless Airwatch™ indicator provides filter change notification.

Quiet operation

Meets American Lung Association® Health House® Guidelines.

Requires no maintenance — except periodic, quick-and-easy filter replacement.

Three-filter system delivers true efficiency —

1. Activated carbon filter reduces odors.
2. The high-efficiency pleated pre-filter extends the HEPA filter life, so you can wait as long as three years to replace it.
3. The HEPA filter traps remaining particles and delivers clean air to the home.

**5-YEAR
WARRANTY**

ACE #	PK	UM	DESCRIPTION	
154500	EA	1	F500A 1000 Enviracaire HEPA	Whole House Air Filter

Features:

- SnapLamp™ features replacement lamp handle with detachable replacement bulb, UC18W or UC36W, to make replacement more economical
- SmartLamp™ Control Algorithm determines optimal UV lamp usage
- SmartLamp™ LED shows bulb life and replacement
- Reduced power consumption and extended bulb life
- Communicates with other home appliances through EnviraCom™ three-wire communications bus
- Automatic brownout and high temperature protection for UV lamps
- Return air models supplied with integrated airflow sensor to monitor air flowing through ductwork
- Dual-purpose reset button:
 - Commands lamp on with a single one-second push
 - Resets internal lamp run-time timer after bulb replacement with extended five-second hold
- UV-C light kills airborne bacteria and surface mold
- UV lamp does not produce ozone
- Easy lamp maintenance with quick, easy bulb replacement
- Sealed unit prevents accidental installer/homeowner contact with high voltage and ultraviolet rays
- Safe design prevents lamp from lighting unless base is correctly mounted on HVAC duct
- Lamp light indicator to safely view lamp operation
- Power cord that plugs into 120 Vac electrical outlet
- Five-year limited warranty

Electrical Ratings:

Voltage Rating: 120 Vac, 60 Hz.

Current and Power Ratings:

Model	Input Power (A)	Bulb Wattage (W)
UV100E 1043 (1- Lamp)	0.46	18
UV100E 2009 (2- Lamp)	0.62	36 (each bulb)
UV100E 3007 Surface Treatment System	0.74	36

Description:

When installed in forced air heating and cooling systems, the UV100E Ultraviolet Systems kill airborne or surface microorganism contaminants like mold and bacteria. The UV systems use patented SmartLamp™ control technology that monitors the HVAC system to operate the lamps only when needed. This technology extends bulb life up to five times and reduces power consumption, lowering operating costs. The UV systems also include local diagnostics with the SmartLamp™ LED and reset capability.

Efficiencies:

- **UV100E Surface Treatment System:**
Kills up to **99.9%** of mold on system cooling coils.
- **UV100E Air Treatment System (dual-lamp):** Kills up to **87%**

EnviraCom™ Communications Capabilities:

- Communicates with homeowner through three-wire communication bus using 24 Vac thermostat connections.
 - Hooked up to single-lamp and dual-lamp Air Treatment System: uses thermostat load information instead of airflow sensor.
 - Hooked up to Surface Treatment System: uses thermostat load information to operate during times evaporator A-coil may be exposed to moisture to extend bulb life beyond two years.
- Sends messages to communicate reset and receives remote reset, when available.
 - Lamp change indication cannot be reset by cycling power.
 - When EnviraCom™ is transmitting messages, shows flashing green EnviraCom™ LED on bottom of unit.

154826	EA	6	UV100E 3007 HW Coil Irradiation	Ultraviolet

The Environmental Protection Agency (EPA) warns that the air inside the home can be up to 100 times more polluted than the air outside.

Features:

- Permanently traps and removes 80% of virus-sized particles (0.01 microns) when new.
- Traps and permanently removes 94% of bacteria-sized particle (0.35 microns) when new.
- Recommended air flow is up to 2000 cfm.
- Resistance with a new media ranges from 0.10" w.g. (at 1000 cfm) to 0.29" w.g. at 2000 cfm.
- Unit operation is completely silent.
- No washing of cells required. Beyond replacement of the disposable media, the only maintenance required is wiping of the ionizing wires and control electrode.
- Media replacement is recommended one time per year.
- Replacement media is #501 Aprilaire Replacement Media.
- 120V AC $\pm 15\%$. Unit equipped with 6-foot grounded cord with plug.
- Power usage does not exceed 60 watts.
- Outer housing is heavy gauge, pre-assembled galvanized steel, with an electrostatic painted finish.
- Door is closed with a positive mechanical latch.
- UL listed.
- Warranty is for two years with the exception of the disposable media and inner housing seals.

Description:

The Aprilaire Model 5000 is the best choice for healthy homes, removing up to **98%** of harmful particles—24 hours a day, 7 days a week and **365 days a year**.

When compared to portable or whole-home units, the Aprilaire Model 5000 brings the most effective electronic air cleaning to every room in a home for a fraction of the cost. That means value, convenience and unmatched performance. No wonder the leading "Product Ratings" magazine listed the Aprilaire Model 5000 **#1 for three years running**.

In addition, it permanently traps and kills captured bacteria and spores and is the best air cleaner for removal of virus-sized particles.

No other electronic air cleaner works as effectively—or is as easy to maintain and operate—as the Aprilaire Model 5000.

ACE #	PK	UM	DESCRIPTION
156500	EA	16	5000 Aprilaire Electronic Air Cleaner

The 2200, 2400, 2250 & 2275 whole-house media air cleaners eliminate airborne dust, pet hair, pollen and pollutants in the home.

Features:

- Permanently traps and removes at least 97% of pollen-sized particles (5.0 microns) when new.
- Traps and permanently removes at least 70% of mold- and spore-sized particles (3.0 microns) when new.
- Removal efficiency increases as the filter loads.
- Recommended air flow is up to 2000 cfm.
- Resistance with a new media ranges from 0.07" w.g. (at 800 cfm) to 0.29" w.g. at 2000 cfm.
- Unit operation is completely silent.
- The only maintenance required is replacement of the disposable media.
- Media replacement is recommended after one to two years depending on air flow.
- Outer housing is heavy gauge, pre-assembled galvanized steel, with an electrostatic painted finish.
- Door is attached with four sturdy posts.
- Warranted for the lifetime of the product with the exception of the disposable media and inner housing seals.
- UL classified.

Clean Air

Dirt
Pet Dander
Allergens
Chemicals
Pollen

Benefits:

Healthier Home Environment—Permanently traps allergy-causing pollen-sized particles (5 microns and larger) at a rate of **97%**, helping to minimize the risk of asthma and allergy attacks. Permanently traps mold and spore particles (3 microns and larger) at a rate of 70%, helping to reduce problems with mold-induced illnesses.

Long Service Life—The disposable filter media lasts 1 to 2 years, so there is no need for monthly or bi-monthly filter changes or cell cleanings. It just takes minutes to do, and many homeowners simply have their local dealer do it as part of the annual servicing of their heating and cooling equipment.

High Quality and Completely Reliable—The Aprilaire Media Air Cleaners feature limited lifetime warranties. They use no electricity and require no maintenance other than the replacement of the filter media. And because of their large broad door seals, they have the lowest air leakage and bypass.

Invisible and Silent—

It mounts to the heating and cooling equipment, out of the way and out of sight. There are no distracting snapping or crackling sounds like those generated by traditional platetype electronic air cleaners.

Space-Gard®

Non-Electronic High-Efficiency Air Cleaner For Restaurants And Dining Area Applications

Benefits:

- Continuous smoke removal
- Fresher, cleaner air for customers and employees
- Lower heating and cooling costs
- Extend life of furniture and furnishings
- High capacity
- Minimum maintenance and service
- Easy to install

Specifications:

Size:	23-3/8" high, 16-3/4" wide, 49-3/8" long
Shipping Weight:	125 lbs.
Electrical Data:	120 volts, 60 Hz, 6.5 amps, 400 watts. Connect 8-foot power cord supplied to three wire grounded outlet.
Filtering Media:	78.6 sq. ft.
Air Flow:	Low 740 cfm. Medium 870 cfm. High, 1000 cfm.
Accessories: (supplied)	(4)-1/4"-20-NC "Eye" bolts (for ceiling mount) UL listed air filtering appliance 501Y

Description:

The Space-Gard air cleaner utilizes a unique filter media—similar to that used successfully for years in hospitals, clinics, laboratories and clean rooms where the level of airborne particles must be kept near zero.

The three-speed blower draws polluted air from the area, through the extended-surface, high-efficiency filter media and exhausts air that has up to **98% of the pollutant particles removed. Four filtration principles are used—straining, diffusion, impingement and interception.** This, plus the deep-space fold design of the media provides an unusually large filtering area for exceptionally high particle-holding capacities.

An important extra benefit of this new-fashioned air cleaner is the high-efficiency operation without the emission of toxic ozone.

The 2600 is designed to be used in restaurant or dining area applications. One Space-Gard Model 2600 Air Cleaner will handle up to 15,000 cubic feet of space. If tobacco smoke particulate removal is the prime consideration, one Model 2600 should be installed for every 25 smokers. In other applications, unit capacity will vary with type and volume of contaminants.

Efficiency Ratings:

Particle Size Micron	Clean Media	Loaded Media *
0.3	70%	95%
0.5	78%	96%
0.7	85%	97%
1.0	95%	98%
2.0	98%	99%

* Media loaded to 1.0 in. w.c. at 1000 cfm with ASHRAE test dust.

Tested by an independent test laboratory.

ACE #	PK	UM	DESCRIPTION
156260	EA	1	2600 Aprilaire Commercial Air Cleaner

Description:

The BreatheCLEAN total home ultraviolet air purification system easily installs into existing ductwork. As air passes by the powerful 36 watt ultraviolet bulbs, ultraviolet energy literally destroys almost all disease-causing organisms in the air. With BreatheCLEAN, you are assured that all of the air your family or your employees breathe is the purest available from any air purification system. No competing model offers more effective purification than our standard unit. Two 36 watt bulbs deliver more than 24,000 effective microwatts per square centimeter of germ-killing ultraviolet energy.

Specifications:

Casing Dimensions: 9.75" x 5.75" x 2"

Amps: 0.68

Electrical: 110 volts, 72 watts

Ballast: Electronic

Bulbs: 2 Bulbs protrude 16" (or 9") into ductwork

Wavelength: 253.7 nanometers

Cord length: 12 feet

Warranty: Five year on purifier; nine months on bulbs

Maintenance: Replace bulbs annually

Health Benefits:

By removing germs, bacteria, mold and dust mites from the air, BreatheCLEAN provides great health benefits for people suffering from asthma or allergies. Additionally, BreatheCLEAN simply keeps you healthier throughout the year because it is continually removing cold germs, viruses and bacteria that cause illness and infection. You can expect fewer sinus infections, fewer colds, clearer sinuses, better sleep and dramatic relief from asthma symptoms.

*Application	1000 sq. ft. (automode)
Warranty	Limited lifetime excluding lamps and filters

* Automode is recommended for individuals with health related issues such as allergies, chemical sensitivity, etc.

Description:

For just pennies a day in operating costs, the CX1000 Complete Air Purification System will provide up to 1,000 sq. ft. of complete air purification, while maintaining an environment that is odor, germ, chemical and allergen free. The powerful air purification technology uses UVC light to activate a highly reactive and **"Patented" Titanium Dioxide Catalyst**, which destroys toxic compounds by converting them into benign constituents such as water and carbon dioxide.

Features:

- 6-stage purification process
- Electronic sensors that adjust product's performance for peak efficiency and protection
- Air inlet grille with safety lock
- 5 micron pre-filter
- Removes allergens down to .3 microns
- First gas adsorption layer
- Second gas adsorption layer
- Hospital grade HEPA filter
- High impact ABS plastic
- Photo-catalytic converter
- High output germicidal UVC lamp for germ-free air
- Air outlet grille with safety lock
- Replacement of UVC lamp (1-year)
- Replacement of filters (2-years)

Health Benefits:

- Dramatically reduce family sickness
- Eliminate endless bouts with colds and influenza
- Create an environment for sound sleep
- Provide relief from asthma, hay fever and sinus problems
- Reduce fatigue, headaches and breathing problems
- Do away with pet odors and dander
- Decrease dust and cleaning requirements
- Relieve sore throats, runny noses, wheezing and sneezing

Description:

For just pennies a day in operating costs, the CX3000 Complete Air Purification System will provide up to 3,000 sq. ft. of complete air purification, while maintaining an environment that is odor, germ, chemical and allergen free. It's **"Patented" Photo-Catalytic Titanium Oxidation cleans air down to the last molecule.** The powerful air purification technology uses 2 UVC lights to activate a highly reactive and patented **Titanium Dioxide Catalyst**, which destroys toxic compounds by converting them into benign constituents such as water and carbon dioxide.

Features:

- Electrostatically charged needled fiber MERV-11 Filter
- Removes allergens down to .3 microns
- Powder coated Paint-Loc steel enclosure
- Aluminum UVC lamp reflectors for air sterilization
- Rust-proof gold zinc plated pull out case
- Safety switch
- Quick disconnect power cord
- Over 70 sq. ft. of photocatalytic matrix surface area
- Sight ports to verify lamp operation
- Computerized service panel
- Built in service lights for filter and UVC lamp replacements
- Service handle and cabinet locks
- Filter replacement (6-months)
- UVC lamp replacement (1-year)

Health Benefits:

- Dramatically reduce family sickness
- Eliminate endless bouts with colds and influenza
- Create an environment for sound sleep
- Provide relief from asthma, hay fever and sinus problems
- Reduce fatigue, headaches and breathing problems
- Do away with pet odors and dander
- Decrease dust and cleaning requirements
- Relieve sore throats, runny noses, wheezing and sneezing

PopUP Filters

Description:

Save space on your truck and time on the job with Honeywell's PopUP™ Media Replacement Filters. If you've ever had to assemble collapsible replacement filters, you'll appreciate the convenience and time savings of the PopUP™ filter. Simply remove the filter from its package and watch it pop-up into finished form, ready to use. No tedious assembly and no bulky storage - you can store up to five PopUP™ filters on your truck in the same space you used to store just one. And because of their condensed size, you can ship PopUP™ filters directly to homeowners for easy replacement filter sales opportunities.

Specifications:

- **Efficiency Standard:** Efficiency ratings are based on American Society of Heating, Refrigerating and Air-Conditioning Engineers Standard 52.2-1999.
- **Efficiency Standard:** Efficiency ranges are defined for small particles, E1=0.3 to 1.0 microns; medium particles, E2=1.0 to 3.0 microns; and large particles, E3=3.0 to 10.0 microns.
- **Minimum Efficiency Reporting Value (Media Filters Only):** MERV 11
- **Type or Air Cleaner:** Media Air Cleaner

Features:

- No assembly required
- Filters literally pop-up ready to use
- Saves space in the warehouse and on the truck
- Reduces any chance of damage to the filter
- Installs in seconds saving time and frustration
- Provides high-efficiency performance (MERV 11)
- Features the American Lung Association® Health House® logo
- Available in 6 sizes that fit Honeywell and other brands

Even Easier Than 1, 2, 3

We can't even say that PopUP™ filters are as easy as 1, 2, 3 because they assemble in just one step. Just open the package and – pop – the filter is ready to use.

ACE #	PK	UM	DESCRIPTION	
154940	EA	12	16" x 20" Pop-up Filter	Fits F100F-1004, F100B-1008, F150E-1000, F100F-2028

Replacement Filters / FC200E

Description:

The FC200E High Efficiency Replacement Media Filter removes over 97% of 3.0-10.0 micron particles from the air. This MERV 13 filter continues to set the standard for high-end media replacements.

FC200E (MERV 13)

Specifications:

- **Efficiency Standard Efficiency:** Ratings are based on American Society of Heating, Refrigerating and Air-Conditioning Engineers Standard 52.2-1999.
- **Efficiency Standard Efficiency:** Ranges are defined for small particles, E1=0.3 to 1.0 microns; medium particles, E2=1.0 to 3.0 microns; and large particles, E3=3.0 to 10.0 microns.
- **Fractional Efficiency:** E1=63%, E2=90%, E3=97%
- **Minimum Efficiency Reporting Value (Media Filters Only):** MERV 13
- **Static Pressure Drop (in. w.c.):** 0.28 at 500 FPM
- **Type or Air Cleaner:** Media Air Cleaner

Humidifiers / Dehumidifiers

***The Best Cure For Indoor
Dryness And Proper Humidity
Throughout The Entire Home.***

Specifications:

Evaporative Capacity

- 0.5 gallons of water per hour using 140° service hot water at unit.

Volume of Home (cubic feet)

- Loose home 9,000—2 air changes per hour
- Average home 18,000—1 air change per hour
- Tight home 36,000—1/2 air change per hour

Standard Rating Conditions

- Outside air; 20°F and 70% R.H.
- Inside air; 70°F and 35% R.H.
- Internal moisture gain; 1 pound/hour
- Continuous humidifier operation at 150 cfm
- 140°F water
- 8 Ft. ceiling height

Size

- Model 350—13-3/4" wide x 12-3/4" high x 15" deep
- Model 360—13-3/4" wide x 12-3/4" high x 12-1/2" deep
- Wall frames and grille 16-1/2" wide x 15-1/2" high

Ductwork - Model 350 (not supplied)

- 7" dia. round ductwork to supply grille
- Supply grille 50 square inches of free air minimum

Electrical Data

- Model 350—120 volt 60 Hz. 0.9 amp
- Model 360—120 Volt 60 Hz. 0.6 amp

Drain Connection

- 1/2" I.D. plastic hose direct to drain fitting on unit

Shipping Weight

- 21 lbs.

Also Included

- Humidistat and Saddle Valve

Description:

The Aprilaire Models 350/360 are state-of-the-art whole-house Humidifiers that are specifically designed to bring all the benefits of patented Aprilaire humidification to homes with radiators or baseboard heat. These are so effective and flexible, they work equally well with central heating and cooling systems. They are completely self-contained units that easily fit inside of closets, heated crawl spaces and basements. They have an evaporative capacity of **0.50 gallons per hour** and can humidify tightly-constructed homes up to **4,500 square feet in size.**

350 Application:

The model 350 is designed especially for basement installations of hydronically heated homes, but is equally suitable for use with any other type heat. The unit can also be installed with or without ductwork in a closet, utility room, or heated crawl space. It has application where there may be a need for humidity, but infrequent need for heat. It can be installed independent of the forced air heating system in a conditioned space to provide humidity as needed.

360 Application:

The Model 360 Aprilaire humidifier is designed especially for any residence, condominium, town house, or apartment, regardless of the type heating system. It is installed through the wall without ductwork and is completely independent of the heating system. It is ideally suited for applications that have a humidity need, but require little heat, as well as installations where the air handling system is located where freezing conditions could occur. Also, the Model 360 will provide controlled humidity for the home with a heating system that has no space for a furnace mounted humidifier.

ACE #	PK	UM	DESCRIPTION

- Average home 2,000—1 air change per hour
- Tight home 4,000—1/2 air change per hour

Standard Rating Conditions

- Outside air; 20°F and 70% R.H.
- Inside air; 70°F and 35% R.H.
- Internal moisture gain; 1 pound/hour
- 70% blower operation
- 8 Ft. ceiling height

Size

- 15-3/8" wide x 15-3/4" high x 10-1/4" deep

Water Feed Rate

- 3 gph

Electrical Data

- 24 volt 60 Hz. 0.5 amp

Also Included

- Humidistat and Saddle Valve

Description: Model 400 (Drainless)

The Aprilaire Model 400 Whole-House Humidifier features a built-in bypass damper and utilizes new evaporative technology to minimize water use. Gravity pulls water down, while the wicking action of the Water Panel® draws it back to the top, using 100% of the water delivered to the unit. It features truly automatic control, has an evaporation capacity of **0.70 gallons per hour** and also humidifies tightly-constructed homes up to **4,000 square feet in size**. It eliminates standing water, making it the perfect choice for homes with septic systems, locations where a floor drain is not available or families interested in water conservation.

Description: Model 600 (All Season)

The Aprilaire Model 600 Whole-House Humidifier features truly automatic control, plus a built-in bypass damper, which means fewer parts to install. It uses the furnace blower to move air through a water panel, where the humidification process occurs. Humidified air is then distributed to the home. The bypass damper is conveniently labeled for both summer and winter settings, allowing you to set it for the entire season with no guesswork involved. It delivers up to 50% more moisture in comparison to competitive units, has as an evaporation capacity of **0.70 gallons per hour**, humidifies tightly-constructed homes up to **4,000 square feet in size** and features the same performance benefits of other Aprilaire humidifiers.

How It Works:

The Aprilaire Humidifiers use humidity in the form of water vapor to prevent minerals from entering the air stream in the home. Water is supplied to the distribution tray, allowing it to flow evenly across the Water Panel®. The resulting humidified air is distributed throughout the entire home.

Description: Model 500 (Small Bypass) For Small To Mid-Sized Homes

The Aprilaire Model 500 Whole-House humidifier features a built-in bypass damper and is designed for use in small to mid-size homes. It utilizes a manual humidifier control installed in either your living area or central heating and cooling system ductwork and comes equipped with a drain to flush minerals from the unit. It has an evaporation capacity of **0.50 gallons per hour**, and is an economical proven performer in the extensive line of Aprilaire humidifiers.

Description: Model 700 (Powered Unit) For Larger Homes

The Aprilaire Model 700 Whole-House Humidifier features truly automatic control, so there's never a need to manually control the humidifier—though it can be installed in manual mode, if desired. Complementing any central heating and cooling system on larger homes, this model utilizes an outdoor temperature sensor for monitoring even the slightest changes in outdoor temperature. It has a built-in fan that pulls heated air directly from the furnace and draws it across a water panel where evaporation takes place. Humidified air then flows throughout the home. It delivers up to **50% more moisture** in comparison to competitive units, has an evaporation capacity of **0.75 gallons per hour—among the highest capacity humidifiers sold** and humidifies tightly-constructed homes up to **4,200 square feet in size**.

Description:

The Aprilaire Model 1700 Whole-House Dehumidifier works throughout the entire home. It removes **50% more** water per kilowatt hour than leading portable dehumidifiers. It also features truly automatic control, so there's never a need to manually control the dehumidifier—just set it once and forget it! The 1700 is the best choice for healthy, comfortable air when installed into a new or existing heating and cooling system.

Features:

- It Provides three times the moisture removing capacity of leading portable dehumidifiers and up to **90 pints or 11.25 gallons per day**.
- There are never any messy tanks to empty or clean.
- It automatically senses moisture levels and maintains optimum humidity levels in the home, never too much, or too little and running only when needed.
- It switches automatically between Whole-House dehumidification when the central air-conditioning system is running, and localizes dehumidification when the air-conditioning isn't running.
- It converts from Whole-Home to localized application, solving excess moisture issues where it is needed the most, from crawl spaces to attics and basements.
- It can be operated manually, allowing the monitoring and control of moisture levels in a specific location—such as a basement or master bedroom.
- **And More...**

Description:

The Honeywell HE225A,B,D **Bypass Flow-Through Humidifiers** use the warm air furnace blower to provide humidification for the whole house. The HE225A,B,D works with virtually any Honeywell humidity control, but for optimal performance, use with the TrueIAQ Digital Control. The HE225A,B,D can maintain proper humidity levels in the home with a comfortable living environment at a lower temperature. The thermostat can be turned down for greater energy savings. Controlling humidity also means moisturizing dry air to prevent damage to hardwood floors and woodwork while preventing excess moisture.

Features/Benefits:

- Anti-microbial coating on pad prevents the surface growth and migration of bacteria, mold, fungus and algae on the humidifier pad.
- Bold new look with blue and white styling.
- Proven technology used for high performance humidification and enhanced comfort.
- Pre-assembled for quicker installation.
- Small footprint, light weight, and reversible components allow easy mounting on either warm air supply or return air duct of any forced air furnace.
- Interior components designed for quick maintenance and service.
- Includes easy-to-use humidity control that mounts on the wall or duct for more flexible installation.
- Continuous flushing reduces the frequency of maintenance in a hard water installation.
- AIRWATCH™ Indicator can be installed to remind homeowner to change humidifier pad.
- Standard tested per ARI Standard 610.
- Five-year warranty.

The American Lung Association and its Health House program do not endorse products.

- **Dimensions:** (mm) 387 mm high x 356 mm wide x 260 mm deep
- **Includes:** Powered Flow-Through Humidifier, mounting template, humidifier pad, self-piercing saddle valve, **standard humidistat (HE365A1006), automatic humidistat (HE365B1004), digital humidistat (HE365DG115)**
- **Approvals, Underwriters Laboratories, Inc. UL/CUL Listed Report E185662**
- **Tradeline Value:** Tradeline

PerfectFLO® Distribution Tray —
Helps ensure that moisture is evenly distributed.

Description:

The Honeywell HE365A,B,D **Powered Flow-Through Humidifiers** use the warm air furnace blower to provide humidification for the whole house. Dry air contributes to an uncomfortable home—not to mention the potential damage and cracking of hardwood flooring and woodwork. When installed into a home's heating and cooling system, a Honeywell HE365 series Whole-House Powered Humidifier works to automatically maintain a proper humidity level throughout the home. Plus, adding whole-house humidification helps save on energy bills. The thermostat can be turned down because the environment is more comfortable.

Features/Benefits:

- Anti-microbial coating on pad prevents the surface growth and migration of bacteria, mold, fungus and algae on the humidifier pad.
- Bold new look with blue and white styling.
- Capable of humidifying the largest area—up to **4200 sq ft (390 sq m)**—of any Honeywell flow-Through humidifier.
- **Includes the PerfectFlo™** water distribution tray for optimal efficiency and water usage.
- Narrower footprint than popular compatible model while maintaining a common humidifier pad and comparable humidification performance.
- Interior components designed for quick maintenance and service.
- HE365A Humidifier includes a convertible humidity control that mounts on the wall or duct for more flexibility.
- HE365B Humidifier includes the Automatic Humidity **Control with HumidCalc+™** that automatically adjusts humidity level and eliminates moisture build-up.
- HE365D includes TrueIAQ Digital Control that automatically adjusts to maintain ideal humidity.
- Continuous flushing reduces the frequency of maintenance in a hard water installation.
- **AIRWATCH™ Indicator** can be installed to remind homeowner to change humidifier pad.
- Standard tested per ARI Standard 610.
- Five-year warranty.

- HVAC power/airflow monitor: 10 mA resistive at 24VAC

Output Ratings

- Relay output contacts:
 - Fan: 1.5A full load, 7.5A locked rotor at 24VAC
 - Heat and Backup: 15A resistive at 120VAC
- Fill Solenoid: 0.1A at 120VAC, 0.5 PF
- Drain Solenoid: 0.1A at 120VAC, 0.5PF
- Humidistat output contacts: 10mA resistive at 24VAC
- Humidistat power supply: 100mA at 24VAC

NEW!

General Description:

Your TrueSTEAM humidifier provides the highest capacity and most efficient steam humidification for whole-house residential applications.

Product Descriptions:

Models-

- **HM512VP1AQ, HM509VP1AQ & HM506VP1AQ**
TrueSTEAM humidifier with VisionPRO IAQ Comfort System.
- **HM512DG115, HM509DG115 & HM506DG115**
TrueSTEAM humidifier with TrueIAQ digital IAQ control.
- **HM509H8908 & HM506H8908**
TrueSTEAM humidifier with manual H8908 humidistat.

Features:

- Provides humidity independent of equipment operation, allowing homeowners to reach their desired humidity set-points regardless of air temperature.
- Can be remotely mounted up to 20 feet from the system.
- Uses up to 70 percent less water to produce even more moisture than traditional whole-house humidifiers.
- Requires only a 1-3/4" cut into ductwork and mounts on a separate, lightweight bracket (included) for accurate leveling.
- Push terminals for easy wiring are routed through an interior harness so no wires are exposed.
- LED lights indicate when system is running or needs service. Lights also provide feedback to the installer during installation.
- Multiple sensors sit in a separate compartment to accurately monitor water levels.

Additional Features:

- 1** LED light feedback allows you to monitor performance, giving you total control and peace of mind.
- 2** Sediment screen keeps the tank clean for a longer period of time, reducing maintenance and ensuring optimum performance.
- 3** Automatically fills with water and drains when needed, so you don't have to remember to do it.
- 4** Wiring to your HVAC equipment allows TrueSTEAM to supply humidity when you need it by turning on your equipment automatically.
- 5** The patented Condensate Collect Dome and beveled nozzle keep water in the tank, delivering only true steam into your duct's airflow.
- 6** Snap-lock latch allows for quick, easy maintenance.
- 7** True steam provides your home with high-capacity true humidity, while using up to **70% less water than flow-through humidifiers.**

Thermostat Controls/Features:

VisionPRO IAQ Total Comfort System— (Models HM512, HM509 & HM506)

- Controls both temperature and TrueSTEAM.
- Sensor for displaying outdoor temperature.
- Intuitive user interface for easy 7-day temperature programming.
- Easy-to-read backlit digital display.
- Maintenance and service reminders.
- Controls other air quality equipment when you're ready.

TrueIAQ Digital Control— (Models HM512, HM509 & HM506)

- Automatic adjustments maintain ideal humidity.
- Sensor for displaying outdoor temperature and humidity.
- Shows actual humidity and desired setting.
- Maintenance and service reminders.
- Controls other air quality equipment when you're ready.

Manual Control—(Model HM506 & HM509)

- Manual control with intuitive comfort settings.
- Integrated humidity chart for accurate control in changing conditions.

153506	EA	1	HM506H8908 TruSTEAM Humidifier	With Manual Control

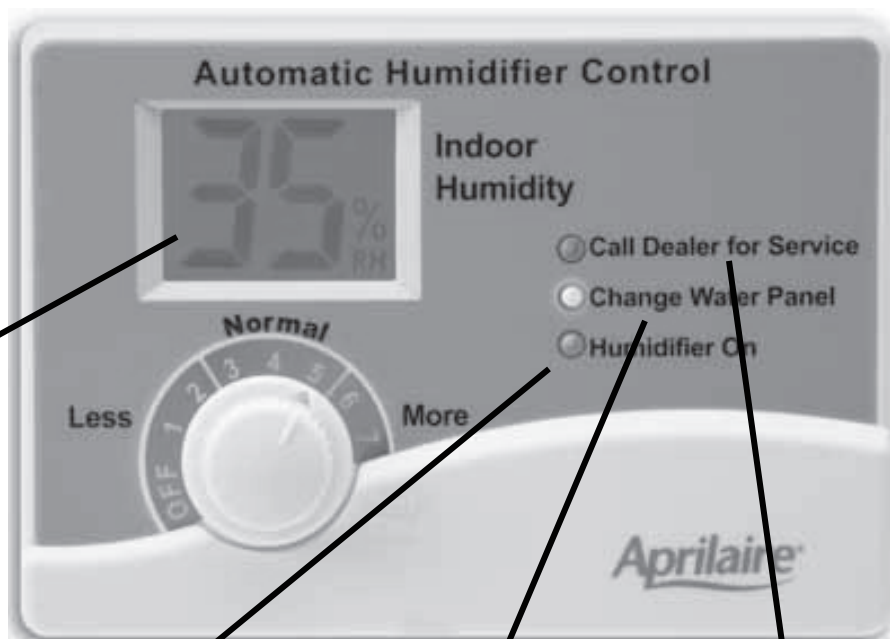

Description:

The optimum levels of relative humidity in a home fluctuate with the changes in outdoor temperature. An Aprilaire automatic humidifier continually monitors and responds to both outdoor temperatures and indoor relative humidity, delivering optimum levels of humidity throughout the home. Monitoring settings or waiting until the environment in a home is comfortable, is not an issue anymore. The 58RP is a set-it-and-forget-it control that keeps a home's humidity level exactly where it should be.

***The digital control panel delivers peace of mind.
Get all of the information you need at a glance!***

Know the relative humidity.

Backlit display provides the current humidity level in a home.

Know when the system is running.

The green light clearly shows that the humidifier is up, running and protecting the home, comfort and health.

Know when to replace the water panel.

The "smart" feature measures usage of the water panel, rather than simply relying on the calendar. The yellow light lets you know when it's time for replacement.

Know immediately when service is needed.

In the unlikely event that there is an issue, the red light clearly indicates that there is a problem, while the digital display provides the service code that a dealer can use to isolate the cause, saving time and money.

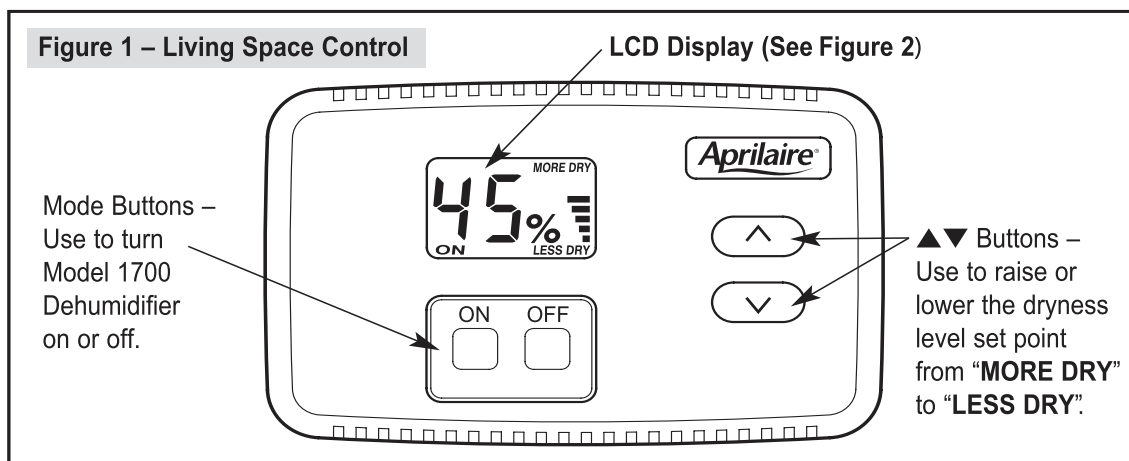

ACE #	PK	UM	DESCRIPTION	
160057	EA	1	Aprilaire 58RP Controller	Used With The 400A, 500A/M, 600A/M & 700A/M

Specifications:

- Low Dew Point Control Level ("MORE DRY" or 7 bars on display) 40°F
- High Dew Point Control Level ("LESS DRY" or 1 bar on display) 65°F
- Temperature Sensor Range 40°F to 100°F
- Relative Humidity Sensor Range 30% to 100%
- Temperature Storage Conditions -30°F to 120°

Description:

The Model 70RP Living Space Control provides a convenient, accessible means of turning the Model 1700 Dehumidifier on and off and allows for adjustment of the dryness level set point. The Model 70RP Control contains its own sensors that override the Model 1700 main control board sensors when connected and enabled. Combined with the features of the 1700, total control over room comfort is at your fingertips.

 - **Tradeline Value:** Tradeline

Description:

The H1008A1008 and H1008D1002 Automatic Humidity Controls with HumidiCalc+™ Software are duct mounted and provide automatic, low voltage, electronic control of by-pass flow through, powered flow-through, steam and drum humidifiers in central heating systems. The H1008D1002 also controls heat/ energy recovery units and dehumidifiers. The H1008A1008 and H1008D1002 are designed to automatically adjust the humidity level based on indoor temperature and humidity, inferred or measured outdoor temperature and the setting of the frost factor dial. The frost factor setting is used to maintain a comfortable humidity level in a home while reducing moisture condensation on inside windows. The HumidiCalc+™ Software infers the outdoor temperature by monitoring the equipment cycles and eliminates the need for an outdoor temperature sensor when used on single-stage gas or oil furnaces. With the use of the C7089H Outdoor Temperature Sensor (**purchased separately**), both models can also provide automatic humidity control in heat pump and multi-stage systems.

Main Features:

- Patented Honeywell HumidiCalc+™ Software eliminates need for an outdoor sensor on the most common single-stage, gas or oil forced-air equipment.
- Combination temperature and humidity sensor accurately determines the dewpoint at the control location.
- With the use of the C7089H Outdoor Temperature Sensor, the H1008 also provides automatic humidity control in heat pump applications.
- Automatically adjusts humidity level based on the frost factor set by the homeowner.
- System status light indicates normal operation, test mode and fault indication.

Honeywell

Accessories

High Quality Replacement Humidifier Pads

Description:

The HC Series Humidifier Pads replace the humidifier pads in the Honeywell Flow-Through Humidifiers or Aprilaire® Humidifiers. The humidifier spreads water over the humidifier pad, and when warm air blows over the water soaked area, vapor is generated. As the vapor circulates through the house, the relative humidity rises.

The **HCE22E1003** and the **HC26E1004** pads are designed with the **AgION™ Anti-microbial coating** for even better protection.

Specifications:

TrueIAQ Control and Outdoor Sensor

- Operating/Storage temp: -40°F to 120°F (-40°C to 50°C)
- Condensation Protection: 0-100%
- Operating RH%: 0% to 99% non-condensing (TrueIAQ). Outdoor sensor protected from condensation.
- Temp reading range: -40°C to 50°C (-40°F to 122°F)
- Temp accuracy within range: 0.4°C (0.72°F)
- Humidity reading range: 5% to 95%
- Humidity temp accurate reading range: -20°C to 50°C (-17°F to 122°F)
- Humidity accuracy over that range: +-4.5%
- Maximum real time clock drift over 1 year: 7 minutes
- Vertical mount to cover one gang box
- Flame Rating: UL94V-0
- RoHS compliant
- Relay life: 100,000 cycles at 1A 24Vac

Power Supply

- 24Vac \pm 20% 50, 60Hz (TrueIAQ control)
- 24Vdc 2-wire over communication bus, not polarized (outdoor sensor)
- Protected against voltage spikes
- Not protected against over voltage connection (ex 120 or 240V)
- All setup parameters are stored indefinitely

In the Event of Power Failure

- Real-time clock is maintained for 4 hours
- All outputs are deactivated
- All setup parameters are stored indefinitely

Mechanical Design

- Dimensions: 2-3/4" W x 4-3/4" H x 7/8" D (TrueIAQ control); 2-3/4" W x 3-3/4" H x 7/8" D (Outdoor sensor)
- Weight: .35 lbs (TrueIAQ control); .15 lbs. (Outdoor sensor)
- Temperature Unit Display: °C/°F

Description:

The TrueIAQ DG115EZIAQ monitors and automatically adjusts operation of the whole-house humidifier, dehumidifier, ventilator, or bath fan.

It can adjust humidity and deliver fresh air with or without dependency on HVAC equipment operation. If a home has both a humidifier and dehumidifier installed, the TrueIAQ DG115EZIAQ can automatically change over to the appropriate equipment based on the comfort settings and the changing outdoor conditions.

The TrueIAQ DG115EZIAQ provides cost-effective ventilation in accordance to industry standards. In addition, it can be programmed to deliver ventilation during set times during the day or night.

Features:

- Provides humidity independent of equipment operation, allowing homeowners to reach their desired humidity setpoints regardless of air temperature.
- Can be remotely mounted up to 20 feet from the system.
- Uses up to 70 percent less water to produce even more moisture than traditional whole-house humidifiers.
- Requires only a 1-3/4" cut into ductwork and mounts on a separate, lightweight bracket (included) for accurate leveling.
- Push terminals for easy wiring are routed through an interior harness so no wires are exposed.
- LED lights indicate when system is running or needs service. Lights also provide feedback to the installer during installation.
- Multiple sensors sit in a separate compartment to accurately monitor water levels.

***Energy Efficient, Fresh Air
Solutions For The Home.***

Specifications:

Blower:

- Plug-in, permanently lubricated motor - engineered for continuous operation
- Dynamically balanced centrifugal blower wheel for quiet, efficient performance
- Maintains a high percentage of rated CFM in less than ideal installations
- **CFM:** QTXE50-50, QTXE80-80, QTXE110-110
- **Sones:** QTXE50- Nearly silent operation <0.3 QTXE80- 0.3, QTXE110-0.7
- Low RPM for quiet operation
- Resilient anti-vibration motor mounts
- Energy Star® compliant

Housing:

- Rugged, 26 gauge, galvanized steel construction
- 6" round ducting for superior performance
- Polymeric duct connector with tapered sleeve and no metallic clatter
- 10-1/2" x 11-3/8" x 7-5/8" height allows for 2" x 8" (nominal) joist installations
- Sturdy, easy, four-point mounting directly to joist
- Includes unique spacer (patent pending) for mounting to engineered "I" joists
- Includes hanger bars to position housing anywhere between 16" to 24"-on-center joists
- Two sets of mounting holes for hanger bars allow flush installation with bottom or top of drywall

Grille:

- Polymeric construction
- Innovative design - the result of extensive research with designers and consumers
- 14" x 15"

Controls (Purchase Separately):

- Model 69VL (Ivory) / 69WL (White) - One rocker switch with "on" indicator light.
- Other controls available from Broan-NuTone
- **3-Year Warranty**

Description:

The quietest products in the industry. The most stylish options for the home. The QTXE line represents the ultimate in bath fan solutions for today's homes. Whether selecting a fan or a fan/light version, the QTXE line brings simple elegance to any bath or powder room. Whether by sight or by sound, the QTXE Line is barely noticeable. One touch of the switch will control just the right amount of ventilation and light.

- Other controls available from Broan-NuTone
- **3-Year Warranty**

Description:

Traditional styles for more conservative budgets. For the bath that's not used everyday you may not have to be as concerned about energy efficiency. The QTR line was designed to satisfy that need. The fan and fan/light models are still among the quietest products in their category, but feature bright incandescent rather than fluorescent lighting. Since they're a perfect match to the QTRE line, they're an ideal design solution for any bath or powder room.

- Polymeric construction
- Innovative design - the result of extensive research with designers and consumers
- 100W incandescent lamp (**bulb not included**)
- 4W night light (**bulb not included**)
- Durable steel reflector with white enamel finish
- 12-3/8" x 14"

Controls (Purchase Separately):

- Refer to Broan's catalog for a complete line of accessories to effectively adapt these fans to your construction requirements.

3-Year Warranty

U.L. Listed for use in insulated ceilings (TYPE I.C.)

Description:

Traditional styles for more conservative budgets. For the bath that's not used everyday you may not have to be as concerned about energy efficiency. The QTR line was designed to satisfy that need. The fan and fan/light models are still among the quietest products in their category, but feature bright incandescent rather than fluorescent lighting. Since they're a perfect match to the QTRE line, they're an ideal design solution for any bath or powder room.

Air Flow Performance

MODEL QTR080L

MODEL QTR110L

ACE #	PK	UM	DESCRIPTION	
147019	EA	1	QTR080L Broan Fan With Light	Sones 1.0, 80 CFM, 4" Duct
147022	EA	1	QTR110L Broan Fan With Light	Sones 1.5, 110 CFM, 4" Duct

* U.L. Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit (ceiling mount only).

Specifications:

Grille:

- White polymeric grille
- Snap-in light diffusing lens for (2) 60W bulbs and 7W night light **(not included)**

CFM:

- 110

Sones:

- 0.9

Ventilator:

- Resilient anti-vibration mounts
- Plug-in, permanently lubricated motor
- Low sound, high performance blower wheel
- Polymeric, 6" round damper/duct connector - for optimal performance - with 1-1/8" long tapered sleeve and no metallic clatter

Heater:

- 1500 watts, with metal blower wheel for efficient, even heating
- Plug-in, permanently lubricated motor - functions independent of ventilator

Bulbs:

- Bright 120 watt lighting (two 60W incandescent bulbs)
- 7 watt nightlight capacity

Housing:

- Rugged galvanized steel housing
- Adjustable mounting brackets span up to 24"
- Suitable for use in insulated ceilings (Type I.C.).
- Use Model 77DV (Ivory) / 77DW (White) Four Function Control

Note:

- For installation in ceilings up to a 12/12 pitch

Description:

The QTX110HL has a small footprint combined with high-level performance. Now, there is no need to wait 15 minutes for the central heating system in a home to take the chill from the bathroom, while it heats every other room in the house. You can now select instant heat when its needed with the QTX line. Powerful heating, light and ventilation are available at the touch of a switch. And with the PowerHeat design, the energy converted to heat is efficiently delivered to the area that it is needed.

ACE #	PK	UM	DESCRIPTION	
147023	EA	1	QTX110HLL Broan Heat/Light Fan	Sones 0.9, 110 CFM, 6" Vent

Features:

- **Easy to Reach Filters:** Washable foam filters effectively filter airborne particles, such as pet dander, lint, dust and mold spores, while protecting the equipment from dust build-up.
- **HomeShield Defrosting System:** Prevents ice build-up on recovery module.
- **Bottom Door Opening:** Unique bottom door opening design allows parallel duct connection for easy access from any angle.
- **Removable Electrical Drawer:** Remove one screw to release and access the electronics with pull out PCB assembly for easy maintenance of sub-components.
- **Interchangeable Core:** Allows unit to be upgraded from an HRV to an ERV, and vice versa, without additional mechanical adjustments.
- **High-Pressure Blower:** Designed to eliminate the need to balance unit in most simple installations.
- **Intelligent Flow Dampers:** The fresh air intake port is equipped with a damper controlled by an intelligent motor with integrated circuit logic. Easy to access. Easy to maintain. Very precise.
- **Flexible Port Configuration:** Versatile design allows for vertical or horizontal port configuration, facilitating installation and maintenance. (Factory-configured)
- **Unique ERV Core:** Patent pending counter cross-flow energy recovery core technology provides the most effective efficiency/volume ratio of all the units in its category.
- **Convenient Wall Control:** The VT4W is an easy to use 3-mode wall control (Min/Max/Intermittent: 20-Min. On/40-Min. Off).

Specifications:

- **Weight:** 42 lb (19 kg)
- **Oval Ports:** Fit 5" (127 mm) ducts
- **Drain Diameter:** 1/2" (12 mm)
- **Installation:** Chains, springs and hooks (provided with the unit).
- **Motor Speeds:** High and low speed
- **Electrical Supply:** 120 V, 60 Hz
- **Power Consumption:** 150 watts

Model ERV90HCS

Model ERV90HCT

Specifications:

- **Voltage:** 120 VAC
- **Frequency:** 60Hz
- **Dimensions:** 21.1" x 34.6" x 13.25"
- **Weight:** 65 lbs
- **Shipping Weight:** 75 lbs
- **HVI Rated of Air Flow:** 169 CFM
- **Power Consumed (max):** 150 Watts
- **Supply Air Duct Connections:** 6" Diameter
- **Exhaust Air Duct Connections:** 6" Diameter
- **Filter:** 30 ppi washable reticulated foam
- **Cabinet:** 20 ga. Pre-painted steel
- **Mounting:** Suspension by chains and springs
- **Wall Control Modes:** N/A
- **Power:** 147 Watts
- **Current:** 1.4 Amps
- **Warranty:** 2 years, parts

Features:

- 71 to 163 cfm (0.3 in. w.g.)
- 64 to 146 cfm (0.4 in. w.g.)
- Offers solid ventilation performance
- Superior heat recovery
- Durable, reliable, high performance
- Best airflow and heat recovery in its class
- Smart Defrost system
- Failure protection system to prevent cold air from entering the house.
- Easy to service – all parts removable in 5 minutes, electrical access on side panel.

Description:

The HRV100H is ideal for homes **3,001 to 4,500 square feet**. It replaces stale and polluted indoor air with fresh outdoor air minimizing negative or positive pressure in the house, while delivering **64 to 146 CFM of whole-house balanced ventilation** at the same time. The heat recovery core allows outgoing stale air to temper fresh incoming air without cross contamination. The HRV100H offers great value, quality and performance and is the best in its class!

Description:

The ERV100HC is ideal for homes in moderately humid climates that are from **3,001 to 4,500 square feet**. It replaces stale and polluted indoor air with fresh outdoor air minimizing negative or positive pressure in the house, while delivering **60 to 142 CFM of whole-house balanced ventilation** at the same time. It allows the homeowner to enjoy the benefits of fresh air to dilute contaminants without an energy penalty. The advanced **enthalpic core** transfers heat from one air stream to the other, tempering the air. This innovative technology reduces moisture that enters the house during the summer. The ERV100HC saves energy and money and is the best airflow, sensible energy recovery and latent energy recovery product in its class!

Description:

The GSHH3K is a fully integrated whole-house **HEPA filtration system** with fresh air ventilation and heat recovery capabilities. It minimizes dust and allergen material as small as **0.3 microns**. It is ideal for tightly built, single family homes up to **6,000 square feet and can deliver 270 CFM of fresh clean air into a home**. The heat recovery core allows outgoing stale air to temper fresh incoming air without cross contamination. Homeowners can benefit from fresh air, cleaned with the best available HEPA filtration technology (**99.97% efficiency at particles 0.3µ**).

Description:

The GSVH1K is a fully integrated whole-house **HEPA filtration system** with fresh air ventilation capabilities. It minimizes dust and allergen material as small as **0.3 microns**. It is ideal for homes in mild climates and up to **2,500 square feet**. Homeowners can benefit from fresh air, cleaned with the best available HEPA filtration technology (**99.97% efficiency at particles 0.3μ**). It is one of the only whole-house filtration devices on the market to feature an electronic, low voltage wall mounted control switch for convenient operating flexibility. Homeowners can take advantage of **eight "revolutionary" pending patents** delivering indoor air quality now setting the industry standard for optimal indoor air quality & comfort.

Description:

The Fresh Air Solution

Mechanical ventilation provided by a fresh air exchange system can solve indoor air quality problems. A Summaira HRV can save a homeowner from damage caused by excess indoor humidity, eliminate indoor air pollutants and odors, and make a home a healthier place to live.

How It Works :

- The HRV unit draws fresh outdoor air into the home through ductwork connected to a venthood on the outside of the home. It then filters the air and distributes it throughout the house, typically through the furnace ductwork.
- The HRV unit draws stale indoor air from throughout the home and exhausts it through ductwork connected to an exhaust hood on the outside of the home.
- The heat recovery core in the HRV transfers up to 82% of the energy from the stale exhaust air to the fresh outdoor air without mixing the two air streams.
- The HRV can run at low speed for continuous fresh air ventilation, and will automatically switch to high speed to control excess humidity and other indoor air pollutants.

Features :

- **High Efficiency COROPLAST Core:** Provides one of the best transfer rates in the industry.
- **Easy to Clean:** Does not contribute to mold growth.
- **Integrated "WET" Terminals:** Facilitates remote furnace blower operation.
- **Easy Fan Motor Change Out:** Remove 3 screws and lift fan / motor deck completely out of unit.
- **Integral Balancing Dampers.**
- **State-of-the-art Damper Defrost System:** Eliminates core freeze-up.
- **Washable Air Filters on Incoming and Exhaust Air.**
- **High Efficiency PSC Motor:** Ensures years of low cost, maintenance free operation.
- **Low Voltage External Connections.**
- **Illuminated Power Switch.**
- **Pre-Painted Galvanized Steel Insulated Cabinet:** Provides structural integrity and quiet operation
- **Core and Filters are Easily Serviced.**
- **Options:** Remote dehumidistat, Remote Econo Airmonitor, remote 20 minute push button timer kit and remote 60 minute timer.
- **Warranty: Fifteen (15) Year Warranty on Heat Exchange Core and Full Two (2) Year Warranty on Electrical Components.**

Description:

The Proventer series central air exchangers are the solution to excess humidity and indoor air contamination in today's tightly built homes.

Specifications:

- **Model:** The Aprilaire® Model 8100 Energy Recovery Ventilator is an enthalpy (sensible and moisture transfer) type unit. The unique paper/aluminum EnergyMax® Transfer Core exchanges energy between the fresh air supply and exhaust air streams.
- **Unit Dimensions:** Overall Unit – 373/8" W x 123/4" D x 209/16" H EnergyMax® Transfer Core – 121/8" x 121/8" x 103/4".
- **Airflow Capacity:** 120 cfm @ 0.30 in. w.g. external ductwork resistance, i.e. 240 equivalent feet for each of the "fresh" and "stale" air streams.
- **Performance:** Apparent Sensible Effectiveness (ASE) – 77% at rated ventilation capacity with 72°F indoor temperature and 32°F outdoor temperature.
- **Home Size:** Up to 3600 sq. ft. home at rated air flow.
- **Power Requirements:** 120 VAC, 1.4 ampere maximum. Unit equipped with a 3 ft. grounded power cord.
- **Interior Insulation:** Entire interior surface is sealed with 1" single face insulation.
- **Filters:** (2) – 1013/16" x 115/16" x 3/32" EZ Kleen® air filters coated with Super Filter Coat adhesive for maximum performance.
- **Unit Weight and Packaging:** Total shipping weight with mounting hardware – 76 lbs.

Description:

The Aprilaire® Energy Recovery Ventilator is designed to remove indoor air pollution and provide a constant supply of fresh air to the home. The special EnergyMax® transfer core utilizes the indoor conditioned air to pre-heat or pre-cool the incoming fresh air depending on the season. During the winter season, the cross-flow design EnergyMax® transfer core allows the incoming fresh air to be preheated by the warm stale air being exhausted, thereby reducing the energy required by the heating system to warm the air to your desired temperature. This same process removes heat and moisture from the incoming air stream during the summer. This product provides a comfortable and healthy environment for an entire household year round, with only minimal maintenance requirements and trouble-free quiet operation. For optimum benefits, this product has been designed for continuous operation.

Features / Benefits:

- Installs as part of any central heating and cooling system
- Provides a constant, controlled supply of fresh air to your home year-round
- Reduces excess indoor humidity levels
- Reduces unhealthy indoor air pollutants such as formaldehyde, volatile organic compounds (VOCs), radon, carbon dioxide, smoke, odors, dust, bacteria and viruses and more
- Saves energy by effectively retaining and utilizing the energy value from your indoor air
- Ventilates homes up to **3,600 sq. ft. in size**
- **Recovers 77% of the apparent heating or cooling energy from the exhausted air**

ACE #	PK	UM	DESCRIPTION
156810	EA	6	8100 Aprilaire Air Exchanger

Specifications:

- **Application:** Fresh Air Ventilation System
- **Airflow Capacity:** (external static pressure) 50 to 160 cfm
- **Current Draw:** Nominal (minimum speed) 0.6 A
- **Electrical Ratings:** 24 Vac
- **Characteristics:** Includes W8150A Fresh Air Ventilation Control, EARD6 normally closed 6 inch damper, AT120B 120Vac/24Vac 20VA transformer, mounting hardware for control, homeowner information label
- **Tradeline Value:** Tradeline

Description:

The Y8150A1009 Fresh Air Ventilation System from Honeywell provides optimal ventilation for improved indoor air quality at an affordable price for the homeowner. A "set it and forget it" program calculates the amount of ventilation needed in a home based on the custom settings. The control operates a fresh air intake damper and, when necessary, activates the main HVAC blower to efficiently meet ASHRAE ventilation rates.

Features:

- Designed to help meet local ventilation codes and standards, including ASHRAE 62.2-2003 standard, Ventilation and Acceptable Indoor Air Quality in Low-Rise Residential Buildings
- Microcontroller optimizes the air delivery schedule to make efficient use of normal HVAC run times
- Easy-to-use input dials allow customized ventilation for each installation
- Test mode that includes immediate feedback to installer to confirm that air delivery requirements of selected ventilation standard are being met
- Economical supply-only ventilation; works with forced air system
- Can be used with other equipment, such as an HRV/ERV, for balanced ventilation

An Affordable, Innovative Solution!

Easily Installed —

To work with your existing heating and cooling fan system to deliver outside air to your home.

Quiet Operation —

Allows you to enjoy your home ventilation without noisy equipment running.

Low Maintenance —

Set-it-and-forget-it programming provides optimal ventilation without having to worry about settings.

Reasonable Price —

Provides an optimal and affordable ventilation solution.

5-Year Warranty

The American Lung Association and its Health House program do not endorse products.

**5-YEAR
WARRANTY**

- **Outdoor Sensor:** Yes, optional outdoor or indoor remote
- **Remote Sensor:** Yes, optional outdoor or indoor remote
- **Sensor Element:** Thermistor
- **Operating Humidity Range:** (% RH) 5 to 90% RH, non-condensing
- **Comments:** Includes Humidification Control with or without Frost Protection, Dehumidification using Whole House Dehumidifier or Air Conditioning with High or Low speed fan, Advanced Patented Ventilation Control and Advanced Dual Fuel Heat Pump Control. Used With THM5421C1008 Equipment Interface Module
- **Dehumidification Setting Range:** 40 to 80% RH.
- **Voltage:** 20 to 30 Vac or 750 mV

Description:

The VisionPRO® TH9421C1004 IAQ Total Home Comfort System features an effortless, 7-Day programmable touch screen thermostat that provides control of temperature, humidification, dehumidification, and ventilation. It also provides electronic control of a 24 Vac heating and cooling systems or 750 mV heating systems in addition to humidification, dehumidification and ventilation.

Features:

- Contains all features of standard VisionPRO®, except arm chair programming.
- Thermostat connects with Equipment Interface Module or EnviraZone panel to control temperature, humidification, dehumidification and ventilation from a single point in the home.
- Automatically raises humidity levels throughout all rooms in a home, moisturizing air to prevent symptoms of dryness and to protect hardwood flooring and woodwork.
- Automatically lowers humidity levels throughout all rooms in a home, utilizing air conditioning or a whole house dehumidifier to prevent dampness, stickiness or odors; symptoms often associated with air that is too moist.
- Removes air pollutants by exchanging the stale air in a house with fresh, filtered air better than having an open window.

Description:

The T8635L is a microelectronic communicating programmable thermostat that supports single-stage or multi-stage conventional and heat pump applications when used with the W8835 (3H/2C) or W8635A (up to 2H/2C conventional) or W8635B (up to 2H/1C heat pump) Equipment Interface Module (EIM).

Features:

- Adaptive Intelligent Recovery—Control for comfort and energy savings.
- Customize the program schedule—program your own schedule to fit your needs.
- Temporary schedule override—set the thermostat higher or lower for the current program schedule.
- Permanent schedule override—set the thermostat higher or lower indefinitely.
- Vacation mode—(1 to 255 days) for added comfort and energy savings. Set the temperature higher or lower for energy savings while on vacation. At the same time, set the comfort level you want when you return.
- Set the filter indicator—(0, 15, 30, 60, 90, or 120 days) to remind you to change the filter.
- Information at the press of a button—use the (information) key to see the outdoor temperature (C7089B Outdoor Temperature Sensor optional accessory), the current set-points, or the filter status.
- No batteries needed—your thermostat retains the schedule for the life of the product. You never have to reprogram the schedule even after a power outage. (You may need to reset the day and time after an extended power outage.)
- Daylight Time key—for quick time changes between Daylight and Standard time.
- Backlit display for improved readability—set the backlight feature for backlighting on demand (press any key to activate) or continual backlighting.
- Optional outdoor temperature display.

Description:

The W8703A1006 Damper Interface Module (DIM) controls up to three conventional zone dampers when used with T8635L Microelectronic Communicating Programmable Thermostats and the W8635 Equipment Interface Module. The W8703A1006 uses EnviraCom™, a lowcost wired communications protocol. Using the product with up to three T8635L Microelectronic Communicating Programmable Thermostats and a W8635A,B Equipment Interface Module enables the following features: Time synchronization and Shared filter indication.

ACE #	PK	UM	DESCRIPTION
154430	EA	4	W8703A1003 EnviraCom Zone Mod 3 Zone Damper Interface

Features:

- Check the temperature in a home remotely using the telephone
- Adjust the temperature settings remotely using the telephone
- Monitor the temperature in a home, and if the temperature gets too hot or too cold, the homeowner receives a telephone voice message
- Check the indoor and outdoor temperature and indoor humidity remotely using the telephone
- Receive a message remotely when the furnace filter needs replacing
- Receive notice when a detection is made from an optional auxiliary sensor
- Receive a message alert remotely if the power is interrupted for an extended period of time
- Name each zone from a prerecorded list

Description:

The W8735D1009 Telephone Access Module (TAM) is a multi-functional product. This means that it can be used in many different applications such as single- or multi-zone applications, conventional furnaces and heat pump equipment. The Telephone Access Module (TAM) is designed with dial-in and dial-out capability. It can be used to dial-in to a homeowner's number and have the TAM give voice messages concerning the status of a homeowner's system such as the indoor temperature setting, outdoor temperature, and indoor humidity level as well as alert messages. a homeowner can also change the thermostat setting (s) for heating and cooling by dialing in to their home number. The TAM can dial-out to multiple phone numbers to deliver system alerts such as a low battery, temperature above or below its configured limit, or a furnace air filter that needs to be replaced. The TAM can share a telephone line with most answering machines and voice mail systems. The TAM can be prompted to pick up a call to gain access to the HVAC system before the answering machine or voice mail are enabled. Additionally, the TAM is equipped with an emergency telephone line disconnect feature activated when another receiver in the premise is picked up while the TAM is connected. Full access to the TAM is given when the complete pass code is entered when prompted. Limited access is given (to contractors) when the last five digits of the entered Contractor telephone number is entered. Contractor access is limited to the W8735D1009 Alert History.

ACE #	PK	UM	DESCRIPTION

- **Operating Humidity Range:** (% RH) 5 to 90% RH, non-condensing
- **Temperature Range, Ambient:** (F) 40 F to 110 F
- **Temperature Range, Ambient:** (C) 4 C to 43 C
- **Comments:** Each thermostat is encoded with unique serial numbers.
- **Comments:** Required accessory (not included): W8665A or W8665E Receiver Module
- **Tradeline Value:** Tradeline
- **Voltage:** 18 to 30 Vac

Description:

The T8665A1002 Chronotherm® IV Wireless Thermostat provides wireless control of 24 Vac conventional gas, oil, or electric applications (1H/1C) when used with the W8665A Single Zone Receiver Module (RM). It supports single or multistage conventional gas, oil or electric applications and heat pumps with auxiliary heat (up to 3H/2C) for up to three zones when used with the W8665E and a Honeywell zone panel.

Features:

- No wires to thermostat allows easy installation.
- Ideal for retrofit zoning.
- Use when current thermostat inconveniently located or to add a thermostat to a room addition.
- Easy-to-read large display with bright back-lighting.
- Full seven-day flexible program capability; different schedules and temperature setpoints selectable each day.
- Copy key makes programming easier and faster.
- Daylight Savings Time (DST) key.
- Models available with programmable fan operation.
- Easy temporary temperature setpoint changes for current period, vacation hold (1 to 255 days) or indefinite hold.
- Frequently used keys are conveniently located near LCD.
- Configurable features allows one model to replace many different models.
 - F or C temperature display.
 - Automatic or manual changeover.
 - Electric or conventional heat fan operation.
 - Adjustable heating cycle rate.
- Minimum-off time for cooling compressors and heat pumps protects equipment.
- Easy installation, setup and system test.
- System test simplifies troubleshooting and saves time by overriding time delays.
- Adaptive Intelligent Recovery control brings room temperature to temperature setpoint at programmed time.
- Setpoints are permanently held in memory (no batteries used) and retained during power outages.
- Adjustable temperature range stops.

Zoning

***Effortless Zoning
From Room To Room
In The Home.***

Specifications:

- **Construction:** ABS plastic
- **Number of Zones:** 2 and 3 Zones, Single Stage Heating and Cooling
- **Dimensions:** 7-5/8" x 7-1/4" x 1-3/8"
- **Voltage:** 24 Volts AC, 50/60 Hz
- **Temperature Rating:** 0°F to 120°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Connection:** Screwless push-in terminal blocks

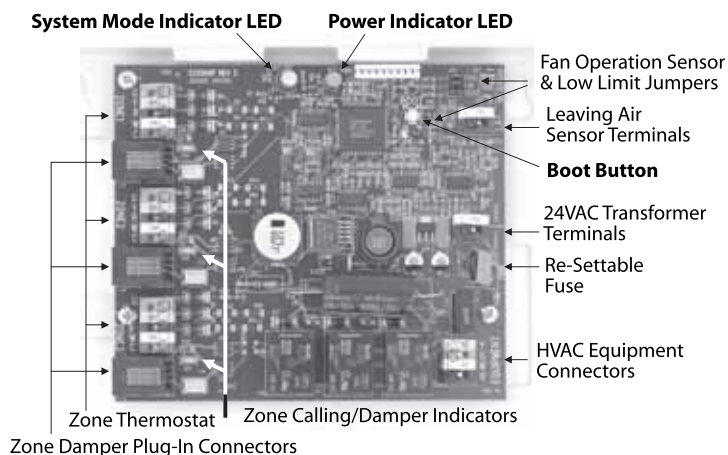

Features:

- **NEW Color Coded Push-In Wiring Blocks**
- Economy Two and Three Zone Control Panel
- Heating Only
- Cooling Only
- Single Stage Heating and Cooling
- Indicator LEDs for System Operation

Description:

The Mini MasterZone™ Zoning Panel is a 2 and 3 zone, single stage heating and cooling control panel. This electronic panel provides the simplest zoning functions and works with all standard heating and cooling thermostats. This panel has two models to control different damper motors. The MMZ3 controls 24VAC damper motors. The MMZK (System Kit) includes the ZPS and T24 Transformer. The NEW MMP3, controls the New Plug-in Zone Motors that use modular cords, supplied with each damper and the DC motors. This panel is used exclusively with the ZDSP, ZDBP, RDP and RRP dampers.

The MM panels are designed to use a minimum of wires to make zoning simple and affordable. Each zone uses a standard 4 wire (Y-G-R-W) thermostat. The panels also feature a separate C – Common terminal for 24 Volt powered thermostats. All terminal blocks are color coded for each wire and have push-in connections making wiring even simpler and no need for a small screwdriver, as with all other zoning panels. The state of the art surface mount technology for all electronic components makes for a highly reliable control panel.

MMP3

MMZ3 / MMZK

Specifications:

- **Construction:** ABS plastic
- **Dimensions:** 7-5/8" x 7-1/4" x 1-3/8"
- **Voltage:** 24 Volts AC, 50/60 Hz
- **Temperature Rating:** 0°F to 120°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Connection:** Screwless Push-in terminal blocks

Features:

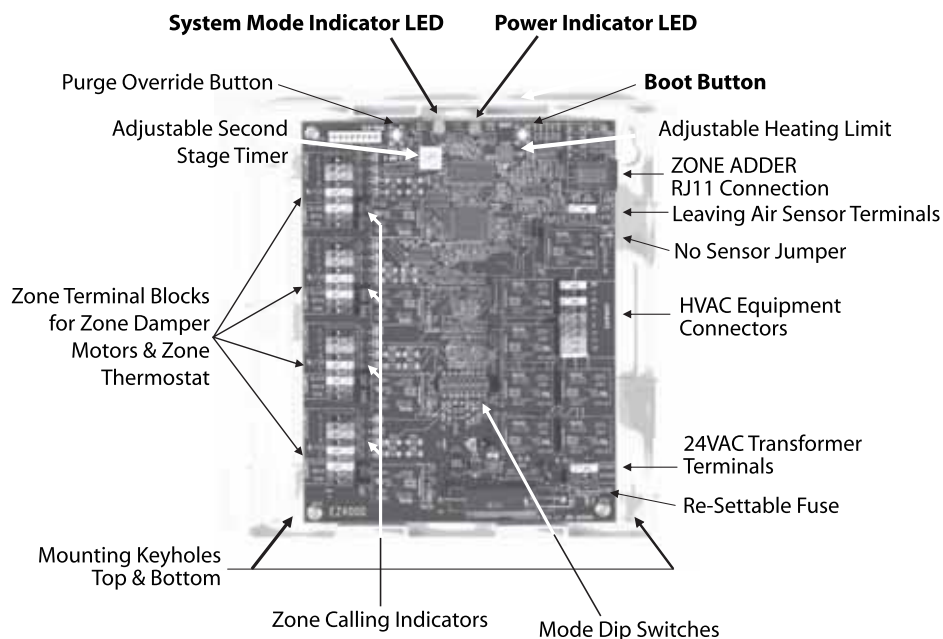

- **NEW Color Coded Push-In Wiring Blocks**
- Uses Any Four Wire Thermostat
- Single Stage, Two-Stage and Heat Pump Compatible
- Four Zones
- Expandable to any number of Zones
- Leaving Air Sensor for Capacity Protection
- Staging by Time or by Number of Zones Calling
- Intelligent Changeover Timing

Description:

The MasterZone™ Zoning System (MZS) Panel is a 2, 3 or 4 zone control panel that is capable of controlling single stage, two stage and heat pump systems. This multi-function board uses any 4-wire thermostat. Two stage and heat pump thermostats are NOT required, however Heat Pump thermostats can be used to remotely control the Emergency Heat.

The MZS panel is the most cost effective and versatile zone controller on the market today. Using surface mount technology, its compact size is full of features not found in any other zone control panel.

The MZS provides the basic function of zoning by being the central control panel that all zone thermostats, zone damper motors and HVAC Equipment wire into. A separate 24 Volt, 40VA Transformer powers the panel and a separate remote Leaving Air Sensor is wired to the panel to provide protection and capacity control of the HVAC Equipment.

ACE #	PK	UM	DESCRIPTION	
174006	EA	1	MZS4 MasterZone™ 4-Zone Panel	
174008	EA	1	MZSK MasterZone™ System Kit	Includes MZS4, ZPS and T24 Transformer
174014	EA	1	MZP4 ZoneFirst P-I-P Panel	4-Zone For DC Damper Systems
174015	EA	1	MZPK ZoneFirst P-I-P 4-Zone Kit	Includes ZPS and T24 Transformer

Specifications:

- **Construction:** ABS plastic
- **Number of Zones:** 2 Expansion
- **Dimensions:** 7-5/8" x 7-1/4" x 1-3/8"
- **Voltage:** 24 Volts AC, 50/60 Hz
- **Temperature Rating:** 0°F to 120°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Connection:** Screwless push-in terminal blocks

Features:

- Two Zone Expansion Panel
- Modular Jacks for Easy Add-On Connection
- Screwless Terminal Blocks
- Individual Zone Indicating Lights
- Indicator LEDs for System Operation

Description:

The MasterZone™ Zone Adder (MZA2) Panel is a 2 zone expansion panel used to add zones onto an MZS4 Zone Control Panel. The MZA requires its own separate 24 Volt AC transformer. The panel also includes a modular jack cord which connects the MZA with the main MZS panel. The MZA is NOT a stand alone zoning panel and is used only as an expansion panel for one or two additional zones when using the MZS4 as the main zoning panel.

The MZA2 operates and wires similarly to the MZS4 except for the HVAC Equipment connections and Leaving Air Sensor.

When either zone thermostat calls, for either Cooling or Heating, the MZA2 panel will take the call and look at the MZS4 status. If there are no other calls, it will open the damper to that zone, if not already open, close the dampers to the zones that are not calling for the same mode and activate the appropriate heating or cooling on the HVAC Unit. If other zones call for the same mode, the MZS panel will allow these calls and open these zone dampers until all zones are satisfied, unless there are calls from other zones for the opposite mode.

ACE #	PK	UM	DESCRIPTION

Round Dampers

- **Construction:** 22 Gauge Galvanized Steel
- **Dimensions:** 5", 6", 7", 8", 9", 10", 12", 14", 16", 18", 20" Diameters.
- **Temperature Rating:** 0°F to 180°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Static Pressure:** Maximum 0.5" W.C.

Square and Rectangular

- **Construction:** 22 Gauge Zinc Plated Steel Steel
- **Dimensions:** 12"x8", 12"x10", 12"x12", 20"x8", 20"x10", 20"x12"
- **Temperature Rating:** 0°F to 180°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Static Pressure:** Maximum 0.5" W.C.

Description:

The Static Pressure Regulating Dampers, Model SPRD, are barometric relief dampers used to by-pass excess air pressure on zoned systems. The SPRDs automatically respond to the air pressure in duct as the various zone dampers open and close. As zone dampers close off air to a number of zones, the supply air pressure in the duct system will increase. This increase in air pressure can increase the noise level and reduce the flow of conditioned air through the HVAC Unit. Using the SPRD solves this by automatically compensating for the excess air pressure by opening on the increased pressure and relieving the excess air. The SPRD helps maintain a constant air pressure in the duct system. This reduces noise that is caused by high air pressures and velocities, as well as maintains a constant volume of air (CFM) through the duct system. Maintaining a constant volume of air through the HVAC System keeps the efficiency of the system at its maximum.

164801	EA	1	BPD/SPRD 10" RD T-A-T Static	Pressure Reg Damper

Specifications:

- **Construction:** 22 Ga. Galvanized Steel
- **Linkage:** Direct Drive
- **Sizes:** 5", 6", 7", 8", 9", 10", 12", 14", 16", 18"
- **Motor Voltage:** 24 Volts AC, 50/60 Hz, 6.5 Watts, 7VA
- **Torque:** 35in-oz to 55in-oz
- **Temperature Rating:** 0°F to 120°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Damper Timing:** Nominal 30 Sec. Powered, 8 Sec. Spring Return
- **Connection:** 4" Wire Leads
- **Duct Pressure:** Maximum 1.0" W.C.

Description:

The RDS series are galvanized steel, single blade dampers complete with a 24 Volt, spring return motor actuator. These dampers are shipped complete and ready for installation. The RDS can be installed in any position in any properly sized duct. All RDS dampers are rated for duct systems less than 1.0" W.C.

All RDS dampers are typically shipped as Normally Open dampers that are powered closed and spring returned opened. The RDS is also unique in that it can be field converted from powered closed to powered open in less than a couple of minutes.

A 24 Volt AC, 50/60 Hz, spring return damper motor, powers the RDS. The motor powers the damper closed and spring returns the damper open for fail-safe operation. Providing power to the damper drives the damper closed. Removing power from the motor allows the motor to spring back to the open position.

The 24 Volt, hysteresis, synchronous motor has been tested to over 250,000 cycles to provide long life. Even replacing the motor is a simple less than one (1) minute change by loosening the setscrew holding the motor onto the damper.

The RDS motor also has a simple adjustment for setting the damper to a minimum position. A minimum position allows for excess by-pass air. To set a minimum position, loosen the setscrew, align the setscrew to the minimum position label and re-tighten.

Dimensional Drawing

Description:

The NEW Retro-Round Insertable Damper makes it easy to install these dampers into any rigid metal duct work. Just slit a 1" wide opening in the center of the round duct, slide in the RRP and secure with the screws provided. The Retro-Round is available with two different motors. The RRP uses a DC motor and wires using modular plug-in cords. The RRM is a 24VAC version using standard thermostat wire. Both motors have position indicating LEDs.

Model RRP - RetroRound Plug-In Damper uses a low current DC motor and wires using a 25' modular cord, included with each damper as well as a splitter to connect additional RRP dampers to the same zone. The RRP must be controlled by the MMP3, H3P or MZP4 Panels. Up to 10 dampers can be used per zone.

ACE #	PK	UM	DESCRIPTION	
174012	EA	1	RRP06 (6") Retro-Round Z-A-T	Insertable Damper DC Motor

Specifications:

- **Construction:** Aluminum Mill Finish, Mitre Angles
- **Linkage:** Zinc plated linkage arms, Delran bushings
- **Dimensions:** 8"x8" to 36"x24" in 2" increments, 1/8" undersized.
- **Motor Voltage:** 24 Volts AC, 50/60 Hz, 6.5 Watts, 7VA
- **Torque:** 35 in-oz to 55 in-oz
- **Temperature Rating:** 0°F to 120°F Operating, -20°F to 140°F Storage
- **Humidity:** 5% to 95% Non-Condensing
- **Damper Timing:** Nominal 30 Sec. Powered, 8 Sec. Spring Return
- **Connection:** 4" Wire Leads
- **Duct Pressure:** Maximum 1"W.C.

Description:

The ZD series are extruded aluminum parallel blade dampers complete with a 24 Volt, spring return motor actuator. These dampers are shipped complete and ready for installation. The lightweight ZD can be installed in any position in any properly sized duct. All ZD dampers are rated for duct systems less than 1.0" W.C.

All ZD dampers are typically shipped as Normally Open dampers that are powered closed and spring returned opened.

A 24 Volt AC, 50/60 Hz, spring return damper motor, powers the ZD. The motor powers the damper closed and spring returns the damper open for fail-safe operation. Providing power to the damper drives the damper closed. Removing power from the motor allows the motor to spring back to the open position. The 24 Volt, hysteresis, synchronous motor has been tested to over 250,000 cycles to provide long life. Even replacing the motor is a simple less than one (1) minute change by loosening the setscrew holding the motor onto the damper.

The ZD motor also has a simple adjustment for setting the damper to a minimum position. A minimum position allows for excess by-pass air. To set a minimum position, loosen the setscrew, align the setscrew to the minimum position label and re-tighten.

Specifications:

- **Application:** Zoning
- **Network Zoning:** Yes
- **Heat Pump Compatible:** Yes
- **Input Ratings:** Voltage: 20-30 Vac, 50/60 Hz. Power: 11 VA nominal.
- **Output Ratings:** 1.5A run, 200,000 cycles (30 Vac) 3.5A inrush. 1.5A run, 100,000 cycles (30 Vac) 7.5A inrush.
- **Humidity Ratings:** 90 percent RH at 95°F, non-condensing.
- **Temperature Ratings:** Shipping: -20 to 120°F. Operating: -40 to 150°F.
- **LED System:** SYSTEM mode LEDs (5) used to communicate equipment status: Red Heat: Heat mode. Green Cool: Cool mode. Yellow Purge: Purge mode. Green Fan: Fan mode. Red Em Heat: Emergency Heat mode. ZONE LEDs (3) used to communicate damper status: Green: Dampers are open or opening. No Color: Dampers are closed or closing. COM LED (1) used to indicate communication status: Green: Panel is transmitting or has received data. No color: Communications are idle.
- **Dimensions:** 12-3/4 in. W x 10-3/4 in. H x 1-7/8 in.
- **Finish:** W8835: Taupe cover, olive-gray base.
- **Mounting:** Mounts with four screws (provided) through holes in cabinet back (wall anchors provided). Wiring: Eighteen-gauge wire for all equipment and system connections.
- **Wiring Connections:** EnviraCom™: Four terminal strips (each with three terminals labeled 1, 2, 3). Dampers: Three terminal strips labeled M6 (Closed), M4 (Open), M1 (Common). Transformer 1: R (hot), C (Common). Transformer 2: T1 (hot), T2 (Common). Equipment: Rc, Rh, W1/E, W2, W3/Aux, Y1, Y2, G, O/B. Humidifier: HUM, HUM. Dehumidifier: DHUM, DHUM. Ventilator: VENT, VENT. Heat Pump Fault Indicator: L, C.

Description:

The W8835A1004 EnviraZone Panel controls single-stage, multistage, conventional or heat pump heat/cool equipment. It controls three zones, and is expandable up to nine zones with two additional W8703A Damper Interface Modules (DIM). This utilizes an advanced zoning control system using the EnviraCom™ communications protocol, the most advanced and easiest to install zoning system in the industry. New control algorithm reduces and regulates plant cycles, decreases damper cycles, and increases efficiency.

Specifications Continued:

- **Thermostats:** VisionPRO® IAQ TH9421 Thermostat controls single- or multi-stage conventional and heat pump equipment.
- **Stages:** 3 Heat/2 Cool
- **Auto Changeover:** Yes
- **Compatible with Supply Air Sensor:** Yes
- **Resettable Fuse:** Yes
- **Individual Zone Fan Control:** Yes
- **Accessories:** For required accessories, Optional accessories include the W8735 Telephone Access Module for telephone dial-in and dial-out capability, W8703 Damper Interface Module to control additional zones, and the W8735A Serial Adapter Module for computer interface.
- **Tradeline Value:** Tradeline

ACE #	PK	UM	DESCRIPTION	
154432	EA	1	W8835A1004 EnviraZone System	3H/2C

Features:

- Creates a networked zoning system when combined with three T8635L Microelectronic Communicable Programmable Thermostats.
- Expandable to nine zones with additional W8703 Damper Interface Modules and Thermostats.
- Compatible with conventional gas, oil, electric or heat pump systems up to 3H/2C.
- Unsurpassed ease-of-wiring with only three wires to connect between devices.
- True communicating system using standard thermostat wire.
- Networked zoning enables these features: Time synchronization.
- Shared-filter indication. Outdoor temperature display in all zones with only one C7089B Outdoor Temperature Sensor connected.
- Vacation Hold in all zones.
- Selectable high and low equipment protection settings.
- Adjustable stage timing.
- Adjustable purge timing and damper positions.
- Expandable up to nine zones with W8703 Damper Interface Module.
- Single network can use up to nine T8635L Thermostats and two W8703 Damper Interface Modules to control nine zones.
- Telephone access when used with optional W8735B Telephone Access Modules.
- Uses Zone of Greatest Demand Intelligence.
- Allows use of EnviraCom™ furnace board or traditional furnace boards.
- Optional use of two transformers for power when many dampers are needed.

Specifications:

- **Application:** Zoning
- **Network Zoning:** Yes
- **Zone Availability:** Available for two or three zones
- **Number of Zones:**
 - **(Y8835A1044):** 2-Zone Kit with 2 VisionPRO IAQ

Description:

The TrueZONE™ HZ311 Panel is used for conventional, single stage applications up to 3 zones (1H/1C). It helps eliminate callbacks by ensuring that a system is operating properly before leaving a jobsite. It all adds up to true comfort for customers and true profit to the bottom line.

Features:

- For conventional, single stage applications up to 3 zones (1H/1C).
- Universal Application
- Robust Push Terminals
- Common-Sense LEDs
- Clean, Professional Installation
- Smaller Footprint
- Variable-Speed Fan Control
- HZ311K System Saver Kit is the one-box solution kit that contains the HZ311 Panel, C7735A Discharge Air Temperature Sensor, and AT140 Transformer.

Description:

The EMM-3 Electronic MiniZone™ Panel controls single-stage heating and cooling equipment and is used on two-and three-zone applications. The EMM-3K includes the C7735A Discharge Air Temperature Sensor and an AT140A Transformer.

Features:

- Uses any Honeywell four-wire thermostat.
- Optional C7735 (EMM-3K) Discharge Air Temperature Sensor
- Sensor for capacity control.
- SYSTEM and ZONE damper status LEDs indicate system status.
- Automatic zone changeover with 20-minute changeover timer.
- Individual zone fan control.
- Thermal circuit breaker protects panel and transformer from damage if miswired.
- Purge timer protects equipment between calls for heating and cooling.
- Uses spring-open/power-closed, spring-closed power- open, and power-open/power-closed dampers.
- Interfaces with single or dual transformer equipment.

Description:

The TZ-4 TotalZone® Zone Control Panel controls single-stage, multi-stage, conventional or heat pump heat/cool equipment. It controls 2, 3 or 4 zones, and is expandable up to 32 zones with optional TotalZone® Add-A-Zone® Four Zone Control Panel.

Features:

- Patented dual-fuel logic for add-on heat pump applications.
- Compatible with multi-stage and heat pump thermostats.
- Expandable using TotalZone® Add-A-Zone® Panels. Controls up to 28 zones.
- Uses any Honeywell four-wire thermostat to control any equipment including VisionPRO or FocusPRO.
- Controls additional stages of heating and cooling based on: Time, adjustable from 5 to 60 minutes, or percent of zones calling.
- Multi-stage or heat pump thermostats.
- Built-in Emergency Heat switch eliminates need for expensive heat pump thermostat on each zone. Zone-A-Lone® allows zone 1 thermostat to set back all zones during unoccupied periods.
- When opposite calls exist, TZ panel services mode calling first and either satisfies call within 20 minutes or drops it and switches over to opposite mode to satisfy that demand. When all calls are satisfied, TZ panel allows fan operation from any zone through Fan switch on each thermostat.
- Setting Fan switch to On from any thermostat turns on fan and closes damper to zones with Fan switches set to Auto.
- Additional features:
- Resettable circuit breaker protects panel.
- Visible LED indicators communicate operation.
- Adjustable stage control timer.
- Adjustable heating and cooling temperature limits for optional C7735A1000 Discharge Air Temperature Sensor (included).
- Adjustable purge timings. Option two transformers for power when many dampers are needed.
- Direct replacement for TZ-3.

Description:

The TAZ-4 is a zone panel used to add zones to the TZ-4. The TZ-4 provides up to four zones. Each TAZ-4 can add up to four additional zones for a total of 32 zones. The TAZ-4 is also compatible with the TZ-3 zone control panel and with the TAZ-1, TAZ-2 and TAZ-3 Add-A-Zone® panels.

Features:

- Used with TZ-4 Control Panel to expand number of zones.
- Uses multiple TAZ-4 Control Panels to control up to 32 zones.
